

UTS:HANDBOOK

2013

DISCLAIMER

This publication contains information which is current at 26 September 2012. Changes in circumstances after this date may impact upon the accuracy or currency of the information. The University takes all due care to ensure that the information contained here is accurate, but reserves the right to vary any information described in this publication without notice. More up-to-date information is published at:

www.handbook.uts.edu.au

Readers are responsible for verifying information which pertains to them by contacting a UTS Student Centre.

EQUAL OPPORTUNITY

It is the policy of UTS to provide equal opportunity for all persons and to prevent discrimination and harassment on the basis of race, colour, descent, national or ethnic origin, ethno-religious background, sex, marital status, pregnancy, potential pregnancy, family responsibilities, disability (physical, intellectual, psychiatric, sensory, neurological, or learning disabilities, and illnesses such as HIV/AIDS), age, homosexuality, transgender status, political conviction, and religious belief.

The Equal Opportunity and Diversity policy describes responsibilities for all members of the UTS community and sets out consequences of any breach of the policy:

www.gsu.uts.edu.au/policies/equalopportunity.html

FREE SPEECH

UTS supports the right to freedom of speech and the rights of its members to contribute to the diversity of views presented in our society.

The policy on the Expression and Practice of Religious, Political and Other Values, Beliefs and Ideas at UTS defines the rights and responsibilities of members of the UTS community in relation to the provisions and parameters that support freedom of speech: www.gsu.uts.edu.au/policies/expressionpracticepolicy.html

NON-DISCRIMINATORY LANGUAGE

UTS has adopted the use of non-discriminatory language as a key strategy in providing equal opportunity for all staff and students. Guidelines for the use of non-discriminatory language have been developed and all members of the University community are encouraged to use them.

HOW TO USE THIS HANDBOOK

The *UTS: Handbook 2013* provides comprehensive information on approved courses and subjects to be offered in 2013. The handbook covers course content and structure, subject and elective choices, attendance patterns, and credit point requirements, as well as important course area information for current and prospective students, and general information on student services and facilities.

The handbook is divided into the following main sections:

- · List of courses by course area
- List of courses by faculty
- General information
 - Studying at UTS
 - Understanding courses and subjects
 - Scholarships, assistance and fees
 - Services and facilities
 - Principal dates
 - Academic year dates
- Course area information
 - UTS: Business
 - UTS: Communication
 - UTS: Design, Architecture and Building
 - UTS: Education
 - UTS: Engineering
 - UTS: Health
 - UTS: Information Technology
 - UTS: International Studies
 - UTS: Law
 - UTS: Pharmacy
 - UTS: Science
- Courses
 - Undergraduate
 - Postgraduate coursework
 - Postgraduate research
- Study package directory
 - Choice blocks
 - Majors
 - Sub-majors
 - Streams
- Subjects
- Alphabetical lists
 - Subjects
 - Majors
 - Sub-majors

Finding information

General

The general information section has University-wide information for all students on matters such as application and admission, enrolment, fees, financial assistance (including scholarships and prizes), health services, semester start and end dates, study plans, understanding study plans, study packages, location of UTS Student Centres, the library, child care, Students' Association, etc. (see pages 20–48).

Course areas

The course areas section contains information for undergraduate and postgraduate students on each of the University's 11 course areas, including contacts and inquiries, student facilities, centres and associations, etc. (see pages 49–107).

Courses

Information on specific courses can be found in the following ways.

- If you know the course code, go to Contents: courses are divided into Undergraduate, Postgraduate coursework, and Postgraduate research, with courses listed numerically by course code (see pages 4–9).
- If you know the course code, you can also go directly to its course entry. Courses appear numerically by course code within their level section (i.e. Undergraduate courses, Postgraduate coursework courses, Postgraduate research courses) (see pages 108–497).
- If you know the course area you wish to study in, go to List of courses by course area: courses are grouped under their course area and divided into Undergraduate, Postgraduate coursework, and Postgraduate research, with courses listed numerically by course code (see pages 10–14).
- If you know the faculty offering the course, go to List of courses by faculty: courses are grouped under their faculty and divided into Undergraduate, Postgraduate coursework, and Postgraduate research, with courses listed numerically by course code (see pages 15–19).
- If you know the name of the course, go to Index: courses are listed alphabetically by course name (see pages 1064–1069).

Subjects

Information on specific subjects can be found in the following ways.

- If you know the subject code, go to Subjects: subjects appear numerically by subject code (see pages 680–1039).
- If you know the name of the subject, go to Alphabetical list of subjects: subjects are listed alphabetically by subject name (see pages 1040–1058).

Majors, sub-majors, choice blocks or streams

Information on the make up of specific study packages (i.e. the subjects in specific majors, sub-majors, choice blocks and streams) can be found in the following ways.

- If you know the code, go to Study package directory: study packages appear alpha-numerically by code (see pages 498–679).
- If you know the name of the major, go to Alphabetical list of majors: majors are listed alphabetically by major name (see pages 1059–1060).
- If you know the name of the sub-major, go to Alphabetical list of sub-majors: sub-majors are listed alphabetically by sub-major name (see pages 1061–1062).

CONTENTS

Note: Courses in the handbook appear in numerical order and are listed as such in the contents pages. For the list of courses by course area, see page 10. For the list of courses by faculty, see page 15. An alphabetical listing of all courses appears in the index, see page 1064.

STUDYING AT UTS

INTRODUCTION TO UTS

The University of Technology, Sydney is a multi-campus university spread over two locations in the Sydney metropolitan area. With a total enrolment of approximately 30,000 students, UTS is one of the largest universities in Australia.

UTS was originally established as the New South Wales Institute of Technology in 1965. In 1988 it attained university status and was joined by the School of Design of the Sydney College of the Arts. The University resulted from amalgamations brought about by the restructuring of the higher education sector in the late 1980s, and in January 1990 the Kuring-gai College of Advanced Education, the Institute of Technical and Adult Teacher Education of the Sydney College of Advanced Education and the 'old' UTS formed the new University of Technology, Sydney.

UTS places a strong emphasis on workplace experience and develops and regularly revises its programs of study in partnership with industry, government and professional bodies. It has one of the highest rates of employment for graduates in New South Wales.

The University is fully committed to internationalisation in all aspects of its operations and encourages students to gain international exposure and experience as part of their degree. Many of UTS's students undertake some study overseas as part of their degree program.

The University's curriculum and ways of teaching and learning equip UTS graduates for international careers and prepare them to live and work in a world of social and cultural diversity.

FACULTIES

In 2013 UTS offers undergraduate and postgraduate coursework and research degrees through the following eight faculties and schools:

- Arts and Social Sciences
- Business School
- Design, Architecture and Building
- Engineering and Information Technology
- Graduate School of Health
- Health
- Law
- Science.

Each of the faculties and schools is responsible for programs across a number of key disciplines, and all faculties offer courses in conjunction with other faculties.

Course areas

Courses at UTS are offered in the following 11 course areas:

- UTS: Business (see page 49)
- UTS: Communication (see page 53)
- UTS: Design, Architecture and Building (see page 57)
- UTS: Education (see page 60)
- UTS: Engineering (see page 62)
- UTS: Health (see page 72)
- UTS: Information Technology (see page 81)
- UTS: International Studies (see page 87)
- UTS: Law (see page 93)
- UTS: Pharmacy (see page 101)
- UTS: Science (see page 102).

FINDING YOUR WAY AROUND

UTS uses a four-character code to identify its campuses and buildings. This building identification system comprises two letters describing a geographic location (the campus) and two numerals indicating a building number. The floor number and room number may follow.

For example, City campus, Broadway, Building 1, level 26, room 30 is identified as CB01.26.30.

The geographic location codes are:

CB - City campus, Broadway

CC - City campus, Blackfriars, Chippendale

CM - City campus, Haymarket

CQ - City campus, 10 Quay Street, Haymarket

KG – Kuring-gai campus

UTS campus maps are available at:

www.uts.edu.au/about/mapsdirections

STUDENT INQUIRIES

UTS Student Centres

UTS Student Centre staff provide general student administration information and advice, as well as course area specific administration services for UTS students and staff. Services provided by the UTS Student Centres include:

- subject and course information
- enrolment inquiries
- study plan inquiries
- class allocation inquiries
- credit recognition and subject substitution applications
- e-requests and Ask UTS inquiries
- leave of absence and concurrent study applications
- exam-related and academic progress applications
- · progression and academic caution matters
- · graduation list preparation.

Postgraduate research

The UTS: Graduate Research School promotes innovation and excellence in research education and researcher development across the University. The school provides a range of services to support and develop research students, supervisors and early career researchers including research education programs, policy development, advice and guidance, and scholarships.

UTS: Graduate Research School CB01.7 – Building 1, level 7 15 Broadway, Ultimo telephone +61 2 9514 1336 email ugs@uts.edu.au www.gradschool.uts.edu.au

UTS COMMUNICATION WITH STUDENTS

My Student Admin

All enrolled students have access to My Student Admin which enables them to update their address, contact details and current enrolment details; print copies of their fees invoice; and access results, class timetables, exam timetables and graduation information. Students must maintain their current address and contact telephone details in My Student Admin.

https://onestopadmin.uts.edu.au

Academic transcripts, statements of course completion and statements of enrolment can be requested at:

www.sau.uts.edu.au/forms

UTS email

It is essential that all students activate their UTS email accounts and check for official University information on a regular basis. Important messages may also be sent by SMS.

All enrolled students are issued with a UTS email account that is used as the primary form of official communication from the University.

Further information and advice on account activation is available at: www.sau.uts.edu.au/managing/webmail.html

The Student Administration Unit contacts students regularly via UTS webmail about course administration matters and via broadcast emails to keep students up to date and informed about what's happening at UTS.

Students are expected to check their official UTS email account at least twice a week.

Due to privacy requirements, the Student Administration Unit is unable to answer specific student inquiries via email without verifying the students identity first. In order to verify a students identity and then provide relevant information, student's are required to enter inquiries via the My Student Portal inquiry system at:

https://mystudent.uts.edu.au

The UTS email policy and guidelines that outline appropriate use and access of UTS email accounts are available at: www.gsu.uts.edu.au/policies/emailpolicy.html

Ask UTS and UTS Service Desk

Ask UTS and the UTS Service Desk are the help desks for the University.

- Ask UTS is the first point of contact for lodging written inquiries in relation to student administration (www.ask.uts.edu.au).
- UTS Service Desk is the first point of contact for lodging written inquiries in relation to IT support (https://servicedesk.uts.edu.au).

Other sources of information

- UTS Facebook: www.facebook.com/UTSEngage
- SAU online via twitter: Follow @UTSStudentInfo on Twitter for UTS Student Admin news and reminders about important dates
- UTS: Noticeboard: Official notices of the University including rule changes, elections, minutes of UTS Council, minutes of the UTS Academic Board, etc., are available from the UTS: Noticeboard at: www.uts.edu.au/oth/noticeboard

STUDENT IDENTITY CARDS

All enrolled students must have a UTS student identity (ID) card. Students are issued with an ID card as part of the enrolment process. This card is only valid while enrolled at UTS. The ID card must be carried at all times while on University premises and may be required to be produced on demand by an employee of the University. A travel concession logo is printed or attached to the card for eligible students.

The student ID card must be presented when borrowing books from the University library, when accessing the computer labs and when sitting examinations or class tests. It is also used to pay library fines and other services and fees. If the card is lost, a fee may be levied for its replacement.

Further information about ID cards and travel concessions is available at:

www.sau.uts.edu.au/student/id

APPLICATION AND ADMISSION

The UTS Admissions Policy is available at: www.gsu.uts.edu.au/policies/admissionspolicy.html
Section 5 of the Student and Related Rules outlines admission requirements.

Domestic students

www.gsu.uts.edu.au/rules/5-index.html

UAC applications

Applications from Australian citizens, New Zealand citizens and permanent visa holders for most undergraduate courses and postgraduate coursework courses are made through the Universities Admissions Centre (UAC) except applications for postgraduate coursework programs in business which are made online through the UTS Business School:

www.business.uts.edu.au/pg/apply
Application details are available from the UAC at:

Application details are available from the UAC a www.uac.edu.au

Details on courses offered by UTS are available in this handbook.

For undergraduate courses starting at the beginning of the year, students are required to lodge a UAC online application between August and December of the previous year. For postgraduate courses, applications are lodged between September and January. Applications for mid-year admissions open in early April of that year. Some courses have earlier closing dates and students should check with the UAC for details on those.

UAC codes differ for postgraduate courses depending on the semester of intake. The most up-to-date code is available from the UAC.

Direct applications

Application information for UTS Business School postgraduate courses, where applications are accepted directly by UTS, is available at:

www.business.uts.edu.au/pg

Information about and application forms for admission to higher degree research programs are available from the UTS: Graduate Research School at:

www.gradschool.uts.edu.au

International students

International student applications for undergraduate and postgraduate courses can be made directly to UTS International or through one of the University's registered agents. For courses starting at the beginning of the year, applications should be received by 30 September for postgraduate research courses and 15 December of the previous year for coursework studies. For courses starting in the middle of the year, applications should be received by 30 March of that year for postgraduate research courses and 15 June of that year for coursework studies. Information about courses and application procedures is available at:

www.uts.edu.au/international

International students undertaking an Australian HSC prior to the year of commencement of university studies must apply through the Universities Admissions Centre (UAC):

www.uac.edu.au/international

Non-award and cross-institutional study

Students who want to enrol in subjects at UTS, but not as part of a UTS degree or qualification, must apply for non-award or cross-institutional study. There are three application periods and closing dates vary for each teaching period. Further information is available from the UTS Student Centres and at:

www.uts.edu.au/study/nonaward.html

Students who are temporary residents or hold student visas should contact UTS International for advice on their eligibility.

www.uts.edu.au/international

English proficiency

An application for admission is not considered until proficiency in English has been demonstrated. Details of the language standards required for admission to UTS are available at:

www.uts.edu.au/international/prospective/studying/require/english.html

If suitable evidence of English proficiency is not forwarded with the application for admission, students are requested to complete an English proficiency test. UTS uses the International English Language Testing System (IELTS). The IELTS test is available in Australia in all capital cities and many regional centres.

Further information is available from the UTS IELTS Centre at:

City campus, Broadway

CB02.5.30M - Building 2, level 5, room 30M

15 Broadway, Ultimo

telephone +61 2 9514 1536 (leave a message if necessary)

fax +61 2 9514 1824

email ielts@uts.edu.au

www.uts.edu.au/international/ielts

CRICOS provider code 00099F

ENROLMENT

Following admission, students are required to identify the set of subjects from their study plan (see page 28) that will constitute their enrolment each year. They must also select a teaching period and a location from those that are on offer for each subject.

Correct enrolment in subjects is the responsibility of the student. For subjects being studied in Australia, enrolment is undertaken using My Student Admin (see page 21). Enrolling into subjects for credit conducted outside the University is a paper-based process. For further information see:

- Concurrent study: www.sau.uts.edu.au/enrolment/concurrent
- International exchange: www.ssu.uts.edu.au/globalexchange

In addition to formally enrolling in each subject, it is necessary to register in activities (e.g. classes, lectures, tutorials, seminars). Where more than one option is on offer for a particular activity, preferences may be collected from students before the final class allocation is made.

See the timetable at:

http://timetable.uts.edu.au

Continuing students are required to enrol in at least one subject for the coming year during the published re-enrolment period from late October to early January otherwise a late enrolment fee of \$250 will apply. Further information is available at:

www.sau.uts.edu.au/enrolment/continuing.html

Additions and deletions can be made to an enrolment using My Student Admin within a tightly defined time period limited by the last day to add a subject and the last day to withdraw from a subject, which is the teaching period census date (see page 22) (see also principal dates) (see page 40).

Failure to notify the University of withdrawal from a subject before the teaching period census date in a program can result in subject failure and incurs financial liability.

Students should be aware that it is their responsibility to regularly check My Student Admin to ensure that:

- their personal details, postal address and contact telephone numbers are correct, and the University is informed of any changes as they occur
- their enrolment details are correct
- they are registered into activities (classes, etc.)
- their subject enrolment is consistent with the completion rules of the course.

Enrolment information is available at:

www.sau.uts.edu.au/enrolment

Information on leave of absence, withdrawal from a subject or entire course, and key dates, is available from the Student Administration Unit at:

www.sau.uts.edu.au

CENSUS DATES

The University is required to set a census date for each subject it offers. The census date is:

- the date students becomes financially liable for any subjects in which they are enrolled
- the final day students can withdraw from a subject without financial liability and academic penalty
- the date students incur a HELP debt for any units for which they have taken out a HELP loan
- the final day Commonwealth-supported students and students requesting Commonwealth assistance can submit appropriate Commonwealth assistance forms and provide their tax file number if they wish to defer their tuition fees
- the final day the University is allowed to accept upfront payments of Commonwealth-supported places student contributions (earlier deadlines for payment may apply).

Further information is available from the Student Administration Unit: www.sau.uts.edu.au/dates/census

Census dates for research degree students are later in the year for Autumn and Spring semesters due to the flexible start dates for research students. Full financial and load liability applies after the census dates. Further information is available from the UTS: Graduate Research School:

www.gradschool.uts.edu.au

ACADEMIC PROGRESSION

All students are expected to meet minimum academic progression requirements. Students must pass 50 per cent of the credit points in which they are enrolled each half year. If this requirement is not met, students are placed on academic caution. During a period of academic caution, usually one half year, a student must consult with the designated academic course advisers from the relevant faculty for advice on their study plan; attend a study skills workshop program organised by the Student Services Unit; and enrol in no more than 24 credit points for the half year of study to which the period of academic caution applies.

Further information about academic caution is available at:

www.sau.uts.edu.au/academic/caution.html

After a period of academic caution, undergraduate students who do not maintain the required minimum level of progress may be excluded from a course. The minimum rate of progress for undergraduate students is achievement of 50 per cent of the credit points for which they have been enrolled in since the beginning of that course. Requirements for postgraduate coursework students are set out in the relevant course area (see page 49) postgraduate information section in this handbook or within specific course information. A faculty board may also discontinue a student's registration in a course if the board is dissatisfied with the student's progress.

Further information about academic progression, including appeal procedures, is available at:

www.sau.uts.edu.au/academic/progress.html

Postgraduate research candidature may be discontinued for an unsatisfactory progress report outcome, unsatisfactory candidature assessment, or failure to complete in the maximum time.

Further information is available from the UTS: Graduate Research School at:

www.gradschool.uts.edu.au/policies-rules

EXAMINATIONS AND RESULTS

https://onestopadmin.uts.edu.au

Information about examination timetables, conduct in examinations, appeals, and special consideration is available at:

www.sau.uts.edu.au/assessment

Students are required to be aware of the specific requirements of examination attendance and conduct, as published in section 9 of the Student and Related Rules:

www.gsu.uts.edu.au/rules/9-index.html

Information on procedures followed in cases of suspected misconduct in an examination is also available in the rules:

www.gsu.uts.edu.au/rules/9-8.html

The UTS policy and procedures on the Assessment of Coursework Subjects are available at:

www.gsu.uts.edu.au/policies/assessment-coursework.html

Grades and grade point average

Students studying coursework programs receive a grade for each subject completed. The schedule of grade descriptions is available in schedule 3 of the Student and Related Rules at:

www.gsu.uts.edu.au/rules/s3.html

In most situations, students also receive a progressive grade point average (GPA) indicating their overall performance in a course.

A GPA is a progressive measure of academic achievement over the duration of enrolment in a course. It provides an overall view of a student's performance in a course and is an internationally recognised measure of student performance.

The GPA is based on the subject grade and credit points and is calculated using a preset weighting for each grade for all courses commenced from Autumn semester 2003. (GPA is only applicable to coursework awards, not research degrees.) In most cases, the GPA is calculated automatically at the end of each semester. The GPA is included on academic records.

Further information on GPAs is available at: www.sau.uts.edu.au/assessment/results/gpa

COURSE COMPLETION AND GRADUATION

Eligibility to graduate

Students need to have satisfied all course requirements in order to graduate and receive an academic award from the University as outlined in sections 12 and 13 of the UTS Student and Related Rules. All matters, such as return of library books, must have been settled.

In addition, a student will not be eligible to graduate if they are involved in any student misconduct or appeals proceedings as outlined in section 16 of the rules.

When enrolling in their final year or semester, students need to ensure their program of study will satisfy requirements in accordance with the required timeframe so as not to delay their graduation.

Graduation

To graduate in Autumn 2013 students must ensure the following:

- payment of outstanding fees and financial obligations owed to UTS by 8 March 2013
- return of all University library books, materials and equipment by 8 March 2013
- application for change or correction of formal name submitted by 8 March 2013
- all outstanding results resolved by 11 March 2013
- correct formal name and status of 'passed' reflected on My Student Admin by 14 March 2013.

To graduate in Spring 2013 students must ensure the following:

- payment of outstanding fees and financial obligations owed to UTS by 2 August 2013
- return of all University library books, materials and equipment by 2 August 2013
- application for change or correction of formal name submitted by 2 August 2013
- all outstanding results resolved by 12 August 2013
- correct formal name and status of 'passed' reflected on My Student Admin by 14 August 2013.

Students need to ensure they are aware of the essential graduation information, ceremony schedule and registration timelines that the University communicates to graduands via their UTS email account or other contact details provided in My Student Admin. Failure to update contact details or read notifications are not accepted as reasons for being unaware of matters so notified (see rule 2.3 of the rules).

As the graduation ceremonies have limited capacity, students who have not undertaken the necessary actions by the required deadlines, as outlined in the graduation communications and on the graduation website, may not graduate and may not be able to attend a ceremony at their preferred time. This may result in deferral to the next ceremony period.

If students have any questions about their eligibility to graduate, course requirements, graduation registration or any other matters, they should contact a UTS Student Centre:

telephone 1300 ask UTS (1300 275 887)

Ask UTS www.ask.uts.edu.au

Further key information is also provided at:

- Graduation: www.gsu.uts.edu.au/graduation
- My Student Admin: https://onestopadmin.uts.edu.au

PRIZES AND AWARDS

Prizes are awarded each year to students in the University for meritorious work. These are made available through the generosity of private individuals and public organisations. They are offered each semester, annually or biennially. In rare instances, a prize is offered only when funds permit. Most prizes are offered subject to the provision that they are awarded only when a student has attained a mark or level of achievement considered by the faculty board concerned to be sufficiently high.

In addition to official University prizes and awards, a number of prizes are available from external sources.

A searchable database of prizes and awards is available at: http://datasearch.uts.edu.au/study/scholarships/prizes.cfm The University's policy and procedures for the administration of prizes are available at:

www.gsu.uts.edu.au/policies/prizesadmin.html

The University's guidelines for the acceptance of new prizes are available at:

www.gsu.uts.edu.au/policies/prizesnew.html

University medal

A University medal may be awarded to a graduating student who has demonstrated exceptional merit.

Further information on the University medal is available in rule 13.8 of the Student and Related Rules.

The guidelines for the award of UTS medals are available at: www.gsu.uts.edu.au/policies/utsmedalguide.html

GLOBAL EXCHANGE

UTS provides a range of opportunities for students to enhance their international capabilities, expand their career and personal goals, and develop an international perspective by participating in global exchange.

UTS has exchange partnerships with over 190 universities in 33 countries. This includes opportunities to study in English in Austria, China, Colombia, Denmark, Finland, France, Germany, Hong Kong, Hungary, India, Italy, Japan, Malaysia, Mexico, the Netherlands, Portugal, the Philippines, Singapore, South Korea, Spain, Sweden, Taiwan, Thailand as well as the more traditional destinations such as Canada, the UK and the USA.

Global exchange is an excellent opportunity to undertake a semester or two of study overseas at a UTS partner university and receive credit toward a UTS degree. UTS aims to create global citizens and encourages students to participate in the Global Exchange Program to develop skills and experiences which will increase their employability.

Global exchange information sessions are conducted each semester and attendance at the session is a preliminary requirement of the application process. More information and registration for an information session are available at:

www.ssu.uts.edu.au/globalexchange

A complete list of partner universities is available at:

https://uts.moveonnet.eu/moveonline/exchanges/search.php

UTS provides scholarships each semester to support student participation in the global exchange program:

www.ssu.uts.edu.au/globalexchange/scholarships.html

In addition, in 2012 the federal government OS-HELP loan scheme provided funding for eligible students of up to \$5824 a semester for up to two semesters of overseas study:

www.studyassist.gov.au/sites/studyassist/helppayingmyfees/pages/os-help-loans-and-study-overseas

STUDENT LEADERSHIP PROGRAMS

Beyond UTS International Leadership Development (BUILD) program

The Beyond UTS International Leadership Development (BUiLD) program is an extracurricular student leadership, global citizenship and social development program focusing on global leadership, community connections and social issues. BUiLD provides participants with leadership development, volunteering, shorterm international programs, study tours, internships, networking opportunities, community engagement and social awareness activities. Participants are able to engage with an extensive suite of experiential learning opportunities locally and overseas.

More information and online registration are available at: www.ssu.uts.edu.au/beyonduts

Brennan Justice and Leadership program

The Brennan program is a voluntary program for UTS law students that seeks to strengthen the justice consciousness, idealism and sense of service that they bring to their studies and later professional work. Introduced in 2011, it is a joint initiative of the UTS Faculty of Law and the UTS Law Students' Society.

The program provides opportunities for students to develop their leadership potential and take part in a range of lectures, discussion groups and voluntary activities. Joining the program gives students the ability to go beyond the academic curriculum of their degree.

More information and online registration are available at: www.law.uts.edu.au/brennan

Social Leaders @ UTS (SoUL)

Social Leaders @ UTS (SoUL) is an extracurricular leadership and volunteering program. SoUL offers seminars, lectures and workshops on social entrepreneurship, active citizenship and the third sector and provides volunteering opportunities for students to put the skills and knowledge they learn in the classroom into practice for local community and not-for-profit organisations.

Through SoUL, students receive leadership training and development, enhanced communication and teamwork skills, hands-on work experience with real-world social businesses and contribute to positive social change in the community.

More information and online registration are available at: www.soul.uts.edu.au

STUDYING AT UTS: INSEARCH

UTS: INSEARCH is a pathway provider to UTS. INSEARCH offers a range of academic and general English programs, higher education diplomas and, on behalf of UTS, UTS Foundation Studies.

INSEARCH has been educating students for over 20 years and is an important part of the UTS community. INSEARCH courses are taught by industry-experienced teaching staff, are designed in consultation with UTS faculties and are approved by the UTS Academic Board. INSEARCH's special relationship with UTS also means that students benefit from UTSs academic standards, student activities and reputation for excellence. Students also have access to UTS facilities which enables them to experience university life while studying at INSEARCH.

INSEARCH offer diplomas in Business, Communication (Public Relations), Design (Visual Communication), Engineering, Information Technology and Science. With small class sizes, dedicated academic support and quality programs, INSEARCH diploma graduates have the opportunity to fast track into the 2nd year of UTS (depending on which course they choose). Full details on INSEARCH courses, entry requirements, articulation and credit points are available on the INSEARCH website.

LEGISLATION, RULES AND POLICIES

UTS rules and policies

The rules and policies of the University have been written to provide advice on the responsibilities of students to their studies and to the rights of students and staff. Students should read and be familiar with the rules and policies of the University.

www.gsu.uts.edu.au/lrp.html

UTS Student Charter

The UTS Student Charter recognises that students and staff have rights and responsibilities to each other and to the University community. Students should read and be familiar with the UTS Student Charter. www.gsu.uts.edu.au/policies/studentcharter.html

Student complaints

The University is committed to providing a learning and working environment in which complaints are responded to promptly and with minimum distress and maximum protection to all parties. All students and staff have a responsibility to contribute to the achievement of a productive, safe and equitable study and work environment at UTS.

The policy on Handling Student Complaints outlines what a complaint is and contains information about how to make a complaint.

More information is available at: www.uts.edu.au/work/grievance

Right to information and privacy

An individual can request access to information held by UTS under the *Government Information (Public Access) Act* 2009 (NSW). If the information requested cannot be accessed online or through an informal application, an access application needs to be lodged with the right to information coordinator.

An individual may request access to their personal information under the *Privacy and Personal Information Protection Act* 1998 (NSW) or, where the information is health related, under the *Health Records and Information Privacy Act* 2002 (NSW). In addition to the requirements of these acts, UTS has a number of policies that govern access to, and the collection, use, storage and disclosure of, personal information.

Further information on right to information is available at:

www.gsu.uts.edu.au/gipa

Further information on privacy is available at:

www.gsu.uts.edu.au/privacy

NSW child protection legislation

Prohibited employment declaration and screening

In accordance with NSW child protection legislation, students participating in practical training placements that require them to have direct contact with children under 18 in designated child-related employment areas are required to complete a prohibited employment declaration form on enrolment, and each year in which they are enrolled as a student. Students may also be subject to employment screening. Screening is carried out only with students' consent but eligibility for participation in such programs is determined on the basis of information obtained through these checks.

Volunteer/Student Declaration (Commission for Children and Young People Act 1998)

Under NSW law any person who has been convicted of a serious sex offence, the murder of a child or a child-related personal violence offence or who is a registrable person under the *Child Protection (Offenders Registration) Act 2000* is prohibited from working in child-related employment. Prior to commencing each professional experience or clinical placement, students are required to complete a Volunteer/Student Declaration.

Education students: Appendix 4 Declaration and Appendix 2 Declaration and Employment Screening Consent for all employment with the Department

Every student, every year from 2011, needs to complete an Appendix 4 Declaration. All students who participate in professional experience subjects conducted in schools or in similar organisations, where work involves direct contact with children under 18, are required to complete an Appendix 4 Declaration at the beginning of each year of their course. Fourth-year students enrolled in primary education courses are required to undergo employment screening.

Students participating in internship or associate teacher programs that involve direct contact with children under 18 without the presence of a qualified teacher are subject to a working with children check by the NSW Department of Education and Communities, which requires completion of an Appendix 4 Declaration and the Appendix 2 Declaration and Employment Screening Consent for all Employment with the Department (internship is regarded as employment even though students are not paid).

Eligibility for participation in such programs is determined on the basis of these checks.

These checks are only carried out with a student's consent. If students refuse to consent to the checks, they will be unable to complete the course requirements. This information is for use by the Department of Education and Communities only.

The forms are available as downloadable PDFs from:

• Appendix 2:

https://www.det.nsw.edu.au/policies/student_serv/child_protection/work_child/implementation_4_PD20050264.shtml

Appendix 4:

https://www.det.nsw.edu.au/policies/student_serv/child_protection/work_child/implementation_6_PD20050264.shtml

Health students: prohibited employment declaration and criminal record check

NSW Health is committed to providing their staff, patients, and clients with a safe workplace. The NSW Department of Health Employment Screening policy requires all students enrolling in courses that involve clinical placements in NSW public health facilities to undertake a National Criminal Record Check and comply with other policy requirements. In addition, when starting nursing or midwifery studies at UTS, international/overseas students are required to obtain a police certificate (with English translation) from their home country and any country that they have resided in, incorporating any charges the student may have against his or her name. If the student is unable to provide a police certificate, he or she must complete a statutory declaration stating that he or she has no pending criminal charges or convictions from their home country or any country that he or she has resided in. If a student does have such records, he or she must list the date of offence, type of offence, and court outcome. Details of the clearance requirements for students, including those for overseas students, are provided in Notice to Students Enrolling in Courses that Require Clinical Placements in NSW Public Health Facilities. This document and further links related to the forms, police contacts, frequently asked questions, and further information can be found on the NSW Health website at:

www.health.nsw.gov.au/jobs/student_clearance/index.asp

In addition, during enrolment at UTS, students are required to read and sign a NSW Health Student Undertaking. This undertaking requires students to notify the NSW Department of Health if they are charged or convicted of a criminal offence after the date of issue of their national police certificate or during the completion of their course. Information on this process is provided at enrolment.

Following the commencement of studies and prior to each clinical placement, students are required to:

- have read the NSW Health Code of Conduct and signed a form confirming that they have read, understood, and will comply with the NSW Health Code of Conduct
- sign a Commission for Children and Young People Student Declaration.

Further information is provided on the commencement of studies. Students cannot undertake nursing practice until these clearance requirements are attended to. Fees may apply which must be met by the student.

Further information is available from UTS: Health at: www.nmh.uts.edu.au/students/current/clinical-practice/rules.html

EQUITY AND DIVERSITY

UTS has a strong commitment to ensuring that the diverse nature of Australian society is reflected in all aspects of its employment and education. The University aims to provide a supportive and open organisational culture in which students and staff are able to develop to their full potential.

The Equity and Diversity Unit provides a range of services for students and staff including:

- support for access to education and employment for people from diverse backgrounds
- grievance handling advice and assistance for matters relating to discrimination and harassment
- advice on anti-discrimination and affirmative action legislation
- design and facilitation of equity and diversity training
- guest lectures and presentations on equity and diversity issues to student and staff groups.

UTS is committed to implementing its Equal Opportunity and Diversity policy.

Equity and Diversity Unit CB01.17.12 City campus, Broadway telephone +61 2 9514 1084 email equity@uts.edu.au www.equity.uts.edu.au

STUDENT OMBUDS

Students with a complaint against a decision by University staff, or related to the University, may seek assistance from the Student Ombuds.

All matters are treated in the strictest confidence and in accordance with proper processes.

CB02.4.02 City campus, Broadway telephone +61 2 9514 2575 email ombuds@uts.edu.au www.ombuds.uts.edu.au

UNDERSTANDING COURSES AND SUBJECTS

COURSE DURATION AND ATTENDANCE

Teaching periods

There are two main semesters in the academic year. Autumn semester runs from the beginning of March to the end of June. Spring semester runs from the beginning of August to the end of November. The majority of subjects are offered within Autumn and Spring semesters.

Summer session for undergraduate and postgraduate subjects occurs during the University summer holiday period. Summer session is designed so that students can fast-track their studies and complete subjects in an intensive format. Students should note that only a limited range of subjects is offered in this session. Any student interested in Summer session should contact the relevant UTS Student Centre regarding details of subjects offered and timetabling information.

The 2013 academic year dates (including the examination period) are:

- Summer session: 3 December 2012 8 February 2013
- Autumn semester: 25 February 28 June 2013
- Spring semester: 29 July 29 November 2013

Some subjects are offered in block or intensive mode in the following short teaching periods:

- March session: 11 March 19 April 2013
- May session: 29 April 7 June 2013
- July session: 17 June 26 July 2013
- August session: 12 August 20 September 2013
- October session: 30 September 8 November 2013
- December session: 18 November 2013 3 January 2014

Standard duration

The standard course duration is listed within the detailed entry for each course. Course duration may vary depending on attendance pattern and student load and the timetabling of chosen elective subjects.

Master's degrees by research take a maximum of two years of full-time (four years part-time) research and writing to complete.

Doctorates take a maximum of four years of full-time (eight years part-time) research and writing to complete.

Study load

Full-time students typically undertake 24 credit points a semester. Part-time students have a reduced semester load. Students are not normally permitted to take more than 30 credit points a semester, but there is no lower limit apart from those dictated by the maximum time and leave of absence rules.

Some courses are offered in such a way as to support part-time attendance through the scheduling of classes in the evening. Others are primarily designed for full-time students. Information on modes of study is provided in the detailed entry for each course.

Enrolment restrictions

The only restrictions on subject enrolment are that the subject requisites are met, the subject has not reached its enrolment quota, and that the subject is a valid component of the student's study plan. Note: Entry into preferred subjects is not guaranteed.

Attendance modes

For each specific subject, teaching period and location, one or more attendance modes is available: standard, block, distance (off-campus), and mixed.

Standard attendance mode involves attendance at weekly, on-campus classes over a 14-week semester.

Block mode involves an intensive period of study in classes scheduled over one or more weeks of the teaching period.

In distance (off-campus) mode, students are provided with materials that they work through in their own time, supported by online and print materials and possibly one or two face-to-face sessions.

Mixed mode attendance combines the flexibility of on-campus, distance and block study.

Students undertaking a master's (research) or doctoral degree are, in general, not required to attend classes. However, regular contact is maintained with the student's supervisor(s) throughout enrolment.

Class attendance

On-campus classes may be timetabled between 9am and 9pm. Not all subjects are available in the evenings. Evening classes can start as early as 5pm. Part-time students may need to attend some day classes and full-time students may need to attend some evening classes.

Regular attendance at classes is a requirement of the University. It is the student's responsibility to attend lectures, tutorials and laboratory sessions and carry out all assignment and examination work in every subject in which she or he is enrolled. Students are issued with a subject outline for each of their subjects that includes further details of specific attendance requirements.

The current timetable is available at:

http://timetable.uts.edu.au

International students

International students studying on student visas are subject to specific enrolment requirements under the Australian Government's *Education Services for Overseas Students Act* 2000. These requirements do not apply to international students studying on other kinds of visa.

Further information on student visas is available from UTS International:

www.uts.edu.au/international/current/visa

Credit point load and course duration

International students studying on student visas must ensure that their credit point load puts them in a position to complete their course within the standard duration. This normally requires the completion of 48 credit points a year. Hence, by default, international students must enrol in 100 per cent load each semester. The exceptions are:

- if they have made up, or intend to make up, credit points by overloading or enrolling in non-standard sessions, or
- if they have formal faculty approval to reduce their load.

Australian Government legislation prevents UTS from granting extensions to international students' courses except in limited circumstances. Failure to follow the above requirements may therefore mean that an international student is unable to extend their student visa to complete their course.

Further information on study load is available from UTS International: www.uts.edu.au/international/study/permission.html

Attendance mode

International students may enrol in distance subjects, subject to faculty approval. However, students studying on student visas must enrol in at least one on-campus subject each semester, and can study a maximum of 25 per cent of their total course by distance.

Further information is available from UTS International: www.uts.edu.au/international

ASSUMED KNOWLEDGE

Assumed knowledge means that a student is assumed to have passed a relevant subject in the HSC. UTS does not have specific HSC subject prerequisites for any of its courses. Each faculty identifies assumed knowledge and / or recommended studies, which students are advised to have achieved before beginning the course. Details of any assumed knowledge are included in the entry for each course.

UTS offers a range of bridging courses (see page 35) for students who do not meet the assumed knowledge requirements for their preferred course. Most of the courses are offered in late January / early February, between enrolment and the start of semester. Bridging courses in chemistry, mathematics and physics are available for new students undertaking degree studies in business; design, architecture and building; education; engineering and information technology; health; and science.

Student learning centres (see page 36) are also available to provide assistance to students via bridging and intensive courses and general advice.

CREDIT RECOGNITION

Credit recognition is granted in accordance with section 6 of the UTS Student and Related Rules. Individual courses may also have specific regulations regarding credit recognition.

UTS provides the opportunity for students to apply to have prior learning considered for credit towards a UTS course where the prior learning is related to assessable components of the course. Forms of prior learning include previous study from recognised tertiary organisations, relevant work or life experience, or courses undertaken outside a recognised tertiary education organisation.

Eligibility for credit recognition does not guarantee an applicant a place in the course for which credit recognition may be available. An applicant may apply for an assessment of their prior learning normally only at the time of applying for entry to a course. If recognition of this prior learning is granted, students receive either exemptions or substitutions from either specified or unspecified components of their UTS course.

Students granted exemptions must monitor progress in their enrolled subjects in the first weeks of the teaching period to enable withdrawal, if necessary, from subjects where credit recognition has been granted, before the last date for withdrawal. Students may apply to have an exemption rescinded and enrol in the relevant subject if they feel they cannot meet academic requirements or other components of their course without completing the subject.

Students should read the Credit Recognition Policy at: www.gsu.uts.edu.au/policies/credit-recognition.html

Further information is also available from specific faculty guidelines at:

www.sau.uts.edu.au/applying/rpl.html

Application forms for credit recognition are available from the UTS Student Centres or at:

www.sau.uts.edu.au/forms

If previous study was at another tertiary institution, the credit recognition search tool can be used for an indication of the amount of credit that an applicant may be eligible to receive at UTS:

http://datasearch.uts.edu.au/credit/index.cfm

Further information is available from:

telephone 1300 ask UTS (1300 275 887)

Ask UTS www.ask.uts.edu.au

When visiting a UTS Student Centre bring a copy of your transcript from your previous study, or alternatively upload a copy via Ask UTS.

Student Centre locations and opening hours are available at:

www.uts.edu.au/students/centres.html

PROFESSIONAL RECOGNITION

Many UTS courses are recognised by professional associations and bodies. This means that graduates may be eligible to apply for professional membership of associations or bodies, or that graduates may be recognised as having satisfied the academic requirements to practise in a particular profession.

Details of professional recognition are included in the entry for each course.

AVAILABILITY AND TYPICAL AVAILABILITY

Course availability

The availability of a course refers to the teaching periods and locations for which there will be a student intake in the specified year. Information about undergraduate and postgraduate courses open for applications is available at:

www.uts.edu.au/study/apply.html

Subject availability

The typical availability of subjects is provided with the subject description. It lists each teaching period/session and location that the subject is usually offered.

Note: While the subject is usually offered according to the specified pattern, there is no guarantee. Students should check the actual availability of subjects on the timetable.

Timetable

The University timetable for all teaching periods (except Summer session) is published online in early November for the coming year. The Summer session timetable is usually published in mid-October each year.

http://timetable.uts.edu.au

UAC CODES

The handbook uses several standard acronyms against UAC codes:

FT: full-time

PT: part-time

CSP: Commonwealth-supported place

PDFP: postgraduate fee-paying

STUDY PLANS

On admission to the University each student is given a study plan. The study plan is a list of the subjects that must be completed in order to qualify for the course award. As well as compulsory or core subjects, the study plan may include lists of subjects from which a specified number of credit points must be selected. Some courses allow students to choose a specific learning pathway. A pathway may require students to choose one or more majors or sub-majors.

The study plan is available through My Student Admin. Any choices, in the form of option selection or pathway specification, can be made online, although in some cases faculty approval is required. The point at which choices need to be made, and the extent to which choices are reversible, depends on the course.

Further information is available from the Student Administration Unit at:

www.sau.uts.edu.au/enrolment/studyplan

COURSE STRUCTURE

A course structure is provided for each course. The course structure specifies the completion requirements for a particular version of a course. Changes in course completion requirements are reflected in successive course versions. However, the course requirements that apply to a student are those that applied at the time of admission to the course, unless a specific transition program has been approved by the faculty.

The course structure is shown by listing compulsory components (core components) and/or an options list. The components in both the core and the options list may be subjects (see page 29) or sub-structures (see below), such as majors, sub-majors, choice blocks or streams.

SUB-STRUCTURES

Choice blocks (CBK), streams (STM), majors (MAJ) and sub-majors (SMJ) are groupings of subjects that form part of the course structure (see above). They are collectively called sub-structures.

Sub-structures are used to specify the completion requirements for a particular course and appear in the course structure and course program of the detailed course entry.

With the exception of choice blocks, which consist entirely of an option list from which a specified number of credit points must be selected, each of these sub-structures can include core components, optional components or both. The components may be subjects or further sub-structures.

The breakdown of the subjects students are required to complete within a particular sub-structure is provided in code-numeric order in the study package directory. The credit point value of the options available is always specified but, in some cases, no subjects or only a partial list of subjects are specified under the list of valid choices. This is the case when students have considerable flexibility as to what subjects they choose. Once permission from the relevant faculty has been obtained, the chosen subject can be made available to the student by being added to the appropriate list on the student's study plan (see page 28).

COURSE PROGRAMS

In order to assist students in determining the order of enrolment in subjects, typical course programs are supplied. These are offered as suggested patterns of enrolment that enable students to satisfy the course completion requirements, taking into account factors such as subject requisites, teaching period offered, and full-time or part-time study load. Individual programs may vary from the typical course program if subject requisites are satisfied.

Following the course program allows students to complete the degree in the minimum time. Students should be aware that if the typical program is not followed, the course duration may be extended and not all subjects may be available when preferred.

In the case of combined degrees and courses with significant flexibility in major and sub-major choices, it is not feasible to publish programs for all possible pathways. Programs are presented for typical pathways, along with information that would allow the equivalent program for a different pathway to be deduced.

Not all courses have a typical program. Students in such courses need to refer to the course structure and select subjects for which they have met the requisites, constructing a program for themselves that avoids timetable clashes. The best way to do this is to identify any long requisite chains in the course and undertake subjects at the beginning of the longest chain first.

SUBJECTS

Subject descriptions include the subject number, name, credit point value and study mode. Also shown are the academic prerequisites and corequisites, if any, followed by a brief subject outline and, in some cases, details of assessment.

Credit points

Credit points are the unit of measure of workload for individual subjects. Credit points (cp) are gained by students enrolled in award courses when subjects are passed and, when accumulated, credit points form one measure of the total requirements of a course. Most subjects are 6cp or 8cp. As a standard measure at UTS, a normal full-time study load is equivalent to 48 credit points a year.

Requisites and anti-requisites

If a subject has an academic prerequisite or corequisite it will be displayed under the 'Requisite(s)' heading in the subject description.

All requisites displayed under the 'Requisite(s)' heading are prerequisites unless a lower case 'c' appears after the subject code (e.g. 78100c) which indicates that the subject is a corequisite.

If a subject has an academic anti-requisite it will be displayed under the 'Anti-requisite(s)' heading in the subject description.

There are also admission requisites and other requisites which may impact on a student's enrolment in a subject; these are available in 'Access conditions', accessible from every online subject description.

Definitions

A **prerequisite** is a subject that must be completed before enrolment in another specified subject.

A **corequisite** is a subject that must be completed either before or concurrently with another specified subject.

An **anti-requisite** is a subject/study package with substantially overlapping content as another subject/study package and which therefore cannot be undertaken by a student, for credit-point value, who has already undertaken the subject/study package for which it is an anti-requisite.

Recommended studies

Some subjects also include an indication of recommended studies, subjects or experience which students would benefit from having completed before commencing the subject. Recommended studies are not mandatory and are not enforced by the University. Students should discuss any recommended studies with their faculty.

Core subjects

Core subjects are subjects that are compulsory within a specified course or sub-structure (see page 28). Whether a subject is a core subject is dependent on the course or sub-structure in which it resides, so that a subject which is core in one course may be available as an option or elective in another.

Options lists

Many course structures (see page 28) provide the opportunity to select subjects from a specified list. Options lists present a set of subjects from which students must make choices to a specified total credit point value. Options lists may either be associated directly with a course or sit within sub-structures such as majors, sub-majors, choice blocks and streams.

Electives

Some courses provide the opportunity to select electives where the subjects chosen are not constrained to a specified list. Although it is necessary to select elective subjects to the nominated credit point value, students are able to choose which subjects to complete in order to satisfy this criteria in the course requirements. Students are able to select from a wide range of subjects offered across the University, within the constraints of the particular access conditions applying to each subject.

Subjects offered by other faculties or institutions

Students wishing to take subjects offered by other faculties or by another institution should discuss their choice of subjects with their faculty adviser.

Note: Once approved by a faculty, it is the student's responsibility to ensure all required application procedures are followed for acceptance at other institutions.

Concurrent study

Students who wish to study one or more subjects at another institution and have those subjects credited to their UTS course must complete an application for concurrent study form. Subjects successfully completed are added to the student's record at UTS as a subject exemption. No mark is recorded and the subjects do not contribute to the calculation of level of award or grade point average. The application form is available at:

www.sau.uts.edu.au/forms

Assessment

Assessment varies from subject to subject. Assessment items can include class presentations; reflective reviews and journals; research papers; case studies; simulations and role-plays; in-class tests; discussion papers; assignments, reports and essays; and final examinations, faculty-based examinations and take-home examinations. Assessment often involves both individual and group work. Detailed assessment requirements, including weighting of assessment items, due dates and arrangements for collection and return of assessment items, are set out, where available, in subject outlines, which are distributed by subject coordinators by the end of the first week of teaching. Students should check with their faculty for any other specific assessment guidelines.

The UTS policy and procedures for the Assessment of Coursework Subjects are available at:

www.gsu.uts.edu.au/policies/assessment-coursework.html

Postgraduate research assessment

The majority of research degrees are undertaken wholly by thesis. A master's (research) is normally a work of around 40,000 words and is examined by two appropriate examiners, at least one of whom is external to UTS. A doctoral degree is normally a work of 80,000–100,000 words and is examined by three appropriate examiners, at least two of whom are external to UTS. Further information is available from the UTS: Graduate Research School at:

www.gradschool.uts.edu.au

ACADEMIC UNITS OFFERING COURSES AND SUBJECTS

In addition to the eight faculties and schools, the following academic units also offer courses and subjects at UTS.

CENTRE FOR LOCAL GOVERNMENT

The objective of the Centre for Local Government is to support the advancement of local government through continuing professional education and training, research and specialist consulting services. In Australia and internationally, the centre works collaboratively with local government associations, professional institutes and state and federal government departments.

The centre is a major provider of continuing professional education for local government in New South Wales. Education and training programs are offered throughout the state and have a strong emphasis on workplace learning and high-quality, up-to-date content. In addition, the centre regularly undertakes applied research, training programs and consultancies for all spheres of government, individual councils and regional groups of councils, across a wide range of activities. Significant contributions are made to the international development of local government through professional education courses and joint programs with partner organisations in the Asia-Pacific region, South Africa and elsewhere.

The centre offers a Graduate Diploma in Local Government Management (C06033) (see page 387), which is delivered largely in flexible, workplace-based modules, as well as a Graduate Certificate in Development Assessment (C11204) (see page 455) and a Graduate Certificate in Local Government Leadership (C11215) (see page 459).

Further information is available from:

Gabrielle Watterson Administrative Officer CB10.06.400 City campus, Broadway telephone +61 2 9514 1659 fax +61 2 9514 2274 email clg@uts.edu.au www.clg.uts.edu.au

INSTITUTE FOR SUSTAINABLE FUTURES

The Institute for Sustainable Futures works with industry, government and the community to develop sustainable futures through project-based research.

The institute's mission is to create change towards sustainable futures. Its objectives are to:

- be a world leading sustainability research institute
- support communities, government and business to create their own change towards sustainable futures
- deliver a cutting edge transdisciplinary postgraduate research program in sustainable futures
- progress public dialogue as well as motivate and facilitate action
- be an exemplar of participation within the UTS community
- value and enrich a supportive and sustainable workplace.

Further information is available at:

CB10.11

City campus, Broadway telephone +61 2 9514 4950 fax +61 2 9514 4941 email isf@uts.edu.au www.isf.uts.edu.au The institute offers a Doctor of Philosophy in Sustainable Futures (C02037) (see page 478) and a Master of Sustainable Futures (Research) (C03032) (see page 491) to both local and international students. The institute does not offer coursework degrees.

Applications for postgraduate research places are subject to the same criteria as applications to any UTS course.

Further information on the University's requirements for postgraduate applications and on scholarships and fees is available from the UTS: Graduate Research School:

www.gradschool.uts.edu.au

The UTS: Graduate Research School provides a range of researcher development courses and activities for currently enrolled research students, early career researchers and supervisors. More information is available at:

www.gradschool.uts.edu.au/researcher-skills

International applicants should contact UTS International. www.uts.edu.au/international

Inquiries

The institute's website provides an outline of the postgraduate program and the steps required to proceed with an application to study at ISF. The institute receives many more applications than places available, so it is important to contact them early and to follow the application processes outlined on their website:

www.isf.uts.edu.au/postgrads

UTS SHOPFRONT

UTS Shopfront is a University-wide program that acts as a gateway for community access to UTS. It links disadvantaged and underresourced community groups to University skills and professional expertise on a pro bono basis.

As part of the University's academic program, UTS Shopfront runs a community research elective which is available to all students in all undergraduate and postgraduate courses (with faculty and UTS Shopfront approval).

Students should consult their faculty before enrolling in these subjects.

Undergraduate

• 50294 Community Research Elective (UG) 8cp

Postgraduate

• 57993 Community Research Elective (PG) 8cp

SCHOLARSHIPS, ASSISTANCE AND FEES

SCHOLARSHIPS

UTS offers many scholarships annually to thousands of UTS students. Scholarships vary considerably in terms of their purpose, eligibility criteria and amount.

The scholarship search facility is available at:

http://datasearch.uts.edu.au/study/scholarships

Vice-Chancellor's scholarships

In 2013, UTS awards the Vice-Chancellor's scholarships to current school leavers, valued at \$12,500 a year for the duration of the full-time course.

- The Vice-Chancellor's Outstanding Achievement Scholarships are awarded for academic excellence in high school. The scholarships were awarded to five current school leavers in 2012 with an ATAR of 99.7 and above.
- The Vice-Chancellor's Merit Scholarships are awarded to students demonstrating academic excellence in high school (ATAR of 90 or above) and financial need. The scholarships were awarded to five current school leavers in 2012. Applicants must demonstrate financial disadvantage by applying for an Equity Scholarship through the Universities Admissions Centre (UAC) (www.uac.edu.au/equity).

Further information on the Vice-Chancellor's scholarships is available from:

UTS Scholarships Office

telephone +61 2 9514 2527

email scholarships@uts.edu.au

http://datasearch.uts.edu.au/study/scholarships

Vice-Chancellor's Indigenous Undergraduate Tuition Fee Scholarships

UTS awards the Vice-Chancellor's Indigenous Undergraduate Tuition Fee Scholarships to recognise academic excellence in the final year of school. These scholarships are awarded to Australian Aboriginal or Torres Strait Islander students to cover tuition fees for the duration of an undergraduate course.

Further information is available from Jumbunna Indigenous House of Learning at:

www.jumbunna.uts.edu.au

Faculty-specific scholarships

Faculty-specific scholarships are offered for specific courses. Some examples are:

- Dean's scholarships are prestigious faculty scholarships for top-performing ATAR students. These scholarships are valued at up to \$10,000 per annum for the duration of the full-time undergraduate degree.
- Co-operative scholarships are sponsored by industry and combine financial benefits with the possibility of valuable industry placement. UTS offer cooperative scholarships in these courses: Bachelor of Accounting, Bachelor of Information Technology, Bachelor of Engineering Diploma in Engineering Practice.

Search for these and other faculty-specific scholarships at: http://datasearch.uts.edu.au/study/scholarships

UTS Diversity Access Scholarships

UTS Diversity Access Scholarships are offered to UTS undergraduate and postgraduate students in situations of financial hardship. These scholarships are one-off payments valued between \$600 and \$2500. Recipients may apply each semester that they are eligible.

Eligibility information is available at:

http://datasearch.uts.edu.au/study/scholarships

Commonwealth scholarships

The Commonwealth Government awards **Student Start-Up Scholarships** and **Relocation Scholarships** to eligible students receiving a Centrelink student support payment (Youth Allowance, Austudy or Abstudy). Further information is available through Centrelink at:

www.humanservices.gov.au

On behalf of the Commonwealth Government, UTS administers the Indigenous Access Scholarship, Indigenous Commonwealth Accommodation Scholarship and the Indigenous Commonwealth Education Costs Scholarship for Indigenous students.

Further information on these scholarships is available from:

http://datasearch.uts.edu.au/study/scholarships

Postgraduate research scholarships

All permanent residents/citizens of Australia applying for a higher research degree can apply for a postgraduate research scholarship. These scholarships are usually living allowance stipends which provide periodical payments to students while they are studying.

Further information on research scholarships is available from the UTS: Graduate Research School at:

www.gradschool.uts.edu.au

Scholarships for international students

UTS offers scholarships for:

- incoming international students
- current UTS students who wish to pursue studies overseas through the Global Exchange program
- current students enrolled in undergraduate, postgraduate coursework and postgraduate research studies.

All scholarship applications are competitive. They are open to international students who meet the specific scholarship selection criteria and who have received or are eligible to receive admission to a course at UTS.

Search for international student scholarships at:

http://datasearch.uts.edu.au/study/scholarships

FINANCIAL ASSISTANCE

Study Assist

The Australian Government's Study Assist website provides information about fees, loans and scholarships associated with study at university. It also contains information about higher education reforms that affect students.

www.studyassist.gov.au

HECS-HELP

Since 1 January 2005, Commonwealth-supported places have replaced HECS places. Eligible students have access to HECS-HELP assistance. This allows eligible students to request a HECS-HELP loan and defer payments through the Australian Taxation Office, or to receive a HECS-HELP discount for upfront payments over \$500.

Further information for Commonwealth-supported students is available at:

www.studyassist.gov.au

FEE-HELP

FEE-HELP is a loan scheme for eligible full-fee-paying domestic students. Under this scheme students can borrow up to the amount of the tuition fees being charged for units of study. Over a lifetime the FEE-HELP maximum limit is currently \$93,204. Students who access FEE-HELP for a full-fee undergraduate place also incur a 25 per cent loan fee.

Further information on FEE-HELP is available at:

www.studyassist.gov.au

SA-HELP

Eligible students who do not wish to pay the student services and amenities fee up front to the University, can request assistance and defer the fee through SA-HELP, a new element of the Higher Education Loan Program (HELP).

Further information on SA-Help and the student services and amenities fee is available at:

www.sau.uts.edu.au/fees/other/service.html

Commonwealth Higher Education Student Support Number (CHESSN)

All Commonwealth-supported students and FEE-HELP students are issued with a Commonwealth Higher Education Student Support Number (CHESSN). The CHESSN is a unique identifier that tracks an individual's use of Commonwealth assistance. As a condition of enrolment, students provide informed consent for the University to share their personal information with the Department of Industry, Innovation, Science, Research and Tertiary Education, so that the University can comply with legislative requirements. The information provided by students is used to generate the CHESSN. The CHESSN stays with students for their academic life.

Students can access their information using their CHESSN via myUniAssist at:

www.studyassist.gov.au

OS-HELP

OS-HELP is a loan scheme that helps eligible Commonwealthsupported students undertake some of their study overseas. The scheme provides up to \$6051 (in 2013) per six-month study period for up to two study periods to help students with a range of expenses such as airfares and accommodation.

Further information on OS-HELP is available at: www.ssu.uts.edu.au/globalexchange/scholarships.html

Centrelink benefits

The Australian Government's benefits for tertiary students are administered by Centrelink and are income and assets tested:

- Austudy (for students aged 22 and over on 1 January 2012)
- Dependent Youth Allowance (assessed on the parents' income and assets; for students up to 22 years who have not met the independence criteria)
- Independent Youth Allowance (for students up to 22 years, who have satisfied the independence criteria).
- Abstudy (see below).

In 2010 significant changes to the eligibility requirements and payment schedules were introduced. Eligibility and registration details for all Centrelink benefits are available from Centrelink at:

www.humanservices.gov.au

Registering students need to provide supporting documents to Centrelink as soon as possible. The first benefit payment for an eligible full-time student is backdated to the date of registration with Centrelink.

Commonwealth legislation sets strict requirements for Austudy and Youth Allowance over which the University has no control.

Students receiving Austudy or Youth Allowance must be enrolled in a minimum of 18 credit points a semester. They need to advise Centrelink if they drop subjects during semester, and with less than 18 credit points they are no longer eligible for the benefits. Exceptions may be made for students with disabilities or ongoing illnesses that impact on their studies, students who are single supporting parents or, in exceptional cases, those who are required by the University to undertake a reduced study load.

The financial assistance service at UTS provides a guide to Centrelink benefits for students at:

www.ssu.uts.edu.au/fassist

The financial assistance service may also be able to assist students who are experiencing financial difficulties associated with eligibility for Centrelink benefits. Contact the service at:

City campus, Broadway telephone +61 2 9514 1177 Kuring-gai campus telephone +61 2 9514 5342

Abstudy

Abstudy assists Aboriginal and Torres Strait Islander tertiary students by providing income support and other assistance.

Further information is available from Jumbunna Indigenous House of Learning at:

CB01.17

City campus, Broadway telephone +61 2 9514 1902 or 1800 064 312

www.jumbunna.uts.edu.au

The financial assistance service provides a guide to Abstudy at: www.ssu.uts.edu.au/fassist/centrelink/abstudy.html

International loan schemes

International students from some countries may apply for government funded and private education loans to support their studies in Australia. UTS International can provide documentation and advice to eligible students. Further information is available at:

www.uts.edu.au/international

Students from Canada, Sweden, Norway, the United Kingdom and the United States may apply for education loans from government departments in their home countries. International students who have the support of a co-borrower who is either a citizen or permanent resident of the United States can access private education loans.

UTS also accepts students who are eligible for a range of US Veteran's Educational Benefit Programs.

Further information on educational loans is available from the loans scheme coordinator:

email usfinaid@uts.edu.au

UTS financial assistance

UTS provides scholarships (see page 31) and a range of other financial assistance. Contact Student Services for more information: email student services@uts.edu.au

FEES AND COSTS

Course and subject fees

Undergraduate fees (domestic)

In 2013 UTS offers Commonwealth-supported places to all commencing undergraduate students. Continuing students enrolled prior to 2013 in full-fee-paying places will maintain their full-fee place, as will international students who become permanent residents.

The government makes a substantial contribution towards the cost of Commonwealth-supported students' education, and the balance is paid through student contributions. Students who are eligible may access HECS-HELP (see page 31). UTS determines the student contribution amount for each subject within the ranges set by the Australian Government.

Continuing full-fee-paying (non-Commonwealth-supported) domestic students must meet the full cost of their education themselves. However, students may be eligible to access the FEE-HELP loan scheme. Students who use FEE-HELP (see page 31) for a full-fee-paying undergraduate course incur a loan fee, to the value of 25 per cent of the loan.

Further information on fees is available at:

www.sau.uts.edu.au/fees

Postgraduate fees (domestic)

For most postgraduate courses by coursework, students are charged tuition fees. A small number of courses are offered as Commonwealth-supported places.

Approved fees for UTS postgraduate award courses are listed in the annual fees schedule. Postgraduate students enrolled in a full-fee-paying place may be eligible to access FEE-HELP (see page 31).

Research degrees are offered on a sponsored, scholarship or full-feepaying basis. Research students who qualify for a Research Training Scheme place are exempt from postgraduate course fees. Further information is available from the UTS: Graduate Research School at: www.gradschool.uts.edu.au

Payment amounts

All students at UTS pay tuition fees to contribute towards the cost of their studies. The exact amount depends on:

- what type of student you are
- the subjects you enrol in, and their credit-point value
- the course you are studying.

Details of all fees are available via the Tuition Fee Calculators at: www.sau.uts.edu.au/fees/calculators.html

Consequences of non-payment of fees

Students who have not paid all due fees and charges by the published final date for payment are liable for a late payment fee. These students are also unable to receive examination results, change their enrolment program, access their UTS computer account or graduate. Students may also have their enrolment in a course cancelled. Students who wish to recommence their studies must then apply through the formal admissions process. Readmission is not guaranteed.

Annual fee increases

Fees increase annually and students should anticipate a fee increase each year. They are set annually by the federal government's Department of Industry, Innovation, Science, Research and Tertiary Education for Commonwealth-supported places and by the University for full-fee-paying places. Any projections regarding the tuition fee cost of obtaining a degree need to incorporate annual fee increases. As the University's costs increase each year, fees are adjusted annually to ensure a high standard of teaching and to enhance the student experience while keeping the cost to the student as affordable as possible.

Student services and amenities fee

In 2013 all domestic students will be required to pay a student services and amenities fee (SSAF) each semester. The SSAF contributes to the provision of amenities and non-academic services for students.

Eligible students may apply to defer this fee through SA-HELP.

Further information is available at:

www.sau.uts.edu.au/fees/other/service.html

Other costs

Students may incur other costs while studying at UTS. These may include books, printed sets of reading materials, photocopying, equipment hire, the purchase of computer software and hardware, and internet services.

Some subjects may incur an additional cost where travel away from the University is involved.

International student fees and costs

Course fees for international students are available from UTS International at:

www.uts.edu.au/international/prospective/studying/fees

Semester fees are subject to increase each academic year, usually between 4–6 per cent.

International students should be aware that, in addition to their course fees, they also need to set aside funds for living expenses. UTS estimates that an international student requires a minimum of A\$14,786 to A\$25,680 for living expenses for each academic year. It is a requirement of the Department of Immigration and Citizenship that, from 1 July 2012, prospective overseas students demonstrate that they have access to at least A\$18,610 a year to fund their living costs in Australia.

There may also be other costs associated with their period of study, including textbooks and other course materials. International students who have school-age dependants need to take into consideration expenses for their dependants during the time they are living in Sydney, including school fees. Further information is available at:

www.uts.edu.au/about/sydney/cost.html

From 2014 all international students will be required to pay a student services and amenities fee (SSAF) each semester they are enrolled. The SSAF contributes to the provision of amenities and non-academic services for students. As an estimation of the cost, in 2012 the SSAF was A\$131.50 a semester for full time students (those enrolled with a study load of 18 credit points or higher a semester). SSAF is subject to annual government set indexation increase and is therefore likely to be higher in 2014.

Further information is available at:

www.sau.uts.edu.au/fees/other/service.html

SERVICES AND FACILITIES

SUPPORT FOR STUDENT LEARNING

Student services

The Student Services Unit provides a range of professional services to support different aspects of student life and learning at UTS.

telephone +61 2 9514 1177 fax +61 2 9514 1172 email student.services@uts.edu.au www.ssu.uts.edu.au

Orientation

UTS offers a free program of activities and a series of integrated study success lectures before semester begins to help new students manage the transition to university study. There are specially tailored components for part-time, postgraduate and international students, and recent school leavers.

www.orientation.uts.edu.au

Peer network

The peer network program enlists the aid of existing students to assist with the orientation of new students. Both undergraduate and postgraduate students can get involved.

www.ssu.uts.edu.au/peernetwork

Careers

The careers service at City campus offers career guidance and assists with job placement for students seeking permanent, casual or vacation work.

telephone +61 2 9514 1471 www.careers.uts.edu.au

Chaplaincy

Visiting chaplains and multi-faith centre rooms are available to students. Chaplains come from a number of different faith traditions including different Christian denominations, Buddhism, Judaism and Islam.

telephone +61 2 9514 2523 www.ssu.uts.edu.au/chaplaincy

Counselling

Counsellors are available at both City and Kuring-gai campuses. The service is free of charge and confidential.

City campus telephone +61 2 9514 1177

Kuring-gai campus telephone +61 2 9514 5342 www.ssu.uts.edu.au/counselling

English language and academic literacy

Higher education language and presentation support staff assist students with workshops, one-on-one and group consultations, and drop-in support for developing English language, academic writing, academic presentation and conversation skills. These services are free of charge. In between teaching periods, they provide workshop programs on academic writing, tutorial presentation and pronunciation at a nominal cost.

telephone +61 2 9514 1177 www.ssu.uts.edu.au/helps

Financial assistance

Financial assistance staff assist students with personal financial matters, student loans, Youth Allowance, Austudy and other Centrelink benefits. Students on low incomes may be eligible for grants and assistance in relation to computer access.

telephone +61 2 9514 1177 www.ssu.uts.edu.au/fassist

Health

Experienced male and female doctors from diverse backgrounds and clinical interests are available at City campus.

telephone +61 2 9514 1177 email Liza.Head@uts.edu.au www.ssu.uts.edu.au/health

Housing

University housing offers four residences to students, all within easy access to City campus. The housing service also provides assistance to students in locating short-term and long-term accommodation in the private rental and share accommodation market.

telephone +61 2 9514 1529 email Amit.Mitra@uts.edu.au www.housing.uts.edu.au

Special needs

The University has a range of services and procedures to improve access for students with special needs. The special needs service is the central point of contact for students with disabilities and ongoing illnesses or conditions that affect their studies. Consultations with special needs staff about the physical environment, course requirements and the services available can be made well ahead of enrolment, or at any time during enrolment.

Many UTS courses require students to successfully undertake fieldwork, internships and work-integrated learning. UTS is committed to making education accessible and endeavours to accommodate the needs of students with disabilities and illnesses to the greatest extent possible.

Students who have a disability that may affect their participation in work-integrated learning components of their course should discuss this with special needs service staff prior to enrolment. The academic liaison officer within the student's faculty should be contacted for advice as necessary.

telephone +61 2 9514 1177 fax +61 2 9514 1172 email special.needs@uts.edu.au www.ssu.uts.edu.au/sneeds

Peer-assisted learning

UTS: Peer Assisted Study Success (U:PASS) is a peer-based learning program designed to assist students undertaking difficult subjects. U:PASS is offered in selected subjects across several faculties. Students meet in small study groups facilitated by peer leaders who have recently completed the subject and achieved high grades. U:PASS sessions are free, informal and responsive to students' different abilities and needs.

www.ssu.uts.edu.au/peerlearning

Computing facilities at UTS

UTS provides computer facilities for students at City and Kuring-gai campuses. There are over 1300 computers in computer lab and open spaces. There are also group pods for group work activities.

Open spaces have audio visual equipment, desk spaces for setting up a laptop, Wi-Fi connectivity and networked computers.

Student printing

Students can print and scan using the computer labs. There is also printing available from open space computers. As well as printing from a general access computer, students can print from any device by using the MyPrint facility. Details on how to use MyPrint can be found on the service desk knowledge base.

IT Support Centres

Students can get IT help from an IT Support Centre by phone, in person or online.

By phone

telephone +61 2 9514 2222

8am-9.30pm Monday to Friday and 9am-5pm Saturday and Sunday

In person

City campus, Broadway

CB02.04.12

9am-9.30pm Monday to Friday and 9am-5pm Saturday and Sunday

City campus, Haymarket

CM05C.01.41

9am-9.30pm Monday to Friday only

Online

Students can submit requests for assistance or search the IT knowledge base using the UTS Service Desk:

https://servicedesk.uts.edu.au

IT services and facilities on campus

Specific information about the full breadth of services, facilities, locations, contacts, IT use policies and email system is available at: www.itd.uts.edu.au

Computer training

In general, where computer training is a necessary part of a Commonwealth-supported place course, it is provided as part of that course. Students can also consult the Mathematics and ICT Study Centre (see page 36).

IT policies and guidelines

The University's electronic mail services are a part of the University's facilities and are intended for teaching, learning, research and administration in support of the University's mission.

The UTS Email Policy outlines appropriate use of, and access to, UTS email accounts:

www.gsu.uts.edu.au/policies/emailpolicy.html

The Guidelines for the Use of Email complement the UTS Email Policy, and should be read in conjunction with this policy:

www.gsu.uts.edu.au/policies/emailguidelines.html

The Acceptable Use of Information Technology Facilities Policy applies to all UTS IT facilities, including email accounts:

www.gsu.uts.edu.au/policies/itfacilities.html

Copyright at UTS

Downloading and / or copying copyright-protected material is illegal. Information about copyright laws is available at:

www.lib.uts.edu.au/about-us/policies-guidelines/copyright-and-uts

Bridging courses

Chemistry bridging course

For first-year chemistry subjects, it is strongly recommended that students have either performed well in HSC chemistry (i.e. band 5 or 6) or have some other suitable prior knowledge. UTS Bridging Chemistry is a bridging course designed to prepare students without such prior knowledge for the study of chemistry at tertiary level. The course includes lectures and demonstrations, tutorial and problem-solving sessions, self-paced learning and laboratory experiences.

UTS: Science, Academic Administration City campus, Broadway telephone +61 2 9514 9985 fax +61 2 9514 1656

email science.admin@uts.edu.au

Mathematics bridging subjects

The Mathematics and ICT Study Centre (see page 36) provides bridging subjects for students who need mathematics, statistics and basic computing skills for their studies at UTS. If groups of students have particular needs, centre staff can design a bridging subject specifically to meet these needs.

Bridging Mathematics: Day and evening classes are available.

- The Algebra and Functions course is a one-week course designed mainly for students who have not studied Year 11 or 12 Mathematics (2 unit). It is suitable for students who studied General Mathematics at the HSC and are enrolling in courses in business, biological sciences, building and architecture. It is an introduction to basic topics. It is suggested that students also take Introduction to Calculus.
- The Introduction to Calculus course is a one-week course designed mainly for students who have not studied Year 11 or 12 Mathematics (2 unit). It is suitable for students who studied General Mathematics at the HSC and are enrolling in courses in business, biological sciences, building and architecture. It is strongly suggested that students take Algebra and Functions before taking this course.
- The Maths Extension 1 course is a two-week course designed for students who studied Mathematics (2 unit) at the HSC. It is not suitable for students who studied General Mathematics at the HSC.

These courses offered are free for UTS students and carry no equivalent full-time student load (EFTSL) value.

Mathematics Preparation for Nursing: This subject is run during the evening in February. It gives a general introduction to mathematics and science for students entering nursing courses. This subject is free of student contribution amounts and carries no EFTSL value. If there is demand for it, the subject may also be run in July.

Mathematics Bridging for Education: This subject is run in February to assist students entering primary education courses. It is free of student contribution amounts and carries no EFTSL value. If there is demand for it, the subject may also be run in July.

Foundation Mathematics: This subject runs in both Autumn and Spring semesters. It covers much of the content of the Mathematics (2 unit) HSC course and some elements of the Mathematics Extension 1 HSC course, and prepares students for entry into courses that require mathematical skills, such as business; design, architecture and building; engineering; information technology; and science. Students who wish to enrol at the University in the following year are encouraged to take the subject as a non-award subject.

Dr Mary Coupland City campus, Broadway telephone +61 2 9514 2241 email Mary.Coupland@uts.edu.au

Physics bridging course

This course is a short introduction to studying physics, designed primarily for students enrolling in engineering or physical sciences (applied chemistry, applied physics, forensic science, nanotechnology) degrees at UTS who have limited background in physics. The course does not attempt to cover HSC physics, but it provides useful advice and background knowledge to assist with tertiary study at UTS.

This course benefits students who are:

- recent school leavers who did not complete HSC physics
- $\bullet \qquad \text{mature-age students returning to study after an extended period} \\$
- not strong at mathematics (band 4 or below in HSC mathematics).

Students who have done HSC physics and have reasonable mathematical ability are advised not to do the bridging course as they will have sufficient background for first-year physics subjects.

This course is not suitable for students intending to take an entry examination where physics forms part of the examination, for example the GAMSAT examination.

Dr Jurgen Schulte City campus, Broadway telephone +61 2 9514 2206 fax +61 2 9514 2219 email Jurgen.Schulte@uts.edu.au

Academic liaison officers

Each faculty has at least one academic liaison officer (ALO) who is a member of academic staff. ALOs can approve requests for adjustments to assessment arrangements for students with disabilities or ongoing illnesses. ALOs are also contacts for students who experience difficulties because of carer responsibilities.

Students are encouraged to see the special needs service (see page 34) before contacting an ALO.

Further information is available from the relevant faculty or at: www.ssu.uts.edu.au/sneeds/services/assessment/alo.html

STUDENT LEARNING CENTRES

Chemistry Learning Centre

The Chemistry Learning Centre assists students in their chemistry learning in undergraduate courses in the faculties of Business; Engineering and Information Technology; Health; and Science. The centre is open as demand requires. The centre is staffed by academic staff from the School of Chemistry and Forensic Science. Notices detailing the opening times and personnel on duty are posted as necessary.

For further information, contact:

Era Koirala CB04.4.31E

City campus, Broadway telephone +61 2 9514 1787

email Era.Koirala@uts.edu.au

www.science.uts.edu.au/facilities/centre/chemistry.html

Jumbunna Indigenous House of Learning

Jumbunna Indigenous House of Learning provides a central meeting place for Australian Indigenous students studying at UTS. At Jumbunna, Indigenous students, staff and researchers are committed to improving education and research outcomes that benefit Indigenous communities. Jumbunna focuses on:

- activities that support the recruitment, retention and graduation rates of Indigenous Australians
- activities that support the teaching and learning issues of Indigenous students and the promotion of Indigenous studies within the University
- research and advocacy of issues of concern to the Indigenous community.

Student services

Jumbunna Indigenous Student Services provides a range of academic and learning support programs to Indigenous students studying at UTS. Services and facilities available to students include academic and fully funded tutorial assistance, a range of programmed cultural activities, group and private study areas, student common room and kitchen, and two computer laboratories at City and Kuring-gai campuses.

CB01.6 – Building 1, level 6 City campus, Broadway telephone +61 2 9514 1902 or 1800 064 312 (tollfree) fax +61 2 9514 1894

KG02.4.47 – Building 2, level 4, room 47 Kuring-gai campus email jumbunna@uts.edu.au www.jumbunna.uts.edu.au

Mathematics and ICT Study Centre

The Mathematics and ICT Study Centre offers free assistance with mathematics, statistics and basic computing to students from all faculties. The centre can also assist students with common computing packages such as wordprocessing, spreadsheets, presentation managers, Mathematica, Minitab and SPSS.

The centre runs subjects to assist with particular courses, for example, mathematics for nursing, and workshops such as examination preparation workshops for specific mathematics subjects. Support tutorials are run by staff from the centre in selected undergraduate subjects. The centre also runs short bridging courses (see page 35) in mathematics, statistics and computing. Centre staff are active in education research and the development of resources.

UTS LIBRARY

UTS has two campus libraries, the City Campus Library and the Kuring-gai Campus Library. UTS is widely recognised as providing library services and facilities that are innovative, creative and user-focused. UTS Library offers numerous online and on-campus services, facilities and resources to support the University's educational and research programs. It provides access to an extensive range of electronic resources including more than 46,000 full-text e-journals (unique titles), over 98,000 e-books, and a collection of approximately one million books, journals and audiovisual items.

Many library services are available online via the library's website, 24 hours a day. These include the catalogue, subject resources, tutorials, tours and workshops, referencing and writing, borrowing, renewals, BONUS+, and Ask a Librarian. These can also be accessed through any of the library's 420 computers. The library is now on Facebook, Twitter, YouTube, Foursquare and Flickr.

Facilities on both campuses include individual and group study areas, silent study rooms, discussion and group presentation rooms, a special needs room with adaptive equipment and software, wireless connection zones for laptops, printing and photocopying, express catalogues, self-service loans machines and computer availability checking machines. Library staff provide face-to-face assistance at service points in the library and deliver a comprehensive information skills training program throughout the semester.

The Scholars' Centre, International Cultural and News Centre, Australian Culture Lounge, Baya Ng'ara Nura Learning Place and Create Space are located in the City Campus Library, and the Olympic and Event Studies Room and James O'Brien Room are available for student use at the Kuring-gai Campus Library.

Further information is available at: www.lib.uts.edu.au

CAMPUS LIFE

Child care

UTS Child Care Inc. (UTSCC) coordinates all childcare services at UTS. Hours of operation are 8am to $6.30\,\mathrm{pm}$ at City campus and $7.45\,\mathrm{am}$ to $6.15\,\mathrm{pm}$ at Kuring-gai campus.

Care is available for 0-5 year olds throughout the year. Child care can be accessed on a full-time or part-time basis.

UTS Child Care centres charge a fee comparable to other childcare centres. It is strongly suggested to contact the childcare centre as early as possible as waiting lists may exist. UTS staff and students may be eligible for a number of subsidies to assist with the cost of child care.

Waiting list application forms can be submitted at:

Radio 2SER (107.3 FM)

2SER is a community radio station, offering a diverse range of programs, which are mostly provided by volunteers. The station broadcasts 24 hours a day and is heard throughout Sydney on 107.3 FM, digital radio and mobile apps. The station is jointly owned by UTS and Macquarie University, and actively encourages student participation.

The station's main studios are located on Broadway, Ultimo (in the Terraces), next to the Co-op Bookshop.

More information and information about becoming involved with 2SER is available at:

www.2ser.com

Students' Association

The Students' Association (SA) is the representative body for students at UTS. It represents all students of the University on welfare and education issues.

The Students' Representative Council (SRC) is the group of elected students that enacts, directs and coordinates the work of the SA. Every UTS student has the right to stand for election to the SRC and to vote in the annual elections.

The University supports the existence of professional advocacy staff, for academic and non-academic appeals and to run the peer tutor scheme.

The SA also operates a second-hand textbook shop, a free weekly breakfast, the Bluebird Brekkie Bar, a student newspaper, *Vertigo*, and it facilitates student support by providing various information, education and action campaigns to benefit students. The Students' Association, with the University, has also opened a free legal service for all UTS students.

The Students' Association is home to a number of collectives that run campaigns and hold regular events and meetings.

UTS Gallery and Art Collection

UTS Gallery fosters innovative contemporary art, cutting edge design and social inquiry by leading and early career practitioners. As a forum to explore new ideas and culturally diverse perspectives, the gallery expresses the spirit of UTS. Situated on Harris Street in the Faculty of Design, Architecture and Building, UTS Gallery is an exciting place where creativity and technology meets. The vibrant exhibition program is accompanied by publications, talks, forums, performances, workshops and an annual artist-in-residence.

UTS Art Collection comprises over 1000 artworks in its permanent and loan collections in a variety of styles and media, most notably post-1960s paintings, prints and photography. Collection staff provide curatorial services and displays of quality Australian art as an integral element of a vibrant, inclusive campus.

UTS Union Ltd

The UTS Union is a hub for student engagement and activity. The Union provides students with access to over 100 social and sporting clubs which students can join and be a part of. In addition, the Social Programs team facilitates the creation of new clubs in conjunction with students each semester.

To assist students with the transition to life at UTS, the Sporting and Social Programs teams provide students with a diverse range of activities and events that encourage interaction and engagement within the wider UTS community. Activities available to students range from tours to semester parties to sporting teams and university games championships.

Spanning the two UTS campuses, the Union provides discounted food and beverage facilities, retail outlets and fitness amenities for the benefit of UTS students and staff. Full details are available on the UTS Union website.

SAFETY, SECURITY AND SUSTAINABILITY

Safety and security

The University is committed to providing a safe and healthy workplace for students, staff and visitors. Students and staff must take reasonable care of themselves and others, cooperate with actions taken to protect health and safety and not wilfully place at risk the health, safety or wellbeing of others.

Emergency procedures

Report emergencies to security (24 hours) by dialling 6 from any internal telephone or 1800 249 559 from mobile phones.

Evacuation procedures, including an emergency evacuation video, are available at:

www.fmu.uts.edu.au/security/emergencies/evacuation.html

First aid and health service

See the first aid poster in your work or study area for the name, location and phone number of first aid officers. If there is no first aid officer nearby, contact security (24 hours) by dialling 6 from any internal telephone or 1800 249 559 from mobile devices. All security officers are trained in first aid.

The UTS Health Service at City campus, Broadway provides a confidential general medical practice for students and staff. Appointments can be made on:

telephone + 61 2 9514 1177

Hazard, accident/incident reporting

If you are involved in an accident, or if you identify a hazard at UTS, then you should report it using the Hazard and Incident Reporting Online (HIRO) system at:

www.safetyandwellbeing.uts.edu.au/accidents/reporting.html

If the accident is serious, report it to security (24 hours) by dialli

If the accident is serious, report it to security (24 hours) by dialling 6 from any internal telephone or 1800 249 559 from mobile devices.

Safe work practices

Always follow safe work practices as provided by your lecturer, demonstrator or other supervising staff. This includes wearing any protective equipment required.

Ask for help if you are unsure about how to use a piece of equipment or undertake a task, particularly before carrying out new or unfamiliar work.

Smoke free environment

Smoking is not permitted inside any building on any campus of the University, nor in any University vehicle. This includes areas adjacent to entrances and exits of buildings, windows and air intakes for air conditioners. Smoking is only permitted in designated smoking areas. Dispose of cigarette butts in the bins provided.

Contact the UTS Health Service for advice regarding quit smoking programs:

telephone +61 2 9514 1177

Campus shuttle bus

The University operates a number of courtesy shuttle bus services for UTS students and staff.

The Kuring-gai shuttle bus service travels between City campus and Kuring-gai campus. The security shuttle bus service travels between City campus, Haymarket, City campus, Broadway and student housing buildings.

Timetables for shuttle bus services are available at:

http://datasearch.uts.edu.au/about/maps directions/shuttle.cfm

Lost and found

The security office is the first point of call to check for lost property or to hand in found items. Items are kept for three months and, if unclaimed, may become the property of the person who found the item.

Security systems

All buildings are accessible by a personal identification number (PIN) and are protected by an electronic intrusion detection system and a closed circuit TV network. PINs are available from faculty offices.

Sustainability

UTS has a strong commitment to sustainability across all areas of the University in research, teaching and learning, campus operations and community engagement.

Transport

UTS promotes sustainable transport with extensive links to trains, buses and light rail, a shuttle bus between campuses, a carpooling program, and bike parking with lockers and showers:

www.green.uts.edu.au/initiatives/transport

Recycling and waste

UTS has extensive recycling programs: www.green.uts.edu.au/initiatives/recycling

Energy and climate change

The University has ambitious greenhouse gas reduction targets and energy efficiency initiatives underway:

www.green.uts.edu.au/initiatives/energy

City campus upgrade

Sustainability is at the core of the City Campus Master Plan, a \$1 billion campus upgrade:

www.fmu.uts.edu.au/masterplan

Community engagement

Under the UTS Green banner, students and staff participate in a wide range of sustainability initiatives including events, games, competitions, films, etc.:

- www.green.uts.edu.au
- www.facebook.com/UTSGreen

UTS collaborates with corporate and community partners and is a member of the Australasian Campuses Towards Sustainability (ACTS).

Research

Sustainability research at UTS is trans-disciplinary in nature. Examples include the following:

- Institute for Sustainable Futures:
- www.isf.uts.edu.au
- Climate Change Research Cluster:
- www.c3.uts.edu.au
- Centre for Technology in Water and Waste:
- www.research.uts.edu.au/strengths/ctww

Teaching and learning

Sustainability is represented across all faculties and specific study can be undertaken across almost the entire range of degrees and disciplines:

www.green.uts.edu.au/about/teaching-learning

In addition, UTS administers the national sustainability teaching and learning resources hub:

www.sustainability.edu.au

Governance

The UTS Sustainability Strategy 2012–2015 is available as a downloadable PDF (319 kb) at:

www.green.uts.edu.au/about/sustainability-strategy/sustainabilitystrategy.html

PRINCIPAL DATES

January

 New Year's Day – public holiday

- 1 Start of Autumn semester for graduate research students¹
- 2 Enrolment period for new graduate research students for Autumn semester commences (to 28 March)¹
- 2 Summer session classes recommence (to 1 February)
- 3 Due date for payment for Summer session subjects
- 3 Early January round UAC undergraduate offers e-released (from 9am)
- 3 UTS Info Day, City campus, Broadway (9am to 4pm)
- 4 Closing date (midnight) for UAC change of preference for main round undergraduate offers
- 7 Census date for Summer session subjects last day to withdraw from subjects³
- 7 Enrolment of new students for Autumn semester 2013 commences (to 8 March)¹
- 7 Supplementary centrally conducted examinations
- 11 Last day to lodge application for review of final assessment result for Spring semester 2012
- 11 Release of results for December session 2012
- 16 Main round of UAC undergraduate offers e-released (from 9pm)
- 18 Deadline for continuing students to re-enrol in subjects for 2013 late enrolment fee of \$250 applies from 19 January
- 23 Closing date for change of UAC preference for late round of undergraduate offers
- 25 Last day to submit appeal against exclusion from Spring semester 2012
- 28 Australia Day public holiday
- 28 NSW public school holidays end (commenced 24 December 2012)
- 30 Late round UAC undergraduate offers e-released (from 9pm)
- 31 Closing date (midnight) for UAC change of preference for final round undergraduate offers
- 31 Closing date for applications for direct admission for specified undergraduate courses, and for honours courses, non-award and cross-institutional enrolment in Autumn semester 2013
- 31 Third round closing date for local postgraduate coursework applications for Autumn semester 2013

February

- 1 Summer session teaching ends for subjects with centrally conducted exams (commenced 3 December 2012)
- 4–8 Centrally conducted examinations for Summer session
- 6 Final round undergraduate UAC offers e-released (from 9am)
- 11–22 Orientation for new students, City campus
- 14 UTS Union Clubs and Activities Day, Kuring-gai campus
- 14–15 Orientation for new students, Kuring-gai campus
- 20 Release of results for Summer session
- 20 UTS Union Clubs and Activities Day, City campus
- 22 Due date for payment of fees for continuing international students for Autumn semester 2013
- 22 UTS Union O'fest, City campus
- 25 Autumn semester classes commence

March

- 1 Closing date for applications for UTS Union Elite Athlete Program (sports scholarships)²
- 2 Late Orientation day for new students
- 8 Enrolment of new students for Autumn semester 2013 ends (commenced 7 January)¹
- Last date to apply for name change (for graduation program and on-stage pronunciation) and pay outstanding fees/fines owed to UTS for graduation at Autumn 2013 graduation ceremonies
- 8 Last day to be admitted to a course or enrol in (add) subjects for Autumn semester 2013¹
- 8 Mid-semester centrally conducted examinations timetable available
- 11 March session commences (ends 19 April)
- 14 Due date for payment of fees for domestic fee-paying students for Autumn semester 2013

- 14 Last date for students to have a status of passed displayed in My Student Admin for graduation at Autumn 2013 graduation ceremonies
- 14 UTS Careers Fair
- 18 Due date for payment of upfront or partial contributions for students in Commonwealth-supported places for Autumn semester 2013
- 21 Graduation registration opens (closes 3 April)
- 23 Due date for payment for March session subjects
- 28 Census date for Autumn semester and March session subjects last day to withdraw from coursework subjects³
- 28 Enrolment of new graduate research students for Autumn semester ends (commenced 2 January)¹
- 29 Good Friday public holiday
- 31 Closing date for applications for admission to postgraduate research courses from international students for Spring semester 2013

April

- 1 Easter Monday public holiday
- 3 Graduation registration closes (opened 21 March)
- 8 Applications available for undergraduate (where applicable) and postgraduate courses for Spring semester 2013
- 8 Applications for internal course transfer for Spring semester 2013 open (closes 28 June)
- 11 Due date for payment of student services and amenities fee for Commonwealth-supported students for Autumn semester 2013
- 15-19 Mid-semester centrally conducted examinations
- 15-26 NSW public school holidays
- 19 March session ends (commenced 11 March)
- 22-26 Vice-Chancellor's week, Autumn semester
- 25 ANZAC Day public holiday
- 26 Release of results for March session
- 29 May session commences (ends 7 June)

May

- 1–13 Graduation ceremonies, City campus
- 2 Due date for payment for May session subjects
- 3 Examination timetable for centrally conducted examinations for Autumn semester available
- 7 Census date for graduate research degree thesis subjects⁵
- 7 Census date for May session subjects³
- 7 Last day for graduate research students to lodge application to change attendance pattern, withdraw, or take leave of absence from thesis subjects for Autumn semester
- 10 Last day to lodge an application for review of final assessment result for March session
- 14 Due date for payment of student services and amenities fee for domestic higher degree research students for Autumn semester 2013
- 31 Closing date for postgraduate research degree applications for Spring semester 2013
- 31 First round closing date for local postgraduate coursework applications for Spring semester 2013

June

- 7 Closing date for undergraduate UAC applications for Spring semester 2013
- 7 Last teaching day of Autumn semester
- 7 May session ends (commenced 29 April)
- 8-28 Centrally conducted examinations for Autumn semester
- 10 Queen's Birthday public holiday
- 11 Enrolment of new students for Spring semester 2013 commences (to 9 August)¹
- 14 Release of results for May session
- 15 Closing date for applications for admission to undergraduate and postgraduate coursework courses from international students for Spring semester 2013
- 17 July session commences (ends 26 July)
- 21 Undergraduate UAC offers for Spring semester 2013 e-released
- 26 Due date for payment for July session subjects
- 28 Closing date for applications for internal course transfer for Spring semester 2013 (opened 8 April)
- 28 Closing date for direct applications for specified undergraduate courses and for non-award and cross-institutional enrolment in Spring semester 2013

- 28 Closing date for international exchange outbound applications
- 28 Farewell ceremony for international students completing studies in Autumn semester 2013
- 28 Last day to lodge an application for review of final assessment result for May session
- 28 Second round closing date for local postgraduate coursework applications for Spring semester 2013
- 29 International graduation ceremonies (offshore) commence (end 4 July)
- 30 Last day of Autumn semester for graduate research students

July

- Census date for July session subjects³
- 1 Enrolment period for new graduate research students for Spring semester 2013 commences (to 30 August)¹
- 1 Start of Spring semester for graduate research students
- 1-12 NSW public school holidays
- 4 International graduation ceremonies (offshore) end (commenced 29 June)
- 17 Release of Autumn semester results
- 22-26 Orientation for new students
- 23 Supplementary centrally conducted examinations
- 26 Due date for payment of fees for continuing international students for Spring semester 2013
- 26 July session ends (commenced 17 June)
- 29 Spring semester classes commence
- 31 Last day to lodge an application for review of final assessment result for Autumn semester 2013

August

- 2 Last date to apply for name change (for graduation program and on-stage pronunciation) and pay outstanding fees/fines owed to UTS for graduation at Spring 2013 graduation ceremonies
- 2 Release of results for July session
- 3 Late Orientation day for new students
- 6 UTS Vacation, Internship and Volunteer Fair
- 7 Applications available for undergraduate courses for Autumn semester 2014
- 9 Enrolment of new students for Spring semester 2013 ends (commenced 11 June)¹
- 9 Last day to be admitted to a course or to enrol in (add) subjects for Spring semester 2013¹
- 12 August session commences (ends 20 September)
- 14 Last date for students to have a status of passed displayed in My Student Admin for graduation at Spring 2013 graduation ceremonies
- 16 Due date for payment of fees for domestic fee-paying students for Spring semester 2013
- 16 Last day to lodge an application for review of final assessment result for July session
- 16 Mid-semester centrally conducted examinations timetable available
- 20 Closing date for International Postgraduate Research Scholarships (IPRS)²
- 20 Due date for payment of upfront or partial contributions for students in Commonwealth-supported places for Spring semester 2013
- 22 Graduation registration opens (closes 6 September)
- 25 Due date for payment for August session subjects
- Census date for Spring semester and August session subjects last day to withdraw from coursework subjects³
- 30 Enrolment of new graduate research students for Spring semester 2013 ends (commenced 1 July)¹
- 31 UTS Open Day, City campus

September

- 5 Applications available for direct admission for specified undergraduate courses, and for honours courses, non-award and cross-institutional enrolment for Autumn semester 2014
- 5 Applications available for postgraduate coursework programs for Autumn semester 2014
- 5 Applications for internal course transfer for Autumn semester 2014 open (close 13 December 2013)
- 5 Graduation registration closes (opened 22 August)
- 7 UTS Open Day, Kuring-gai campus
- 12 Due date for payment of student services and amenities fee for Commonwealth-supported and domestic fee-paying students for Spring semester 2013
- 20 August session ends (commenced 12 August)

- 23 NSW public school holidays commence (end 7 October)
- 23–27 Mid-semester centrally conducted examinations
- 27 Release of results for August session
- 30 Closing date for applications for admission to postgraduate research courses from international students for Autumn semester 2014
- 30 Closing date for on-time undergraduate UAC applications
- 30 Graduation ceremonies, City campus, commence (end 4 October)
- 30 October session commences (ends 8 November)
- 30 Vice-Chancellor's week, Spring semester commences (ends 4 October)

October

- 3 Due date for payment for October session subjects
- 4 Examination timetable for centrally conducted examinations for Spring semester available
- 4 Graduation ceremonies, City campus, end (commenced 30 September)
- 4 Vice-Chancellor's week, Spring semester ends (commenced 30 September)
- 7 Labour Day public holiday
- 7 NSW public school holidays end (commenced 23 September)
- 8 Census date for graduate research degree thesis subjects⁵
- 8 Census date for October session subjects³
- 8 December session 2013 and Summer session 2014 timetable published online
- 8 Last day for graduate research students to lodge application to change attendance pattern, withdraw, or take leave of absence from thesis subjects for Spring semester
- 11 Last day to lodge an application for review of final assessment result for August session
- Due date for payment of student services and amenities fee for domestic higher degree research students for Spring semester 2013
- 25 Closing date for Australian Postgraduate Awards, RL Werner and University doctoral scholarships²
- 25 Closing date for postgraduate research degree applications for Autumn semester 2014
- 28 2014 University timetable published online
- 31 Closing date for late undergraduate UAC applications (late fees apply)
- 31 First-round closing date for local postgraduate coursework applications for Autumn semester 2014

November

- 8 Last teaching day of Spring semester
- 8 October session ends (commenced 30 September)
- 9–29 Centrally conducted examinations for Spring semester
- 15 Release of results for October session
- 18 December session commences (ends 3 January 2014)
- 27 Due date for payment for December session subjects
- 29 Closing date for international exchange outbound applications
- 29 Closing date for late undergraduate UAC applications (late fees apply)
- 29 Farewell ceremony for international students completing studies in Spring semester 2013
- 29 Last day to lodge an application for review of final assessment result for October session
- 29 Second round closing date for local postgraduate coursework applications for Autumn semester 2014

December

- 2 Census date for December session subjects³
- 2 Elite Athlete Program (sports scholarships) applications open²
- 2 Summer session commences (to 31 January 2014)
- 13 Closing date for applications for internal course transfer for Autumn semester 2014 (opened 5 September)
- 13 Closing date for late undergraduate UAC applications (late fees apply)
- 15 Closing date for application for admission to undergraduate and postgraduate coursework courses from international students for Autumn semester 2014
- 16 Examination timetable for centrally conducted examinations for Summer session available
- 18 Release of Spring semester results

- 23 NSW public school holidays commence (to 27 January 2014)
- 25 Christmas Day public holiday
- 26 Boxing Day public holiday
- 31 Last day of Spring semester for graduate research students
- tba Australian Tertiary Admission Ranks (ATARs) released by UAC⁴
- tba NSW Higher School Certificate (HSC) results released⁴
- 1. Enrolment for new coursework students occurs online or on campus during designated enrolment sessions. New students accept their offer via www.start.uts.edu.au Graduate research students should refer to the University Graduate School enrolment website (www.gradschool.uts.edu.au).
- 2. Information about the application and closing dates for all scholarships is available on the scholarships website (http://datasearch.uts.edu.au/study/scholarships/).
- 3. HECS-HELP, FEE-HELP, domestic award, and international fee payment information is available from the Student Administration website (www.sau.uts.edu.au/fees). Full financial liability applies after the census dates. For onshore and offshore census dates and details for all teaching periods, see Academic year dates.
- 4. Dates for the release of 2012 HSC results and ATARs to be confirmed; see NSW Government HSC website (www.nsw.gov.au/higher-school-certificate) and UAC website (www.uac.edu.au) for further information.
- 5. Census dates for research degree students are later in the year for Autumn and Spring semesters due to the flexible start dates for these students at UTS. Full financial and load liability applies after these census dates. More information is available at: www.gradschool.uts.edu.au

Note: Information is correct as at September 2012. The University reserves the right to vary any information described in Principal dates 2013 without notice.

COURSE AREA INFORMATION

UTS: BUSINESS

Information for students

UTS: Business is located on two campuses: City campus (Haymarket) and Kuring-gai campus (Lindfield).

UTS: Business courses are administered by the UTS Business School. The business school consists of five discipline groups: Accounting; Economics; Finance; Management; and Marketing.

All postgraduate courses are administered by the Graduate School of Business.

Location, contacts and inquiries

Student Centre, Haymarket

The Student Centre, Haymarket manages the student administration activities of the faculty and is responsible for a broad range of activities including admission, enrolment, graduation, course information, promotion and student matters.

Graduate attributes

A graduate from the UTS Business School is expected to possess the following attributes:

- Business knowledge and concepts: be able to operate effectively
 with business knowledge of sufficient depth in different
 professions, industry and society, both locally and globally.
- Critical thinking, creativity and analytical skills: be able
 to apply and demonstrate critical and analytical skills, and
 innovation in business practice.
- Communication and Interpersonal skills: be able to use communication skills (reading/writing and listening/speaking) to work with others and be self reflective.
- Attitudes and values: have an awareness of obligations and responsibilities in business and their impact.
- Business practice-oriented skills: be able to integrate generic, technical and professional skills including being proficient in technology, to operate effectively in various industry contexts with the capacity to anticipate and respond to change.

These graduate attributes overarch each of the Business School's undergraduate and postgraduate programs, but each of these programs in turn have their own distinct set of graduate attributes, known as learning goals, which need to be assured as part of the Business School's AACSB accreditation, through a set of aligned learning objectives.

AIESEC

AIESEC is the world's largest student organisation. Existing in 110 countries around the world and with over 38,000 members, AIESEC aims to promote cultural awareness and international understanding, develop practical managerial skills for its members and bridge the gap between students, academics and the business sector.

It is AIESEC's membership base of determined and committed students who contribute to changing people's lives and developing themselves as leaders. This is achieved through activities such as AIESEC's international exchange programs, team building, marketing, project management and national and international conferences. AIESEC also provides opportunities to gain business contacts and make new friends.

AIESEC provides students with the ability not only to do something for themselves, but also to have an impact on the lives of people around the world in many different ways.

Further information on exchange and membership is available at:

CM05B.1.06

City campus, Haymarket email aiesec.uts@aiesec.net www.aiesec.org

Short business courses and executive development

UTS: Business offers a range of executive development programs and short, intensive courses in specialist professional topics. Executive certificate programs are offered in banking, business accounting, business management, economics, event management, finance, financial analysis, insurance, leadership, leisure and tourism, marketing, project management and quantitative finance. In addition to its advertised programs, UTS: Business also develops in-house programs tailored to specific corporate needs. Business specialists within UTS: Business also co-create customised programs with corporate leaders using problem-solving and strategic design techniques to advance their talent, operations and competitive edge.

Further information is available from:

Executive Development Unit telephone +61 2 9514 3504 fax +61 2 9514 3510 email executive.development@uts.edu.au www.gsb.uts.edu.au/edu

Undergraduate course information

UTS: Business offers a wide range of courses spanning the traditional disciplines of accounting, economics, finance, management and marketing.

Additional rules of importance to undergraduate coursework students

Credit recognition (exemptions)

Students who are enrolled in UTS: Business courses and who have previously studied at another university or other recognised tertiary educational institution may be eligible for credit recognition in the form of subject exemptions, if the subjects previously studied are deemed by UTS: Business to be equivalent to those specified for their course.

Requests for exemptions for more than one-third and up to twothirds of the degree may be considered by the Business School Board. Students are required to apply for exemptions at enrolment in their first semester of study. If a student wishes to request exemptions after their first semester of study they are advised to make an appointment with a student adviser in the student centre either at Haymarket or Kuring-gai.

Students should note that exemptions given in one course at UTS will not necessarily be transferred to another course at UTS after a successful internal course transfer has occurred.

Further information on credit recognition for undergraduate students in UTS: Business is available at:

www.business.uts.edu.au/student/admin/rpl/

Further details can also be obtained from the Student Centres at Haymarket and Kuring-gai.

Credit recognition forms are available at:

www.sau.uts.edu.au/forms

Internal course transfer

While students may gain entry to a particular course, they may choose to apply for entry to a different course within the field of business. Where a student articulates from one level of study to another, only one testamur is issued. Further information is available from the Student Centre, Haymarket.

Students from combined degrees: Students in combined degrees should normally graduate from their combined degree at one ceremony, though receiving two testamurs.

If a student wishes to graduate with the Bachelor of Business only, the student should meet one of the following criteria:

- a UAI/ATAR score equivalent or higher to the entry level for the year they began their studies, or
- the standard internal course transfer criteria, that includes an overall credit average and a minimum of 48 credit points of completed study.

If a student is successful in transferring to the single Bachelor of Business degree, the student must satisfy the academic and credit point requirements of the Bachelor of Business, which are:

- 48 credit points comprising business core subjects
- 48 credit points comprising a first business major subject
- 48 credit points comprising either a second business major; or two sub-majors; or one sub-major and four electives.

Internal course transfer information and forms are available at:

www.sau.uts.edu.au/enrolment/course/transfer

Academic progression

All students are expected to meet minimum academic requirements. Students must pass 50 per cent of the credit points in which they are enrolled each half year. If this requirement is not met, students are placed on academic caution. During a period of academic caution usually one half year, a student must consult with the designated academic course advisers from the relevant faculty for advice on their study plan; attend a study skills workshop program organised by the Student Services Unit; and enrol in no more than 24 credit points for the semester to which the period of academic caution applies.

Further information about academic caution is available at:

www.sau.uts.edu.au/academic/caution.html

Majors and sub-majors

To have a major or sub-major noted on a final transcript, students must complete at least 75 per cent of the subjects in that major or sub-major at UTS; the other 25 per cent of the subjects may be given as credit recognition from previous studies at another university (subject to approval), under any approved undergraduate course.

Policy on subject substitution

Where there is an overlap of a subject between majors and submajors, students must substitute an undergraduate subject chosen from within the particular discipline (subject to approval). The subject chosen should enable students to meet the objectives of the relevant major(s) or sub-major(s) and make up the required number of credit points. Students are still required to meet normal prerequisite conditions in choosing a substitute subject. As some majors have specific substitution rules, students should refer to the information on specific majors.

Students must apply for subject substitution before undertaking the subject. Subject substitution forms are available from the Student Centre, Haymarket and must be submitted back at the Student Centre, Haymarket at least four weeks before the start of the semester of intended study.

Electives

When choosing electives, students should be aware that all prerequisites must be met and that no elective may be materially similar to other subjects taken as part of the student's undergraduate degree. Students who wish to undertake cross-faculty electives within UTS, or do concurrent study with other universities, should seek approval from UTS: Business. UTS: Business reserves the right to approve a student's choice of electives. Students are accommodated in subjects depending on the availability of class places.

Students from other faculties applying to undertake business electives

Students from other faculties may undertake subjects offered by UTS: Business as an elective if they have met all the prerequisites. Students are accommodated in subjects depending on the availability of class places. It is the responsibility of students to ensure that their own faculty approves their choice of business elective(s) according to the requirements of the program in which they are enrolled.

Semester load

Full-time study is usually undertaken at the normal load of 24 credit points a semester. Students who wish to undertake more than the normal full-time load in one semester must have their study plan endorsed by a student adviser from the Student Centre, Haymarket. Part-time study is usually undertaken at the normal rate of 12 credit points a semester. Note that there are set criteria before approval can be granted to exceed the normal full-time load.

Attendance

Most courses are offered part time (one or two subjects a semester) or full time (three or four subjects a semester). Up to an extra two subjects (if offered) may be taken in Summer session to fast-track study. Local students may attend part time or full time. International students must enrol in a minimum of four subjects a semester to meet Department of Immigration and Citizenship requirements, and a maximum of four subjects a semester.

Subject attendance requirements

Students are required to be punctual and regular in attendance for all classes in the subjects in which they are enrolled.

It is the student's responsibility to study all material provided, or required to be accessed, to maximise their chance of meeting the objectives of the subject and to be informed of subject-related activities and administration.

International students in Australia are advised to attend all classes. Failure to attend may infringe conditions of the student visa.

Information on the campus, day and time that individual subjects are offered is available from the UTS timetable at:

http://timetable.uts.edu.au

Forms

All undergraduate forms are available at: www.sau.uts.edu.au/forms

Majors

A major consists of 48 credit points of study (eight 6-credit-point subjects) in a related area.

Students enrolled in the Bachelor of Engineering Bachelor of Business (C10065) (see page 148); Bachelor of Engineering Bachelor of Business Diploma in Engineering Practice (C10068) (see page 157); Bachelor of Business Bachelor of Laws (C10125) (see page 181); Bachelor of Business Bachelor of Business (C10169) (see page 214); Bachelor of Medical Science Bachelor of Business (C10163) (see page 208); Bachelor of Science Bachelor of Business (C10162) (see page 203); Bachelor of Business Bachelor of Computing (C10219) (see page 226); or any other combined degree, are ineligible to undertake the Information Technology major in the Bachelor of Business component of the combined degree. Students enrolled in these courses are required to complete a business major offered by a school or schools within UTS: Business. Majors are listed below.

Note: Details of the subjects within each major are provided in the study package directory.

- Accounting (MAJ08437)
- Economics (MAJ09209)
- Finance (MAJ08440)
- Financial Services (MAJ08068)
- Human Resource Management (MAJ08446)
- International Business (MAJ08442)
- Management (MAJ08438)
- Marketing (MAJ08441)
- Marketing Communication (MAJ08116)

Second major only:

- Business Law (MAJ09401)
- Information Technology (MAJ02041)
- Sport Management (MAJ08445)
- Tourism Management (MAJ08443)

Extended majors

An extended major consists of 72 credit points of study (12 6-credit-point subjects). An extended major in the Bachelor of Business allows students the option of pursuing a highly specialised study in one discipline area while still undertaking a cross-disciplinary year of study. Extended majors are listed below.

Note: Details of the subjects within each extended major are provided in the study package directory.

- Extended Economics (MAJ09402)
- Extended Finance (MAJ08060)
- Extended Management (MAJ08046)
- Extended Marketing (MAJ08063)

Sub-majors

A sub-major consists of 24 credit points of study in a related area. Sub-majors are available to all students except where specified.

It should be noted that not all subjects are offered in every semester and that not all sub-majors are available at both campuses. Sub-majors are listed below.

Note: Details of the subjects within each sub-major are provided in the study package directory.

- Advanced Advertising (SMJ08131)
- Advertising (SMJ08137)
- Economics (SMJ09028)
- Econometrics (SMJ09058)
- Event Management (SMJ08203)
- Finance (SMJ08123)
- Financial Planning (SMJ08214)
- Financial Reporting (SMJ08116)
- Human Resource Management (SMJ08128)
- International Accounting (SMJ08117)
- International Management (SMJ08129)
- Management (SMJ08130)
- Management Consulting (SMJ08109)
- Management Reporting (SMJ08195)
- Marketing (SMJ08138)
- Marketing Research (SMJ08132)
- Small Business Accounting (SMJ08120)
- Sport Management (SMJ08126)
- Strategic Marketing (SMJ08204)
- Tourism Management (SMJ08127)

Faculty-wide: international exchange

• International Business Studies (SMJ08139)

Sub-majors offered by other faculties

Faculty of Arts and Social Sciences

- Human Resource Development (SMJ08141)

Postgraduate course information

UTS: Business offers a range of master's degrees, graduate diplomas and graduate certificates by coursework. In addition, doctoral programs and research masters (by thesis) programs are also offered.

Further information and general inquiries on postgraduate course information is available from the Student Centres (see page 49) at Haymarket and Kuring-gai.

Postgraduate coursework

Exemptions

Exemptions are granted on the basis of the successful completion of equivalent subjects from recent undergraduate or recent postgraduate studies. Students should lodge an application for subject exemption form if they wish to apply for exemptions from subjects within their enrolled course.

Postgraduate subject exemptions are not normally granted where prior studies were undertaken more than 10 years previously. Postgraduate subject exemptions are also not granted for prior subdegree TAFE studies.

UTS: Business subject exemption forms for postgraduate students are available at:

www.gsb.uts.edu.au/student/rpl

Exemptions from electives are considered only for prior postgraduate studies. Students who have completed a UTS: Business honours degree or equivalent as determined by the head of the UTS Graduate School of Business may be eligible for up to an additional four subjects (to a maximum of 24 credit points) of exemptions where equivalent coursework subjects exist.

The maximum number of subject exemptions allowed in each course under the UTS: Business policy is detailed below.

Graduate certificates

Exemptions are not permitted except where an exemption has been approved for a specified UTS executive development course.

Graduate diplomas

A maximum of five subject exemptions is permitted, of which two core subjects can be approved from prior undergraduate study.

Master's degrees (excluding MBA)

A maximum of eight subject exemptions is permitted, of which four core subjects can be approved from prior undergraduate study.

MBA

A maximum of 10 subject exemptions is permitted, of which four core subjects can be approved from prior undergraduate study. Exemptions will not be permitted for the subjects 21715 Strategic Management and 21878 Studies in Business Communication.

Articulation

While courses are offered as stand-alone qualifications they are also components of integrated programs of study that enable students who satisfactorily complete a graduate certificate or graduate diploma to apply for entry to a higher-level course within their chosen field of study. Where a student articulates from one level of study to another, only one testamur is issued. Further information is available from the Graduate School of Business.

Internal course transfer forms are available at:

www.sau.uts.edu.au/forms

Progression

Postgraduate students will have their enrolment discontinued if they fail:

- three subjects in a graduate diploma
- four subjects in a master's degree, or
- five subjects in the MBA.

Postgraduate students are advised that there is a maximum time to complete their course requirements (see rule 10.5).

Electives

Postgraduate students are not permitted to undertake undergraduate subjects, including language subjects, as electives in any UTS: Business postgraduate program. Students may only choose and enrol in postgraduate subjects as electives.

Majors and sub-majors

To have a major or sub-major noted on a final transcript, students must complete at least 75 per cent of the subjects in that major at UTS, under any approved postgraduate course.

Semester load

Full-time study is usually undertaken at the normal load of 24 credit points a semester. Students who wish to undertake more than the normal full-time load in one semester must have their study plan endorsed by a student adviser from the Student Centre, Haymarket.

Part-time study is usually undertaken at the normal rate of 12 credit points a semester.

Attendance

Postgraduate UTS: Business degrees are offered on campus only, but some subjects are also offered in block mode. The usual attendance for each subject is three hours a week, while subjects offered in block mode usually involve five or six full days of attendance spread over the semester.

Most degrees are offered part time (one or two subjects a semester) or full time (three or four subjects a semester). An extra two subjects (if offered) may be taken in Summer session to fast-track study.

Local students may attend part time or full time. International students must enrol in four subjects a semester to meet Department of Immigration and Citizenship requirements.

Subject attendance requirements

Students are required to be punctual and regular in attendance for all classes in which they are enrolled. It is the student's responsibility to study all material provided, or required to be accessed, to maximise their chance of meeting the objectives of the subject and to be informed of subject-related activities and administration.

International students in Australia are advised to attend all classes at their campus. Failure to attend may infringe on the conditions of the student visa.

Information on the campus, day and time that individual subjects are offered is available from the UTS timetable at:

http://timetable.uts.edu.au

Forms

Most postgraduate forms are available at:

www.sau.uts.edu.au/forms

Credit recognition (exemption) and graduation forms, which are faculty-specific, are available at:

www.gsb.uts.edu.au/student/rpl

Postgraduate research

Admission requirements

To be eligible for admission to the UTS Business School's Doctor of Philosophy program an applicant should:

- hold a relevant bachelor's degree with first or second class honours (division 1)
- hold a master's (by thesis) degree
- possess an equivalent qualification, or
- be a graduate of at least two years' standing of this University
 or another tertiary institution, whose research publications and
 written reports on work satisfy the Academic Board that the
 applicant has the ability and experience to pursue their proposed
 course of study.

Each applicant is required, prior to application, to contact the UTS Business School research office with a thesis area or topic and seek appropriate supervision. Applicants are also required to submit a brief thesis proposal with their application.

Course structure

Based on the candidate's proposed area of research the University allocates a supervisory panel with expertise in this area.

While candidates with an insufficient background in research methods and/or theoretical knowledge in the core fields of study may be required to do some coursework, the final assessment for the degree is based on submission of a thesis of approximately 50,000–70,000 words. The thesis is examined by three examiners, of who at least two are external to the University, and are experts in the area of research addressed in the thesis. Guidelines for presentation and submission of the thesis are available from the UTS: Graduate Research School.

Both the candidate and the candidate's principal supervisor are required to submit progress reports at the end of each semester. In addition, a student's candidature is assessed before or at the end of the first two semesters of candidature in the case of a full-time student, or the first three semesters in the case of a part-time student. The following components, considered by a review panel, constitute the assessment: satisfactory semester progress reports, successful completion of prescribed coursework prior to the assessment, a written thesis proposal, and an oral seminar on the research topic and written proposal.

A student who does not satisfy the requirements for the assessment is not permitted to proceed with their candidature unless, with the approval of the Academic Board, the student is invited to re-attempt the assessment.

UTS: COMMUNICATION

Information for students

UTS: Communication offers degrees by coursework and degrees by research — these two study areas have separate information and administration services available to students.

The UTS Student Centre provides student administration services to coursework students. It coordinates a wide range of activities including enrolment, identification of potential graduands, processing of student leave applications, special consideration applications and variation of programs via e-requests.

The research degrees administrator provides similar assistance to postgraduate research students.

Statement on scholarly work and its presentation

Scholarly work involves working with texts by authors in different fields. These authors have intellectual property rights to their work, so in the scholarly process of quotation, commentary, paraphrase and interpretation, specific rules or protocols must be observed. These apply to audiovisual texts as well as to writing.

In the production of work by students in UTS: Communication, the protocol to be observed is the acknowledgment of the work of other authors, whether this work takes the form of an idea, a section of text, sounds or images. Unacknowledged copying, paraphrasing or summarising can be considered plagiarism if it is 'passed off as one's own' (*The Macquarie Dictionary*, 2009). Work involving plagiarism is not accepted for assessment and may be the subject of disciplinary action.

Conventions for acknowledgment are well established but take different forms. It is the responsibility of students to familiarise themselves with these conventions and to use them. Snooks and Co., *Style Manual for Authors, Editors and Printers*, 6th edn (revised), Wiley, 2002, is useful.

Other sites that outline issues in using information appropriately can be found at:

www.lib.uts.edu.au/help/study-skills

International exchange and study abroad

Local students

Students at UTS can study overseas as part of their degree through either the international exchange program or by study abroad.

Students accepted into the international exchange program can study at an institution with which UTS has a student exchange agreement or memorandum of understanding and the student pays through HECS-HELP.

Further information about the international exchange program is available at:

www.uts.edu.au/international/exchange/going/apply

Students undertaking study abroad at an overseas institution enrol at that university and pay full fees to that institution.

International students

UTS: Communication welcomes students from around the world. Our courses reflect Australia's multicultural character and its cultural, commercial, media and technological links to other countries and communities. UTS is committed to the internationalisation of all its courses, which prepare students for fulfilling lives and productive careers in a globalised world. A number of staff in UTS:

Communication have lived and studied overseas and maintain international connections in the arts, media, business and research.

UTS: International provides information and assistance for prospective international students. Further details are available at: www.uts.edu.au/international

Exchange and study abroad

Students who are already enrolled in an overseas university course and who wish to study in Australia for one or two semesters can enrol in subjects through international exchange or study abroad arrangements. Exchange students come from institutions with which UTS has a student exchange agreement and pay fees through their home institution. Study abroad students apply directly and pay fees to UTS as their university does not have a formal exchange agreement.

Subject selection

Undergraduate students can apply to enrol in subjects listed in the individual undergraduate programs. Note that access to subjects in media arts and production is restricted to students who have already completed introductory subjects in these areas at their home institution.

Postgraduate students can select from the range of subjects listed in individual postgraduate programs.

Students must meet the subject prerequisite requirements indicated in the subject descriptions. Students are also advised to ensure that the subjects they select satisfy course requirements at their home institution.

Undergraduate and postgraduate courses

International students can apply for any of the full-time courses offered by UTS: Communication that appear in this handbook.

Short courses and continuing professional education (CPE)

UTS: Communication regularly offers in-house short courses, seminars, workshops, organisational training and other professional development programs.

Short course programs are available in:

- advertising (UTS/AFA AdSchool)
- journalism and writing (Australian Centre for Independent Journalism)
- creative writing (UTS Centre for New Writing)
- pro tools sound design (UTS Pro School), and
- media presentation skills (Australian Centre for Public Communication).

New programs are constantly in development. Further information is available from:

www.communication.uts.edu.au/courses/short.html

Undergraduate course information

Applications

All non-current school leavers are selected through an assessment of academic merit. Applicants with five or more years of work experience or equivalent and limited educational qualifications may be requested to provide a personal statement. For further information see UTS: Communication selection criteria at:

www.undergraduate.uts.edu.au/apply

Areas of study

The undergraduate program is based on a subject bank of about 70 subjects designed for undergraduate students seeking both a general and professionally focused university education.

Courses are offered in the following areas:

- information and media
- journalism
- media arts and production
- public communication
- social inquiry
- writing and cultural studies.

Course structure

Students must complete 144 credit points consisting of 48 credit points of core subjects, a 48-credit-point major, a 24-credit-point sub-major, and 24 credit points of electives.

- core: a set of communication subjects running vertically through three years
- major: a set of specialist subjects belonging to the area of study and running vertically through three years
- sub-major: a study sequence of three subjects that relate to a particular field of study
- electives: a choice of subjects from UTS: Communication or from subjects offered by other course areas.

 $\label{lem:all UTS: Communication courses can be combined with international studies or law.$

Students who excel in their degree have the option of studying the Bachelor of Arts (Honours) after three years.

Core subjects

UTS: Communication core subjects (STM90550) are designed to give students the essential skills and knowledge required by every communication graduate.

Through the core subjects, students examine the foundations of communication and develop their professional practice or craft through new technologies as well as existing traditional mediums.

Each core subject engages students in critical examinations and reflections of key communication concepts, preparing them to work with a real-world client in their capstone subject.

Majors

Each major integrates theory and practice and is designed to provide the specialist skills and knowledge required by an entrant to a particular industry or creative practice. Major subjects maintain a critical focus on industry while allowing students to develop the well-rounded expertise needed by practitioners in the next decade.

The first three subjects in a major lay the foundation for understanding and working within a particular field. The last three subjects challenge students to develop the confidence and expertise employers demand.

There are six majors offered by UTS: Communication (CBK90700)

- Information and Media (MAJ10023): This interdisciplinary
 major prepares students for work in a variety of creative
 information design and management roles. Students develop
 an understanding of the interrelationships between people,
 information and communication technologies, as well as
 practical skills in areas such as web design and architecture,
 media research and writing information and media content
 for diverse audiences. Students create a portfolio of products
 including blogs, podcasts, websites, databases as well as audience
 and user analyses.
- Journalism (MAJ10020): This major is designed to meet the
 essential practical skills and theoretical knowledge needed
 for a career in journalism. Students gain an understanding of
 the crucial role that journalists play in creating a democratic
 public sphere, providing a forum for debate and giving voice
 to diverse communities. This major equips students with
 advanced research, writing, reporting and analytical skills for
 print, television, radio and online media; and knowledge of
 the intellectual, ethical and political foundations of journalism.
- Media Arts and Production (MAJ10021): Highly regarded in the
 industry, this major has a history of award-winning students and
 graduates. Students develop production skills in video, sound
 and new media, and enhance their creative innovation in these
 areas. Students are encouraged to evolve as creative directors and
 producers of media projects, as well as develop their technical
 proficiency specifically in one media area. By the time students
 graduate, they should have a professional portfolio of creative
 production work.
- Public Communication (MAJ10024): This major has a focus on professional communication careers including public relations and advertising. Students explore the communication contexts for these practices cultural, social and political. Students develop their professional skills in campaign design and production, copywriting, media liaison and writing, research and evaluation, sponsorship and event management. Students have the option of completing a Public Relations stream (STM90716) or an Advertising stream (STM90715) in this major. Assignments provide material for a portfolio when they graduate.

- Social Inquiry (MAJ09395): Flexible, rigorous and professionally focused, this major is for students interested in social issues and developing the skills to participate effectively in social change. Students explore cross-cultural, international and local perspectives affecting society, and gain a broad range of skills and knowledge that prepares them for a variety of professions in the diverse fields of social science, media and communication.
- Writing and Cultural Studies (MAJ10022): In this major students study both general and specific creative writing as a professional practice that influences and is influenced by culture. Students study the theory and practice of writing and apply their skills across a range of genres and different media. Students explore the position and role of the writer in society, while learning to think critically and creatively about developments in the cultural industries. Students also gain the skills to assess and evaluate the needs of diverse communities, and develop strategies for responding to social and cultural issues.

Sub-majors

A sub-major is a study sequence of three subjects that relate to a particular field of study. Sub-majors allows students to develop expertise in exciting new directions, broadening their knowledge and enriching the sophistication of their work. Each sub-major builds on a major by inspiring students to new heights of thinking while challenging them to deal with major issues affecting society and the professions they plan to enter. There are seven sub-major study sequences available (CBK90701):

- Aboriginal Studies (SMJ09052)
- Bodies, Genders, Rights (SMJ09051)
- Environmental Studies (SMJ09050)
- Media Studies (SMJ10032)
- Reading Australia (SMJ09049)
- Screen Studies (SMJ10033)
- Transnational Studies (SMJ09048).

Flactives

Elective subjects allow students to broaden or specialise their knowledge and skill set.

In the 24 credit points of electives, students can choose:

- any three subjects from the UTS: Communication subject bank
- $\bullet \qquad \text{three foundation subjects of another UTS: } Communication \, \text{major} \\$
- a second UTS: Communication sub-major
- Language and Culture subjects, or
- subjects from another course area of UTS, such as UTS: Business or UTS: Design, Architecture and Building.

Students may wish to undertake the Professional Internship elective in which they negotiate a learning contract and develop a structured industry experience project to enhance their career prospects.

Prerequisites must be observed when selecting electives.

Postgraduate course information

Applications

Applicants need to lodge an application through the Universities Admissions Centre (UAC) or make a direct application at the UTS: Communication Postgraduate Information Evening. For most courses, applicants can be made an offer if they possess a bachelor's degree, a master's degree or a graduate diploma in any field of study, or a graduate certificate in the same field of study. Applicants who do not possess the relevant qualification must submit a CV and personal statement outlining their educational and professional achievements. Additional documentation is required for the Master of Arts in Creative Writing (C04109) (see page 324) and Master of Arts in Non-fiction Writing (C04244) (see page 367). Further information is available at:

www.postgraduate.uts.edu.au/applying

Postgraduate coursework

UTS: Communication offers graduate coursework programs in:

- information and knowledge management
- · international studies
- journalism
- media arts and production
- public communication, and
- writing.

Within each program, courses may be offered at the level of graduate certificate, graduate diploma or master's degree.

Most programs are articulated so that students can progress through the program at their own pace and more effectively meet their individual study and development needs. This also allows students to enter the program at a point appropriate to their qualifications and experience.

The graduate programs are normally structured as follows:

- master's degrees: 72 credit points
- graduate diplomas: 48 credit points
- graduate certificates: 24 credit points.

Students who successfully complete the graduate certificate or graduate diploma and who are admitted to a more advanced-level course in the program are eligible for recognition of prior learning in the more advanced course for completed subjects.

The graduate program generally consists of subjects from 200 to 500 level, with a master's degree requiring some subjects at 500 level.

All graduate courses are fee-paying courses.

Semester load

Full-time study is usually undertaken at the normal load of 24 credit points a semester.

Part-time study is usually undertaken at the normal rate of 8 or 16 credit points a semester.

Subject availability

Subjects in the graduate programs are normally offered every semester or every year. Classes proceed in a given semester only when there is sufficient demand. UTS: Communication reserves the right to cancel a class or a subject if it is not viable.

Electives

Where course requirements allow a free choice of electives, students may select subjects from graduate programs in UTS: Communication or subjects from other course areas in the University. Students may select subjects beyond the lists of elective subjects for particular courses with the approval of the graduate adviser. Not all subjects are available every semester.

Progression rules

Postgraduate students are advised that they may be excluded from a course if they exceed the maximum time allowed for completion of that course (section 10.5 of the University Rules).

Postgraduate research

UTS: Communication's research office prepares an information booklet, *Applying for a Research Degree*, which contains the selection criteria and details of supplementary information required by the faculty from course applicants.

The booklet is available from the research degrees administrator:

www.fass.uts.edu.au/postgraduate/research/apply

Application forms are available from the UTS: Graduate Research School or at:

www.research.uts.edu.au/future-students/apply.html

Applicants should contact one of the faculty's research strength directors and potential supervisors to discuss their proposed research project prior to submitting their application.

The deadline for applications for all applicants wanting to commence the following March is the final working day in October. In the event of a mid-year intake, the deadline is the last week in May.

Supervision

UTS: Communication has the capacity to supervise theses in the fields of:

- cultural studies
- · digital media and the social sciences
- information studies
- journalism
- media arts
- new media and cultural theory
- public communication
- public history
- public media
- social activism
- writing.

Within these broad fields there are specific areas of supervision capacity, which change slightly each year.

UTS: Communication research centres and strengths

Cosmopolitan Civil Societies

The Cosmopolitan Civil Societies Research Centre (CCS) aims to develop a better understanding of social change and cultural cohesion in Australia and other cosmopolitan societies. The centre's research interest is at the intersection of conflict and cohesion, and in how division can be transformed into dialogue, recognition and inclusion. Its research programs focus on social action, community capacity, migration and cultural diversity, and aims to inform policy-making for social and cultural sustainability.

The CCS research initiative draws on the expertise of the University's teaching and research staff in the areas of management, education, communication, cultural studies, social change, social inquiry, leisure, sport and tourism, international studies, urban sociology, sustainability, community studies, finance and economics, built environment, engineering, globalisation and law.

Research areas include:

- collective action and learning
- human rights and social justice
- migration, cultural diversity and racism
- strengthening civil societies.

Students research areas are:

- community capacity building
- migration, cultural diversity and cosmopolitan civil societies
- non-profit and community organisations
- social action.

Transforming Cultures

After 10 years, Transforming Cultures (TfC) is well established internationally in both scope and reputation. It focuses on interdisciplinary cultural and social research, sponsoring innovative projects with local impact in Australia and the Asia–Pacific and Indian Ocean regions. Projects include an examination of 'cultures of place', cultural citizenship, experimental history and the culture of memory, and international activism. The centre also seeks to develop and report accounts of change and intervention in a globalising world. One current major focus is India, a new economic powerhouse in the region.

The Transforming Cultures research centre explores cultures in the process of transformation as well as the (technological and other) cultures that are transforming societies across the globe. TfC researchers interrogate the social and cultural technologies that are transforming individuals, cultures and the societies of which they are part and on which they act. These include technologies of the body, of communication and of transculturation.

Project areas are:

- cultural frictions (convenor: Devleena Ghosh)
- environment, political ecologies and spatial cultures (convenor: Heather Goodall)
- experience-based inquiry (convenor: Catherine Robinson)
- experimental histories and cultures of memory (convenor: Katrina Schlunke)
- oceans and borders (convenor: Devleena Ghosh)
- transforming communications (contact: Tanja Dreher).

TfC researchers are drawn from across the humanities and social sciences, including anthropology, communication studies, cultural studies, gender studies, history, international studies, philosophy and sociology.

Student research areas are:

- social frictions and cultural citizenship (convenor: Andrew Jakubowicz)
- experimental histories and cultures of memory (convenor: Dr Katrina Schlunke)
- environment, political ecologies and spatial cultures (convenor: Heather Goodall)
- transnational studies (convenor: Devleena Ghosh)
- transforming communications (convenor: Penny O'Donnell)
- experience-based inquiry (convenor: Catherine Robinson).

Creative Practices and Cultural Economy

The Centre for Creative Practices and Cultural Economy (CPCE) provides a unique framework for the investigation of creative practice within a cultural economy context. It merges creative practice with cross-disciplinary areas such as public history, information technology, cultural analysis and economics. In doing so, the centre brings new

understanding to the creative industries concept. It explores a range of perspectives on the process of creativity from inception to production, in order to determine how meaning is made in contemporary society across a range of cultural forms.

The centre's core investigations are the key issues of cultural and economic values, their nature, their purpose and, most importantly, their intersection with each other and with creative practice.

The CPCE provides fresh perspectives by understanding cultural economy as a closely interwoven fabric of cultural and economic creative practices that represent a whole systems approach in the determination of value. This entails not only the tangible qualities that emerge through process and production, but the intangible processes of individual values, sense of place, identity and passion that are captured within all creative works.

Research hubs are:

- building creative societies
- creative media
- cultural heritage and tourism
- media and communication practices
- · wine and food
- · writing and literary cultures.

The CPCE has a significant body of research students, which enriches the research strength's creative culture. Members supervise a range of traditional and non-traditional master's and doctoral degrees, and their areas of expertise include:

- new media
- fiction
- non-fiction
- screenwriting
- public history
- history and memory
- media arts
- multimodality
- film and video
- documentary
- sound and music.

UTS: DESIGN, ARCHITECTURE AND BUILDING

Information for students

UTS: Design, Architecture and Building is located on City campus, Broadway, in the Peter Johnson Building (Building 6) on Harris Street.

The Building 6 Student Centre provides information and assistance to coursework students who have inquiries and concerns about student and course administration. The student centre coordinates a wide range of activities including enrolment, production and distribution of class timetables, identification of potential graduands, the processing of student leave applications, special consideration and variation of programs. The centre also assists with interpretation of University rules and regulations, and provides various forms for students.

The research degrees administrator provides similar assistance to postgraduate research students.

Location, contacts and inquiries

The Building 6 Student Centre is located on level 4 of the Peter Johnson Building (Building 6). It is responsible for a broad range of activities including admission, enrolment, graduation, timetabling, course information and promotion, and student progression matters.

Building 6 Student Centre CB06.4.05

Postal address

Faculty of Design, Architecture and Building PO Box 123

Broadway NSW 2007

Faculty structure

The Faculty of Design, Architecture and Building administers UTS: Design, Architecture and Building courses. The faculty consists of three schools that manage both undergraduate and postgraduate coursework degrees: the School of Design; the School of Architecture; and the School of the Built Environment.

UTS: Design, Architecture and Building has a research culture that respects distinct intellectual areas while encouraging internal and external research partnerships.

Teaching strategies

- students are motivated to want to learn
- students learn both in groups and independently
- students learn using a combination of theoretical and practical applications
- students adopt a scholarly approach to their studies
- students emulate practice
- students engage with the community
- students learn from feedback on exams, assignments and general performance, and
- research and writing skills are promoted.

Students learn from highly accomplished and motivated staff, student readers, workbooks and texts where appropriate.

Facilities

UTS: Design, Architecture and Building has state-of-the-art facilities including:

- a digital architecture studio and lab exclusively for Master of Advanced Architecture students
- an interactivation studio to research the interaction between people and technology
- the creative image laboratory used for teaching, workshops and general access for third- and fourth-year visual communications students
- fashion workshops and studios created for the design and construction of garments
- a moving image production video studio
- a fabrication workshop for metalworking, woodworking, general use, plastics, welding, spray painting, materials storage, tool storage and a 3D printer
- a photography studio for small, medium and large formats; black and white, and colour film processing and printing; lighting; backdrops; and darkrooms
- state-of-the-art computing lab, featuring a render farm and 21 dual-processor G5 Macs (these facilities are comprehensively upgraded every three years)
- the textile print workshop, which consists of a dye lab, a print area with two large print tables, transfer press and heat setter, a screen exposure room, a screen wash area and a drying area, and a coating area
- a digital workshop that holds 3D printers, a laser cutter and a 3D scanner
- a motion capture laboratory that has a Vicon optical system
 to capture human movement by a series of cameras and then
 encoded as digital data these data allow animators to produce
 characters with life-like movement and a 3D scanner
- DAB lab research gallery, which provides managerial assistance for academic staff and postgraduate student case studies and research projects
- UTS Gallery, which is a dedicated public gallery, presenting a rich and varied program of high quality exhibitions, educational activities and special events that make a significant contribution to the cultural life of UTS and the wider community of Sydney.

Centres

UTS: Design, Architecture and Building is home to several research centres (see page 59).

International exchange

Being an exchange student provides the opportunity to study and travel overseas, to experience and learn from the perspectives of other cultures, and to develop alternative ways of thinking and a new approach to learning.

UTS: Design, Architecture and Building has exchange agreements with the following universities:

- Hong Kong Polytechnic University
- Kyushu Institute of Design (Japan)
- Fachhochschule Vorarlberg GmBH (Austria)
- Fachhochschule Hannover; Fachhochschule Wiesbaden (Germany)
- Central Saint Martins College of Art and Design, London; Mackintosh School of Architecture; University of Brighton (UK)
- Ryerson Polytechnic University (Canada).

Cross-faculty courses

The Master of Animation (C04212) (see page 339) is a cross-faculty course incorporating the teaching strengths of the Faculty of Design, Architecture and Building; the Faculty of Arts and Social Sciences; and the Faculty of Engineering and Information Technology. The Bachelor of Photography and Situated Media (C10265) (see page 280) shares subjects with the Faculty of Arts and Social Sciences's Bachelor of Sound and Music Design (C10269) (see page 281).

Undergraduate course information

Undergraduate study in UTS: Design, Architecture and Building is unique. UTS: Design, Architecture and Building provides specialist design education focusing on the areas of fashion and textiles design, industrial design, interior design, visual communication and photography, and situated media design. The architecture program offers disciplinary and professional education, and the construction project management and property economics courses equip students to work in professional roles in their chosen industry.

School of Design

The Bachelor of Design offers six distinct professional areas of specialisation:

- Bachelor of Design in Animation (C10273) (see page 286)
- Bachelor of Design in Fashion and Textiles (C10306) (see page 295)
- Bachelor of Design in Integrated Product Design (C10304) (see page 293)
- Bachelor of Design in Interior and Spatial Design (C10271) (see page 284)
- Bachelor of Design in Photography and Situated Media (C10265) (see page 280)
- Bachelor of Design in Visual Communication (C10308) (see page 297).

Design students are required to undertake a professional core program specific to each individual course, as well as elective studies. The six areas also share a number of subjects within the design studies strand.

Design studies subjects

Design students are required to undertake 30 credit points of design studies subjects. Each subject is worth 6 credit points and is one semester in duration.

These subjects examine what is common to the different forms of design and the interface between design and other disciplines and professions. The subjects develop creative thinking within a critical framework and foster openness to difference and alternative futures while establishing criteria for judgment about the value of design proposals. The subjects also enhance students' abilities to work collaboratively and reflect individually. Through these subjects, students acquire an understanding of, and skills in, a range of aspects of design research:

- research for design investigating the cultural contexts of design problems and solutions
- research of design reflecting upon and explaining the nature of creative design processes
- research by design exploring and articulating what can be discovered about situations through designed interventions.

Not all subjects are offered every semester. Contact the Building 6 Student Centre for details.

Elective stream

Students are required to undertake 24 credit points of elective subjects. This may be in the form of a sub-major (24 credit points in a single specialist area) or chosen from a variety of electives offered by the different faculties in the University.

Overseas exchange

The design programs offer students the opportunity to undertake concurrent study at approved institutions overseas. UTS: Design, Architecture and Building has memorandum of understandings with institutions in Canada, Germany, Japan, Korea and the United Kingdom.

School of Architecture

The architecture program includes the Bachelor of Design in Architecture (C10004) (see page 125) (leading onto the Master of Architecture (C04235) (see page 353)).

UTS architecture courses provide students with the skills and knowledge necessary to practise in the architectural profession and to be future leaders in the design of the built environment. Students receive a rich education oriented towards international practice and design innovation, and gain a critical and ethical awareness of architecture as a discipline with much to offer in the face of many of the most pressing challenges of today: environmental and social sustainability, urban sprawl and amenity, cultural preservation and the livelihood of diverse communities. Graduates are highly skilled and sought after by the profession. The course is recognised both nationally and internationally.

The architecture program at UTS offers disciplinary and professional education through two distinct but consecutive and strongly interconnected degree courses.

The first comprises a Bachelor of Design in Architecture (BDes) (C10004) (see page 125), awarded after successful completion of three years of full-time study (or part-time equivalent). The second comprises a Master of Architecture (MArch) (C04235) (see page 353), which involves a further two years of full-time study (or part-time equivalent).

In general terms, the BDes can be seen as a liberal introduction to the study of architecture as a discipline. This degree can stand alone and equips students to join other design fields or related disciplines, or to go on to further academic research and study. It also plays an important role in preparing students for the MArch degree. In this second degree the emphasis lies on educating students for the practise of architecture. Together, the two degrees acknowledge the nature of architecture as both a discipline and a profession. Further information on the MArch degree is available from postgraduate course information (see page 59).

School of the Built Environment

The school offers two undergraduate courses:

- Bachelor of Construction Project Management (C10214) (see page 223)
- Bachelor of Property Economics (C10007) (see page 126).

The Bachelor of Construction Project Management (C10214) (see page 223) is concerned with the management of all aspects of the construction process and provides a high quality education for both construction managers and quantity surveyors.

It delivers all the recognised competencies for construction professionals and gives graduates the opportunity to diversify into project management. This unique degree provides graduates with the broader skills and knowledge required to meet the changing demands of the construction industry.

The course offers a first-rate building education and gives students opportunities such as industrial placements, field trips, practical and lab-based work, and international exchange programs. Students have access to state-of-the-art computing facilities. Every stage of the course includes a practical component and there is a substantial professional work experience program.

The Bachelor of Property Economics (C10007) (see page 126) produces highly skilled property professionals and is fully recognised by Australian employers, governments and professional associations.

Property is valued as a fundamental economic asset that affects the security and wealth of the owner. Success in this industry requires an understanding of the principles of valuation, legalities and ethics, economics, finance, accounting and management.

UTS: Design, Architecture and Building provides a broad-based applied property degree course that includes the important component of practical experience — full-time students complete their degree on a part-time basis for the final two years, ensuring all students have industry experience upon graduation.

Postgraduate course information

Postgraduate study in UTS: Design, Architecture and Building is sophisticated and contemporary. UTS: Design, Architecture and Building's design and digital architecture courses give students the chance to extend their abilities, developing both their broader and specific knowledge base to realise their potential as innovative designers. The property, planning and project management courses are renowned for their diverse, innovative and practical application, and flexible delivery options. UTS: Design, Architecture and Building offers Australia's only Master of Animation (C04212) (see page 339) and Master of Advanced Architecture (C04240) (see page 359).

UTS: Design, Architecture and Building has a cutting edge research culture, committed to developing knowledge, innovation and excellence. Research strengths have a national and international profile.

Postgraduate coursework

School of Design

Two postgraduate coursework degrees are offered by the School of Design:

- Master of Animation (C04212) (see page 339)
- Master of Design (C04243) (see page 366).

The Master of Animation (C04212) (see page 339) is the only qualification, at this level, devoted to animation in Australia. Coursework areas include traditional film animation, 2D and 3D digital animation, graphic visualisation, object-oriented programming and animation studies, culminating in the production of a short animated work.

Unique in Australia, the Master of Design (C04243) (see page 366) is intellectually vibrant, socially engaging, visionary, practice-focused and actively linked to industry. This course is centred around building a design community network. It provides a postgraduate education that is flexible in both its practice orientation and research integration. With a focus on design evolution, innovative integration of new technologies, practice and student experimentation, the Master of Design is delivered by experienced studio leaders who are acknowledged leaders in the specific industries and professions.

School of Architecture

Four postgraduate coursework degrees are offered by the School of Architecture:

- Master of Advanced Architecture (C04240) (see page 359)
- Master of Architecture (C04235) (see page 353)
- Graduate Diploma in Architecture (C07115) (see page 417).
- Graduate Certificate in Architecture (C11212) (see page 459)

The Master of Advanced Architecture (MAdvArch) (C04240) (see page 359) offers two distinct streams. The MAdvArch in Design Technologies is a design-based, post-professional coursework program that critically explores current advances in design production and thinking to postulate new forms of urbanism and architectural space. The MAdvArch in Urban Design focuses on research, technology and experimentation that is directed towards the spatial transformation of urban environments. It is available not only to architects, but all designers of the built environment.

The Graduate Diploma in Architecture (C07115) (see page 417) and the Graduate Certificate in Architecture (C11212) (see page 459) are tailored pathway courses into the Master of Advanced Architecture (C04240) (see page 359) only.

The Master of Architecture (C04235) (see page 353) is the second of a two-tiered degree structure and is the degree required for registration as an architect. The emphasis of this degree lies in educating students for the practise of architecture. The Master of Architecture is a professional degree, i.e. a qualification accepted for candidates seeking to take the professional examination of the Board of Architects and Australian Institute of Architects as a prerequisite to registration under the provision of the *Architects Act* 2003. The Master of Architecture may be undertaken only after the successful completion of the Bachelor of Design in Architecture (C10004) (see page 125) degree (or equivalent); a degree that by itself does not lead to professional recognition.

School of the Built Environment

This school offers postgraduate programs in project management, property development and planning. In particular, the project management courses are generically designed so the skills learned can be applied to a wide range of business fields and industry.

The planning program enhances knowledge and skills in urban analysis, policy and the use of emerging technologies. It has a strong emphasis on master planning, sustainability and urban design, equipping its graduates so they can respond to changing natural, economic and social environments. The engaged, practical nature of the course prepares graduates for leadership roles in government departments and agencies, major development companies and private consulting firms.

The property development program provides a thorough and advanced grounding in all aspects of the property development process, markets and institutions, including the political, managerial, legal and physical systems which contribute to the effective management and development of property assets, property investment portfolios and development proposals.

The project management program provides practice-based knowledge, skills and tools necessary for the delivery of different types and sizes of projects and programs across all industry sectors, underpinned by theory and research. At the forefront of industry trends, the UTS program incorporates project complexity, program management, governance, reflective practice and leadership into its subject offerings. It has a global recognition for its rigorous focus on quality.

The courses offered are:

- Graduate Certificate in Property and Planning (C11001) (see page 421)
- Graduate Certificate in Project Management (C11005) (see page 422)
- Graduate Diploma in Property Development (C06006) (see page 385)
- Master of Planning (C04007) (see page 301)
- Master of Project Management (C04006) (see page 300)
- Master of Property Development (C04008) (see page 302).

Postgraduate research

UTS: Design, Architecture and Building offers five research degrees:

- Master of Architecture (Research) (C03001) (see page 486)
- Master of Built Environment (Research) (C03002) (see page 486)
- Master of Design (Research) (C03012) (see page 487)
- Doctor of Philosophy (C02001) (see page 472)
- Doctor of Project Management (C02051) (see page 481).

Contacts and inquiries

Further information on research programs is available from:

telephone +61 2 9514 8080 fax +61 2 9514 8966 Ask UTS www.ask.uts.edu.au www.dab.uts.edu.au

Research centres

UTS: Design, Architecture and Building is home to the Centre for Contemporary Design Practices (a UTS research strength), the Designing Out Crime Research Centre, the Asia–Pacific Centre for Complex Real Property Rights and the Built Environment Design and Management research group.

UTS: EDUCATION

Information for students

UTS: Education caters for a broad range of educational practitioners' professional development needs, from primary through to adult workplace teaching and learning. Undergraduate and postgraduate courses in teacher education and postgraduate courses in adult education provide a rich program combining theory and practice with unique opportunities to discover more about learning in a variety of contexts – in schools, vocational colleges, corporations and learning centres in Australia and overseas. UTS: Education is located on City campus and Kuring-gai campus.

Credit recognition policy

UTS: Education recognises both formal and informal prior learning. For more information consult the policy on credit recognition at: www.education.uts.edu.au/students/admin/credit.html

Student support

UTS: Education helps students develop their learning skills through services provided by the following support units.

Academic liaison officers

As part of UTS: Education's equity plan, an academic liaison officer is available at each campus to help students with physical, psychiatric and medical issues and other special needs. The liaison officers negotiate with lecturers on students' behalf for any reasonable adjustments required to ensure equity of educational opportunity. This may include provision of signers, notetakers, extensions of time, alternative assessment tasks and special exam conditions.

Kate Collier City campus telephone +61 2 9514 3461 email Katharine.Collier@uts.edu.au

Robyn Staveley Kuring-gai campus telephone +61 2 9514 5381 email Robyn.Staveley@uts.edu.au

Computing facilities for UTS: Education students City campus

At Building 10 (CB10) on City campus, UTS: Education has a digital media learning space. This facility incorporates leading-edge concepts in educational design and technology. The computer facility provides powerful Macintosh computers with a suite of common up-to-date software installed for document production, web authoring, video and image editing, internet and email access. They are compatible with a range of foreign language fonts. Printing and scanning facilities are also available for students. UTS: Education students have access to these facilities when classes are not in progress.

Presentations in Building 10 teaching spaces may be complemented by data projectors linked to electronic lecterns. These integrate an internet-connected computer, DVD player, VHS player, document imager and sound system for media rich learning experiences. A number of mini-studios with camera, lighting and playback facilities allow students to videotape and review presentations. Building 10 also contains a general access computing laboratory and a computer kiosk on the street level. These are available to enrolled students 14 hours a day.

Kuring-gai campus

There are five computer laboratories for students' use at Kuring-gai campus. Four of these have Windows-based computers installed and offer an excellent range of software. The largest lab is the Macintosh lab where many of the courses are conducted. This lab contains 30 new networked multimedia computers, a laser printer and a scanner. Students have free access to this lab and a large range of software when classes are not in progress. There is also a collection of educational software and a digital art facility. Students have access to the internet and their own email account from all the computers in the laboratories.

International links

UTS: Education has a history of strong international links and has offered programs in Laos, Cambodia, Hong Kong, Vietnam, Thailand, Japan, the South Pacific region, Europe, the Middle East and South Africa.

UTS: Education has seen increasing numbers of international students from Japan, China, South Korea and from countries in Africa and the Middle East. The most popular courses with international students are in teaching English to speakers of other languages (TESOL), a language major in secondary teaching, e-learning, and individual subjects done in study abroad programs.

In the teacher education courses students have the opportunity to do overseas practicums in Thailand, Samoa and China. The Bachelor of Arts in International Studies is also available as a combined degree with UTS: Education undergraduate degrees and offers students the opportunity to live and study overseas in a country of choice for two semesters.

Teacher education

UTS: Education offers pre-service teacher education courses at Kuring-gai campus for beginning teachers in primary and secondary education.

Primary education is offered in a full-length Bachelor of Education degree, which may be taken as a four-year Bachelor of Education in Primary Education (C10206) (see page 219) or as a five-year combined Bachelor of Education Bachelor of Arts in International Studies (C10208) (see page 221). Both courses provide a fully recognised teaching qualification in primary education. There is also a nonteaching qualification exit option, the Bachelor of Arts in Educational Studies (C10209) (see page 223), for students who complete three years of study.

Secondary education is offered as a graduate-entry program, the Bachelor of Teaching in Secondary Education (C08002) (see page 468) for students with an undergraduate degree in an area of specialisation. It is available in the following specialised areas: English; languages; mathematics; personal development, health and physical education; science; visual arts; English/history; mathematics/science; mathematics/computer studies; and business studies/economics/computers

Other postgraduate courses are designed for qualified and experienced teachers who wish to extend their professional skills. These include master's courses in e-learning, TESOL, education and applied linguistics.

People considering teaching as a career should be aware that teachers need:

- high levels of competence in literacy and numeracy
- high levels of competence, or the willingness to achieve competence, in information and communication technologies, and
- a fundamental interest in learning.

Initial teacher education courses

The initial primary teacher education courses available are:

- Bachelor of Education in Primary Education (C10206) (see page 219)
- Bachelor of Education Bachelor of Arts in International Studies (C10208) (see page 221), during which students prepare for primary school teaching and acquire knowledge and understanding of another language and culture.

These are interlinked courses designed to prepare students for teaching in primary schools. The two courses share a common core of professional experience, key learning areas and contextual studies. This common structure enables students to change courses at the end of their first year, subject to places being available.

In addition, the Bachelor of Education in Primary Education allows students to study a choice of electives. Meritorious students can instead choose to complete an honours program. In the Bachelor of Education Bachelor of Arts in International Studies, students undertake a country major choice instead of electives or honours.

Professional Experience

Professional Experience contains two interlinked elements:

- campus-based studies that examine the range of theoretical issues, skills and procedures central to effective pedagogical practice, and
- field experiences where students engage in a variety of professional interactions in schools and other educational settings.

These combined elements foster the development of professional knowledge, skills and attitudes with which teachers should begin their careers. Students may apply to undertake field experience in an existing international professional experience program in Thailand, China or Samoa.

Through its provision of developmentally sequenced and integrated campus- and field-based experience, the Professional Experience stream promotes learning about learning, learning about self, learning about school life and learning about teaching.

UTS: Education rules specify that failing a professional experience subject for the first time places the student on probation and failing the same teaching practicum for the second time leads to exclusion.

All students participating in the internships that require them to supervise students without the presence of a qualified teacher are subject to a criminal records check by the NSW Department of Education and Training. The department, on the basis of the criminal records check, reserves the right to reject or suspend the participation of any student in such programs. It is expected that such security checks also apply to schools other than NSW departmental schools.

Criminal records checks are carried out only with the student's consent. All students are requested to complete a form that authorises a criminal records check to be undertaken. Any refusal to undergo the check results in the student being unable to complete the course requirements.

Full details are provided in general information (see page 25).

Key Learning Areas

The subjects in this stream fall into the following curriculum areas:

- English education
- information technology education
- mathematics education
- music education
- personal development, health and physical education
- science and technology education
- social and environmental education
- visual arts education.

Contextual Studies

Subjects within the Contextual Studies stream encourage students to draw on perspectives gained from all components of their degree, so that in the latter part they can refine and articulate their personal theories of learning and justify them with reference to research evidence from classroom practice and theoretical insights.

Bachelor of Arts in Educational Studies

Students who were originally admitted into the Bachelor of Teaching in Secondary Education, Bachelor of Education in Primary Education or Bachelor of Education Bachelor of Arts in International Studies have the opportunity of changing to a three-year degree: the Bachelor of Arts in Educational Studies (C10209) (see page 223) (subject to the approval of the course coordinator). This degree does not provide qualifications to teach.

Adult education

UTS: Education offers a dult education postgraduate courses for people who work, or wish to work, as:

- human resource developers
- education and learning consultants
- vocational educators and trainers
- language, literacy and numeracy educators, and
- Aboriginal educators and community managers.

Adult education courses are shaped by the following educational principles derived from adult learning theory.

- Learning is a collaborative endeavour involving the mutual negotiation of meaning and understanding.
- Learning is enhanced through the recognition and use of experience and the acquisition and application of knowledge in practice-based activities.
- Learning is a lifelong and socially embedded activity, dependent on mutual respect, diversity of approach and the recognition of relevance to learning.
- Learning involves the appreciation and application of theories in the different and changing contexts of professional practice.
- Learning is enhanced through discussion, critical thought and reflection on taken-for-granted assumptions and practices.

- Learning involves mutual obligations based on the valuing of difference, respect for diversity, responsible and ethical self management.
- Learning is a developmental process involving the recognition, articulation and transformation of knowledge, personal values and theoretical frameworks.

Workplace/flexible learning

Recognising the competing demands of work and home life for students, UTS: Education offers adult education courses in a variety of study modes, which can be tailored to meet student needs. Students can choose to study full time or part time. Many subjects are offered in a variety of learning modes including weekly classes, blocks (intensive, face-to-face learning programs conducted over a number of days each semester, often during school holidays) and weekend workshops. Many of the master's courses can be done by distance, supported by email contact with lecturers and UTSOnline web-based conferencing tools to keep students in touch with others in their course.

Postgraduate coursework

Progression rules

In accordance with section 10 of the University Rules (Academic Progression), postgraduate students are advised that they may be excluded from a course if they exceed the maximum time allowed for completion of that course (rule 10.5).

Postgraduate research

Centre for Research in Learning and Change

UTS: Education has a well-established and internationally recognised reputation for undertaking research that focuses on the complex and multifaceted relationship between learning and change. Lead researchers are successful in winning competitive research funding and are committed to collaborative approaches to their investigations.

The focus of the research is the investigation of the ways in which learning influences and is influenced by changes in educational institutions, workplaces, organisations and communities. The research aims to produce knowledge and practices to enhance learning, to promote more productive organisations and build more effective communities. At the heart of this research endeavour is to understand how learning responds to change, how learning is changing, and how change is embedded in and constructed by cultural and communication practices.

Central to the capacity to change is the ability to learn, not just to have learned well in educational institutions, but to keep learning, to be ready to learn again. Governments, business, communities, professional bodies and special interest groups increasingly invoke learning as a key strategy in understanding and facilitating social, cultural, environmental and economic responses to the numerous challenges presented by post-industrialisation and advances in technology, particularly in information and communication technologies.

The research projects are outcomes based and research outputs are published widely and disseminated through working papers and a seminar series. UTS: Education researchers have extensive experience working in partnership with research sponsors.

Research activities are embedded in the six broad research programs of the UTS research strength:

- discourses and cultural practices
- · working, learning and professional practice
- · changing communities: education and social action
- · teacher learning and development
- language, literacy and literature
- learning and teaching in a digital age.

UTS: Education research students come from a variety of professional communities, are encouraged to be active members of the research centre and programs, and are integral to the success of the UTS: Education research activities and profile. The research degrees are closely linked to the research programs and priority areas for research student applications. Prospective research students are encouraged to view the UTS: Education website to obtain more information about research programs.

A full list of staff research interests and expertise is available at: www.rilc.uts.edu.au

UTS: ENGINEERING

Information for students

The Faculty of Engineering and Information Technology (FEIT) is Australia's leader in practice-oriented engineering and IT education and research, and currently enrols over 7000 students in industry-recognised courses from undergraduate to doctoral level.

The faculty prides itself on its high level of engagement with the engineering and IT professions locally and internationally, by offering short courses and consulting expertise to the local community, and internationally through its courses offered in Hong Kong and Singapore, a significant local international student population and a robust student exchange program. FEIT is also the leading research faculty at UTS, with a diverse range of research being undertaken in matrix across the faculty's eleven research centres (including one institute) and five academic schools.

The faculty structure comprises four portfolio areas in teaching and learning; research; international; and external engagement, each led by an Associate Dean. Five schools house the academic sub-disciplines of the Faculty of Engineering and Information Technology:

- School of Civil and Environmental Engineering
- School of Computing and Communications
- School of Electrical, Mechanical and Mechatronic Systems
- School of Software
- School of Systems, Management and Leadership.

Location, contacts and inquiries

The Faculty of Engineering and Information Technology is located at City campus, Broadway, in Buildings 1, 2 and 10. Key staff are:

Professor Hung Nguyen

Faculty contacts and areas of interest

A comprehensive list of UTS: Engineering academic staff and their research areas is available from:

www.feit.uts.edu.au/about.html

Additional English language and mathematics requirements

UTS: Engineering requires commencing students to undertake English language and mathematics readiness surveys so that the most effective study patterns can be advised. UTS: Engineering reserves the right, when appropriate, to require students who are identified as needing additional support to undertake preparatory English language and/or mathematics courses prior to progressing further in the course, or to restrict the level of advanced standing awarded where this is indicated as appropriate by these readiness surveys.

UTS: Engineering clubs and societies

UTS: Engineering has an active student-run society — the UTS Engineering Society — supporting over 1000 members. The Society runs both industry networking events and a social calendar. It also proudly runs Orientation Camp annually for all new engineering students.

Further information is available from:

www.engsoc.org.au

https://www.facebook.com/groups/2387194794 email.utsengsoc@gmail.com

UTS: Engineering facilities

UTS: Engineering has a strong commitment to providing an effective and supportive learning environment for its students. The Remote Laboratory, one of the first of its kind in the world, enables students to conduct experiments in real time on real experimental equipment via the internet. State of the art labs within the faculty include the Civil Engineering Lab which houses the Shaker Table, the only earthquake simulator of its size in Australia. Engineering students have access to both University computing laboratories as well as a number of faculty computing laboratories adapted for specific courses. The Learning and Design Centres are located at CB01.25.15 and CB02.6.39. They provide access to tutors for individual and small group support, reference material, and software and hardware resources, on a drop-in basis, and are open for extended hours.

Compulsory safety induction

As part of the faculty's commitment to safety, all engineering and IT students are required to annually complete a safety induction in order to access PIN-protected facilities within the faculty. Completion of the safety induction is not required to be able to attend scheduled/ supervised lab sessions or use some IT labs during business hours. Students enrolled in an engineering or IT course are automatically given access to enrol in the safety induction through UTS Online (the forum is called 'UTS: Faculty of Engineering and Information Technology - Safety Induction').

Students from outside the faculty who enrol in engineering or IT subjects and who need PIN access to faculty facilities must contact the faculty to get enrolled in the safety induction forum:

email FEITPinAdmin@uts.edu.au

This is also the contact for students who have problems with their PIN access.

Professional bodies in engineering

Engineers Australia

Engineers Australia is the principal professional body and learned society for engineers in Australia. Its membership covers all branches of engineering, with specialist colleges catering for the main fields of practice. Its headquarters is located in Canberra, with operating divisions in capital cities and regional centres. The local division, which covers UTS, is the Sydney Division. It runs an annual program

of lectures, seminars and professional activities, with particular events for young engineers. The division's office is located in Chatswood: telephone +61 2 9410 5600

www.engineersaustralia.org.au

The Association of Professional Engineers, Scientists and Managers, Australia

The Association of Professional Engineers, Scientists and Managers, Australia (APESMA) provides advice and assistance on employment-related matters for professional engineers, scientists and managers. Student members receive the publication The Student Update three times a year, which gives practical insight into the workplace and employment issues that affect them as professional engineers. For information and student membership application forms contact APESMA on:

telephone 1300 273 762

Other bodies

There are a number of other national and regional associations representing particular branches of engineering. UTS: Engineering staff with interests in the field concerned are often active in these bodies and able to provide information.

Women in Engineering and IT program

The Women in Engineering and IT (WiE&IT) program at UTS is a long-standing initiative to redress the low rate of female participation in the field by: communicating the opportunities of engineering and ICT careers as a course of study; promoting the involvement of women in the course, the Faculty and research at UTS; and by networking with professionals from engineering and ICT fields and professional organisations. It also seeks to address attitudes and behaviours which may deter students and staff from achieving, in a safe and rewarding learning, research and working environment.

The WiE&IT program invites students, staff and industry to support the ongoing activities in 2013 and contribute ideas for new initiatives which will attract and support more women to choose to study engineering and IT.

Read more about the program at:

www.utswomeninengineeringandit.blogspot.com

www.feit.uts.edu.au/women

Practice-oriented engineering education

What does it mean?

Practice-oriented engineering education requires students to experience the reality of engineering from an early stage in their professional formation — through internship. It actively relates this experience to their developing understanding of engineering theory, analysis and laboratory work, and to studies in other disciplines, and it promotes critical and creative thinking based on knowledge gained outside as well as within the University. This interaction requires that most academic staff have significant experience of engineering practice and keep it constantly refreshed. Educational programs in which students or a majority of staff do not have current experience cannot validly be called practice-oriented.

Practice-oriented education is more than practice and more than education. A university education should impart a thorough grasp of fundamental principles, a respect for knowledge, a capacity for critical inquiry and lateral thinking, a fluency in communication, a pride in excellence and an eagerness to contribute to shaping the future. Practice-oriented engineering education claims that these attributes can be more effective when they have been developed in contact with the human and technical challenge of real engineering situations.

Engineering education at UTS

In Australia, the basic qualification for professional engineering is the Bachelor of Engineering (BE) degree. At most universities, the BE occupies four years of full-time academic study. At UTS, as well as completing the academic program, all undergraduate engineering students must gain substantial approved engineering experience in industry or in other authentic professional settings. This experience must be distributed over the period of the course and must meet standards of quality and relevance. This experience is recognised in the award of a Diploma in Engineering Practice (DipEngPrac). The combined BE DipEngPrac degree takes five years to complete.

Graduates of most university engineering courses need up to two years' experience in industry, after graduation, before they are able to assume real responsibility. UTS: Engineering graduates have already gained much of this experience together with a real understanding of the interrelations between theory and practice, technology and human factors. They are equipped to undertake professional responsibility much sooner than graduates of other courses at other universities — often upon graduating.

The combination of formal academic learning in the University and experiential learning in the workplace is called cooperative education. UTS: Engineering courses have embodied this principle for over 30 years. The courses are highly regarded in industry and, according to many reports and surveys, the graduates enjoy the highest employment rate of any engineering degree courses in Australia. Cooperative education is also well known and highly regarded in other countries, particularly in North America. UTS is a member of the World Council for Cooperative Education.

The UTS BE DipEngPrac extends the concept of practice-oriented engineering education into one of total professional formation and leads to the combined award of Bachelor of Engineering Diploma in Engineering Practice (C10061) (see page 140). Students' perception of the value of the periods spent employed in industry — the internships — is illustrated by the very high percentage of students who choose to continue to mix work and study even after completing the formal internship requirements.

Other UTS: Engineering courses, undergraduate and postgraduate, are also designed to interact strongly with industry, though the work-experience requirements are mostly less structured than those of the BE DipEngPrac. In all programs, the majority of students already have significant industrial experience or are gaining it concurrently. UTS: Engineering has policies for maximising opportunity for its academic staff to maintain first-hand experience in industry and engages many practising engineers as adjunct teaching staff. It also strongly encourages collaborative research and consultancy with industry and many of its research students are industry-based. The predominant culture, therefore, is strongly practice-oriented and this also benefits the relatively small number of students who do not yet have engineering work experience.

In all of its activities, UTS: Engineering seeks to promote a better understanding of the role of engineering in society and to promote and support service to the community through other channels as well as industry.

Continuing professional education

Practising engineers wishing to undertake continuing professional education may, if class sizes permit, enrol in single subjects. All enrolments on this non-award basis incur full-cost recovery fees. Their successful completion creates the possibility of advanced standing credit under existing University policies, should candidates decide to enrol in a course.

Further information is available at:

www.uts.edu.au/study/fees.html

In addition, in-house short courses, seminars, workshops and other professional development programs are offered from time to time, frequently in response to corporate invitations or opportunities arising from visits by international experts.

Further information on continuing professional opportunities through UTS: Engineering is available at:

www.eng.uts.edu.au/courses/short

Short courses

Courses in playground safety

The Royal Society for Prevention of Accidents (RoSPA) and UTS: Engineering offer regular short courses on playground safety, design, maintenance and inspection including:

- Accredited Outdoor Playground Inspectors Course: Routine Inspections Level 1 (1 day)
- Accredited Outdoor Playground Inspectors Course: Operational Inspection Level 2 (3 day)
- Accredited Outdoor Playground Inspectors Course: Revision and Reaccreditation Operational Inspection Level 2R (1 day)
- Designing Playgrounds and Outdoor Spaces: Module A Standards and Accessibility (2 day).

Floodplain Risk Management

The Floodplain Risk Management subject is aimed at elected local government councillors, community representatives on floodplain risk management committees, engineers and planners in both government and consultancies seeking a background in floodplain risk management and associated land use planning issues.

This course is conducted by UTS in conjunction with the:

- Floodplain Management Authorities (FMA), and
- NSW Department of Environment and Climate Change (DECC).

Taught by industry experts, including those from DECC, the NSW State Emergency Service, local government and consultancy, this course shows how to develop and implement floodplain risk management in accordance with the Floodplain Development Manual. Courses available:

- Introduction to Floodplain Risk Management
- Managing Flood Risk to Existing Property
- Effective Consideration of Flood Risk in Land using Planning.

Further information

For further information, contact:

Angelia Lawah, UTS: Engineering Short Course Administrator telephone +61 2 9514 1806 email Liuangelia.Lawah@uts.edu.au www.eng.uts.edu.au/courses/short

Undergraduate course information

UTS: Engineering's flagship course is the five-year Bachelor of Engineering Diploma in Engineering Practice (C10061) (see page 140). Students graduating with this award can major in civil, civil and environmental, electrical, ICT engineering, innovation, mechanical, mechanical and mechatronic engineering or graduate without specifying a major. In addition, a major may be combined with a sub-major in another discipline.

UTS: Engineering also offers a four-year Bachelor of Engineering (C10067) (see page 152) available only to international students, a three-year Bachelor of Engineering Science (C10066) (see page 149) available only to international students, as well as the combined degree awards Bachelor of Engineering Bachelor of Arts in International Studies Diploma in Engineering Practice (C10062) (see page 146), Bachelor of Engineering Bachelor of Business (C10065) (see page 148), Bachelor of Engineering Bachelor of Science (C10073) (see page 160), Bachelor of Engineering Bachelor of Medical Science (C10075) (see page 167), Bachelor of Engineering Bachelor of Biotechnology (C10078) (see page 170) and Bachelor of Engineering Science Bachelor of Laws (C10136) (see page 190).

The same educational philosophy underpins all awards: students undertake a set of core subjects, a set of practice subjects that defines their major and, in some cases, a set of electives. The Diploma in Engineering Practice award requires the completion of two internships. The single Bachelor of Engineering and combined Bachelor of Engineering courses require the completion of 12 weeks work experience. The credit recognition policies and assumed knowledge are the same for all courses.

The Bachelor of Engineering Diploma in Engineering Practice is described below including information on course structure. For detailed information on the subjects in each major, or information on other courses, refer to the individual course entries (see page 12).

Bachelor of Engineering Diploma in Engineering Practice

The program leading to the combined award of Bachelor of Engineering Diploma in Engineering Practice (C10061) (see page 140) (BE DipEngPrac) is a comprehensive preparation for careers in the professional practice of engineering.

The BE DipEngPrac is a combined award and the Diploma in Engineering Practice is not available separately. Both elements of the program are closely interwoven and interdependent, and prepare students for professional engineering internships by linking theory and application. The degrees combining engineering with business, biotechnology, science and medical science may also be combined with the Diploma in Engineering Practice.

As noted above, the combination of formal academic learning in the University and experiential learning in the workplace is called 'cooperative education'. UTS: Engineering courses have embodied this principle for over 30 years. The courses are highly regarded in industry and, according to many reports and surveys, graduates have enjoyed correspondingly high employment rates; the highest of any engineering degree courses in Australia.

Engineering education in many countries is undergoing revolutionary change and the UTS program is at the forefront of much of this change.

At present, students can major in the combined award in one of the following areas: civil engineering, civil and environmental engineering, electrical engineering, ICT engineering, innovation engineering, mechanical engineering, mechanical and mechatronic engineering, or with a non-specified major. The choice of major can be made at entry or postponed until the end of the first year without extending completion time (subject to availability of places and adequate performance). Further majors may be introduced in subsequent years in response to technological developments and employment demand, and provision will be made to allow students to change from existing majors. It is also possible for students to negotiate a program that focuses on an area outside the designated majors. There is considerable elective scope which can be used to extend engineering knowledge or to take a sub-major in a discipline such as business or social science.

Course structure

The overall program comprises five principal components: the core program, the Engineering Practice Program, the fields of practice subjects, the electives and the Capstone Project. The core program, the Engineering Practice Program and the Capstone Project are common to all students undertaking the BE DipEngPrac.

Core program

This component provides a framework covering knowledge, skills and attributes that are relevant to all engineers across all fields of practice. It consists of common mathematics and physics subjects, and common engineering subjects which draw on several fields of engineering practice to develop interdisciplinary knowledge and skills within the larger context of professional practice.

The core program runs throughout the course from admission to graduation. Students take differing combinations of subjects in their first year, and in each successive year, depending on their choice of major.

Engineering Practice Program

The Engineering Practice Program supports and assesses student learning in workplace and community environments. Its objectives are to prepare students for engineering work experience, to support them during that experience and to assist them in maximising learning. The program also supports the integration of this experiential learning with the theoretical and practical aspects of the academic curriculum.

A fundamental objective is to develop the ability to learn in a wide variety of modes and contexts and to critique and contribute to those learning environments on a lifelong basis.

The program is administered through a series of subjects offered in various modes. Students enrol in the program as a whole and are guided through the respective modules. Students are ultimately responsible for their progression through the program. Academic staff and workplace mentors and supervisors act as facilitators; administrative staff assist in ensuring that students' progress is recorded and validated; and Industry Partnering Unit staff assist students in securing suitable work placements and in establishing cooperative programs with industry and the community.

The minimum time in the workplace required to satisfy each engineering internship subject is 22 weeks. In total, however, 48 weeks must be gained by the required deadline to meet course requirements and to be eligible to graduate.

Internships are organised into two blocks of six months each. Students are required to undertake the relevant prerequisite subjects prior to undertaking their internships and in a semester following an internship are required to enrol in the appropriate review subjects. Credit point limits also apply to some of these subjects. Details of prerequisite subjects and subjects required to be completed after each internship are listed under STM90271.

While students are encouraged to undertake additional work experience, they are only permitted to complete each of the two official internships once.

Industry Partnering Unit

The Industry Partnering Unit (IPU) assists students in obtaining internships. The staff of the IPU maintain contact with industry and on average facilitate 250 internships a semester. IPU staff keep records of students' intentions of seeking and securing internships. A service is also offered to advise students on the preparation of résumé, presentation at interviews and advice on how to find work opportunities in Australia and overseas. Students seeking work experience must register with IPU in the semester preceding their intended period of work and the semester of their internship.

IPU maintains a database, called Industry Internship Management System (I2MS), which provides the interface between the student and company. Once students have access and an active résumé on I2MS they can apply for internships. This system also records the detail of junior and senior internships. It is the students' responsibility to advise

IPU of the start and finish dates of the internship and also check they enrolled in the appropriate engineering experience subjects.

Fields of practice and majors

This component relates theoretical and practical learning from core subjects to applications in specific fields of engineering internship. It develops knowledge of engineering science and technologies relevant to particular branches of engineering and specialist technical expertise. Particular sets of subjects constitute majors in the respective fields of practice, as set out below. A major provides the essential foundations needed for practice in that field, familiarity with current practice, awareness of likely developments and knowledge of resources available for future self-directed learning.

All majors emphasise and develop the essential engineering skills of observation and experimentation, analysis and synthesis, modelling, systems thinking, conceptual reasoning and judgment, and problem formulation and solving, using as case studies the technologies and contexts relevant to the particular field of practice. Each major involves substantial laboratory content, designed to integrate theoretical and practical understanding. All are designed to link with the core program and with engineering internship.

The totality of all fields of practice subjects across all majors provides the pool from which students wishing to graduate with a non-specified major may draw (subject to approval) to make up their field of practice component. Some fields of practice include subjects taught wholly or partly by other faculties.

Electives

In general, students may devote 24 credit points to electives. A range of electives may be taken to broaden or deepen knowledge. Some students may wish to explore introductory engineering subjects before making their choice of major, in which case the additional subject(s) may be counted (subject to conditions) as part of the elective component. The elective component also provides a mechanism for recognition of prior learning. Further, the elective component affords maximum flexibility for students wishing to undertake study on international exchange with our overseas partner institutions.

Students are not permitted to take an elective subject that covers substantially the same material as a required subject or a subject already undertaken. Undergraduate students may enrol in approved UTS: Engineering postgraduate subjects provided they have completed at least 120 credit points of their undergraduate degree and met prerequisite requirements. Undergraduate students may undertake up to four approved postgraduate subjects. A maximum of three approved postgraduate subjects recently undertaken as part of an undergraduate degree may be used to apply for exemptions from a UTS: Engineering master's degree provided the subjects fulfil the equivalent subject requirements.

The combined degrees have no electives.

Capstone Project

In the final semesters of the degree, each student undertakes a Capstone Project, supervised by a member of academic staff and designed to consolidate and integrate learning in all aspects of the program. Industry-linked projects, under joint supervision, are strongly encouraged.

The project topic must be approved by an academic supervisor and must be relevant to the field of practice concerned. It may be largely technical in emphasis or it may encompass a range of technical and contextual challenges.

The Capstone Project results in a substantial report which must be written and produced to professional engineering standards and must demonstrate the student's readiness for professional engineering practice.

Credit recognition

Students with prior formal learning (such as other university study or TAFE qualifications) may be entitled to credit recognition in the form of subject exemptions. The level of credit recognition depends on the relevance of the area of study to the proposed major in the BE DipEngPrac. For a TAFE diploma in the same area students can expect to receive between 24 and 36 credit points of exemptions, depending on the grades obtained in the TAFE subjects.

Exemption from part of the Engineering Practice Program is granted only on the basis of actual work experience completed before commencing the course that can be shown to meet the required standards. The maximum exemption given is for one work-experience semester. Without exception, all students in the engineering practice program must complete all components associated with the second internship.

UTS: Engineering reserves the right to advise any student who is admitted with credit recognition, and who is not succeeding in the program, to undertake some or all of the subjects from which exemption had been granted.

Postgraduate course information

UTS: Engineering offers postgraduate coursework and research programs, providing a wide range of professional development opportunities to engineers and other graduates. In fulfilling these responsibilities, UTS: Engineering draws on its close links with industry to offer distinctive programs that are highly regarded by engineering-dependent enterprises.

In 2012, over 900 students were enrolled in postgraduate coursework programs and over 200 in research degree programs.

Postgraduate award courses may be taken by coursework or research. UTS: Engineering supports research through its management of postgraduate research, development of research strengths and centres, encouragement of individual researchers and research teams, facilitation of interdisciplinary research, and sponsorship of visits to UTS: Engineering by internationally renowned experts.

In addition to award courses, UTS: Engineering provides opportunities for continuing professional development through studies undertaken on a non-award basis.

The following information is intended to assist postgraduates to plan and complete their studies within UTS: Engineering. Additional information can be obtained online and from other publications or by direct inquiry.

Postgraduate coursework

Specialist courses

UTS: Engineering offers specialist courses by coursework in several fields. Each of these courses includes core subjects which must be satisfactorily completed during studies for the award.

Students in any specialist course receive preference in the allocation of class places in core subjects. Students taking popular subjects through elective studies are allowed to enrol when places are available.

- Master of Engineering Management (C04094) (see page 314)
- Master of Engineering Management Master of Business Administration (C04102) (see page 322)
- Master of Engineering Studies Master of Engineering Management (C04207) (see page 338)
- Master of Environmental Engineering Management (C04098) (see page 321)
- Graduate Certificate in Engineering Management (C11054) (see page 434)
- Graduate Certificate in Environmental Engineering Management (C11051) (see page 432)

General courses

A range of coursework programs is available through UTS: Engineering, leading to the general awards of Master of Engineering (by coursework), Master of Engineering Studies and Graduate Certificate in Engineering.

For each of these general awards, postgraduate majors are available. The majors offered reflect current research strengths and interests in UTS: Engineering.

- Master of Engineering (C04090) (see page 309)
- Master of Engineering Studies (C04097) (see page 315)
- Graduate Certificate in Engineering (C11048) (see page 428)

Distance education

Flexibility is a major feature of UTS: Engineering's postgraduate engineering management and environmental engineering management programs.

The distance education program is designed to meet the professional needs of busy engineers. Core subjects and a selection of electives can be taken in distance mode as well as standard attendance mode.

The following are examples of subjects that may be offered in distance mode:

- 49122 Ecology and Sustainability
- 49003 Economic Evaluation
- 49121 Environmental Assessment and Planning
- 49001 Judgment and Decision Making
- 49069 Leadership and Responsibility

- 49013 Managing Information Technology in Engineering
- 49002 Managing Projects
- 49309 Quality Planning and Analysis
- 49123 Waste and Pollution Management

Progression

Postgraduate engineering students may be excluded from further study at the University if they fail more than 50 per cent of the total number of enrolled credit points from the commencement of the course.

Postgraduate engineering students may also be excluded from a course if they exceed the maximum time allowed for completion of that course (see rule 10.5).

Timetables

UTS timetable information is available from:

http://timetable.uts.edu.au

Maiors

Postgraduate majors are available in the Master of Engineering (ME), Master of Engineering Studies (MEStud) and Graduate Certificate in Engineering (GradCertE).

UTS: Engineering offers an extensive range of programs by research and/or coursework through its award and non-award courses. A selection of these program majors are described below. Information on other specialist research areas can be obtained from individual members of academic staff.

Program majors have been developed to match the needs of engineers and other professionals. They provide opportunities for advanced studies and professional development in engineering and cross-disciplinary areas between engineering and other disciplines. All postgraduate program majors are differentiated by their focus, structure, presentation, attendance flexibility, assessment practices and multiple entry/completion options.

Students are entitled to have the name of the major listed in their degree transcript (not the testamur) if they have completed the following.

- ME (by coursework): a minimum of four subjects (24 credit points) must be completed within the particular postgraduate program major as described below, together with an approved graduate project in the major of between 18 and 30 credit points. Indicated major compulsory subjects must be completed.
- MEStud: a minimum of four subjects (24 credit points) must be completed within the particular postgraduate program major. Indicated compulsory major subjects must be completed. Any special topics listed in the program major are not available in the MEStud. To obtain the energy planning and policy major, students must complete eight subjects (48 credit points) from the respective program major list. MEStud management subjects do not apply to these majors. To obtain the software engineering major, students must complete all five subjects from the major as well as the management subjects.
- GradCertE: a minimum of three subjects (18 credit points) must be completed within the particular postgraduate program major as described below. Indicated compulsory major subjects must be completed.

Postgraduate program majors reflect current research strengths and interests in UTS: Engineering and change with time. The availability of individual subjects in any year is influenced by student demand, arrangements with visiting lecturers, scheduling within the University and policies on class sizes.

If, in the opinion of the Director of Postgraduate Coursework Programs, a student does not have the required prerequisite knowledge to successfully undertake and complete a major, the student may be required to undertake one or two preparatory undergraduate subjects.

Postgraduate research

UTS: Engineering has a lively and cutting-edge research culture driving advances in engineering and IT technology, practice and education. UTS: Engineering's research is needs-driven and collaborative and works with many enterprises in business partnerships. Researchers are world-class and recognised leaders in their fields, responsible for delivering new, better and more cost-effective solutions to complex engineering challenges.

Research is varied and utilises modern laboratories and research facilities on the City campus, Broadway. These are supported by extensive computing facilities and library services. The laboratories have excellent back-up workshops and expert support staff. Many opportunities exist for professional development through challenging, well-resourced research programs.

Contacts and inquiries

The management and administration of all research matters of the Faculty of Engineering and Information Technology is managed through the faculty's Research Office, headed by the Associate Dean (Research). The office is responsible for a broad range of matters including, but not limited to, research-strategic priorities, policy and planning, and advice and support to faculty staff in preparing grant applications, research publications, research conferences and research degree student supervision. The associate dean is supported by the Director of Research Programs, the Research Manager and the research administration officers, who are responsible for the academic management and support of research degree students and general research matters respectively.

Research matters are governed via the Research Management Committee and Research Degrees Committee that report to the Faculty Board in Engineering and Information Technology. The Research Management Committee has overarching responsibility for determining the faculty's research strategies and policies, and for making recommendations in relation to building research culture and profile, and for budgetary and resourcing matters relating to research. The Research Degrees Committee makes recommendations and sets policies relating to candidature management of higher degree by research students, from admission through to graduation.

Specific inquiries should be directed to the Faculty of Engineering and Information Technology Research Office. Key staff are:

Associate Professor Jaya Kandasamy Director of Research telephone +61 2 9514 2558 email Jaya.Kandasamy@uts.edu.au

Dan Gollan Research Manager telephone +61 2 9514 7863 email Daniel.Gollan@uts.edu.au

Phyllis Agius Research Administration Officer telephone +61 2 9514 2686 email Phyllis.Agius@uts.edu.au Gunasmin Lye Research Administration Officer telephone +61 2 9514 2663 email Gunasmin.Lye@uts.edu.au

Research Administration Officer telephone +61 2 9514 2591

email Craig.Shuard@uts.edu.au

General inquiries from domestic students should be directed to:

UTS Graduate Research School

telephone +61 2 9514 1336

General inquiries from international students should be directed to: UTS International

telephone 1800 774 816 (free call within Australia)

Research profile and strengths

The Faculty of Engineering and Information Technology has a number of key research centres and institutes. These centres are hives of research activity that have international standing within their respective discipline areas. The centres and institutes include:

- Advanced Analytics Institute
- Centre for Built Infrastructure Research
- Centre for Energy Policy
- Centre for Electrical Machines and Power Electronics
- Centre for Health Technologies
- Centre for Human-Centred Technology Design
- Centre for Innovation in IT Services and Applications
- Centre for Quantum Computation and Intelligent Systems
- Centre for Intelligent Mechatronic Systems
- Centre for Real-Time Information Networks
- Centre for Technology in Water and Wastewater.

Collaborative research

UTS: Engineering's researchers work with private and public companies to achieve their strategic objectives in engineering research and development. These collaborative programs tend to be long-term and offer mutually beneficial outcomes, with the economic, business, social and environmental dimensions of engineering being addressed explicitly. Most collaborative research is supported by sponsorships or grants.

Research opportunities and major research areas

Research opportunities are available in the following areas of specialisation.

School of Computing and Communications: wireless relay/mesh and cooperative networking, body area networking, micro- and nanoscale networks, 4G (WiMAX, LTE), short-range RF and inductive near field communication systems and sensing, antennas and propagation, microwave engineering, national broadband network, multi-antenna systems, wireless sensor networks, bio-mimetic paradigms for network management and configuration, autonomic communications, anticipatory systems, radio resource management (RRM) mechanisms, Satellite communications and broadcasting, LAN/WAN enterprise networking, network embedded applications, m-health monitoring, mobile networks, personal area networks, multilayer switching, mobile and distributed multimedia applications and services, network security, internet service architecture, programmable networks, internet quality of service, web technologies, web architecture framework, mobile commerce and internet business, location-based services, network grid services, peer to peer networks, digital signal processing, pattern recognition, computer vision, multimedia, image processing, image and video analysis, machine learning, cognitive and affective multimedia content analysis and multimedia systems.

School of Civil and Environmental Engineering: built infrastructure, structural engineering, geotechnical engineering, construction materials, local government, road engineering, water and environmental resource management, water modelling, membrane technology in water and wastewater treatment, soil contamination and remedial techniques, and solid waste management.

School of Electrical, Mechanical and Mechatronic Systems: advanced control, artificial intelligence, autonomous robotics, automotive engineering, biomedical engineering, energy, embedded systems, health technologies, mechatronics, power systems, and renewable energy.

School of Software: art and technology, artificial intelligence, computer animation, computer games, computer graphics, computer usability, data mining, e-finance, e-government, e-health, e-marketing, e-safeguard, e-security and e-service, emergency management, expert systems, human-computer interaction, information systems, innovation and creativity, innovation and technology, intelligent agents, intelligent problem solving and smart business decision-making in engineering, interaction design, interactive entertainment, interactive storytelling, learning environments, multi-agent systems, multimedia, next-generation automated enterprise cooperative infrastructure, object-oriented computing, object-oriented processes and methodologies, ontologies, optimisation activities, quantum computing, ray tracing, rendering techniques, requirements engineering, resource planning, robotics, semantic web, smart trading systems, software development, and technology design and use.

School of Systems, Management and Leadership: energy policy and planning, engineering practice, environmental risk, information systems, IT education, IT governance, IT strategy and management, knowledge management, operations and risk management, strategic IT leadership, systems analysis and design, systems development, and systems theory and socio-technical systems.

Further information is available from:

www.eng.uts.edu.au

Research centres and institutes

The Faculty of Engineering and Information Technology supports several institutes and centres, each capturing established research strengths in engineering, information technology and related fields. These include the following.

Advanced Analytics Institute (AAI)

AAI provides interdisciplinary expertise and leadership in areas including data mining, machine learning, applied statistics, behaviour analytics, data science and engineering, marketing, finance, economics, decision-making, optimisation and risk management. AAI offers cross-disciplinary and cross-domain research capabilities and hands-on experience in advanced analytics across historical data, realtime information and future trends. Analytics is a fast-growing global industry with an ever-increasing demand for qualified graduates. At UTS, a cross-disciplinary approach to analytics research brings together experts from across UTS's faculties and research centres to form a specialist analytics group. AAI brings together leading researchers from the Faculty of Engineering and IT, the Faculty of Business, the Centre for Quantum Computation and Intelligent Systems (QCIS) and the Centre for the Study of Choice (CenSoC). The Institute also fosters dedicated research and development resources for advanced analytics and receives resource support from the UTS External Engagement department and the UTS Research Innovation Office.

AAI offers unique training programs in broad-based analytics. AAI is working towards fostering world-class specialists and analytical project managers for specific domains through a supervisor-driven and practice/project-oriented approach, interdisciplinary workshops, short courses (including executive training), and day-to-day engagement in tier-one organisations.

Director

Associate Professor Longbing Cao telephone +61 2 9514 4411 email advancedanalytics@uts.edu.au www.analytics.uts.edu.au

Centre for Built Infrastructure Research

The Centre for Built Infrastructure Research (CBIR) comprises a multidisciplinary team of researchers from the faculties of Engineering and Information Technology; Science; and Design, Architecture and Building. CBIR's nationally and internationally renowned work focuses on finding solutions to important global problems in control, rehabilitation and health monitoring of building structures and bridges, green and smart materials, sustainable design, management, improvement, safety, and conservation.

Director

Professor Bijan Samali telephone +61 2 9514 2023 email Bijan.Samali@uts.edu.au www.research.uts.edu.au/strengths/bi

Centre for Electrical Machines and Power Electronics

The Centre for Electrical Machines and Power Electronics (CEMPE) is principally concerned with electrical variable speed drives and generation of electricity using rotating electrical machines and renewable sources (such as wind and hydro). The technical research disciplines necessary for these two areas are very similar, covering electrical machines design, power electronics and mechanical design. The interest in renewable energy generation is primarily for remote areas and developing countries, so the incorporation of expertise in design for such areas is valuable, with the inclusion of energy requirements analysis, energy economics, technology transfer and human management issues.

Director

Professor Joe Zhu telephone +61 2 9514 2318 email Jianguo.Zhu@uts.edu.au http://services.eng.uts.edu.au/cempe

Centre for Energy Policy

The Centre for Energy Policy (CEP) addresses contemporary energy and environmental policy issues in national and international contexts. Energy market reforms, environmental policy options and energy—economy interactions are key areas of focus. Research undertaken in the centre is policy-oriented, applied and cross-disciplinary, emphasising the weaving together of technical, business, economic, legal, social, political and philosophical dimensions of energy, environmental and economic policies.

Centre for Health Technologies

The interdisciplinary research skill-base brought together in the Centre for Health Technologies (CHT) is unique in Australia in the development of medical devices and systems. The CHT has four research programs: non-invasive instrumentation, bio-therapeutics, bio-electromagnetics and nano-biotechnology. Its focus is on health and disease processes, and the development of new devices and advanced methods for the early detection, diagnosis and rehabilitation of cardiovascular disease, diabetes, neurological disorders and cancer. Its research has already produced several new-device technologies which are at the cutting edge of biomedical engineering and science.

Centre for Human Centred Technology Design

The Centre for Human Centred Technology Design (HCTD) is committed to information and communications technology (ICT) design research, methods and approaches, as defined by its commitment to the human, that is, to those who will use the technology.

HCTD's approach furthers the development of a much needed sociotechnical perspective on technology design that can both balance and extend the more common technology driven or management driven perspectives. HCTD's focus is on understanding the complex interplay between the drivers of social, organisational and technical change and how these shape, and are shaped by, the design, implementation and use of information and communication systems. The centre's research outcomes contribute to the design and development of ICT that fit easily and appropriately into the social, cultural and organisational contexts within which they will be used.

Centre for Innovation in IT Services and Applications

The Centre for Innovation in IT Services and Applications (iNEXT) is a world-class research environment for developing and nurturing innovation for the next generation IT services and applications, including internet-enabled business applications, mobile health services, high-end visualisation technologies, novel image processing architectures and advanced video surveillance systems.

- Future internet: iNEXT aims to develop those enabling mechanisms that will allow the transformation of the current connectivity infrastructure into the service infrastructure of tomorrow's internet.
- Applications and services: iNEXT aims to develop innovative applications with special focus on assistive mobile health and internet-enabled business applications.
- Visual information processing: iNEXT aims to define novel visualisation techniques and intelligent recognition algorithms for extracting important information from video streams and wireless sensor networks for surveillance and environmental monitoring purposes.

Commercialisation of such applications and services is particularly emphasised. iNEXT includes a significant research training component, graduating many research students in the past years.

Centre for Intelligent Mechatronic Systems

Building on 15 years of strong cross-disciplinary research in electrical machines and power electronics at UTS, the Centre for Intelligent Mechatronic Systems (CIMS) integrates the disciplines of mechanical, electrical and electronics engineering and computer systems. Its four main research directions are: autonomous robots (operating in unstructured environments and for infrastructure maintenance, search and rescue, health care and road vehicles); electrical machines (new materials and topologies, system optimisation, variable speed control and compact, low-temperature fuel cells); automotive systems (performance, comfort, fuel efficiency, road safety and emission control); and human factors (physiological and psychological aspects of human–machine and human–environment interaction).

Centre for Quantum Computation and Intelligent Systems

The Centre for Quantum Computation and Intelligent Systems (QCIS) is a research centre within the University's Priority Investment Research Program. The centre's mission is to be acknowledged by research centres throughout the world as a pre-eminent research centre in quantum computation and intelligent systems, and to be acknowledged by Australian industry and government as a leading source of knowledge and expertise in quantum computation and intelligent systems.

The centre was established in April 2008 with a vision to develop:

- theoretical foundations for quantum computation
- theoretical foundations for intelligent systems, and
- innovative technologies for intelligent systems.

This technology will result in next-generation enterprise intelligent information systems.

The centre's five major research programs cover quantum computation, knowledge discovery, decision support, innovation and infrastructure enhancement. Together, these programs develop a set of innovative and practical methodologies and techniques for intelligent information processing and system building for a broad range of businesses in the finance, marketing, security, health, government and engineering sectors.

Centre for Real-Time Information Networks

The Centre for Real-Time Information Networks (CRIN) aims to support research and development activities related to the efficient creation, collection, transmission, analysis and use of information in real-time, engineering-embedded applications. The centre supports the improvement of Australian society through a focus on applied research achieved through close links with both industry and research bodies working in appropriate application domains.

Examples of priority areas of interest for the centre are national security for safeguarding Australia, healthcare diagnosis and monitoring for the cost-effective improvement of the health of Australians, environmental and resource monitoring for a sustainable Australia, and the smart use of the web in supporting Australian industry.

The centre aims to design, fabricate and test proof of concept systems, in which the performance and operational suitability of the developed systems shall be demonstrated. The proof of concept systems may be electronic hardware, software, or a combination of hardware and software, and will include the latest prototyping technologies, such as embedded processors, high-performance networks and sophisticated distributed software applications.

Director (acting)

Associate Professor Kumbesan Sandrasegaran telephone +61 2 9514 2428 email Kumbesan.Sandrasegaran@uts.edu.au www.crin.uts.edu.au

Centre for Technology in Water and Wastewater

The Centre for Technology in Water and Wastewater (CTWW) undertakes research to ensure the sustainable management of water resources in both urban and rural environments, in Australia and internationally. This collaborative research centre links researchers, government, industry and community partners through its research programs, which include solid liquid separation and filtration technologies in water treatment; innovative biological treatment systems for wastewater treatment; membrane hybrid and nanotechnology systems in water, wastewater and stormwater reteatment; water reuse; desalination; in situ barrier and other systems for treatment of groundwater, surface and groundwater hydrology; bio-solid and waste management; urban water cycles and soil / aquifer management and modification; and flood management and catchment modelling for flood prediction.

UTS: HEALTH

Information for students

Location, contacts and inquiries

UTS Student Centres

The UTS Student Centres are both the initial and primary point of contact for all students. Students should deal with the student centres in all matters affecting their studies. This includes enrolment, exemptions, timetable matters, examination and assessment, as well as a wide range of student administration procedures.

For specific UTS: Health information, students should contact the following UTS Student Centres.

City campus

Building 10 Student Centre Foyer, Level 2, Building 10 (CB10.2) 235 Jones Street, Ultimo telephone +61 2 9514 1222

Kuring-gai campus

Kuring-gai Student Centre Foyer, Level 5, Building 1 (KG01.05) Eton Rd, Lindfield telephone +61 2 9514 1222 Ask UTS www.ask.uts.edu.au

Opening hours

UTS Student Centre opening hours are available at: www.uts.edu.au/students/centres.html

Faculty policies and procedures

NSW child protection legislation

Full details are provided in the NSW child protection legislation (see page 25) section in the University-wide general information.

Student administration matters

A range of student administration matters affect the progress of students through their studies. These are formally handled by the Student Administration Unit of the University.

The University's web enrolment system, through which students add and withdraw from subjects, allocate themselves to classes, update their contact details and access their complete study plan and subject results, may be accessed through My Student Admin at:

www.uts.edu.au/onestop/studentadmin

Enrolled students are advised to refer to this website for their current personal and enrolment details.

A range of forms for various student administration matters can be obtained at:

www.sau.uts.edu.au/forms

They can also be obtained from the UTS Student Centres. These forms include applications for:

- credit recognition
- leave of absence, and
- course withdrawal.

Further information is available from the Student Administration Unit at:

www.sau.uts.edu.au

Submission of assignments

Nursing, midwifery and health

All assignments must be submitted by $4\,\mathrm{pm}$ on the due date by being:

- placed in the Kuring-gai campus assignment box outside the academic programs office on level 3, Building 5, or
- placed in the City campus assignment box on level 7, Building 10, near the Wattle Street lifts. Students are able to access this area via the lifts 7am–10pm Monday to Friday. On weekends contact UTS Security to arrange access.

Human movement and sport and exercise management

All assignments must be submitted by 5pm on the due date by being:

 placed in the Kuring-gai campus assignment box on level 6 near room KG01.06.07.

All assignments must be accompanied by an assignment cover sheet, which can be downloaded from:

www.nmh.uts.edu.au/students/current/documents-policies

Do not use plastic folders or sleeves when lodging assignments.

Extensions

Applications for an extension of time for the completion of assignments must be made in writing on the appropriate form:

www.nmh.uts.edu.au/students/current/documents-policies

Extensions can only be granted by subject examiners or their nominees. Generally, an extension is only granted in the case of verifiable medical grounds or other serious matters.

Good academic practice

Students are advised to read the Advice to Students on Good Academic Practice policy available at:

www.gsu.uts.edu.au/policies/academicpractice.html

Referencing procedures

To assist students with planning, researching, writing and submitting assignments, UTS: Health has published referencing procedures in undergraduate and postgraduate style manuals. Students attempting written assignments are strongly recommended to refer to this document, which clearly outlines the expectations in regard to academic writing. This publication is available under 'Style and referencing guides' at:

www.nmh.uts.edu.au/students/current/documents-policies

Academic misconduct

Both the University and UTS: Health view the academic conduct of students very seriously. Students must ensure that they conduct themselves in a professional manner, and observe the various rules and policies at all times.

In those instances where a student breaches academic conduct, the rules relating to academic misconduct are strictly observed. Breaches can include cheating in an examination or a class test and not acknowledging the work of others (plagiarism).

Plagiarism

Plagiarism refers to the practice of using someone else's ideas or work and presenting them as one's own without acknowledgment. Plagiarism is literary or intellectual theft. It can take a number of forms, including:

- copying the work of another student, whether that student is in the same class, from a previous year of the same course, or from another tertiary institution
- copying any section, no matter how brief, from a book, a journal article, the internet or another written source, without duly acknowledging it as a quotation
- copying any diagram, illustration or chart without duly acknowledging the source
- paraphrasing or otherwise using the ideas of another author without duly acknowledging the source, and
- presenting an assignment written by another student as your own work.

Whatever the form, plagiarism is unacceptable both academically and professionally. By plagiarising you are both stealing the work of another person and cheating by representing it as your own. Any incident of plagiarism can therefore be expected to attract severe penalties.

Students who condone plagiarism by allowing their work to be copied are also subject to disciplinary action. If students are in any doubt about plagiarism they should discuss the matter with the subject examiner or their tutor.

Note: The above provisions are drawn in part from the Faculty of Business Guidelines for the Preparation and Presentation of Assessed Work, February 1998.

Misconduct provisions

The provisions relating to academic misconduct are designed to ensure fairness in the process, as well as allowing such issues to be investigated effectively.

The rules relating to academic misconduct, discipline and appeals for students can be found at:

www.gsu.uts.edu.au/rules

Laboratories

Nursing, midwifery and health

Nursing, midwifery and health laboratory staff are based in room KG02.3.51 and CB10.6.212 respectively, but can often be located in the laboratories situated at Kuring-gai campus in rooms 2.3.46, 2.3.49, 2.3.56, 2.3.60, 2.2.53, 2.2.56, and 2.2.62, and at City campus in rooms 10.6.206, 10.6.208, 10.6.209, 10.6.210, 10.6.214, 10.6.216, 10.6.219, 10.6.220, 10.6.221, 10.6.222, 10.6.224 and 10.6225.

The laboratories also offer the following:

- equipment and posters may be borrowed for presentations or tutorials
- videos may be viewed in the laboratory area
- · textbooks are available for quick referencing.

Laboratories at Kuring-gai and City campuses are made available throughout the semester for students to practice learnt procedures.

Laboratory rules and safety

Students have a duty of care to themselves and others, and must cooperate and observe the following points when in the laboratories:

- For safety reasons, a maximum of 15 students is allowed in the practice lab at a time. The faculty recognises that there may be peak times, such as prior to examinations, when more practice capacity is required. Should this occur, additional labs may be made available for practice.
- Students must comply with all laboratory safety rules while in the labs. In particular, no food, drink or children are allowed in the laboratories, and covered shoes must be worn at all times.
- All problems must be reported to the relevant technical officer.
- Should the use of the practice lab be abused in any way, UTS: Health will review its operation.

Human movement and sport and exercise management

The Human Movement and Sport and Exercise Management courses utilise laboratories located at Kuring-gai campus in rooms 1.607a, 1.607b, 3.601 and 3.403. These spaces are used for undergraduate teaching and postgraduate research.

Laboratory rules and safety

Students have a duty of care to themselves and others, and must cooperate and observe the following points when in the laboratories:

- Students must comply with all laboratory safety rules while in the labs. In particular, no food, drink or children are allowed in the laboratories, and covered shoes must be worn at all times.
- All equipment in the laboratories must be treated with respect. Any equipment malfunctions or technical issues should be reported immediately to academic staff and/or the technical officer.
- Where appropriate, subject outlines contain specific safety information and procedures that must be adhered to during classes.

Faculty centres and clinical professorships

UTS: Health has three centres and seven clinical professorships. The centres coordinate a range of international, educational, contract research, consultancy and continuing professional education activities on behalf of UTS: Health. The clinical professorships, which are each established under the sponsorship of an industry partner, are the primary locations of UTS: Health's research activities, particularly as they relate to practice development.

Faculty rules

Attendance

For students admitted into the Kuring-gai intake of the Bachelor of Nursing (C10122) (see page 173), most subjects are taught at Kuring-gai campus, however, students are required to attend City campus for Science subjects one day per week. For students admitted into the City intake of the Bachelor of Nursing (C10122) (see page 173), all subjects are taught at City campus in the first and second year of the program. The third year of the program is currently taught at the Kuring-gai campus with limited on-campus attendance. For students admitted into the Bachelor of Nursing Bachelor of Arts in International Studies (C10123) (see page 178), most subjects are taught at City campus. For students admitted into the Bachelor of Midwifery (C10225) (see page 230), all subjects are taught at City campus.

Class allocation

Students are allocated to particular groups or classes within a subject. This class determines when they attend laboratory sessions as well as tutorial times. Students must state their preferences for classes at enrolment. Students are allocated to classes and may then make changes to their allocation (subject to available places). Further information on this process is available from My Subject Activities at:

www.uts.edu.au/onestop/studentadmin

Some class changes may be limited by nursing practice restrictions in some years of the undergraduate courses, or by cohort management.

Nursing and Midwifery Board of Australia registration

The Bachelor of Nursing, Bachelor of Nursing Bachelor of Arts in International Studies and Bachelor of Midwifery are accredited by the Nursing and Midwifery Board of Australia. Graduates are eligible to apply for registration as a Registered Nurse or Midwife. In addition, for registration eligibility, the Nursing and Midwifery Board of Australia requires applicants to provide evidence of identity and good character, and documented evidence for assessment of any variation to the standard education program, for example credit recognition. Detailed information is available at:

www.nursingmidwiferyboard.gov.au

Clinical placements

Note: Nursing and midwifery clinical ladders are available as downloadable PDFs from the online UTS: Handbook at:

www.handbook.uts.edu.au/nmh/

Nursing practice policy

As part of their studies, students are required to undertake clinical practice in a variety of health facilities. This involves students being placed in a clinical environment in accordance with the nursing clinical ladder (see online handbook). Students are accompanied by a clinical facilitator or allocated an academic liaison officer who supports their clinical learning and undertakes their assessment.

UTS: Health makes every effort to place students in a health facility in close proximity to their home or close to public transport. However, this is often very difficult to achieve given the limited number of student placements, and students are asked to take this into consideration when they receive notification of their placement. Students with special needs may make a request to be placed in a particular health facility, following discussions with the subject coordinator, by emailing the Clinical Practice Unit:

email nmh.clinical.practice@uts.edu.au

Midwifery practice policy

As part of their studies, students are required to undertake clinical practice. This involves students being placed in a midwifery practice environment in accordance with the midwifery practice ladder (see online handbook). Students are supported by a midwifery practice facilitator or midwifery educator. UTS: Health makes every effort to place students in a health facility in close proximity to their home and close to public transport. However, this is often very difficult to achieve given the limited number of student placements, and students are asked to take this into consideration when they receive notification of their placement. Students are required to complete a request form in the first week of semester to identify their preferences.

Students with disabilities

Students in the Bachelor of Nursing, the Bachelor of Nursing Bachelor of Arts in International Studies, or the Bachelor of Midwifery must undertake nursing and/or midwifery practice placements as a prerequisite to satisfactory course completion. Information regarding the practice placement procedures for students with disabilities is available from special needs (see page 34) in the University-wide general information.

Accident and incident reporting

Any student or staff member involved in an accident, injury or incident while on clinical placement must complete a standard accident/incident form, available from their facilitator, midwifery educator or academic liaison officer. Completed forms should be forwarded to the academic clinical advisor for nursing and midwifery students. This form is to be completed in addition to any forms which the health facility requires.

The subject coordinator should also be notified immediately of any injury, accident or incident which requires medical attention.

If an injury sustained by a student raises doubts about the student's ability to attend subsequent nursing or midwifery practice experiences, the matter should be referred to the Director of Studies, Undergraduate for nursing students or the Director of Midwifery for midwifery students.

Attendance

The Nursing and Midwifery Board of Australia requires students to undertake a specified number of nursing or midwifery practice hours. One hundred per cent attendance on practice is required. Only cases of documented illness or misadventure, as per UTS rule 8.3, are accepted as a reason for not undertaking all nursing or midwifery practice hours. In the event of illness or misadventure, students must notify their clinical facilitator, midwifery educator or academic liaison officer, the relevant health facility and the Clinical Practice Unit:

telephone +61 2 9514 5122

email nmh.clinical.practice@uts.edu.au

Students in this category may then be offered completion of nursing or midwifery practice at the next specified time (see the relevant practice ladder). Should a student fail to complete all nursing practice hours for any other reason, including work or social commitments, they will not be offered the opportunity to complete their nursing practice hours, and run the risk of failing the subject.

Students are required to attend designated shifts while on nursing practice. Shift times vary between facilities, however, common start times are 7am and 1.30pm. Students with carer responsibilities should ask for a document from a UTS Student Centre which outlines issues that students may face.

Completion of nursing or midwifery practice

When assessing whether students are eligible to undertake additional hours to complete their nursing or midwifery practice, the Faculty of Health examines a student's nursing or midwifery practice history, taking into account past attendance as well as the requirements of the Nursing and Midwifery Board of Australia. Therefore, it is in the interests of students to ensure that they maintain a complete attendance record.

As indicated above, students may not be given the opportunity to complete missed nursing practice hours and consequently may fail the subject.

Conduct

Students undertaking supervised nursing or midwifery practice must follow the directions given to them by their facilitator, midwifery educator of academic liaison officer or, in the absence of these, the staff of the hospital or agency concerned. Students are reminded that they are required to adhere to clinical placement facility policy and procedures.

Safety

While on practice placement, all students are responsible for promoting and maintaining environmental health and safety (EHS) by:

- looking out for hazards, reporting them to the supervisor of the work area and helping to fix hazards
- taking action to avoid, eliminate or minimise risks
- following safe work methods and using personal protective equipment as required
- seeking information or advice as necessary, particularly before carrying out new or unfamiliar work
- participating in orientation activities
- reporting accidents and incidents to the supervisor of the work area
- · reporting emergencies in line with the facility protocols
- disposing of any hazardous wastes in a safe and approved manner
- not willfully placing at risk the health, safety and welfare of others
- exercising a duty of care toward others in everything undertaken.

All students must be aware of risk management policies and processes and be capable of implementing these within the clinical environments. Students must also comply with the policies and procedures of the relevant health facility.

Pregnancy on clinical placements

Pregnancy does not preclude students from clinical practice however some clinical placements may be potentially harmful to the developing foetus and to the student. Pregnant students are expected to notify the Faculty of Health of their pregnancy if they are working or studying in areas where there may be particular health and safety issues, e.g. radiation, working with infectious disease, cytotoxic drugs or anaesthetic gases. Students who are pregnant and in their third trimester of pregnancy, or within the first six months of being postnatal, must have the written permission of the Director of Undergraduate Nursing Studies to attend clinical placements. Students must also comply with health care facilities' guidelines and recommendations when undertaking placements.

Student wellbeing advice

All students involved in clinical placements must be fit to do so.

Students who have health problems or who are under the influence of alcohol and/or other drugs that might foreseeably render them unsafe during nursing or midwifery practice placement, or who have a health problem that may be affected adversely during their placements, should seek medical advice before undertaking a placement and should advise their subject coordinator.

Failure to do so may result in the Faculty of Health accepting no responsibility for the consequences.

Each student is responsible for evaluating the foreseeable health risks before and during each clinical placement, and implementing risk management strategies in consultation with the subject coordinator, and UTS environmental, health and safety guidelines. Students must also adhere to policies and direction from workplaces where the clinical placement is held.

Uniform

Students are required to wear the official uniform of the Faculty of Health during all nursing and midwifery practice placements. Academic staff will indicate any other occasions when students must wear their uniform. Some nursing practice placements, e.g. mental health, may not require the official uniform. Students are notified of this when they receive their practice placements. Students must purchase their uniform from the approved suppliers.

The uniform consists of:

- purple polo shirt; UTS design (men and women)
- black trousers; UTS design (men and women)
- black knee-length skirt; UTS design (to be worn with stockings)
- black, closed in rubber-soled shoes.

Other requirements are as follows.

- Fingernails must be short and clean. Only clear nail varnish is acceptable.
- False nails must be permanent, not require any infill, and be short, non obtrusive, clean and with clear lacquer only.
- Hair must be worn off collars. Students with long hair must wear it up; long ponytails are not acceptable.
- Students are permitted to wear a wedding ring and one pair of small, plain studs in the ear lobes. No other jewellery or piercings are acceptable.

- Watches should either be digital or have a second hand, and must have no sharp edges, fancy watchbands or large buckles. A multicoloured ballpoint pen and small notepad are essential requirements. A small pocket calculator is advisable.
- Academic staff will provide advice to students on other items which need to be purchased, e.g. fob watch, stethoscope, scissors.
- Students must wear the uniform from their first nursing or midwifery practice placement in Autumn semester and should ensure that their uniform is available by this time.
- All students must wear their UTS photo identification card, with retractable cord, at all times near their collar; this is available from the Co-op Bookshop for a nominal fee.

Immunisation

UTS is committed to the health, welfare and safety of its students and staff. The following guidelines have been set up in order to ensure legislative requirements are adhered to, along with minimising infectious disease transmission to and/or from our students and staff.

All students and staff must adhere to current legislative requirements, policies and procedures regarding infection control and immunisation. Students should be aware of guidelines regarding immunisations and levels of required immunity, as indicated within these guidelines. At the time this policy was developed, guidelines assisting in the direction of this policy included:

- National Health and Medical Research Council (2003), The Australian Immunisation Handbook, 8th edn, Commonwealth of Australia, Canberra.
- NSW Health (2005a), Occupational Assessment, Screening and Vaccination Against Specified Infectious Diseases, Circ 2007/006, 1 February 2007.
- NSW Health (2005b), *Tuberculosis Screening and Protection—Health Care Worker*, Circ 2001/71, 1 August 2001.

Documentary evidence of vaccination and/or current immunity for the following diseases (completed record card plus serology) prior to clinical placement is mandatory:

- Adult Diptheria, Tetanus and Pertussis
- Hepatitis B
- Measles/Mumps/Rubella
- Varicella (chickenpox)
- Tuberculosis
- Hepatitis A
- Influenza (optional).

Students must carry their updated and current vaccination screening record card plus serology with them at all times while on clinical practice and will be required to show evidence of both. Students must meet immunisation requirements of each placement they attend. Students unable to show their immunisation status will be asked to leave the placement.

Acceptable immunisation status is a prerequisite for attending clinical placements, due to legislative and organisational requirements. Health facilities have the right to preclude students who are not immunised in accordance with their policies. There are academic progress implications for students who fail to complete practice requirements for this reason.

Students who are unable to complete vaccination requirements for any reason (including conscientious objection) must request authorisation through the academic clinical advisor at least four weeks prior to every clinical placement. In most cases authorisation will be denied due to external organisation policies and requirements. Students who are unable to meet immunisation requirements will significantly impact their ability to complete their course.

Criminal record checks

Full details are provided in the NSW child protection legislation (see page 25) section in the University-wide general information.

Unsafe practice performance

A student's performance is deemed unsafe if it places patients, clients, their families, staff members or fellow students at risk, and if he or she is unable or unwilling to perceive that risk. The judgment that a student's performance is unsafe is usually made on the basis of more than one incident, however, it can be made on the basis of one episode.

Students whose performance is deemed unsafe are removed from the health facility as soon as the judgment is made and are referred to the subject coordinator, who determines the appropriate course of action. Students may receive a fail grade for the subject, or be given an opportunity to demonstrate improvement in an alternative clinical environment such as the laboratory. If satisfactory, students are given another opportunity to complete their nursing or midwifery practice in a clinical environment.

Refer to rule 16.10.

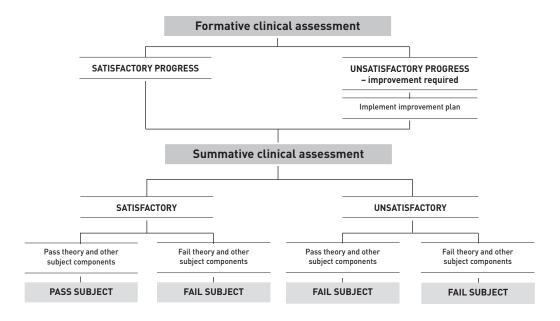

Unsatisfactory practice performance

A student's performance is deemed unsatisfactory if it fails to meet the objectives and assessment of a given nursing practice experience.

Each student has a formative assessment part-way through his or her clinical placement. If unsatisfactory performance is identified in this assessment, the clinical facilitator/midwifery educator/ academic liaison officer notifies the student and identifies a plan of action. This includes major areas of improvement and specific aims to be met to achieve satisfactory performance. If the student and/or the clinical facilitator/midwifery educator/academic liaison officer have reason to believe that they cannot work together to implement the improvement plan, a request can be made by either person to the subject coordinator for alternative arrangements. Each student receives a summative assessment towards the end of her or his clinical placement, which is assessed as either overall satisfactory or unsatisfactory.

The following diagram demonstrates the process for clinical subject assessment.

Clinical subject assessment diagram

Administering of intravenous medications while on clinical practice

Third-year Bachelor of Nursing students are permitted to administer intravenous medications only under the following conditions:

- under direct supervision of a registered nurse (including University clinical supervisors) accredited by the hospital to administer intravenous medications as long as all other medication requirements have been met, e.g. correct dose, patient, route, time, and written orders, etc., and
- hospital policy allows students to administer intravenous medications under the direct supervision of a registered nurse as set out above.

Postgraduate course information

UTS: Health's postgraduate programs aim to ensure that opportunities are provided for nurses, midwives and health services managers to study at graduate level, whether they were educated in hospitals or the higher education sector. Enrolment in a postgraduate program provides an opportunity to study within a challenging and stimulating environment. Postgraduate nursing, midwifery and health services management programs provide the scope for health professionals to strengthen and expand their knowledge in their disciplines while also encouraging study and research in specialised areas.

Two categories of postgraduate courses are offered – those by coursework and those by research.

Contacts and inquiries

UTS Student Centres

The UTS Student Centres are both the initial and primary point of contact for all students. Students should deal with the UTS Student Centres in all matters affecting their studies, including enrolment, exemptions, timetable matters, examination and assessment, as well as a wide range of student administration procedures.

For specific UTS: Health information, students should contact the following UTS Student Centres. $\begin{tabular}{ll} \hline \end{tabular}$

City campus

Building 10 Student Centre Foyer, Level 2, Building 10 (CB10.2) 235 Jones Street, Ultimo telephone +61 2 9514 1222

Kuring-gai campus

Kuring-gai Student Centre Foyer, Level 5, Building 1 (KG01.5) Eton Rd, Lindfield telephone +61 2 9514 1222 Ask UTS www.ask.uts.edu.au

Opening hours

UTS Student Centre opening hours are available at: www.uts.edu.au/students/centres.html

Academic Programs Office

The Academic Programs Office provides support and assistance to the UTS Student Centres in regard to UTS: Health processes and issues, and manages and supports UTS: Health's courses and specific student issues and processes. Students must contact the UTS Student Centre and complex issues may be referred by staff in the UTS Student Centre to the Academic Programs Office.

Postgraduate coursework

Postgraduate coursework rules and procedures

Admission requirements

Where large numbers of applicants are eligible for admission to any of UTS: Health's courses and places are limited, preference is given on the basis of:

- general educational qualifications
- previous academic grades, and
- professional experience and activities, e.g. post-registration certificates and scholarly activities such as research and publications.

Credit recognition

Subject exemptions are granted on the basis of the successful completion of equivalent subjects from recent postgraduate studies. Students should lodge an application for credit recognition and include a formal transcript verifying academic results and a description of the subject for which they are claiming equivalence.

For detailed information about applying for subject exemptions, read the Credit Recognition Application Guidelines (27kB PDF):

www.sau.uts.edu.au/forms/pdfs/RPL_0911.pdf

UTS: Health may also grant credit by substitution. This involves students being able to substitute a prescribed subject where they can demonstrate that they have undertaken an equivalent subject at either postgraduate or, in exceptional circumstances, undergraduate level.

The maximum number of exemptions under UTS: Health policy are:

- graduate certificates: maximum of two exemptions (12 credit points)
- graduate diplomas: maximum of four exemptions (24 credit points)
- master's: maximum of eight exemptions (48 credit points)
- master's conversions: students must complete a minimum of four subjects.

Rules and regulations

All students should refer to the Rules of the University available at: www.gsu.uts.edu.au/rules

Progression rules

A student will have their registration discontinued, in accordance with rule 10.2.3 and rule 10.4.1, if they fail more than 50 per cent of the total number of enrolled subjects in an assessment period, or fail to meet any concurrent experience or other requirement prescribed by the course over a two-year period.

Contacts and inquiries

The directors of studies, course coordinators and advisers provide academic advice to students on their program, or other assistance such as helping students experiencing difficulties to cope with their academic work.

Postgraduate research

UTS: Health offers the following research degrees at master's and doctoral levels:

- Master of Nursing (Research) (C03048) (see page 493)
- Master of Midwifery (Research) (C03049) (see page 494)
- Master of Health Services (Research) (C03050) (see page 494)
- Doctor of Nursing (professional doctorate) (C02052) (see page
- Doctor of Midwifery (professional doctorate) (C02053) (see page 483)
- Doctor of Health Services (professional doctorate) (C02054) (see page 484)
- Doctor of Philosophy (PhD) (C02024) (see page 474).

All research degrees require the independent preparation of a thesis that makes an original contribution to knowledge. The master's (honours) and professional doctorate degrees include required coursework in addition to the preparation of a thesis.

University rules and procedures for master's students and doctoral students apply to all research students in UTS: Health (see section 11).

Applications for research degrees

Application forms for research degrees are obtained from the UTS: Graduate Research School. All requirements for documentation must be met when submitting the application. UTS: Health uses the University's scoring system to assess applications. Applicants are assessed on the basis of a range of categories, such as academic qualifications, research publications and professional achievement. The minimum educational requirements must be met by each applicant as specified in the entry requirements for each degree. Applicants are required to have a research proposal and agreement of a suitable supervisor at the time of application. Applicants are also required to complete a supplementary form. More information is available at:

www.nmh.uts.edu.au/research/postgraduate/apply

International applicants are required to first contact UTS International

email international@uts.edu.au

Selection of supervisors

Research for a degree at doctoral and master's level must lead to a distinct contribution to the knowledge of a subject by original investigation. This involves a considerable intellectual challenge and a substantial commitment over time and necessarily depends on the relationship between the candidate and his or her supervisors. For this reason careful thought should be given by the candidate and the proposed supervisor to the questions of personal compatibility and areas of common academic and professional interests. It is essential that the project be of direct interest to the supervisor and candidate and lie within the supervisor's area of expertise.

For doctoral and master's candidates there must be a principal supervisor and a panel of supervisors (which can be composed of the alternate supervisor alone). The principal supervisor must be a member of UTS: Health academic staff, be a registered supervisor with the University and be eligible to supervise a candidate at the required level. A panel member (or alternate supervisor) may either be a member of UTS: Health academic staff or the University, or a person employed outside the University of recognised standing in the field of the candidate's research. Supervisory panel members must be registered as a supervisor with the University. Supervisors of doctoral and master's candidates are appointed by the UTS: Graduate Research School Board on the recommendation of the director of research.

The rules regarding the appointment of supervisors and the code of conduct for supervisors can be found at:

www.gradschool.uts.edu.au

Regulations and responsibilities regarding supervision

While the student–supervisor relationship is a flexible one, the University requires supervisors to ensure by their advice, guidance and expertise that a particular candidate maintains satisfactory progress within the prescribed term of the candidature; that the candidate receives adequate advice both on the substance of the thesis and on the form its presentation will ultimately take; and that the work being done on the thesis is reviewed critically on a continuing basis. The way in which this is done is to be negotiated between the candidate and the supervisors.

The University acknowledges that research students have a right to effective supervision and research training. However, students have responsibilities as well in adhering to the University rules, in maintaining progress and in communicating with their supervisors.

The UTS: Graduate Research School Board has produced a Code of Conduct for Supervisors, Advisors and Research Degree Candidates, available at:

www.gradschool.uts.edu.au

Research Student Symposium

The Research Student Symposia are held twice a year in June/July (Winter session) and December (Summer session). They are designed to facilitate a number of important requirements for UTS: Health's research students and provide an opportunity for research students, supervisors, staff and invited guests to interact in formal and informal settings. The symposium incorporates student presentation, doctoral and master's assessments (see below), plenary sessions from invited guests and workshops.

Requirements for research degree candidates

Research degree students have a number of University and faculty requirements that must be met in order to progress through the degree. Failure to meet these requirements can result in review or termination of the candidature. The Rules of the University relating to students are published at:

www.gsu.uts.edu.au/rules

Students are expected to be aware of current rules and policies affecting their candidature and progression requirements. Students are required to provide current contact details and other relevant information to their supervisors, UTS: Health and the UTS: Graduate Research School. It is the candidate's responsibility to inform their supervisors, UTS: Health and the UTS: Graduate Research School of changes in their contact details or circumstances that will affect their candidature.

Progress by semester

It is the responsibility of each student and supervisor to discuss, at the beginning of each semester, the progress anticipated throughout that semester. The initial consultation between candidate and supervisor should include the establishment of a form of agreement, or contract, which identifies certain minimum requirements for that semester. These consist of setting an agenda for regular contact; presenting in the Research Student Symposia and attending the presentations of others; identifying the criteria by which to judge the progress of the research being undertaken that semester; attending coursework subject sessions and successful completion of coursework (where appropriate); and the submission of semester progress reports.

Progress reports

It is a University requirement that all research students who are enrolled and are not on leave of absence or under examination for that semester complete and return a progress report for Autumn and Spring semesters (rule 11.13). Progress reports are sent to the student by the UTS: Graduate Research School and must be completed by the student and their supervisors and returned to UTS: Health by the due date. The faculty also requires students to complete the semester plan and report form, which must be submitted with the progress report.

Student presentation

Student presentations are held during Research Student Symposia weeks. It is a condition of candidature with UTS: Health that research degree candidates present at and attend Research Student Symposia at least once a year for part-time students and twice a year for full-time students. Candidates are not expected to present in the first semester of candidature. The presentation should relate to the student's research, area of study or methodology. These workshops provide an ideal opportunity to obtain peer review, gain insight into other research being conducted, learn new methodologies being employed and form a network with peers and academic staff. The importance of these workshops to the academic development of research degree candidates should not be underestimated.

Doctoral and master's assessment (confirmation of candidature)

It is a University requirement that all research degree students undertake a formal assessment during the early phase of their candidature. The assessment comprises an oral presentation (of up to 20 minutes) to a panel of assessors and the submission of written work (of up to 10,000 words).

The objectives of the assessment are to ensure that: candidates have the knowledge and skills to enable successful and timely completion of their research program; candidates who are not suited/equipped to work towards a research degree are made aware of this fact before they have invested considerable time and money; and that there is a commitment by the University through the supervisor and UTS: Health for the provision of sufficient human and physical resources to enable satisfactory completion of the research program.

Master's and doctoral students are required to undertake assessment before or at the end of the first two semesters for full-time students and before or at the end of the first three semesters for part-time students.

The assessment panel comprises the student's principal supervisor, the co-supervisor (and panel if applicable), the chair of the panel (usually the responsible academic officer), and two external examiners, who are nominated by the candidate's supervisors and approved by the responsible academic officer. Members and students of UTS: Health are also invited to attend as observers, but do not contribute towards the decision of the panel. After the assessment, the panel discusses the student's presentation and work.

The student is informed of the panel's determination verbally (if appropriate), or in a meeting with the chair, supervisors and student as soon as practical. The student will be informed of the panel's decision by mail within two weeks of the assessment date and copies of the letter will be forwarded to the student's supervisors and the UTS: Graduate Research School. Students who do not satisfy the requirements for the doctoral or master's assessment will not be permitted to proceed with their candidature unless with the approval of the UTS Academic Board. Then, they will be invited to re-attempt the assessment six months after they have been notified in writing of the unsatisfactory outcome.

The written component of the assessment must be submitted to the research administrator no later than 14 working days before the assessment date.

The University policies and rules relating to doctoral and master's assessment can be found at:

www.gradschool.uts.edu.au

The Guidelines for Doctoral and Master's Assessment (components and procedures) are available at:

www.nmh.uts.edu.au/research/postgraduate/candidature/assessment.html

Submission of thesis

All research degree students are required to submit a thesis (or dissertation) to complete their program. The University has a number of rules and requirements for the submission of theses. The Rules of the University relating to thesis topics, the submission of theses and the examination of theses are published at:

www.gsu.uts.edu.au/rules

The UTS: Graduate Research School also provides information on the requirements for thesis submission, which can be obtained from their website (www.gradschool.uts.edu.au).

It is a University requirement (rule 11.16) that candidates for doctoral degrees make an oral presentation of their work to a panel or audience. This must be completed within the six months prior to submission.

The examination process

Theses are examined by examiners (not including supervisors) who are appointed by the UTS: Graduate Research School Board following recommendation by UTS: Health. In the case of master's students, at least one of the two examiners will be external to the University; for doctoral students at least two of the three examiners will be external to the University.

Candidates for a research degree may be required to undertake an oral defence of their thesis under such conditions as determined by the UTS: Graduate Research School Board.

Rules relating to the examination process are available at:

www.gsu.uts.edu.au/rules

Information for research degree students

Research degrees have specified maximum durations as described in the Rules of the University. Students can complete in less than the maximum time.

Maximum duration of candidature: master's degrees

Full time = two years (four semesters)

Part time = four years (eight semesters)

Maximum duration of candidature: doctoral degrees (excluding PhD by publication)

Full time = four years (eight semesters)

Part time = eight years (16 semesters)

Maximum duration of candidature: doctoral degrees by publication

Full time = one year (two semesters)

These periods do not include periods of approved leave of absence (rule 11.9).

The maximum duration may only be extended with the approval of the UTS: Graduate Research School Board (rule 11.8).

Professional doctorate and master's (honours) coursework

Coursework for professional doctorate students is typically undertaken in block sessions of three to six days. These blocks are typically held in February, July and December. Students are required to attend a block session for each subject in which they are enrolled for that semester

Coursework for master's (honours) students is typically undertaken in class sessions that run over three to six days during the semester. Students are required to attend the class sessions for each subject in which they are enrolled for that semester.

Intellectual property

UTS: Health has explicit guidelines relating to academic misconduct, including plagiarism. In brief, plagiarism is defined as any attempt to use the work of another person without acknowledging the source. For the purposes of this rule, 'work' is defined as written materials such as books, journals and magazine articles or other papers, and also includes films and computer programs.

At research level, students must exercise great care in acknowledging all material derived from any source; if in doubt students should consult their supervisor. Remember, even paraphrasing another person's work is defined as 'using' that person's work and must be acknowledged.

The penalties relating to a candidate found to have committed plagiarism are outlined in the UTS Rules.

Discontinuation or resolution of progress

Research degree students may have their registration discontinued if they fail to complete all prescribed work within a given period of time or if the UTS: Graduate Research School Board is dissatisfied with the student's progress. The Rules of the University relating to discontinuation of candidature, appeal against discontinuation and results of appeals are rules 11.20–11.22.

Appeals

In cases of appeal, a Student Assessment Appeals Committee of the Faculty Board in Nursing, Midwifery and Health considers the appeal following the criteria and procedures approved by the Academic Board.

For a detailed explanation of the rights and procedures of appeals, candidates should consult the Rules of the University published at: www.gsu.uts.edu.au/rules

Graduation

Research students should consult closely with their supervisor when anticipating graduation, as the assessment process for theses can be a time-consuming undertaking, and revisions are often required.

Graduation ceremonies are conducted during a specific period in April–May and September–October each year. Information regarding graduation will be forwarded to eligible students following the receipt of the final bound copies of the thesis.

Contacts and inquiries

Any inquiries of a non-administrative nature should, in the first instance, be directed through the student's supervisors. If this is not possible, or is inappropriate, inquiries should be directed to the research administrator, relevant course coordinator or to the director of research

Administrative inquiries should be directed to the research administrator.

UTS: INFORMATION TECHNOLOGY

Information for students

The Faculty of Engineering and Information Technology (FEIT) is Australia's leader in practice-based engineering and IT education and research, and currently enrols over 7000 students in industryrecognised courses from undergraduate to doctoral level.

The faculty prides itself on its high level of engagement with the engineering and IT professions locally and internationally, by offering short courses and consulting expertise to the local community, and internationally through its courses offered in Hong Kong and Singapore, a significant local international student population and a robust student exchange program. FEIT is also the leading research faculty at UTS, with a diverse range of research being undertaken in matrix across the faculty's twelve research centres and institutes, and five academic schools.

The faculty structure comprises four portfolio areas in teaching and learning; research and development; international; and external engagement, each led by an associate dean. Five schools house the academic sub-disciplines of the Faculty of Engineering and Information Technology:

- School of Civil and Environmental Engineering
- School of Computing and Communications
- School of Electrical, Mechanical and Mechatronic Systems
- School of Software
- School of Systems, Management and Leadership.

Location, contacts and inquiries

The Faculty of Engineering and Information Technology is located at City campus, Broadway, in Buildings 1, 2 and 10. Key staff are:

Faculty contacts and areas of interest

A comprehensive list of UTS: Information Technology academic staff and their research areas is available from:

http://datasearch2.uts.edu.au/feit/staff/listing/index.cfm

Environmental Health and Safety Plan

UTS: Information Technology is committed to providing a safe and healthy workplace for students, staff and visitors, and adopting a socially responsible approach towards protecting and sustaining the environment. Promoting a safe, healthy and environmentally sound environment is the responsibility of all staff and students.

The names and locations of first aid officers and first aid kits are indicated by appropriate signs in Building $10\,\mathrm{and}$ school areas.

More information is available at:

- MyFEIT (student intranet): http://my.feit.uts.edu.au/myfeit
- UTS: Safety and Wellbeing: www.safetyandwellbeing.uts.edu. au/student

Computing facilities

The faculty provides computer laboratories, network services and high bandwidth internet access for use in teaching and research. This gives students the software and information they need for their subjects and the services to communicate and collaborate with their peers. Personal laptops can also be used to access network services and the internet.

Teaching laboratories

Computer laboratories

The faculty has 17 computer laboratories in Building 10 and 20 computer laboratories in buildings 1 and 2 that are used in many subjects. They are regularly updated with the latest hardware and undergo a complete upgrade of operating systems and programs before most semesters.

Most labs offer students a choice of operating systems at the login screen, which gives the laboratories great flexibility to meet student and class needs.

The Building 10 laboratories can be grouped into 10 general purpose laboratories, each of 30 computers, as well as four internetworking labs, two professional presentation labs and a graphics lab.

Except during scheduled classes, general access to laboratories is:

- 8am-10pm Monday to Friday (during semester)
- 9am–6pm Monday to Friday (outside semester).

Booking times are located on laboratory doors.

Seven days a week, 24-hour access is provided to some laboratories throughout the University, including some of the UTS: Information Technology labs.

Network services

UTS: Information Technology provides a Unix shell, via SSH, with a home directory that is backed up regularly. Students can access additional services; this is normally organised by their lecturers. Services include Oracle, MySQL, PostgreSQL databases, Subversion repositories and internal websites.

Breakout rooms and lounge areas

These areas provide space for students to collaborate together or for individuals to have time on their own. All areas have access to the wireless network and many, particularly the breakout rooms, have whiteboards, wired access and power. Breakout rooms can be booked and are suited for groups wanting a private meeting space, while the atrium lounge and table areas are more casual and social spaces.

Specific-purpose laboratories

Access to specific-purpose laboratories is arranged by the academic involved in a particular subject or research project.

Networking laboratories

These three laboratories are equipped with user-configurable, rack-mounted network equipment for teaching computer network subjects.

Graphics laboratory

A laboratory of specially equipped computers for graphic-intensive subjects is available. In particular, the computers have advanced graphic accelerator cards and the Maya software application.

Creativity and cognition studios

These studios form a multidisciplinary environment for research into computing support for creativity and into the development of new art forms and art practice using digital media. They include a games studio, a sound studio and a video wall with an interaction space incorporating a range of sensor systems.

Remote access facility

The remote access facility provides modem access for students and staff. This gives users access to UTS: Information Technology's computing systems and the internet.

Service desk facility

Students requiring IT support for any faculty-provided IT system, including the computing laboratories, should telephone or email, between 9am and 5pm weekdays, describing the problem:

telephone +61 2 9514 7922

email FEITServiceDesk@uts.edu.au

Compulsory safety induction

As part of the faculty's commitment to safety, all engineering and IT students are required to annually complete a safety induction in order to access PIN-protected facilities within the faculty. Completion of the safety induction is not required to be able to attend scheduled/ supervised lab sessions or use some IT labs during business hours. Students enrolled in an engineering or IT course are automatically given access to enrol in the safety induction through UTS Online (the forum is called 'UTS: Faculty of Engineering and Information Technology - Safety Induction').

Students from outside the faculty who enrol in engineering or IT subjects and who need PIN access to faculty facilities must contact the faculty to get enrolled in the safety induction forum:

email FEITPinAdmin@uts.edu.au

This is also the contact for students who have problems with their PIN access.

Women in Engineering and IT Program

The Women in Engineering and IT (WiE&IT) Program at UTS is a long-standing initiative to redress the low rate of female participation in the field by communicating the opportunities of engineering and ICT (information and communications technology) careers as a course of study; by promoting the involvement of women in the course, in the Faculty and in research at UTS; and by networking with professionals from engineering and ICT fields and professional organisations. We also seek to address attitudes and behaviours which may deter students and staff from achieving, in a safe and rewarding learning, research and working environment.

The WiE&IT Program invites students, staff and industry to support its ongoing activities in 2013 and contribute ideas for new initiatives which will attract and support more women to choose to study engineering and IT.

Further information is available at:

www.feit.uts.edu.au/women

www.utswomeninengineeringandit.blogspot.com

Short courses

UTS: Information Technology offers a variety of professional, commercial and customised courses throughout the year in the areas of computing and information technology. Courses regularly on offer include Advanced Java (J2EE), Developing Windows and Web Applications using Visual Studio .NET, Managing and Using Microsoft Share Point 2010, Fundamentals of Unix, IP Telephony and Voice Over IP (VoIP), Java Fundamentals, Object-oriented Programming with C++, Programming with C, Iphone Games Development, SQL Server 2008 for Business Intelligence, SQL Server 2008 for Developers, Linux Systems Administration and a range of Cisco certified network academy preparation stages for certification (CCNA stages 1 to 4).

New CCNA security courses are also available. These courses are offered by the UTS Cisco Networking Academy.

Courses may also be customised to suit corporate training needs.

For further information, contact:

Angelia Lawah, UTS:IT Short Course Administrator telephone +61 2 9514 1806 fax +61 2 9514 1844 email Liuangelia.Lawah@uts.edu.au www.it.uts.edu.au/courses/short

Undergraduate course information

UTS: Information Technology offers undergraduate degrees in information technology and a number of combined degrees with business, international studies, law and mathematics.

The full list of courses is available at:

www.handbook.uts.edu.au/it/ug (see page 13)

Bachelor of Science in Information Technology students must complete eight foundation core subjects and an IT major (CBK90781).

IT majors are offered in four areas:

- Business Information Systems Management (MAJ02080)
- Enterprise Systems Development (MAJ03444)
- Interprise systems bevelopment (MAJ03445)
 Internetworking and Applications (MAJ03445)
- Data Analytics (MAJ02081).

The following areas are offered as sub-majors:

- Business Information Systems Management (SMJ02064)
- Enterprise Systems Development (SMJ03036)
- Internetworking and Applications (SMJ03037)
- Data Analytics (SMJ02065)
- Computer Graphics and Animation (SMJ02066)
- plus sub-majors from other faculties.

Practice-based education

UTS: Information Technology is a leader in practice-based education and has offered a year of industrial experience, i.e. the Diploma in Information Technology Professional Practice (C20049) (see page 299), as part of its undergraduate courses for many years. The industry experience provides a better understanding of the relationship between theory and practice, and increases students' employability by providing work experience before graduation.

The Industry Partnering Unit (IPU) assists students in their preparation to obtain an industrial training position as part of the Diploma in Information Technology Professional Practice. The staff of the IPU maintain contact with various organisations that offer IT positions. Students seeking industrial training must attend the industrial training information session held in May each year and register in the semester preceding their intended period of industrial training.

The IPU maintains a database which provides information to students on available industrial training jobs.

Undergraduate progression rules

Undergraduate students who do not maintain the required minimum level of progress may be excluded from a course and have their enrolment withdrawn. The minimum rate of progress is achievement of 50 per cent of the credit points in which a student has been enrolled since the beginning of that course. In addition, students are bound by the Rules of the University and are advised to refer to them:

www.gsu.uts.edu.au/rules

Grading of awards

The cut-off points for grading are fixed and common across all undergraduate degrees as follows.

Students who have completed the required subjects and credit points determined for each award qualify to graduate at pass level.

Qualification for graded awards is based on the weighted average mark calculated for all graded subjects completed, including electives. Ungraded pass/fail subjects, including electives taken while on exchange and exemptions granted as recognised prior learning, are not included in the calculation.

In the case of combined degrees where the IT component is less than 144 credit points, the grading of the IT component normally includes all IT subjects, plus core subjects from the non-IT degree, to a total not less than 144 credit points. Students in combined degrees who wish to confirm which subjects are counted towards the grading of their degree should check with the Faculty of Engineering and Information Technology.

For a degree with distinction, the weighted average mark must be greater than or equal to 75. For a degree with credit, the weighted average mark must be greater than or equal to 65 and less than 75.

The grading of Bachelor of Science (Honours) in Information Technology is as follows.

Students who have completed the required subjects and credit points (48 credit points) determined for the award qualify for third class honours.

Qualification above third class honours is based on the weighted average mark calculated for all graded subjects completed, including electives. Ungraded pass/fail subjects and exemptions granted as recognised prior learning are not included in the calculation. All failures are included in the calculation.

- First class honours: the weighted average mark must be greater than or equal to 85.
- Second class honours (division 1): the weighted average mark must be greater than or equal to 75 and less than 85.
- Second class honours (division 2): the weighted average mark must be greater than or equal to 65 and less than 75.

The University Medal is awarded to the top student(s) in each graduating cohort provided their weighted average mark is above 85.

Postgraduate course information

Postgraduate coursework

UTS: Information Technology offers postgraduate degrees in information technology, IT management, internetworking and interactive multimedia

The courses are designed to challenge the IT professional, help professionals develop specialised IT skills or equip people to enter the IT industry from other fields. The innovative programs cover growth areas such as cloud computing, computer graphics and gaming, data mining, enterprise software engineering, human-centred design, information sytems services, interactive multimedia, networking applications and services, and strategic IT management and leadership.

Progression rules

Postgraduate information technology students may be excluded from further study at the University if they fail more than 50 per cent of the total number of enrolled credit points from the commencement of the course.

Postgraduate information technology students may also be excluded from a course if they exceed the maximum time allowed for completion of that course (see rule 10.5).

Credit recognition

Credit recognition is granted on the basis of the successful completion of equivalent subjects from recent undergraduate or recent postgraduate studies from recognised tertiary institutions. Students should lodge an application for credit recognition form if they wish to apply for exemptions from subjects within their enrolled course.

Postgraduate credit recognition is not normally granted where prior studies were undertaken more than three years previously. Postgraduate credit recognition is not granted for prior sub-degree TAFE studies or industry certifications. Credit recognition is mostly given for core subjects. However this is dependent on the specific program.

Articulation

While courses are offered as stand-alone qualifications they are also components of integrated programs of study that enable students who satisfactorily complete a graduate certificate or graduate diploma to apply for entry to a higher-level course within their chosen field of study. Where a student articulates from one level of study to another, the subjects completed are also carried forward into the higher-level course. Articulation is via internal course transfer.

Internal course transfer forms are available at:

www.sau.uts.edu.au/forms

Postgraduate research

UTS: Information Technology has a lively and cutting-edge research culture driving advances in engineering and IT technology, practice and education. UTS: Information Technology's research is needsdriven and collaborative, and works with many enterprises in business partnerships. Researchers are world-class and recognised leaders in their fields.

Research is varied and utilises modern laboratories and research facilities at City campus, Broadway. These are supported by extensive computing facilities and library services. The laboratories have excellent back-up workshops and expert support staff. Many opportunities exist for professional development through challenging, well-resourced research programs.

UTS: Information Technology practises excellence in research and research training, and is committed to the production of high quality research output in collaboration with other faculties, other universities and industries in Australia and overseas. UTS: Information Technology's increasing research activities are driven by a substantial number of excellent research leaders among academic staff which has resulted in a significant increase in high quality research publications, PhD completions and competitive research grants awarded, in particular, research grants from the Australian Research Council.

Contacts and inquiries

The management and administration of all research matters of the Faculty of Engineering and Information Technology is managed through the Research and Development Office, headed by the Associate Dean (Research and Development). The office is responsible for a broad range of matters including, but not limited to, research strategic priorities, policy and planning, and advice and support to staff in preparing grant applications, research publications, research conferences and research degree student supervision. The Associate Dean is supported by the Director of Research Programs, the Research Manager and the research administration officers, who are responsible for the academic management and support of research degree students and general research matters respectively.

Research matters are governed via the Research Management Committee and Research Degrees Committee that report to the Faculty Board in Engineering and Information Technology. The Research Management Committee has overarching responsibility for determining research strategies and policies, and for making recommendations in relation to building a research culture and profile, and for budgetary and resourcing matters relating to research. The Research Degrees Committee makes recommendations and sets policies relating to candidature management of higher degree research degree students, from admission through to graduation.

Specific inquiries should be directed to the Faculty of Engineering and Information Technology Research and Development Office. Key staff are:

Associate Professor Jaya Kandasamy Director of Research Programs telephone +61 2 9514 2558 email Jaya.Kandasamy@uts.edu.au

Dan Gollan Research Manager telephone +61 2 9514 7863 email Daniel.Gollan@uts.edu.au

Craig Shuard Research Administration Officer telephone +61 2 9514 4460 email Craig.Shuard@uts.edu.au

Phyllis Agius Research Administration Officer telephone +61 2 9514 2686 email Phyllis.Agius@uts.edu.au

Gunasmin Lye Research Administration Officer telephone +61 2 9514 2663 email Gunasmin.Lye@uts.edu.au

General inquiries from domestic students should be directed to:

UTS Graduate Research School telephone +61 2 9514 1336

General inquiries from international students should be directed to:

UTS International telephone 1800 774 816 (free call within Australia)

Research profile and strengths

The Faculty of Engineering and Information Technology has a number of key research centres and institutes. These centres are hives of research activity that have international standing within their respective discipline areas. The centres include:

- Advanced Analytics Institute
- Centre for Built Infrastructure Research
- Centre for Electrical Machines and Power Electronics
- Centre for Energy Policy
- Centre for Health Technologies
- Centre for Human-Centred Technology Design
- Centre for Innovation in IT Services and Applications
- Centre for Intelligent Mechatronic Systems
- Centre for Quantum Computation and Intelligent Systems
- Centre for Real-Time Information Networks
- Centre for Technology in Water and Wastewater.

Collaborative research

The research strengths in the Faculty of Engineering and Information Technology were recognised as a consequence of a thorough analysis of networks of expertise and communities of interest, and based on the review of ICT research at UTS.

Each UTS: Information Technology research strength includes a number of specialised research laboratories that bring together staff, experts, research students and external organisations to develop new and innovative ideas, and apply them in practice. The quality and relevance of research in the research laboratories is enhanced by well-established links, both with industry and with overseas research institutions. Graduate research students, academics, visiting researchers and research assistants undertake collaborative research within these laboratories.

Further information is available from:

www.feit.uts.edu.au/research

Research opportunities and major research areas

Research opportunities are available in the following areas of specialisation.

- School of Civil and Environmental Engineering: built infrastructure; structural engineering; geotechnical engineering; construction materials; local government; road engineering; water and environmental resource management; water modelling; membrane technology in water and wastewater treatment; soil contamination and remedial techniques; and solid waste management.
- School of Computing and Communications: wireless relay/ mesh and cooperative networking; body area networking; microand nano-scale networks; 4G (WiMAX, LTE); short-range RF and inductive near field communication systems and sensing; antennas and propagation; microwave engineering; national broadband network; multi-antenna systems; wireless sensor $networks; bio\text{-}mimetic\,paradigms\,for\,network\,management\,and$ configuration; autonomic communications; anticipatory systems; radio resource management (RRM) mechanisms; Satellite communications and broadcasting; LAN/WAN enterprise networking; network embedded applications; m-health monitoring; mobile networks; personal area networks; multilayer switching; mobile and distributed multimedia applications and services; network security; internet service architecture; programmable networks; internet quality of service; web technologies; web architecture framework; mobile commerce and internet business; location-based services; network grid services; peer to peer networks; digital signal processing; pattern recognition; computer vision; multimedia; image processing; image and video analysis; machine learning; cognitive and affective multimedia content analysis; and multimedia systems.
- School of Electrical, Mechanical and Mechatronic Systems: advanced control; artificial intelligence; autonomous robotics; automotive engineering; biomedical engineering; energy; embedded systems; health technologies; mechatronics; power systems; and renewable energy.
- School of Software: art and technology; artificial intelligence; computer animation; computer games; computer graphics; computer usability; data mining; e-finance; e-government; e-health; e-marketing; e-safeguard; e-security and e-service; emergency management; expert systems; human-computer interaction; information systems; innovation and creativity; innovation and technology; intelligent agents; intelligent problem

solving and smart business decision-making in engineering; interaction design; interactive entertainment; interactive story telling; learning environments; multi-agent systems; multimedia; next-generation automated enterprise cooperative infrastructure; object-oriented computing; object-oriented processes and methodologies; ontologies; optimisation activities; quantum computing; ray tracing; rendering techniques; requirements engineering; resource planning; robotics; semantic web; smart trading systems; software development; and technology design and use.

School of Systems, Management and Leadership: energy
policy and planning; engineering practice; environmental risk;
information systems; IT education; IT governance; IT strategy
and management; knowledge management; operations and
risk management; strategic IT leadership; systems analysis and
design; systems development; and systems theory and sociotechnical systems.

Research centres and institutes

The Faculty of Engineering and Information Technology supports several centres and institutes, each capturing established research strengths in Engineering and Information Technology related fields. These include the following:

Advanced Analytics Institute (AAI)

AAI provides interdisciplinary expertise and leadership in areas including data mining, machine learning, applied statistics, behaviour analytics, data science and engineering, marketing, finance, economics, decision-making, optimisation and risk management. AAI offers cross-disciplinary and cross-domain research capabilities and hands-on experience in advanced analytics across historical data, realtime information and future trends. Analytics is a fast-growing global industry with an ever-increasing demand for qualified graduates. At UTS, a cross-disciplinary approach to analytics research brings together experts from across UTS's faculties and research centres to form a specialist analytics group. AAI brings together leading researchers from the Faculty of Engineering and IT, the Faculty of Business, the Centre for Quantum Computation and Intelligent Systems (QCIS) and the Centre for the Study of Choice (CenSoC). The Institute also fosters dedicated research and development resources for advanced analytics and receives resource support from the UTS External Engagement department and the UTS Research Innovation

AAI offers unique training programs in broad-based analytics. AAI is working towards fostering world-class specialists and analytical project managers for specific domains through a supervisor-driven and practice/project-oriented approach, interdisciplinary workshops, short courses (including executive training), and day-to-day engagement in tier-one organisations.

Professor Longbing Cao Director telephone +61 2 9514 4477 email advancedanalytics@uts.edu.au www.analytics.uts.edu.au

Centre for Built Infrastructure Research

The Centre for Built Infrastructure Research (CBIR) comprises a multidisciplinary team of researchers from the faculties of Engineering and Information Technology; Science; and Design, Architecture and Building. CBIR's nationally and internationally renowned work focuses on finding solutions to important global problems in control, rehabilitation and health monitoring of building structures and bridges, green and smart materials, sustainable design, management, improvement, safety and conservation.

Professor Bijan Samali Director telephone +61 2 9514 2023 email Bijan.Samali@uts.edu.au www.research.uts.edu.au/strengths/bi

Centre for Electrical Machines and Power Electronics

The Centre for Electrical Machines and Power Electronics (CEMPE) is principally concerned with electrical variable speed drives and generation of electricity using rotating electrical machines and renewable sources (such as wind and hydro). The technical research disciplines necessary for these two areas are very similar, covering electrical machines design, power electronics and mechanical design. The interest in renewable energy generation is primarily for remote

areas and developing countries, so the incorporation of expertise in design for such areas is valuable, with the inclusion of energy requirements analysis, energy economics, technology transfer and human management issues.

Professor Joe Zhu Director telephone +61 2 9514 2318 email Jianguo.Zhu@uts.edu.au http://services.eng.uts.edu.au/cempe

Centre for Energy Policy

The Centre for Energy Policy (CEP) addresses contemporary energy and environmental policy issues in national and international contexts. Energy market reforms, environmental policy options, and energy-economy interactions are key areas of focus. Research undertaken in the centre is policy-oriented, applied, and cross-disciplinary, emphasising the weaving together of technical, business, economic, legal, social, political and philosophical dimensions of energy, environmental and economic policies.

Professor Deepak Sharma Director telephone +61 2 9514 2422 email Deepak.Sharma@uts.edu.au

Centre for Health Technologies

Professor Hung Nguyen

Director

The interdisciplinary research skill base brought together in the Centre for Health Technologies (CHT) is unique in Australia in the development of medical devices and systems. The CHT has four research programs: non-invasive instrumentation, bio-therapeutics, bio-electromagnetics and nano-biotechnology. Its focus is on health and disease processes, the development of new devices and advanced methods for the early detection, diagnosis and rehabilitation of cardiovascular disease, diabetes, neurological disorders and cancer. Its research has already produced several new device technologies which are at the cutting edge of biomedical engineering and science.

telephone +61 2 9514 4441 email Hung.Nguyen@uts.edu.au Professor Ann Simpson Director telephone +61 2 9514 4097 email Ann.Simpson@uts.edu.au http://services.eng.uts.edu.au/~htn/health.html

Centre for Human Centred Technology Design

The Centre for Human Centred Technology Design (HCTD) is committed to information and communications technology (ICT) design research, methods and approaches, as defined by its commitment to the human, that is, to those who will use the technology.

HCTD's approach furthers the development of a much needed sociotechnical perspective on technology design that can both balance and extend the more common technology driven or management driven perspectives. HCTD's focus is on understanding the complex interplay between the drivers of social, organisational and technical change and how these shape, and are shaped by, the design, implementation and use of information and communication systems. The centre's research outcomes contribute to the design and development of ICT that fit easily and appropriately into the social, cultural and organisational contexts within which they will be used.

Centre for Innovation in IT Services and Applications

The Centre for Innovation in IT Services and Applications (iNEXT) is a world-class research environment for developing and nurturing innovation for the next generation IT services and applications, including internet-enabled business applications, mobile health services, high-end visualisation technologies, novel image processing architectures and advanced video surveillance systems.

- Future internet: iNEXT aims to develop those enabling mechanisms that will allow the transformation of the current connectivity infrastructure into the service infrastructure of tomorrow's internet.
- Applications and services: iNEXT aims to develop innovative applications with special focus on assistive mobile health and internet-enabled business applications.
- Visual information processing: iNEXT aims to define novel visualisation techniques and intelligent recognition algorithms for extracting important information from video streams and wireless sensor networks for surveillance and environmental monitoring purposes.

Commercialisation of such applications and services is particularly emphasised. iNEXT includes a significant research training component, graduating many research students in the past years.

Centre for Intelligent Mechatronic Systems

Building on 15 years of strong cross-disciplinary research in electrical machines and power electronics at UTS, the Centre for Intelligent Mechatronic Systems (CIMS) integrates the disciplines of mechanical, electrical and electronics engineering and computer systems. Its four main research directions are: autonomous robots (operating in unstructured environments and for infrastructure maintenance, search and rescue, health care and road vehicles); electrical machines (new materials and topologies, system optimisation, variable speed

control and compact, low temperature fuel cells); automotive systems (performance, comfort, fuel efficiency, road safety and emission control); and human factors (physiological and psychological aspects of human–machine and human–environment interaction).

Centre for Quantum Computation and Intelligent Systems

The Centre for Quantum Computation and Intelligent Systems (QCIS) is a research centre within the University's Priority Investment Research Program. The centre's mission is to be acknowledged by research centres throughout the world as a pre-eminent research centre in quantum computation and intelligent systems, and to be acknowledged by Australian industry and government as a leading source of knowledge and expertise in quantum computation and intelligent systems.

The centre was established in April 2008 with a vision to develop:

- theoretical foundations for quantum computation
- theoretical foundations for intelligent systems, and
- innovative technologies for intelligent systems.

This technology will result in next-generation enterprise intelligent information systems.

The centre's five major research programs cover quantum computation, knowledge discovery, decision support, innovation and infrastructure enhancement. Together, these programs develop a set of innovative and practical methodologies and techniques for intelligent information processing and system building for a broad range of businesses in the finance, marketing, security, health, government and engineering sectors.

Centre for Real-Time Information Networks

The Centre for Real-Time Information Networks (CRIN) aims to support research and development activities related to the efficient creation, collection, transmission, analysis and use of information in real-time, engineering-embedded applications. The centre supports the improvement of Australian society through a focus on applied research achieved through close links with both industry and research bodies working in appropriate application domains.

Examples of priority areas of interest for the centre are national security for safeguarding Australia, healthcare diagnosis and monitoring for the cost effective improvement of the health of Australians, environmental and resource monitoring for a sustainable Australia, and the smart use of the web in supporting Australian industry.

The centre aims to design, fabricate and test proof of concept systems, in which the performance and operational suitability of the developed systems is demonstrated. The proof of concept systems may be electronic hardware, software, or a combination of hardware and software, and will include the latest prototyping technologies, such as embedded processors, high-performance networks and sophisticated distributed software applications.

Associate Professor Kumbesan Sandrasegaran Director (acting) telephone +61 2 9514 2428 email Kumbesan.Sandrasegaran@uts.edu.au www.crin.uts.edu.au

Centre for Technology in Water and Wastewater

The Centre for Technology in Water and Wastewater (CTWW) undertakes research to ensure the sustainable management of water resources in both urban and rural environments, in Australia and internationally. This collaborative research centre links researchers, government, industry and community partners through its research programs, which include solid liquid separation and filtration technologies in water treatment; innovative biological treatment systems for wastewater treatment; membrane hybrid and nanotechnology systems in water, wastewater and stormwater treatment; water reuse; desalination; in situ barrier and other systems for treatment of groundwater, surface and groundwater hydrology; bio-solid and waste management; urban water cycles and soil/aquifer management and modification; and flood management and catchment modelling for flood prediction.

Professor Saravanamuth Vigneswaran Director telephone +61 2 9514 2641 email Saravanamuth.Vigneswaran@uts.edu.au www.research.uts.edu.au/strengths/ctww

Formal external research links

UTS: Information Technology research groups have formal links to external organisations such as the Cooperative Research Centres (CRC) network.

Capital Markets CRC

The Capital Markets CRC aims to be the technology provider of choice to global securities businesses/markets. It supports research programs in corporate governance, data mining, interoperability, language technology, market design and visualisation.

Professor Chengqi Zhang email Chengqi.Zhang@uts.edu.au

UTS: INTERNATIONAL STUDIES

Information for students

UTS: International Studies plays a key role in the internationalisation of the UTS teaching and learning experience both in the Faculty of Arts and Social Sciences (FASS) and across the University.

The International Studies program teaches:

- about cultural diversity and social change in Asia, Europe and the Americas
- about processes of regionalisation, internationalisation, transnationalism and globalisation, and their localised receptions
- a suite of Asian and European language and culture subjects at many levels.

UTS: International Studies is responsible for the coordination and implementation of the following teaching programs:

- the Bachelor of Arts in International Studies, which can be combined with most other bachelor's-level degrees at UTS
- the Bachelor of Global Studies (C10264) (see page 278)
- the Australian Language and Culture program (see page 91)
- the Graduate Diploma in International Studies (C06106) (see page 400) and Master of Arts in International Studies (C04262) (see page 384) (by coursework)
- Master of Arts in International Studies (Research) (C03034) (see page 491)
- Doctor of Philosophy (PhD) in International Studies (C02039) (see page 478).

Staff in UTS: International Studies also conduct research in the above areas, with particular strengths in European, Latin American, Asian and China studies, as well as in language teaching and curriculum development. Staff in the program are affiliated with a number of FASS research centres: the Transforming Cultures Research Centre, the Cosmopolitan Civil Societies Research Centre, the China Research Centre and the Centre for Research in Learning and Change.

Staff may also supervise research students in the PhD and Master of Arts in International Studies (Research). Supervision may be available in languages other than English, such as Chinese.

Bachelor of Arts in International Studies

Technological change, globalisation and increased mobility during the second half of the 20th century have dramatically increased the importance of having an international outlook. In all aspects of life and work, contemporary graduates need to be aware of the wider world. UTS aims to enhance its graduates' understanding of other cultures and societies through the Bachelor of Arts in International Studies, which can be combined with most other bachelor's-level degrees at UTS.

The Bachelor of Arts in International Studies introduces students to languages and cultures of the non-English-speaking world and teaches them about contemporary societies in Asia, Europe and the Americas. The course provides opportunities for students to study overseas for an academic year at an institution of higher education in the country of their international studies major. At postgraduate level, the Master of Arts in International Studies (C04262) (see page 384) (by coursework) also provides the possibility of study overseas for one semester.

The key element in the Bachelor of Arts in International Studies is a period of study overseas (see page 88). In preparation for this, the study of the language and culture (see page 88), contemporary society (see page 91), and political and economic structure of the relevant country is necessary. The course requires undergraduate and postgraduate (coursework) students to follow a single major (see page 92), a specialisation in a particular country or region.

Students study one of the following countries or majors: Argentina, Canada (Québec), Chile, China, Colombia, France, Germany, Italy, Japan, Latino USA, Mexico, Spain or Switzerland.

Students are admitted to the combined degrees with international studies with no guarantee of entry to a specific major, although every effort is made to meet students' preferences. UTS: International Studies reserves the right to allocate places in majors according to its resources and arrangements with overseas universities.

The Bachelor of Arts in International Studies has no prior language requirements.

Each student's choice of major and subjects requires the approval of the Faculty Board of the Faculty of Arts and Social Sciences.

In exceptional circumstances (see special arrangements) (see page 91) students may, with the approval of the head of the International Studies program, vary the designated subjects in their international studies major. See the lists of approved alternative subjects (see page 91) for undergraduate students and for postgraduate students.

International students

International students may apply to undertake any of the combined degrees with international studies, or the postgraduate coursework program. International students follow the same program as local students, and may access any of the majors offered, provided the country they choose as their major is able to grant them a visa to study there. This needs to be determined prior to commencing subjects within the major. If a visa cannot be granted, it is not possible for the student to undertake the chosen major.

Language and culture subjects

UTS: International Studies organises the teaching of Chinese, French, German, Italian, Japanese and Spanish for all UTS students.

UTS students can access language and culture subjects in one of the following ways:

- as part of an undergraduate combined degree or as part of the postgraduate coursework degree program in international studies
- as part of the Bachelor of Global Studies (C10264) (see page 278)
- as a sub-major within a degree where this option is available
- as elective subjects in any other UTS degree, with faculty approval, or
- as non-award subjects.

Students are encouraged to study a language other than English, not only to gain a communication tool, but also to gain an understanding of another culture and society. UTS: International Studies does not usually give exemptions for any previous study of languages. The language and culture subjects admit students at different levels and are able to meet various levels of linguistic competence in order to enhance each student's communicative ability. Students in the combined degree with international studies are asked to contact UTS: International Studies regarding any issues with their language and culture subjects.

UTS students who want to study languages not offered at UTS are asked to apply via cross-institutional enrolment to the university that offers the language they wish to study. Students need to plan ahead and check the deadline for when cross-institutional applications close at the other university. UTS: International Studies is unable to assist with cross-institutional enrolments.

UTS students who wish to engage in language and culture studies at UTS, but not for credit to a degree, are admitted as fee-paying, non-award students. Students from other institutions can enrol in language and culture subjects as cross-institutional students. Application forms for non-award or cross-institutional enrolment may be downloaded from the UTS website at:

www.uts.edu.au/study/nonaward.html

In all cases, classes are only taught at UTS if student numbers permit. Language and culture subjects are an important part of the Bachelor of Arts in International Studies. They are designed to prepare UTS students for further study in the country of their international studies major.

Enrolment procedures for language and culture subjects

Combined degree students in the Bachelor of Arts in International Studies and students in the postgraduate coursework degree program are required to enrol in language and culture subjects as noted on their study plan.

Other UTS students who wish to study a language and culture subject as a credited sub-major or elective(s) in their current degree need to obtain approval from their faculty before they enrol in the subject.

All students undertaking language and culture study at UTS for the first time need to complete a level assessment to ensure that they are placed at an appropriate class level.

UTS: International Studies reserves the right to place students in a class that is appropriate for their level of language proficiency.

The procedure for students who wish to take UTS: International Studies subjects as electives or sub-majors is as follows.

- Students must, at the earliest opportunity during the enrolment period, request permission from their faculty to study the subject by submitting an e-request. When submitting an e-request for a language subject students, must complete the additional fields under the Language Subject Details section. More information is available at language assessment.
- Once the subject is approved, the Student Centre makes an initial assessment of the e-request by analysing the responses in the Language Subject Details section, in conjunction with the submitted supporting statement.
- Student Centres add and waiver the level 1 subject if students have little or no experience in the language, and then reply to the student.
- For students with prior knowledge or experience in the language, their e-requests are forwarded to UTS: International Studies for processing.
- Students who require an assessment need to attend a language session.

Students wishing to study a language as an elective are only granted approval if spaces are available four weeks before the beginning of semester. Places in subjects are limited.

Students intending to take international studies subjects as electives or sub-majors are advised to lodge an e-request at the earliest opportunity during the enrolment period.

Credit points and workload

All language and culture subjects are taught over one semester and have a value of 8 credit points. All language and culture subjects taught on UTS campuses consist of four contact hours a week.

To cater for the different needs of students, each language and culture program has different points of entry depending on a student's language skill. Beginner levels necessarily concentrate more on basic communication skills; the higher levels introduce students to literature and culture in the language of study.

Students who start a language at beginners level on their entry to the Bachelor of Arts in International Studies can expect to acquire survival language skills for their period of in-country study, and to lay a strong foundation for further language acquisition after graduation.

Students with competence in a language they intend to study are admitted to the language and culture subjects at a higher level to reflect their ability in that language. These students are expected to improve their existing skills in speaking, comprehension, reading and writing. Through the process of language acquisition, students are also encouraged to obtain an insight into the relevant culture.

Students in the Bachelor of Arts in International Studies follow a specific language and culture program by enrolling in a series of subjects — four for undergraduates in an international studies combined degree and at least two for postgraduates in the postgraduate coursework degree program in international studies.

In exceptional circumstances students with advanced competence in a language may be exempted from further study in that language. Students who have advanced competence in the language of their major are encouraged to chose a third language in the International Studies program. Other subjects may also be taken. Further details are provided under the regulations for special arrangements (see page 91). Any amendments to the individual student's International Studies program are subject to the approval of the head of the International Studies program.

In-country study

In-country study is a key component of both the Bachelor of Arts in International Studies and the Master of Arts in International Studies (by coursework). It provides a unique opportunity for students to immerse themselves in the language and culture of another country, through a learning program at a host university, through involvement in the life of the local community, and through assignments that are supervised by UTS: International Studies.

When?

Students taking the combined degree with a Bachelor of Arts in International Studies must spend two semesters of study at a university or other higher education institution in the country of their major. In-country study is usually taken in the fourth year of a combined degree. Students taking the Master of Arts in International Studies may spend one semester of study in the country of their major.

Where?

All in-country study is taken in countries where English is not the predominant language. In-country study is organised by UTS: International Studies at over 70 universities in Argentina, Canada (Québec), Chile, China, Colombia, France, Germany, Italy, Japan, Latino USA, Mexico, Spain or Switzerland.

What?

Each student's individual study program depends on their level of language competence and the subjects and other learning experiences that are available at their host university. All students must also complete assignments that are assessed by staff of UTS: International Studies.

Costs

In-country Study 1 and In-country Study 2 are full-credit subjects at UTS for which the student contribution is payable at undergraduate level. Students receiving student financial support in Australia are still eligible to receive it while they are engaged in the period of incountry study.

The costs of tuition at overseas universities and of travel between Sydney and the student's place of study are paid by UTS, except in cases where a scholarship has been awarded to a student with provision for these costs. Visa fees are also paid by UTS and students are covered by the UTS Overseas Insurance Policy.

Students pay the costs of accommodation and other living expenses during their period of in-country study. Students should be aware that the living costs vary from country to country and that in some countries living costs are high. The UTS medical service is available to students for medical examinations for visas, vaccinations and other country-specific health advice.

Admission to in-country study

Under normal circumstances, students can only proceed to a period of in-country study within the Bachelor of Arts in International Studies after they have successfully completed all earlier stages in the combined degree. Students who have not successfully completed all earlier stages may proceed to a period of in-country study only with the permission of both the dean of the faculty in which their degree is based and the head of the International Studies program.

In-country study academic prerequisites

Before undertaking In-country Study 1, students must have satisfactorily completed:

- 976001 Foundations in International Studies
- four semesters of language and culture subjects approved by the International Studies program as appropriate for the student's particular country major
- the contemporary society subject relevant to country major
- all the required subjects in the student's professional degree program.

Before undertaking In-country Study 2, students need to have successfully completed In-country Study 1.

Content and assessment

Students with a basic level of language competence usually follow a program of study that continues to develop their knowledge and understanding of the host country's language and culture. Those whose level of language competence is adequate, study subjects related to the development of the contemporary society — history, economics, politics, society and culture — of the host country, alongside students from that country. Those whose level of language competence and understanding of local culture is close to that of a native speaker may choose freely from a wide range of subjects with the approval of the host university and UTS: International Studies.

In all cases, students undertake a reduced study load at the host institution. In addition to the classes attended, all students are expected to complete assignments administered by UTS: International Studies, and these, together with a satisfactory report from the host institution, are the basis for assessment.

Any study undertaken at the host university during the two semesters of in-country study is part of the in-country study experience. Students may not credit any subjects completed at their host university during the period of in-country study towards the professional component of their combined degree.

Conditions of participation for in-country study

Before students engage in a period of in-country study, they may be required to meet appropriate financial and enrolment requirements. They are also required to agree to be governed by UTS: International Studies' conditions of participation for the period of in-country study and to abide by the rules and regulations of the host institution and the laws of the host country. The conditions of participation are as follows:

As a student of UTS participating in a period of in-country study within the International Studies program, I understand that I remain subject to the Rules, Codes of Conduct, Policies and Procedures of UTS (see rule 2.1.1) and undertake to:

- accept financial responsibility for all personal expenditure and for all costs that are additional to those met by UTS; additional costs may include insurance or social security payments required by host universities
- meet all academic requirements that precede the period of incountry study
- abide by the regulations for in-country study travel arrangements as set out by UTS: International Studies
- participate in any pre-departure preparation specified by UTS: International Studies and abide by deadlines in the processes of collating necessary information for travel and university enrolment arrangements
- advise the appropriate faculty and UTS: International Studies of any changes in an academic program while overseas in accordance with applicable UTS dates and the guidelines of UTS: International Studies
- abide by the laws of the host country
- abide by the rules and regulations of the host institution (see rule 2.1.5)
- behave personally and professionally in an appropriate manner for a representative of UTS
- consult with staff of UTS: International Studies and advisers at the host institution should any problems arise in relation to academic or other matters during a period of in-country study
- where relevant, obtain appropriate advice relating to health
 matters, disabilities or other special needs from a relevant
 professional regarding ability to complete the period of incountry study, and liaise with staff of UTS: International Studies
 should any additional arrangements be required. Note: UTS
 cannot guarantee that host universities will be able to meet the
 needs of all students, and in some cases students may be advised
 to complete in-country study by means of approved alternative
 subjects in Sydney.

I understand that failure to abide by these conditions may result in disciplinary action (see rule 2.1.10).

Rules and regulations for in-country study (ICS) travel

- The travel team at UTS: International Studies will be solely responsible for travel arrangements. All travel issues must go via UTS: International Studies travel staff. Students will not have any contact with travel agents.
- UTS will pay for the most economical, reasonably direct airfare to the ICS location. This includes applicable government and airline taxes.
- Students must comply with relevant airline security and baggage regulations.
- Major coordinators will decide on departure dates within their major. Students enrolled in the same program within one ICS location will depart from Sydney on the same date. Major coordinators will advise students of their departure dates from Sydney and their arrival dates at ICS locations.
- No changes can be made to the departure date from Sydney (except in cases of serious illness or misadventure and in consultation with the major coordinator and travel staff at UTS: International Studies).
- UTS will not be responsible for any extra costs involved with late travel bookings to the ICS location caused by students not providing relevant documentation within UTS: International Studies set timeframes.
- Students cannot make stopovers, change the routing or add any side trips to their air tickets. Students can individually organise any private travel during their semester breaks.
- Students are responsible for changing the date of their return flight to Sydney as advised by the travel team. Information on these procedures is distributed at the pre-departure briefing meeting along with air tickets. Return flights are subject to availability in the fare class booked.

- Students should return to Sydney only after completing their academic program at the host university. Students who wish to return to Sydney before their academic program has finished must have prior approval from their major coordinator.
- Students are able to stay overseas for a maximum of 12 months from their departure date ex-Sydney.
- UTS will not credit or refund travel for students who decide to make their own travel plans, or who fail to re-confirm fully with airlines their return flight details to Australia.
- Students withdrawing from travelling overseas on ICS for personal reasons, after air tickets have been issued, will be responsible for reimbursing UTS all cancellation costs. Cancellations costs may include any agency and airline fees.
- Students need to comply with instructions given by UTS on repatriation to Sydney for health or security reasons. Directions may be issued via the head of international studies, major coordinator or travel team.

Academic support and pastoral care

In-country academic advisers from each host university assist UTS: International Studies' staff in monitoring students' progress and provide academic support and pastoral care. At the end of each semester of in-country study, the host university reports to UTS: International Studies oneach student's progress. Country coordinators from UTS: International Studies visit each student at least once during their in-country placement and regular contact is maintained with students and with the host universities' academic advisers.

Before departure, students receive both a subject outline and a detailed study guide, which together outline the study program for each host university, including the range of subjects available, assessment guidelines and criteria and advice on practical matters associated with settling into the life of the local community. The study guide also includes contact numbers for Australian embassies and consulates.

An emergency policy has been developed and students are advised of procedures to follow in the event of an emergency.

Alternative arrangements

In-country study is an integral component of the International Studies program; all students are expected to proceed to a period of in-country study during the course. In exceptional cases, after applying for special consideration, provision may be made for students to vary their program of study to fit individual circumstances. Under those circumstances, students may be required to complete their Bachelor of Arts in International Studies by taking subjects from the list of approved alternative subjects (see page 91). Replacing a 24-credit-point in-country study subject requires that the student complete three alternative subjects, two of which must be from UTS: International Studies. Any such request would need to be made in writing to UTS: International Studies at the earliest possible opportunity. Any variation in the Bachelor of Arts in International Studies is subject to the approval of the head of the International Studies program.

UTS: International Studies reserves the right to vary the in-country study component of the Bachelor of Arts in International Studies program in the event of unsafe conditions in a particular region.

Foundations in international studies and contemporary society

In each major of the Bachelor of Arts in International Studies, students take two specific subjects that provide an introduction to the history, politics, economics and society of the country or region of their international studies major.

The subject 976001 Foundations in International Studies provides students with an understanding of international approaches and perspectives in regards to issues of contemporary importance in Asia, Europe and the Americas. All students take this subject to help them gain an appreciation of representative theoretical approaches to the main forces in global issues sufficient to apply these approaches to specific cross-cultural and interdisciplinary areas of interest.

The contemporary society subjects provide an introduction to a specific country or region in order to ensure that students gain an understanding of its political, social and economic structures, and to identify its more dynamic aspects. No prior knowledge of the culture or skill in the language of the country concerned is required, and all teaching is conducted in English. Contemporary society subjects are alught by UTS: International Studies, with students studying the contemporary society subject relevant to their major (CBK90142). Contemporary society subjects are also offered as electives to all UTS students.

Australian Language and Culture program

The Australian Language and Culture program provides English language development through the study of Australian society and culture. Subjects may be undertaken only by study abroad or exchange students who have an English language test score lower than the UTS entry requirement.

The English proficiency requirement for international students or local applicants with international qualifications is IELTS: 5.0-6.0 overall with a writing score of 5.0; TOEFL: paper based: 510-550 overall with TWE of 3.0, internet based: 64-80 overall with a writing score of 17, with the exception of 59343 Experiencing Australian Language and Culture, which is restricted to students whose academic English falls below the IELTS requirements stated above.

Students may study subjects in the program for one semester then take an IELTS or TOEFL test. Students who then meet the UTS entry requirements can enrol in UTS faculty subjects for the second semester via UTS Exchange. The subjects available in the program are:

- 59304 English for Academic Purposes 1
- 59305 English for Academic Purposes 2
- 59306 Researching Australia 1
- 59307 Researching Australia 2
- 59308 Australian Society and Culture 1
- 59309 Australian Society and Culture 2
- 59302 Film and Popular Culture 1
- 59303 Film and Popular Culture 2
- 59343 Experiencing Australian Language and Culture

Further information is available from UTS International:

telephone + 61 2 9514 1798 fax + 61 2 9514 7843 email studyabroad.exchange@uts.edu.au www.uts.edu.au/international/exchange www.uts.edu.au/international/prospective/studying/abroad

Special arrangements

Under certain circumstances some students may need to vary the subjects of study prescribed by their major in the Bachelor of Arts in International Studies.

In these and other exceptional circumstances, special arrangements can be made to cater for individual needs. Students should notify UTS: International Studies in writing, at the earliest time possible, of these circumstances.

Under such circumstances, students are required to study one or more subjects from the list of approved alternative subjects to the equivalent value of credit points (see below).

For any amendment to the course of study, students need approval from the head of the International Studies program.

Approved alternative subjects

Approved alternative subjects for undergraduate students

Approved undergraduate alternative subjects include all language and culture subjects: Chinese, French, German, Italian, Japanese and Spanish. All language and culture subjects have a value of 8 credit points and are taught over one semester.

All contemporary society subjects may be taken as approved alternative subjects: Contemporary Canada (Québec), Contemporary China, Contemporary France, Contemporary Germany, Contemporary Italy, Contemporary Japan, Contemporary Latin(o) America, Contemporary Spain and Contemporary Switzerland. All contemporary society subjects have a value of 8 credit points. Note: Contemporary France, Contemporary Germany, Contemporary Italy, Contemporary Spain and Contemporary Switzerland are offered at the same time and day in Spring semester only; students are thus only able to select one of these subjects in that semester.

Other approved alternative subjects may be any of the following, subject to availability: 58227 Balancing World Views: Introduction to Aboriginal Cultures, 013082 Aboriginal Social and Political History and 58218 Ideology, Beliefs and Visions. Each of these subjects has a value of 8 credit points.

Approved alternative subjects for postgraduate students

Approved postgraduate alternative subjects include all language and culture subjects: Chinese, French, German, Italian, Japanese and Spanish. Other approved alternative subjects are also available in CBK90900.

Sub-majors, electives and non-award studies

Students at UTS can increase their intercultural skills by enrolling in a language and culture program and contemporary society subject. Students in any degree offered at UTS may be able to take these subjects as electives or as a sub-major, provided this is approved by their faculty.

Students can study Chinese, French, German, Italian, Japanese and Spanish.

Sub-majors are available by combining three international studies subjects; three contemporary society subjects from an international studies sub-major (SMJ09034); a contemporary society subject and two relevant consecutive language and culture subjects from a specialist country studies sub-major (SMJ09036); or three consecutive language and culture subjects from a language other than English (LOTE) studies sub-major (SMJ09035).

Language and culture subjects and contemporary society subjects may also be taken as non-award studies.

Note: Contemporary France, Contemporary Germany, Contemporary Italy, Contemporary Spain and Contemporary Switzerland are offered at the same time and day in Spring semester only; students are thus able to select only one of these subjects in that semester.

Further information on these subjects can be found in the study package directory.

Undergraduate course information

Bachelor of Global Studies

The Bachelor of Global Studies (C10264) (see page 278) is a new transdisciplinary degree focusing on the connections between the political, economic and cultural aspects of global phenomena, within the context of a chosen area of study. The program requires students to be able to engage in complex problem-solving regarding global phenomena from several different perspectives.

All students follow a core program in global studies, select a major, and either two sub-majors or one sub-major and an exchange semester:

- global studies core subjects (48cp)
- major choice (48cp)
- sub-majors and exchange semester (48cp).

In addition, students undergo a domestic work placement within a workplace that deals with global issues and practices in the first semester of the third year of the degree.

Bachelor of Arts in International Studies combined degrees

UTS: International Studies offers the degree of Bachelor of Arts in International Studies through combined degree programs only. Combined degrees have been established between UTS: International Studies and the faculties of Arts and Social Sciences; Business; Design, Architecture and Building; Engineering and Information Technology; Law; Nursing, Midwifery and Health; and Science.

The combined degree with international studies at UTS is designed to produce graduates who are primarily trained in a professional or practical discipline, but who also have a substantial knowledge and appreciation of a non-English-speaking culture.

In addition to their professional degree program, students who undertake the combined degree program follow an international studies major that concentrates on a specific country or region. Students learn about its language and culture, study its contemporary society and spend two semesters studying there.

The international studies component of any combined degree amounts to the equivalent of two years of full-time academic study or 96 credit points. It is studied concurrently with the major discipline of study in an integrated program. Combined degrees have been structured to facilitate the study of two separate programs at the same time.

Each combined degree program has a course coordinator in the appropriate faculty. Inquiries about a specific combined degree program should be addressed to the relevant course coordinator.

Combined degree students enrol at the University through the faculties.

Outlines of the combined degrees with the Bachelor of Arts in International Studies are provided in other sections of this handbook.

Undergraduate students studying for the Bachelor of Arts in International Studies study 96 credit points: four sequential subjects that focus on a relevant language and culture, one subject that introduces students to the study of social change, one subject that examines contemporary society, and two semesters at an institution of higher education in the country of their major.

- $\bullet \quad \ \ language \ and \ culture \ 1-4: four \ subjects, four \ semesters \ (4 \ x \ 8cp)$
- 976001 Foundations in International Studies: one subject, one semester (8cp)
- contemporary society: one subject, one semester (8cp)
- in-country study 1–2: two subjects, two semesters overseas (2 x 24cp).

Transferring into the combined degree with international studies

Students admitted into a degree at UTS may apply to transfer into a combined degree with international studies via the University's internal course transfer process towards the end of their first year, provided it is in the same area of study. Transfers between different areas of study need to go through the Universities Admissions Centre. Approval to transfer is made by the student's faculty. Transferring students need to be aware that places in some majors in the Bachelor of Arts in International Studies are limited, and may already be capped at the time of the proposed transfer, due to the fact that combined degree

students select their majors in a ballot that takes place in semester one of their first year of study at UTS. Thus, while every effort is made to accommodate transferring students in their preferred major, it may not always be possible to admit students into popular majors at the time of transfer. Popular majors subject to capping during the first-year ballot process may include France, French-speaking Switzerland and Spain. Note that UTS: International Studies reserves the right to allocate places in majors according to its resources and arrangements with overseas universities.

Majors

The majors available in the Bachelor of Arts in International Studies are listed below. Each major includes 32 credit points (four 8-credit-point subjects) of instruction in language and culture; 8 credit points of study of 976001 Foundations in International Studies; 8 credit points of study of contemporary society; and 48 credit points (two semesters) of study at a university or institution of higher education in the country of the major:

- Argentina (MAJ08954)
- Canada (Québec) (MAJ08933)
- Chile (MAJ08918)
- China (MAJ08919)
- Colombia (MAJ09409)
- France (MAJ08920)
- Germany (MAJ08921)
- Italy (MAJ08923)
- Japan (MAJ08924)
- Latino USA (MAJ09380)
- Mexico (MAJ08926)
- Spain (MAJ08927)
- Switzerland (MAJ08932).

Postgraduate course information

UTS: International Studies offers both research and coursework postgraduate degrees.

Progression rules

Postgraduate students are advised that they may be excluded from a course if they exceed the maximum time allowed for completion of that course (rule 10.5 of the Student and Related Rules).

Postgraduate coursework

UTS: International Studies offers the following postgraduate coursework degree programs:

- Graduate Diploma in International Studies (C06106) (see page 400)
- Master of Arts in International Studies (C04262) (see page 384).

These two programs provide opportunities for students from any disciplinary background to study a language and culture other than English and thus add an international dimension to their undergraduate qualification. In particular, the programs enable students to:

- learn or improve their knowledge of the language of the country they choose to study
- learn about contemporary society in the country they choose to study, and
- learn about cultural diversity and social change.

Graduate Diploma in International Studies

Postgraduate students studying for the Graduate Diploma in International Studies (C06106) (see page 400) are required to study 48 credit points, comprising at least two sequential subjects that focus on a relevant language and culture; 979508 Research in International Studies; a Contemporary Society subject; plus two elective subjects.

- language and culture 1–2: two subjects, two semesters (2 x 8cp)
- 979508 Research in International Studies: one subject, one semester (8cp)
- 979xxx Contemporary Society subject: one subject, one semester (8cp)
- approved electives (16cp).

Master of Arts in International Studies

Postgraduate students studying for the Master of Arts in International Studies (C04262) (see page 384) are required to study at least two sequential subjects that focus on a relevant language and culture. Students must also undertake 979508 Research in International Studies; a Contemporary Society subject; plus two elective subjects.

Once these six subjects have been completed, students will undertake In-country study 1 (prerequisite subject: 979508 Research in International Studies).

- language and culture 1–2: two subjects, two semesters (2 x 8cp)
- 979508 Research in International Studies: one subject, one semester (8cp)
- 979xxx Contemporary Society subject: one subject, one semester (8cp)
- approved electives (16cp), and
- in the final component: In-country Study 1: one subject, one semester overseas (24cp).

Postgraduate research

UTS: International Studies accepts research students for the following higher degrees:

- Master of Arts in International Studies (C03034) (see page 491)
- Doctor of Philosophy in International Studies (C02039) (see page 478).

Applications for research degree candidature are welcomed from graduates with an interest in the social, political, economic and cultural changes that have taken place in Asia, Europe and the Americas.

Students interested in China may choose to write their thesis in Chinese or in English. Students may undertake their candidature either in China or in Australia. UTS: International Studies can supervise students in the fields of modern and contemporary Chinese history, Chinese political economy, social change in the People's Republic of China, and contemporary Chinese culture.

UTS: LAW

Information for students

Law courses are administered by UTS: Law. The information provided in this section is an introduction to the full range of information that is available and is not intended to be complete. Students are advised to visit UTS: Law and other UTS websites for more comprehensive information.

www.law.uts.edu.au

Location, contacts and inquiries

UTS: Law is located at City campus, Haymarket. Most academic and administrative staff are located in Building 5, City campus, Haymarket, although some staff are located at 645 Harris St, City campus, and at Kuring-gai campus, Lindfield.

Faculty structure

The UTS: Law executive is led by the dean and is supported by two associate deans and the faculty manager.

UTS: Law is governed by the Faculty Board in Law which consists of ex officio members, elected staff members and elected student members. The Faculty Board in Law meets quarterly and is the formal decision-making body of UTS: Law. A number of faculty committees report to the Faculty Board in Law.

A UTS: Law Executive Council comprises faculty management and representatives from the legal profession, government and the community. The UTS: Law Executive Council suggests and scrutinises proposed initiatives as well as offering strategic advice and an external focus for UTS: Law.

Faculty policies and procedures

Progression and acceleration

Students may seek permission from the director (students) (by way of e-request) to enrol in subjects totalling more than 28 credit points a semester if:

- there is no timetable clash
- maximum class size is not exceeded
- the student's academic record indicates that he or she is capable of performing satisfactorily with an increased workload, and
- the student can demonstrate that his or her work and other nonstudy commitments permit him or her to increase their workload without detriment to their studies.

Note: Students studying the accelerated Juris Doctor (C04236) (see page 354) program can enrol in a maximum of 30 credit points a semester without the permission of the director (students).

In Summer session, students may undertake a total of 12 credit points or less.

UTS: Law cannot guarantee avoidance of timetable and/or examination clashes where students do not follow the standard course progression.

Timetable

The current timetable is available at:

http://timetable.uts.edu.au

Class attendance

Law classes for full-time studies are generally timetabled during the day. Registrations in evening or other classes are subject to availability and UTS: Law does not provide any guarantees in securing preferences.

Study load and class attendance details are available in course duration and attendance (see page 27) in the general information section.

Guide to written communication

Essays and other written work should be prepared in accordance with the guidelines laid down in UTS: Law's *Guide to Written Communication*.

Further information and the required assignment coversheet is available at:

www.law.uts.edu.au/assessment/assignments.html

Unless advised otherwise by the lecturer, assignments must be typed and must also be properly written with due regard to spelling, punctuation, grammar and syntax.

A lecturer may require the written work to be submitted through Turnitin prior to formal submission and may also request that a copy of the Turnitin report be attached to the written work.

Unless otherwise instructed by the lecturer, all written work should include footnotes or endnotes and a bibliography in the manner set out in the *Guide to Written Communication*.

Any piece of written work which does not comply with these requirements may be:

- required to be rewritten in proper form
- · penalised in marks, or
- · rejected without assessment.

Assessment

Lodgement of assignments

All work submitted for assessment should bear a UTS: Law assignment coversheet. Students are required to retain a copy of all assignments submitted. Students who are handing in written work must submit it, with an assignment coversheet attached, in the assignment box located adjacent to the UTS: Law reception (Building 5, block B, level 3). The assignment box is cleared every business day at 6pm during faculty teaching weeks and at 5pm during faculty non-teaching weeks and Summer session. Assignments submitted by fax or email are not accepted by UTS: Law, unless otherwise arranged with the lecturer.

Late work

Any assessment task submitted after 6pm during faculty teaching weeks, or 5pm during faculty non-teaching weeks and Summer session, on the due date of submission will either be rejected without assessment (where the subject outline states that this will be the consequence of an assessment task being submitted after the due time on the due date) or penalised by way of loss of marks unless an extension has been sought and approved by the subject coordinator

(after due consideration of any submission made by the academic liaison officer on behalf of special needs students) through a request for extension or application for special consideration.

In the absence of compelling circumstances, no application for a request for extension will be accepted after the due date.

Insofar as there is to be a penalty by way of loss of marks, five per cent of marks for the assessment task will be deducted per day for assessment tasks submitted after the due date. Submission will not be accepted after assessment tasks have been returned to other students.

Plagiarism

Where individual work is required for the purposes of assessment, the copying, unacknowledged use of, or reliance on the work of other individuals without acknowledgment is considered to be cheating/misconduct. The penalties imposed for cheating/misconduct or allowing work to be plagiarised are severe under the University Rules and regulations.

Plagiarism is one of the most serious crimes in the academic community. It indicates an attempt by someone to pass off the words and/or ideas of another as their own. To take any but a few sequential words of another without acknowledgment is plagiarism and tantamount to cheating. It is so treated at UTS: Law.

Experience shows that one of the most common ways for plagiarism to occur is when students work together. It is acknowledged by the academic staff that study groups are an efficient and beneficial method of learning but problems arise when it is extended into the assessment process. UTS: Law expects, in fact demands, that all assignments submitted be the work of the person who is credited with the mark. It can be an extremely fine line between discussion of an essay topic with another, and collaboration, but where comparisons of various students' work indicate collaboration this is taken to be plagiarism.

Acts of plagiarism are penalised.

Student facilities

UTS: Law library

The library aims to support the teaching, learning and research needs of students and staff at UTS: Law. The law collection consists of print and electronic sources while training and research assistance can be provided. Further information is available at:

www.lib.uts.edu.au

For information or assistance contact the UTS: Business and Law library team at:

www.lib.uts.edu.au/about-us/staff-profiles/information-services/business-law-team

Computer labs

UTS: Law provides four computer labs for use by UTS: Law students. Students have access to the full range of Microsoft Office applications, the internet and printers, and are supported by a faculty-based Information Technology Division (ITD) team.

The labs are located at:

CM05B.3.25, CM05B.3.26, CM05B.3.35, CM05B.3.36

Building 5, block B, level 3

City campus, Haymarket

Opening hours: 7.30am–10pm Monday–Friday, 8am–6pm Saturday and Sunday during semester.

In addition, ITD provides computer laboratories for UTS students on all campuses. Further information is available from:

www.itd.uts.edu.au

Law Students' Society

The UTS Law Students' Society (LSS) is the largest student-run society on campus. It provides a variety of services to law students and its members ranging from organising social events, educational seminars and mentoring programs, running legal competitions, providing careers information, writing legal and non-legal publications and representing the educational concerns of law students. An important part of this role is being a key communication channel between UTS: Law and the student body including representing student concerns to the Dean where necessary.

The LSS communicates its various events, services, publications and competitions, as well as relevant activities of UTS: Law, to students through its website; social networking sites such as Facebook and Twitter; free fortnightly e-newsletter, *The Buzz*, which students and staff can subscribe to via the LSS website; and its 'subject tab' on UTS Online.

A council of student members, elected by law students in or around October each year, governs the LSS. The council meets on a monthly basis throughout the year, with fortnightly meetings of the executive, to review the activities of LSS and options for improvement and reform. Interest and input are encouraged from students, and many of the ideas acted upon originate from members of the LSS.

Social functions are an important part of university life and the LSS regularly organises functions for students. Popular events include the annual orientation camp, first-year drinks, harbour cruise, 'Perspectives on Law' dinner, speaker series, law revue, intervarsity sports day, numerous other intervarsity events, informal barbecues and the highlight of the social calendar, the Law Ball.

Services to members include:

- the Brennan Justice and Leadership Program, a joint initiative with the Faculty of Law
- legal competitions such as mooting, client interviewing, negotiation, witness examination and paper presentation
- the LexisNexis Textbook Equity Scheme (a textbook loan program) for financially disadvantaged students
- a Peer Mentoring Program for first-year students, a joint initiative with the Faculty of Law
- the Mallesons Professional Mentoring Program for students wishing to expand their professional network
- a regularly updated database of subject tutors
- a regularly updated database of social justice opportunities
- affiliation with the Australian Law Students' Association (ALSA), including provision of all ALSA publications to students and sending a UTS delegation to the annual ALSA July Conference
- a quartlery academic publication, The Full Bench, containing student contributions
- an introductory guide to Law School for new students, the Alternative Law Handbook
- careers publications for legal and non-legal graduate opportunities, and
- a Clerkship Seminar Series, Clerkship Networking Evening, and a Careers Networking Evening, a joint initiative with the Faculty of Law.

Location and contact details

A list of council members and their contact details is posted on the LSS website. Alternatively, students can make initial contact with the LSS by emailing the president.

Centres within UTS: Law

The Law Research Centre (LRC) aims to foster an environment that: promotes excellence in academic research, serving the community and the professions; contributes to law reform; and assists in the creation of a just and principled society.

Under the umbrella of the LRC, five research networks have been established:

- Health, family and communities
- Intellectual property, media and communications
- Corporate, commercial and tax
- · Criminal justice and criminology
- International law, human rights and the environment.

The LRC is the home of the Australasian Legal Information Institute (AustLII) which provides a unique legal research infrastructure for the LRC. AustLII is committed to creating open access to legal knowledge through its research and related activities and has been in operation for 15 years.

Also affiliated with the LRC is the Communications Law Centre, an independent, non-profit, public interest centre specialising in

communications, media and online law and policy. The centre was established in 1988 and it is now a UTS centre in the Faculty of Law and the Faculty of Arts and Social Sciences.

Anti-Slavery Australia is an award winning centre of the Faculty of Law and the only University based legal, research and policy centre in Australia focused on slavery, trafficking, forced labour, forced marriage and extreme labour exploitation. Anti-Slavery Australia is involved in research, teaching, and working with law students on a range of social justice initiatives.

Industrial training/professional practice

Admission to legal practice in Australia

Admission to the Supreme Court of NSW to practise as a lawyer in New South Wales is based upon the successful completion of an accredited academic legal qualification and an accredited course of practical legal training (PLT).

The UTS Bachelor of Laws (C10124) (see page 179) (LLB) and Juris Doctor (C04236) (see page 354) (JD) are accredited academic legal qualifications.

Practical legal training

The Faculty of Law's PLT program is accredited by the Legal Profession Admission Board of the Supreme Court of NSW (LPAB). UTS: Law was the first to offer an accredited PLT program in Sydney at a university level. The program comprises subjects which satisfy the competencies required by the Legal Profession Admission Rules 2005 and a practical experience work placement.

Further details regarding the structure of the PLT program can be obtained from a UTS Student Centre.

Practical experience

A compulsory and integral part of the PLT program is completion of 75411 Practical Experience work placement. Students must undertake an approved 16 weeks of full-time, or equivalent part-time, work placement. Further information regarding completion requirements is available from the practical experience guidelines and rules at:

www.law.uts.edu.au/practical/experience

International law graduates

Students who have been admitted to practise as a lawyer in a country outside Australia should have their legal qualification assessed by the Legal Profession Admission Board (LPAB) (www.lawlink.nsw. gov.au/lpab)

UTS: Law offers two courses to allow lawyers from a common law background to meet the LPAB requirements to practise law in Australia. Depending on the number of subjects required by the LPAB, candidates need to complete one of the following courses:

- Graduate Certificate in Australian Law (C11211) (see page 458)
 requires the completion of four set subjects (30 credit points) and
 subject substitution is available for one subject only where it is
 approved. This course particularly suits lawyers from Canada,
 USA and the UK
- Graduate Diploma in Australian Law (C07073) (see page 411) is designed specifically to meet the requirements of the LPAB assessment. The course is designed for subject choices to be tailored to meet the needs of individual students in line with the LPAB requirements.

To qualify as a lawyer in New South Wales the above courses need to be followed by enrolment in a practical legal training (PLT) program, which may be completed at UTS by enrolment in the Graduate Certificate in Professional Legal Practice (C11232) (see page 467).

Students from a non-common law background may be required to enrol in the Juris Doctor (C04236) (see page 354), depending on the number of subjects required by the LPAB.

International lawyers who have received LPAB assessment of their law qualification and would like to receive a study plan which best suits their needs from courses offered by UTS: Law are invited to send a scanned copy of the assessment to the Haymarket Student Centre at:

Ask UTS www.ask.uts.edu.au

Bar exams

Students who wish to pursue a career as a barrister can find information about education, training and professional development from the NSW Bar Association at:

www.nswbar.asn.au

Application and admission

International candidates who wish to enrol in one of the above courses can find information about the application process and due dates for application at:

www.uts.edu.au/international/prospective/studying/apply Information about fees for international students is available at: www.sau.uts.edu.au/fees/international

Local students lodge applications via UAC.

Admission to postgraduate law courses is available twice a year in Autumn and Spring semesters. Juris Doctor, Master of Legal Studies, Graduate Diploma in Legal Studies, Graduate Diploma in Legal Practice and Graduate Certificate in Legal Practice students may also commence in Summer session.

Law postgraduate information sessions

Before each semester UTS: Law holds a series of postgraduate information sessions that provides a good opportunity for potential candidates to:

- receive further information about postgraduate courses
- seek advice from senior academic and administrative staff
- submit a direct application for postgraduate coursework study at UTS: Law.

Sessions are held throughout the year. Information and registration are available from UTS: Law before each information session at:

www.law.uts.edu.au/events

Graduate employment and summer clerkship programs

UTS: Law participates in graduate employment and summer clerkship programs in conjunction with major Sydney law firms and government departments.

The programs were devised in 1980 and are generally open to penultimate and final-year law students who are interested in working in one of the large law firms or government organisations. Students who participate develop a greater understanding of employment opportunities and legal experience while adding detail to their curriculum vitaes.

UTS: Law, in conjunction with the UTS Careers Service and UTS Law Students' Society, organises a range of support services for interested students within application timelines each year.

Further information on support services, guidelines and key dates are available at:

- Graduate employment: www.law.uts.edu.au/careers/graduate
- Summer clerkship: www.law.uts.edu.au/careers/clerkship

Cross-disciplinary subjects

UTS: Law offers a range of cross-disciplinary law subjects — studies in various strands of the law for students not undertaking a law qualification but who wish to become familiar with the law as it affects their chosen profession. Through its cross-disciplinary program, UTS: Law offers subjects for students in UTS: Business; UTS: Design, Architecture and Building; UTS: Engineering and Information Technology; UTS: Health; and UTS: Science.

Cross-disciplinary students enrol in UTS: Law subjects through their home faculty and any inquiries should be made in the first instance to the UTS Student Centre.

Further information is available from:

telephone 1300 ask UTS (1300 275 887) or +61 2 9514 1222 Ask UTS www.ask.uts.edu.au

Majors and sub-majors offered to students from other faculties

Majors

The following law majors are available within courses from other UTS faculties.

- Master of Business Administration (C04018)
 - Business Law (MAJ09362)
- Bachelor of Business (C10020/C10021/C10026/C10027)
 - Business Law (MAJ09401)
- Bachelor of Global Studies (C10264)
 - Legal Studies (MAJ09399)

Sub-majors

The following law sub-majors are available within courses from other UTS faculties.

- Bachelor of Business (C10020/C10021/C10026/C10027)
 - Business Law (SMJ09030)
 - Taxation Law (SMJ09033)
- Master of Business Administration (C04018)
 - Business Law (SMJ09037)

Some courses from other UTS faculties may also include law subjects not listed under any of the above majors and sub-majors; students should check the handbook entry for the course in which they are enrolled for further details or contact the appropriate UTS Student Centre.

Undergraduate course information

UTS: Law offers a range of bachelor's degrees (see page 13), from the stand-alone Bachelor of Laws (C10124) (see page 179) to Bachelor of Laws degrees that can be combined with a degree in business, communication, engineering, information technology, international studies or science. Whether students are focused on studying the law on its own, or are looking to expand their qualifications and career opportunities with a combined degree, UTS: Law offers practical, work-ready courses with the practical legal training (PLT) program option to get students qualified sooner.

Applications

Offers to undergraduate UTS: Law courses are based on academic merit. Further information is available at:

www.uts.edu.au/study/undergrad.html

Recommended reading prior to entry

Patrick Keyzer's *Legal Problem Solving: A Guide for Law Students* (published by LexisNexis Butterworths) or *A Career in Law* edited by Jim Corkery (published by Federation Press) can be purchased from the Co-op Bookshop, the Sydney Law Cooperative Bookshop, LexisNexis Butterworths or the Law Book Company.

Rules and procedures

Subjects

UTS: Law timetables undergraduate subjects over three teaching periods: Autumn semester, Spring semester and Summer session. The full range of core and option subjects that may be timetabled can be found under each of the course entries.

Core law subjects

All core law subjects are taught in both Autumn and Spring semesters. Core law subjects are timetabled in the day and repeated in the evening.

Option subjects

A range of option subjects are taught in both Autumn and Spring semesters and during Summer session. However, not all option subjects are timetabled every semester and some option subjects are only offered once every two years. Timetabled option subjects are offered subject to sufficient student interest.

Subject descriptions

Descriptions of the law subjects available are provided in subjects (see pages 680–1039).

In order to assist students with understanding the interrelationships of the various option subjects, their general orientation and to make informed choices, option subjects can be classified into the groups listed below.

Students who are unsure which subjects fall under each group are advised to contact UTS: Law. The groups are:

- corporate and commercial law
- comparative law
- criminal law
- environmental law
- family and health law
- industrial and employment law
- intellectual property law practice
- international law
- jurisprudence
- media and communications
- public law
- taxation law

Credit recognition

Credit based on previous studies may be granted within UTS: Law's undergraduate degrees, subject to University Rules and UTS: Law guidelines. The granting of exemptions is at the discretion of the associate dean (teaching and learning). All students seeking credit for previous studies must lodge an application to the Haymarket Student Centre prior to enrolment. Information in relation to applying for credit, including the precedent list, can be found at:

www.law.uts.edu.au/cr

Inquiries

telephone 1300 ask UTS (1300 275 887) or +61 2 9514 1222

Ask UTS www.ask.uts.edu.au

Law subjects

Students may be able to obtain exemption from law subjects (core law, law option and practical legal training subjects), up to a maximum of 48 credit points, if they are able to satisfy the Faculty Board in Law that a comparable course of study has been successfully undertaken as a Bachelor of Laws subject at another recognised university.

To verify this, if the subject upon which the student is basing their credit recognition application does not appear on the precedent list, the student must provide a transcript of his or her academic record and a detailed subject outline, together with the subject reading guide that was current at the time of study, for assessment. Students who have undertaken a law subject at another university, either in the year before or after that which is published on the precedent list, may seek an exemption without supplying the full subject outline as part of their credit recognition application.

Exemptions for law subjects are only granted to students on the basis of equivalent subjects completed as part of a law degree offered by a law school at a recognised university.

Exemptions are not granted on the basis of studies completed through the Law Extension Committee of the Supreme Court (LPAB).

As a general rule, exemptions for law subjects are not given if the subject upon which the student is basing their application for credit recognition was studied more than six years ago. The time period indicated by the 'six-year rule' is calculated from the date the subject was successfully completed to the date when it is due to be undertaken at LITS. Law

However, the Faculty Board in Law shall always retain discretion to waive the application of the rule in cases where there is additional evidence of work or study experience. Indeed, in subjects where there have been significant recent changes in the law, an exemption may not be granted even though the subject was successfully completed less than six years ago. Currently, credit recognition for practical legal training (PLT) subjects has a time limit of three years.

- A student who transfers from a law degree at a recognised university into the Bachelor of Laws at UTS, and unsuccessfully applies for an exemption from 70115 Perspectives on Law and/ or 70120 Legal Method and Research because the completion of the introductory law subject(s) undertaken at the other university were insufficient to grant an exemption, can request in writing to the director (students) to have their application reconsidered.
 - For 70115 Perspectives on Law, students must demonstrate
 that they have completed subjects covering contracts,
 criminal law, torts and constitutional law within the
 other university's law degree. Alternatively, the director
 (students) may approve an exemption from 70115
 Perspectives on Law if they believe that the student has

- acquired sufficient knowledge from the subjects completed at the other university to justify the exemption.
- For 70120 Legal Method and Research, students must demonstrate that they have completed subjects at the other university which collectively have a sufficient focus on legal method and research to justify an exemption.
- If a student is unable to obtain an exemption from a UTS: Law
 core subject on the basis of having completed a similar core
 subject at another university, because the content of the subject
 completed at the other university was insufficient to warrant an
 exemption from the corresponding UTS: Law core subject, the
 student cannot use the completion of that similar core subject
 undertaken at the other university as the basis for an exemption
 from an unspecified option within a law course at UTS.
- Students enrolled into courses that require the completion of 70115 Perspectives on Law can apply for an exemption from this subject on the basis of completing a Master of Legal Studies (C04147) (see page 330) at UTS: Law or equivalent at another university.

Non-law subjects

It is possible to obtain exemptions for non-law option subjects in the Bachelor of Laws if students have completed a bachelor's degree, advanced diploma or diploma course from a recognised university. The maximum exemptions that can be granted on the basis of having completed a course are 48 credit points for a bachelor's degree (three years, full time). Students with an incomplete degree, a completed advanced diploma or diploma are granted credit points on a pro rata basis. No exemptions can be sought for a partially completed diploma or advanced diploma. These exemptions are not permitted in combined degree courses.

Students applying for credit recognition on the basis of a single, completed prior degree may be granted 48 credit points of exemptions for the general elective choice block of the straight Bachelor of Laws or, if the prior study was relevant, up to 48 credit points of exemptions from law subjects.

Concurrent study at another university

Subject to approval by UTS: Law, students may apply to undertake elective subjects in undergraduate law courses at other universities for credit towards an unspecified option within their course at UTS. A concurrent studies application consists of a cover sheet, subject outline(s) for the proposed subject(s), and a personal statement explaining the student's motivation for undertaking concurrent study. Subject outlines must detail the academic content, attendance and assessment requirements, and the reading guide of the subject(s) proposed to be completed. A complete application should be submitted to the Haymarket Student Centre before applying to the other institution. Subjects completed concurrently at another institution without prior approval risk not being credited to the student's course at UTS.

- Students cannot undertake core subjects on a concurrent basis.
- Students cannot undertake options on a concurrent study basis if UTS: Law offers the equivalent subject during the proposed semester.
- Students must complete a minimum of 50 per cent of the credit point value of their course at UTS.

The concurrent studies application form is available at:

www.sau.uts.edu.au/forms

Internal course transfers

UTS students who transfer into the Bachelor of Laws from an incomplete UTS combined law degree may receive exemptions on a pro-rata basis, to a maximum of 48 credit points, from non-law subject options for subjects which have been completed as part of their previous UTS studies.

Honours

It is possible for students to gain an award with honours in the Bachelor of Laws degree or the law component of combined degrees.

An additional year of study is **not** required. To qualify for honours, a student must complete 76040 Research Thesis, as an option subject of 6 credit points within the degree. This subject forms part of the credit points required for degree completion. 76040 Research Thesis has requirements that students must comply with in addition to the Honours Regulations (below). Further details are available in the online subject description.

The Honours Regulations are:

1. Awards

1.1 Awards of the Law degree or the Law component of a combined degree shall be classified as follows:

- a. degree (with first class honours)
- b. degree (with second class honours), and
- c. degree.

1.2 Award of the degree with second class honours shall not be graded.

2. Requirements of honours

- 2.1 To qualify for an award of the degree with honours a student shall:
- a. successfully complete 76040 Research Thesis
- subject to requirements below, obtain an honours mark, calculated in accordance with the formula 'sum of all' (UTS law subject credit points multiplied by mark) divisible by the 'sum of all law subject credit points' such that:
 - for first class honours: no less than 75.00
 - for second class honours: in the range of 70.00 and 74.99 (note that in calculating the honours mark, rounding occurs to two decimal places)
- c. not fail any subject after the first semester of study
- d. $\,$ successfully complete not less than 96 credit points of law subjects within UTS: Law
- e. for the purpose of the calculation in 2.1(b), students may discount up to three of their worst subjects provided that at least 12 UTS Bachelor of Laws subjects are included in the calculation, and
- f. a student's honours mark shall include the mark obtained by the student in 76040 Research Thesis notwithstanding that such a mark might be one of their worst subjects.

2.2 In exceptional circumstances the director (students) may modify or dispense with the requirements of regulation 2.1, subject to appeal to the Faculty Board in Law.

To be eligible for a University medal, an undergraduate student must have achieved the highest first class honours mark in the graduating cohort.

International exchange program

UTS: Law participates in the international student exchange program administered by UTS: International. Through the program, it is possible to undertake the following study options at overseas exchange partner universities:

- three or four law or non-law subject options from CBK90300 Electives (Law), or
- three law subjects from CBK90592 Options, or
- four law subjects from CBK90507 Options (Law) (if not using PLT as part of their degree).

To be eligible for the program, students should have a credit average or better and have completed 68 credit points of core subjects including 70517 Equity and Trusts before going overseas. The number of places is strictly limited.

Results achieved in study overseas are recorded as a pass or fail grade without a mark. It should be noted that the pass/fail results for exchange subjects are excluded from the calculation of a GPA and in the calculation for honours.

Information and application packs are available from UTS: International. Further information is available at:

www.uts.edu.au/international/exchange

Postgraduate course information

The UTS: Law postgraduate program has grown dramatically in recent years. Postgraduate course offerings are continuously being updated to ensure they are aligned with and meet the needs of the profession and the community.

Close student interaction between the legal profession and UTS: Law offers students a first-class education and a marketable postgraduate legal qualification. Classes are taught by a mix of practising professionals and full-time academic staff who ensure students gain specialised knowledge and training within their degrees.

UTS: Law strives to meet the expectations of its students to foster a collegial environment in which both academics and students are driven by a commitment to outstanding intellectual achievement.

Internal course transfer

Students may apply to articulate up or down between graduate certificates, graduate diplomas and master's programs, within the same area of study. Students should apply for an internal course transfer before the program they are currently enrolled in is completed. Appropriate successfully completed subjects are credited to the new course if the transfer is approved.

Students are also permitted to apply for an internal course transfer across postgraduate courses of the same level. Only completed subjects relevant to the new course can be credited if the transfer is approved. Students are not permitted to apply for an internal course transfer between undergraduate and postgraduate courses.

Further information is available at:

www.sau.uts.edu.au/enrolment/course/transfer/continuing.html

Credit recognition

Credit recognition based on previous studies may be granted subject to University Rules and UTS: Law guidelines.

The granting of exemptions is at the discretion of the associate dean (teaching and learning). All students seeking credit recognition based on previous studies must lodge an application to the Haymarket Student Centre prior to enrolment.

Information on applying for credit recognition based on previous studies, including the precedent list, is available at:

www.law.uts.edu.au/cr

Students may be able to obtain exemption from law subjects if they are able to satisfy the Faculty Board in Law that a comparable course of study has been successfully undertaken at another recognised university.

To verify this, if the subject upon which the student is basing their application for credit recognition does not appear on the precedent list, the student must provide a transcript of his or her academic record and a detailed subject outline, together with the subject reading guide that was current at the time of study, for assessment. Students who have undertaken a law subject at another university, either in the year before or after that which is published on the precedent list, may seek an exemption without supplying the full subject outline as part of their credit recognition application.

Exemptions from core subjects, as well as practical legal training subjects, are only granted to students on the basis of equivalent subjects completed as part of a law degree leading to professional practice and offered by a law school at a recognised university.

Exemptions for postgraduate law option subjects are only granted to students on the basis of study undertaken as part of a postgraduate law course offered by a law school at a recognised university.

Exemptions are not granted to students who base their application for credit recognition on the completion of cross-disciplinary subjects.

Exemptions are not granted on the basis of studies completed through the Law Extension Committee of the Supreme Court (LPAB).

The following limits apply to credit granted to postgraduate courses of three years, or less, full time:

- from a completed postgraduate degree, a maximum of one quarter of the credit-point value of the current UTS course
- from an incomplete postgraduate degree, a maximum of half of the credit-point value of the current UTS course.

Notwithstanding 1 or 2 above, the maximum overall amount of credit granted for a UTS: Law postgraduate coursework course shall not exceed one half of the credit-point value of that course.

Students who completed 8-credit-point postgraduate electives as part of their Juris Doctor (C04236) (see page 354) candidature may apply to have these subjects credited towards the Master of Laws (C04143) (see page 328) or Doctor of Juridical Science (C02027) (see page 474), up to a maximum of 24 credit points.

As a general rule, exemptions for law subjects are not given if the subject upon which the student is basing their application for credit recognition was studied more than six years ago. The period in the 'six-year rule' is calculated from the date the subject was successfully completed to when it is due to be undertaken at UTS: Law.

The Faculty Board in Law shall always retain discretion however to waive the application of the rule in cases where there is additional evidence of work or study experience. Indeed, in subjects where there have been significant recent changes in the law, an exemption may not be granted even though the subject was successfully completed less than six years ago.

Applications for credit recognition for practical legal training subjects have a time limit of three years.

A student who transfers from a law degree at a recognised tertiary institution into a Graduate Diploma in Legal Studies (C07074) (see page 412), Master of Legal Studies (C04147) (see page 330) or Juris Doctor (C04236) (see page 354) at UTS, and unsuccessfully applies for an exemption from 70115 Perspectives on Law and/or 70120 Legal Method and Research because the completion of the introductory law subject(s) undertaken at the other university were insufficient to grant an exemption, the student can make a written request to the director (students) to have their application reconsidered.

- For 70115 Perspectives on Law, students must demonstrate that
 they have completed subjects covering contracts, criminal law,
 torts and constitutional law within the other university's law
 degree. Alternatively, the director (students) may approve an
 exemption from 70115 Perspectives on Law if in their view the
 student has acquired sufficient knowledge from the subjects
 completed at the other university to justify the exemption.
- For 70120 Legal Method and Research, students must demonstrate
 that they have completed subjects at the other university which
 collectively have a sufficient focus on legal method and research
 to justify an exemption.

If a student is unable to obtain an exemption from a UTS: Law core subject on the basis of having completed a similar core subject at another university, because the content of the subject completed at the other university was insufficient to warrant an exemption from the corresponding UTS: Law core subject, the student cannot use the completion of that similar core subject undertaken at the other university as the basis of an exemption from an unspecified elective within a postgraduate law course at UTS.

Students who have been admitted to the Master of Laws (C04143) (see page 328) and who have completed a Juris Doctor (C04236) (see page 354) at UTS, after transferring to this course from the Master of Law and Legal Practice, are able to claim:

- an 8-credit-point unspecified law elective exemption where the student completed a minimum of two law electives (12 credit points) within the Master of Law and Legal Practice that were not credited to their Juris Doctor study plan
- a 16 credit-point unspecified law elective exemption where the student completed a minimum of three law electives (18 credit points) within the Master of Law and Legal Practice which were not credited to their Juris Doctor study plan
- a 24 credit-point unspecified law elective exemption where the student completed a minimum of four law electives (24 credit points) within the Master of Law and Legal Practice which were not credited to their Juris Doctor study plan.

Further information is available at:

telephone 1300 ask UTS (1300 275 887) or +61 2 9514 1222 Ask UTS www.ask.uts.edu.au

Concurrent study at another tertiary institution

Subject to approval by UTS: Law, students may apply to undertake subjects in postgraduate law courses at other universities for credit towards an unspecified option in their course at UTS. A concurrent studies application, detailing the academic content, attendance, assessment requirements and reading guide of the subject(s) proposed to be completed, should be submitted to the Haymarket Student Centre before applying to the other institution. Students who complete subjects concurrently at another institution without prior approval risk not being able to credit these subjects to their course at UTS.

- Students cannot undertake core subjects on a concurrent basis.
- Students cannot undertake options on a concurrent study basis if UTS: Law offers the equivalent subject during the proposed semester.
- Students must complete a minimum of 50 per cent of the creditpoint value of their course at UTS.

The concurrent study application form is available from:

www.sau.uts.edu.au/forms

Juris Doctor with honours

It is possible for students to gain an award with honours in the Juris Doctor (pre-2012: C04236v1; current: C04236) (see page 354), and the Juris Doctor component of the combined Juris Doctor Master of Business Administration (C04250) (see page 374).

An additional year of study is **not** required. See the rules for the course you are enrolled in, below.

Transitional arrangements for students who commenced study prior to 2012

In 2011 the Faculty of Law amended the honours requirements for the Juris Doctor. All students who commenced studies prior to 2012 and who are due to complete the requirements of the Juris Doctor (C04236v1) in Spring 2012 or later, may choose the means by which their eligibility for honours is determined. They can choose either:

- the original honours requirements for the course, i.e. to qualify
 with honours, candidates must attain a weighted average
 mark of 80 per cent across all subjects attempted calculated in
 accordance with the formula 'sum of all' (UTS law subject credit
 points multiplied by mark) divisible by the 'sum of all law subject
 credit points', OR
- the pre-2012 requirements as set out in Honours regulations, pre-2012 below.

Juris Doctor, pre-2012

To qualify for honours in the Juris Doctor (C04236v1), students who commenced studying the course prior to 2012 must complete 77740 Research Paper, as a 6-credit-point option subject in the degree.

To be eligible to undertake 77740 Research Paper, students must successfully complete no less than 96 credit points within UTS: Law, including 70717 Evidence and Criminal Procedure; and attain a minimum weighted average mark of 73.00 across all subjects attempted.

The research subject forms part of the credit points required for degree completion. 77740 Research Paper has requirements that students must comply with, in addition to the honours regulations for the Juris Doctor (below). Further details are available in the online subject description.

Honours regulations, pre-2012

The Honours regulations for students who commenced studying the Juris Doctor (C04236v1) prior to 2012 are:

1. Awards

- 1.1 Awards of the Juris Doctor degree shall be classified as follows:
- a. degree (with honours), and
- b. degree.

2. Requirements of honours

- 2.1 To qualify for an award of the degree with honours a student who commended studying prior to 2012 shall:
- a. successfully complete 77740 Research Paper
- b. subject to requirements below, obtain an honours mark of no less than 75.00, calculated as a weighted average mark received in all subjects completed in accordance with the formula 'sum of all' (UTS law subject credit points multiplied by mark) divisible by the 'sum of all law subject credit points'
- c. not fail any subject after the first semester of study
- d. a student's honours mark shall include the mark obtained by the student in 77740 Research Paper.
- 2.2 In exceptional circumstances the director (students) may modify or dispense with the requirements of regulation 2.1, subject to appeal to the Faculty Board in Law.

Juris Doctor, current

To qualify for honours in the current Juris Doctor (C04236) (see page 354), students who commenced study in the course from 2012 onwards must complete 78102 LLM Project by Research as an 8-credit-point option subject within the degree.

To be eligible to undertake 78102 LLM Project by Research, students must successfully complete not less than 96 credit points within UTS: Law, including 70717 Evidence and Criminal Procedure; and attain a minimum weighted average mark of 73.00 across all subjects attempted.

The research subject forms part of the credit points required for degree completion. 78102 LLM Project by Research has requirements that students must comply with in addition to the honours regulations for the Juris Doctor (below). Further details are available in the online subject description.

Honours regulations, current

The Honours regulations for the current Juris Doctor, current (C04236) (see page 354) are:

1. Awards

- 1.1 Award of the Juris Doctor degree shall be classified as follows:
- a. degree (with honours), and
- b. degree.

2. Requirements of honours

- 2.1 To qualify for an award of the degree with honours a student shall:
- a. successfully complete 78102 LLM Project by Research
- b. subject to requirements below, obtain an honours mark, of no less than 75.00, calculated as a weighted average mark received in all subjects, in accordance with the formula 'sum of all' (UTS law subject credit points multiplied by mark) divisible by the 'sum of all law subject credit points'
- c. not fail any subject after the first semester of study
- a student's honours mark shall include the mark obtained by the student in 78102 LLM Project by Research.
- 2.2 In exceptional circumstances the director (students) may modify or dispense with the requirements of regulation 2.1, subject to appeal to the Faculty Board in Law.

Juris Doctor Master of Business Administration

To qualify for honours in the Juris Doctor Master of Business Administration (C04250) (see page 374), a student must complete 78102 LLM Project by Research as an 8-credit-point option within the Juris Doctor component of the degree.

To be eligible to undertake 78102 LLM Project by Research, students must successfully complete not less than 96 credit points within UTS: Law, including 70717 Evidence and Criminal Procedure; and attain a minimum weighted average mark of 73.00 across all subjects attempted.

The research subject forms part of the credit points required for degree completion. 78102 LLM Project by Research has requirements that students must comply with in addition to the honours regulations for the Juris Doctor component of the Juris Doctor Master of Business Administration (below). Further details are available in the online subject description.

Honours regulations, JD MBA

The Honours regulations for the Juris Doctor component of Juris Doctor Master of Business Administration (C04250) (see page 374) are:

1. Awards

- 1.1 Award of the Juris Doctor component of the Juris Doctor Master of Business Administration shall be classified as follows:
- a. degree (with honours), and
- b. degree.

2. Requirements of honours

- 2.1 To qualify for an award of the degree with honours a student shall:
- a. successfully complete 78102 LLM Project by Research
- subject to requirements below, obtain an honours mark, of no less than 75.00, calculated as a weighted average mark received in all subjects completed in the Juris Doctor
- c. not fail any subject after the first semester of study
- a student's honours mark shall include the mark obtained by the student in 78102 LLM Project by Research.
- 2.2 In exceptional circumstances the director (students) may modify or dispense with the requirements of regulation 2.1, subject to appeal to the Faculty Board in Law.

International exchange program: Juris Doctor

Juris Doctor students participate in the international exchange program administered by UTS: International. Through the program, it is possible to undertake three law subjects from CBK90592 Options at overseas exchange partner universities.

To be eligible for the program, students should have a credit average or better and have completed 68 credit points of core subjects, including 70517 Equity and Trusts before going overseas. The number of places is strictly limited.

Results achieved in overseas study are recorded as a pass or fail grade without a mark. It should be noted that the pass/fail results for exchange subjects are excluded from the calculation of a GPA and in the calculation for honours.

Information and application packs are available from UTS: International. Further information is available at:

www.uts.edu.au/international/exchange

Mandatory continuing legal education

Participation in postgraduate study may entitle lawyers to mandatory continuing legal education (MCLE) points. If this particular educational activity is relevant to students' immediate or long-term professional development needs, particularly those related to the practice of the law, they may claim one 'unit' per hour of attendance (excluding refreshment breaks).

Further information regarding MCLE points is available from the Law Society of NSW:

www.lawsociety.com.au

Postgraduate coursework

UTS: Law offers a range of postgraduate coursework degrees (see page 14) to suit both law graduates and graduates of other disciplines. UTS: Law prides itself on its unique specialisations, flexibility and vocational relevance. Graduate certificate, graduate diploma and master's programs in law and legal studies, and specialised programs in communications law, intellectual property law, international law, practical legal training and dispute resolution are available.

Courses

Coursework programs are normally structured as follows:

- master's degrees: 48 credit points
- graduate diplomas: 36 credit points
- graduate certificates: 24 credit points.

Exceptions to this include the Juris Doctor (C04236) (see page 354) (144 credit points), Juris Doctor Master of Business Administration (C04250) (see page 374) (192 credit points), Graduate Diploma in Australian Law (C07073) (see page 411) (48 credit points), Graduate Certificate in Australian Law (C11211) (see page 458) (30 credit points), and the Graduate Certificate in Legal Practice (C11128) (see page 444) (12 credit points).

Subiects

UTS: Law timetables subjects over three teaching periods: Autumn semester, Spring semester and Summer session. The full range of core and optional subjects available can be found under each of the course entries.

Core law subjects

All core subjects are taught in Autumn and Spring semester and are timetabled during the day and are repeated in the evening.

Optional law subjects

A range of optional law subjects is taught in each semester. However, not all optional subjects are timetabled every semester and some optional subjects are offered on a two-yearly basis only. Timetabled optional subjects are offered subject to sufficient student interest.

Postgraduate progression

In accordance with rules 10.2.3 and 10.4.1, a graduate certificate, graduate diploma or master's candidate shall be excluded if they fail to maintain a minimum rate of progress. To maintain a minimum rate of progress, a student must not fail:

- two subjects in a graduate certificate
- three subjects in a graduate diploma
- four subjects in a master's degree, or
- five subjects in the JD, JD MBA, or MLLP.

Students may appeal against such exclusion under rule 10.8.

Postgraduate students are advised that they may be excluded from a course if they exceed the maximum time allowed for completion of that course (see rule 10.5).

Contacts and inquiries

Haymarket Student Centres CM05B.5 – Building 5, block B, level 5 CM05C.1 – Building 5, block C, level 1 City campus, Haymarket cnr Quay St and Ultimo Rd, Haymarket telephone 1300 ask UTS (1300 275 887) Ask UTS www.ask.uts.edu.au

Majors

UTS: Law offers seven major areas of study within the Master of Laws (C04143) (see page 328). Students in this course elect to complete study within a major, sub-major or alternatively subjects from across the major areas. Students must nominate a major or sub-major for it to appear on their academic transcript. Students who do not nominate a major and subsequently meet the requirements for a major must submit an e-request before graduation. Majors are available in:

- corporate and commercial law
- dispute resolution
- global business law
- intellectual property
- international law.

Postgraduate research

Higher research degrees provide an opportunity for law and non-law graduates to make a major contribution to knowledge by undertaking advanced-level research through the exploration of ideas and issues in a thesis. UTS: Law offers a Doctor of Philosophy in Law (C02028) (see page 475), the 'professional doctorate', the Doctor of Juridical Science (C02027) (see page 474) and a Master of Laws (Research) (C03024) (see page 488). These degrees are particularly valuable for students wishing to pursue a career in research or academia. Entry is on the basis of proven research achievement.

Information about potential supervisors and areas of supervision is available at:

www.law.uts.edu.au/research/postgraduate/supervisors.html

Student research is coordinated through the associate dean (research) and the faculty research officer and governed by the Research Management Committee (RMC) and the Higher Degree Committee. The faculty research officer can be contacted for further information about the faculty's research and higher degree research program.

Credit recognition

The granting of exemption for higher degree by research courses is at the discretion of the associate dean (research).

Support for research students

In addition to the support provided by the UTS Library and the UTS Graduate Research School, UTS: Law provides a range of facilities for higher-degree research candidates such as research support funding, study spaces, printing access, email and internet access.

Contacts and inquiries

Faculty research officer telephone +61 2 9514 3753 fax +61 2 9514 3400 email law.research@uts.edu.au www.law.uts.edu.au

Research interests of staff members

There is a diverse range of staff research interests within the faculty. The faculty has established research networks and interest groups which represent the key areas of research strength.

Information on supervision and research interests of staff is available at:

www.law.uts.edu.au/research/postgraduate/supervisors.html Staff contact details are available at:

http://datasearch2.uts.edu.au/law/staff/index.cfm

UTS: PHARMACY

Information for students

UTS: Pharmacy strives to provide industry-relevant, practice-based and future-focused education for graduate-entry students, giving them the best possible start for a career in pharmacy. UTS: Pharmacy has strong links with industry, including professional associations and industry advisory committees to ensure its curriculum is closely tied to industry expectations and developments. The degrees have been developed with the current and expanding role of the pharmacist in mind and give students a solid foundation in the pharmaceutical sciences, develop their abilities to be effective practitioners and provide them with them with a number of options to allow them to pursue their area of interest. In addition, the courses have been developed by pharmacy academics with extensive experience in pharmacy curriculum development and delivery, pharmacy practice and integrating research into practice and teaching.

UTS: Pharmacy also undertakes world-class research with many of its academic staff leading researchers in their fields. The research areas covered include pharmaceutical services, drug resistance in cancer and quality use of medicines. UTS: Pharmacy is expanding its research profile national and internationally by undertaking collaborative research with colleagues from other disciplines, institutions, industry and health care settings. Research will be further developed through a strong cohort of postgraduate research students, who are supported and encouraged by these leading researchers and a vibrant research culture. UTS: Pharmacy is committed to collaborative research that has a real impact on the pharmacy profession, with a focus on innovative practice-oriented research that improves the quality use of medicine and informs health policy.

Location, contacts and inquiries

UTS: Pharmacy is located at City campus, Broadway. Further information about UTS: Pharmacy is available at: email pharmacy@uts.edu.au www.pharmacy.uts.edu.au

Structure

UTS: Pharmacy is governed through a Graduate School of Health Academic Board of Studies. The head of school is supported by an executive officer. Academic staff members hold responsible academic officer positions for teaching and learning, research and clinical placements.

The Academic Board of Studies is chaired by the head of school and includes representatives from other faculties, senior executive representatives, and a student and industry representative.

The Graduate School of Health is managed in conjunction with the faculties of Science and Nursing, Midwifery and Health.

 $\label{lem:uts:pharmacy} UTS: Pharmacy also has two External Advisory Committees: national and international.$

Support and facilities

UTS: Pharmacy has a dedicated, purpose-built facility for student education which includes a simulated pharmacy for practice-based learning.

UTS: Pharmacy supports the Master of Pharmacy students through an Academic Mentorship Scheme, where each student is allocated an academic mentor who oversees her or his progress and assists with any ongoing difficulties affecting her or his learning. Regular meetings are held with students and academic mentors to identify any issues affecting students.

Professional bodies

UTS: Pharmacy has strong links to industry through its External Advisory Committees which include representatives from several areas of industry, including community pharmacy, hospital pharmacy, the pharmaceutical industry and professional associations.

Additionally, academic staff have links with the profession through their research and professional activities, such as hospital appointments, membership of professional associations and research collaborations.

Professional practice

Students of the Master of Pharmacy undertake three clinical placement subjects to gain experience in the professional pharmacy environment. The placement program includes experience in community pharmacy, hospital pharmacy and the pharmaceutical industry.

The clinical placement subjects are further supported by the professional services subjects which prepare students for the varying roles in the profession.

Subjects

The Master of Pharmacy is a structured, two-year, full-time degree. In the final year of the program students are given the opportunity to undertake two electives from other faculties of the University in areas such as business management, health policy and the sciences.

Postgraduate course information

Postgraduate coursework

UTS: Pharmacy currently offers the Master of Pharmacy (C04252) (see page 376), which is a graduate-entry degree for students who have completed a bachelor's degree in a relevant science discipline (e.g. medical science) who wish to become registered pharmacists.

The Master of Pharmacy has been developed by leading pharmacy teachers and researchers, with the input of a dedicated educational designer. The course is highly integrated, with the content and learning outcomes of each subject linked with the others in the course to provide students with continuity of learning and a thorough understanding of the sciences underpinning pharmacy practice and experience in applying concepts learnt in real-life situations. The course aims to incorporate educational technologies to facilitate student-based learning and reflect the postgraduate level of learning. Problem-based learning is also a major component of the course, preparing students for the workplace.

Contacts and inquiries

Initial inquiries regarding the Master of Pharmacy degree should be made to the Building 6 Student Centre:

telephone 1300 ask UTS (1300 275 887) or +61 2 9514 1222 Ask UTS www.ask.uts.edu.au

Postgraduate research

UTS: Pharmacy provides opportunities for graduates of pharmacy and related disciplines to develop their research career by undertaking a higher degree by research, the Doctor of Philosophy (C02056) (see page 485). Research students are guided by supervisors who are leading researchers in their fields and are supported by a strong research culture. Research degrees offer students the opportunity to gain research training by undertaking original research and investigating questions related to a broad range of areas including the pharmaceutical sciences, pharmacy practice and service delivery.

Contacts and inquiries

Initial inquiries regarding research degrees should be directed to: email pharmacy@uts.edu.au

Research profile

UTS: Pharmacy research covers a broad range of areas including cancer drug resistance, quality use of medicines, pharmacy practice and consumer behaviour. Research staff are international leaders in their area of research and their work is supported by several large grants, including those from the NHMRC and the Cancer Council.

UTS: SCIENCE

Information for students

UTS: Science publishes a specific course guide at the beginning of each academic year. The course guide is available from the Building 6 Student Centre.

UTS: Science's website provides information on its news, events and operations:

www.science.uts.edu.au

Location, contacts and inquiries

Learning resource and study centres

UTS: Science operates learning resource and study centres in chemistry, physics and mathematics/statistics. These are drop-in centres staffed by the relevant school for all UTS students to get help with introductory subjects in these areas. Although the emphasis is on the provision of help for first-year subjects, sometimes assistance can be provided for later-year subjects.

Research facilities and institutes

Science research facilities

Through its technology hubs, UTS: Science is repositioning its relationship with the community, industry and government. Expert researchers, scientists and experienced technical staff are supported by world-class instrumentation in a state-of-the-art science building.

These technology hubs form a network of niche expertise and platform technologies, providing cutting-edge capabilities, advanced training and high-level services managed in a way that is accessible to both internal researchers at UTS and also external industries, allowing informal access to researchers, links with state and federal research and development schemes and access to world-class national infrastructure.

UTS: Science invites organisations to be stakeholders in our technology hubs in conjunction with research institutes and groups. The technology hubs are:

- Microstructural Analysis Unit
- Biosciences Research Facility
- Chemical Technologies Research Facility
- Environment Research Facility.

These technology hubs are where UTS: Science interacts with industry in pursuit of leading-edge techniques, methodologies and capabilities.

Further information on the technology hubs is available from:

www.science.uts.edu.au/research/coe

Microstructural Analysis Unit

The Microstructural Analysis Unit (MAU) provides access to a comprehensive array of state-of-the-art materials characterisation and microscopy instrumentation, which is supported by resident professional staff.

MAU has six scanning electron microscopes, four scanning probe microscopes and an X-ray diffractometer. All these instruments are equipped with specialised attachments, such as cathodoluminescence spectroscopy with hot and cold stages, electron backscatter diffraction, electron beam lithography as well as EDS and WDS quantitative X-ray mapping systems. A broad range of equipment for characterising the electrical and optical properties of materials is also available as well as extensive materials fabrication facilities.

All MAU instrumentation are available 24 hours a day, seven days a week, to all staff and students within UTS: Science. External user access is available on a cost recovery basis. MAU also offers accredited training programs in electron microscopy and microanalysis, scanning probe microscopy techniques and X-ray analytical methods.

Inauiries

Associate Professor Matthew Phillips Director, Microstructural Analysis Unit telephone +61 2 9514 1620 email Matthew.Phillips@uts.edu.au www.science.uts.edu.au/mau

Biosciences Research Facility

The Biosciences Research Facility includes an extensive array of instrumentation and support services for research in medical, molecular biology including two high-end specialised core facilities for proteomics and microbial imaging.

Proteomics describes the study of the complete set of proteins (proteome) that is expressed at a given time in a cell, tissue, organ or organism. Modern proteomics requires the integration of a wide range of protein analytical tools and information technologies, to quickly and reliably identify changes in proteins, e.g. altered proteomic states associated with disease.

The Proteomics Core Facility (PCF) brings together leading technologies for sample preparation, protein separations, identification and characterisation.

PCF offers services and training in proteomics discovery technologies to Australian and international researchers from academia and industry. PCF has particular expertise in experimental design, custom method development, sample preparation, complex mixture fractionation and protein separations.

The Microbial Imaging Facility (MIF) at UTS has recently been established to provide high-resolution imaging of bacteria, parasites, eukaryotic cells and parasite—host interactions. The facility also has equipment for flow cytometry and biological specimen preparation for optical and electron microscopy.

MIF is comprehensively equipped with sophisticated and state of the art optical microscopes for epifluorescence, deconvolution, confocal and live-cell imaging microscopy.

The star of the facility is the DeltaVision OMX 3D-SIM \square , a structured illumination microscope for super-resolution imaging, which enables scientists/researchers to view cells and organisms in spectacular detail at a resolution never before possible. It is the only one in Australia, and one of only two commercial units in the world.

Inquiries

Philip Lawrence telephone +61 2 9514 8356 email Philip.Lawrence@uts.edu.au www.science.uts.edu.au/research/coe

Chemical Technologies Research Facility

The Chemical Technologies Research Facility (CTRF) draws from several world-class laboratories, technical and research staff specialising in chemistry and materials science at UTS: Science. CTRF focuses on chemical and biochemical analysis and materials technology. It is equipped to produce and characterise a diverse range of organic and inorganic materials and is supported by a team of over 20 experienced technical staff and researchers. CTRF expertises include the physical and mechanical characterisation of engineering materials, chemical and physical characterisation of forensic and pharmaceutical samples.

CTRF provides services to industry, researchers and the community in these specialised areas.

Inquiries

Dr Ronald Shimmon telephone +61 2 9514 8260 email Ronald.Shimmon@uts.edu.au www.science.uts.edu.au/research/coe

Research strengths and capabilities

UTS: Science has a strong record of research and development, essential to facilitating quality postgraduate research programs. Research grants and funding are very important to the direction and support of postgraduate research. UTS: Science wins a substantial proportion of national and international competitive research grants awarded to UTS annually.

The faculty obtains grants and funding across wide areas of expertise such as in the physical, chemical, forensic, climate change and environmental, biological, biomedical and mathematical sciences.

UTS: Science prides itself on research that engages the interest of the community and industry, and produces outcomes of economic and social benefit.

Further information on the research strengths and areas is available from:

www.science.uts.edu.au/research

UTS: Science's research strengths are marked by its research institutes and centres, which form a substantial part of the University's research strengths.

The ithree Institute

The Institute for Biotechnology of Infectious Diseases has recently been re-branded to 'the ithree Institute' (I3) to reflect its new strategic direction and its one-health research focus, where it will take an interdisciplinary approach of 'infectious ecology' — infection, immunity and innovation.

The aim of the institute is to deliver the highest quality research on the biology and control of infectious diseases in humans and animals. I3 research holds the keys to interrupting the lifecycle of pathogens.

Located in state-of-the-art laboratories in central Sydney, its facilities include pathogen culture and the Delta Vision OMX 3D-SIM \square (the only one in Australia). This structured illumination microscope for superresolution imaging enables scientists and researchers to view cells and organisms in spectacular detail at a resolution never before possible.

It also brings together expertise in molecular biology, cell biology, genetics, bioinformatics and protein chemistry, etc. Its philosophy is to work in partnership with others to deliver world-class scientific discovery and to drive innovation.

I3 also works very closely with the Department of Medical and Molecular Biosciences at UTS: Science to focus its teaching commitments, encourage research-oriented teaching and raise its visibility to UTS students. It also promotes career development of its staff and students.

Inauiries

Professor Ian Charles Director, The I3 Institute telephone +61 2 9514 2672 email Ian.Charles@uts.edu.au www.ithreeinstitute.uts.edu.au

Plant Functional Biology and Climate Change Cluster

The Plant Functional Biology and Climate Change Cluster (C3) was established to demonstrate UTS's commitment to finding real and accurate solutions to climate change problems.

C3 is a cross-disciplinary research group with the aim to improve and enhance predictions about climate change outcomes. Building on existing key UTS research strengths and resources in terrestrial and aquatic ecosystems, C3 brings together a core group of experts in plant physiologists, ecologists, biologists, remote sensing specialists, and biological and physical modellers.

Working on a regional scale, e.g. forest, coastal and estuarine ecosystems, this unique group's targeted research approach improves the confidence in scientists' predictions about climate change. Whether terrestrial or aquatic plants are at the bottom of the list, and more often than not forgotten, by integrating the biological feedback from plants into climate change models, C3 improves their research findings accuracy and usefulness for developing future resource planning strategies to reduce climate change.

C3 also aims to provide an opportunity for the University, and wider community, to connect on issues relating to climate change by fostering interfaculty discussion through forums and seminars.

C3 is currently undergoing a considerable growth in its research capacity and welcomes inquiries from students interested in taking up honours and PhD positions. Some areas of research include ocean acidification, ecosystem and food web modelling, coral bio-energetic, biological invasions and climate change synergies, and Antarctic sea-ice algal communities.

Inquiries

Associate Professor Peter Ralph Director, Plant Functional Biology and Climate Change Cluster telephone +61 2 9514 4070 email Peter.Ralph@uts.edu.au www.c3.uts.edu.au

Institute for Nanoscale Technology

The Institute for Nanoscale Technology's (INT) core research activities focus on the interaction of light with nano and microscale structures, and on materials chemistry. INT's research work revolves around, but is not limited to, the following:

- modelling and fundamental understanding of optical, chemical, electrical and structural phenomena at optical and sub-optical wavelengths
- technological development and exploitation of these phenomena to achieve useful results in the communications, architectural and biomedical industries.

The group has also successfully developed a range of efficient analytical and numerical algorithms for a number of important situations and is internationally recognised for the development and application of semi-analytic methods based on multiple techniques, bloch mode techniques and Green's function methods.

There is also substantial expertise in computational electromagnetic techniques, particularly the finite element and finite difference time domain methods. Part of the focus of this group is in the design and study of the fundamental physics of photonic crystal devices, micro-structured optical fibres, radiation dynamics of photonic crystal clusters, localisation in random structures, optical biomimetics, plasmon resonances, sensing applications, plasmonic heating and light scattering.

Another area of particular interest is the development of 'smart' and energy-efficient coatings for windows.

The aim of the group is to produce graduates with the necessary skills to sustain a vibrant industry. INT ensures that its works are closely tied in with UTS: Science's undergraduate and postgraduate curriculum.

Inauiries

Professor Michael Cortie Director, Institute for Nanoscale Technology telephone +61 2 9514 2208 email Michael.Cortie@uts.edu.au www.nano.uts.edu.au

Centre for Forensic Science

The Centre for Forensic Science (CFS) was established in 2002 and became a University research centre in 2007. The aim of the centre is to provide high-calibre research, high-quality education, enhancement of professional practice and independent services for the benefit of the community. It brings together world-class academics with different expertise but with a common vision, that is the prevention and solving of crime and terrorism.

Forensic science at UTS is presented as a multidisciplinary methodology applied within a scientific, legal and political structure. One of the prime objectives of the centre is to develop new investigative techniques and also to demonstrate their significance within the legal system and to communicate their meaning to juries and society in general. The centre is the only one of its kind in Australian universities, making it unique, and serves local and national law enforcement agencies, security agencies and the community at large in the application of scientific principles, methods of administration and enforcement of the law.

It also capitalises on UTS: Science's forensic programs and runs professional short courses and seminars for law enforcement agencies, forensic organisations, practitioners, insurance companies, legal firms, various research institutes and the community.

It has research programs in the areas of fingerprints, questioned documents, trace evidence, fire investigation and analysis, illicit drugs, toxicology, DNA profiling, materials and engineering, statistics and data handling, and artificial neural networks applied to forensic classification.

The centre also offers an independent investigative and consulting service through the UTS commercial company accessUTS Pty Limited.

Inquiries

Professor Claude Roux Director, Centre for Forensic Science telephone +61 2 9514 1718 email Claude.Roux@uts.edu.au www.forensics.uts.edu.au

Centre for Environmental Sustainability

The Centre for Environmental Sustainability (CEnS) aims to generate multidisciplinary, multiscale information that is urgently needed for sustainable natural resource management by providing:

- high-quality innovative research on the tolerance and resilience of our natural terrestrial and riverine systems and biota to human-induced environmental stressors and requirements for remediation and management
- insights into physical/chemical dynamics and ecosystem functions at the mechanistic level for use in modelling landscape and/or catchment processes.

The centre coordinates research programs at honours, master's and doctoral level. It works closely with the Centre for Ecotoxicology — a joint enterprise between UTS and the NSW Department of Environment, Climate Change and Water with the aim to promote education research and knowledge transfer in the field of ecotoxicology.

The University arm also offers an independent investigative and testing consulting service for industry through access UTS Pty Limited.

Inquiries

Professor David Booth Centre for Environmental Sustainability telephone +61 2 9514 4053 email David.Booth@uts.edu.au www.research.uts.edu.au/strengths/es

Cross-faculty research

Centre for Health Technologies

The Centre for Health Technologies (CHT) research team brings together complementary interdisciplinary research skills unique in Australia in the development of innovative medical devices and biotechnology processes for health technology applications.

The focus of CHT is on the study of health and disease processes and the development of new medical devices and advanced biotechnology applications for early detection, diagnosis, treatment and rehabilitation of lifestyle diseases such as cardiovascular disease, diabetes mellitus, neurological disorder and cancer.

The centre's innovative medical device technologies and biotechnology/biopharmaceutical research programs are currently at the cutting edge of biomedical engineering and biotechnology science, and have already developed several significant biomedical devices and advanced biotechnology processes.

Further information is available from:

www.research.uts.edu.au/strengths/ht

Quantitative Finance Research Centre

The Quantitative Finance Research Centre (QFRC) is a joint initiative of UTS: Business's School of Finance and Economics and UTS: Science's Department of Mathematical Sciences. QFRC is a recognised key UTS research centre.

QFRC encompasses the largest and pre-eminent concentration of research strength in quantitative finance in Australia, and is recognised as one of the leading centres for this discipline in the Asia–Pacific region. The group focuses on financial risk management and the associated quantitative methods. Areas of particular interest include simulation techniques in finance, financial optimisation, credit risk, financial econometrics and market design issues. In line with the federal government's aim for Sydney to become a major international finance centre, the QFRC performs internationally competitive research and translates breakthroughs into ideas that can be implemented in the local and global finance industry.

Further information is available from:

www.qfrc.uts.edu.au

Centre for the Study of Choice

The Centre for the Study of Choice (CenSoC) is a cross-disciplinary initiative of UTS: Business's School of Marketing and School of Finance and Economics with UTS: Science's Department of Mathematical Sciences linked with national and global affiliates. CenSoC uses theory, tools, processes and insights from econometrics, mathematics, statistics, marketing and psychology to build models to predict how consumers or firms are likely to respond to future choices. Its charter is to better understand individual and group decision-making, including the decision and choice processes of managers, organisations and consumers.

Further information is available from:

www.censoc.uts.edu.au

Links with industry

In the development of all its courses, UTS: Science is assisted by appropriate advisory committees with members drawn from the wider community. The courses are regularly reviewed to ensure currency and relevance to industrial and commercial practice.

UTS: Science has strong links with industry through its academic staff who maintain contact by undertaking appropriate research and consulting activities and through the centres of expertise. Undergraduate students have the option of spending an additional 12 months working in a relevant industry. UTS: Science provides assistance to students in finding these professional experience positions.

Subject prerequisites, corequisites, antirequisites

While every effort has been made to ensure the accuracy of the prerequisite, corequiste and antirequisite data in subject descriptions, students should check with their program directors if they intend to enrol in subjects in a different sequence to the typical course program shown in the handbook.

Bridging and short courses

Short intensive bridging courses designed for students about to enter a degree are offered in February each year. These courses teach at an introductory level only and assist in bridging the gap between school and university study. Subjects include chemistry, physics and mathematics. Other short courses are available, subject to demand.

Further information is available from:

www.science.uts.edu.au/courses/bridging.html

Undergraduate course information

UTS: Science offers a number of undergraduate degree programs developed to produce graduates for professional and vocational practice, with an ability to continue their studies by research and to contribute to the knowledge base of their scientific discipline. Most of UTS: Science's undergraduate courses are built from three building blocks of subjects comprising a 48-credit-point foundation stream, a 48-credit-point disciplinary core and a 48-credit-point extension block.

Students in the Bachelor of Science (C10242) (see page 241) select a major course of study by combining a specific disciplinary core with a matching extension block and then graduate with an award specifying that major, e.g. Bachelor of Science in (name of Science major). Most undergraduate majors also contain 24 credit points of ree electives that can be used to take subjects in a different science specialty or a different discipline altogether, such as business or information technology.

Research-based, one-year honours degrees are also available to bachelor's pass degree graduates.

Professional experience is also offered as an optional and additional component of the science degree courses in which students work in industry for a year and complete two subjects focused on enhancing understanding of the workplace environment and further development of their technical and generic skills.

Contacts and inquiries

Further information regarding undergraduate courses offered by UTS: Science is available from:

Building 6 Student Centre telephone 1300 ask UTS (1300 275 887) or +61 2 9514 1222 Ask UTS www.ask.uts.edu.au

Honours degree courses

One-year, research-based honours degrees are available in all disciplines of science and mathematics at UTS. Honours programs provide basic training in research and introduce students to advanced areas of study in the relevant discipline. Graduates generally enter occupations for which an honours degree is the minimum requirement or continue with postgraduate research degrees. Honours programs are offered in applied chemistry, applied physics, biomedical science, biotechnology, environmental science, forensic biology, forensic science, marine biology, mathematics, mathematics and finance, medical science and nanotechnology.

Admission requirements

Honours courses are one-year full-time or equivalent part-time courses. They are open to students who possess or have fulfilled all the requirements for a relevant bachelor's degree from UTS, or equivalent qualification, with at least a credit average over the final third of the undergraduate program.

Commencement date

Students commencing their honours course in Autumn semester are normally required to commence work on their honours program on the first Monday in February. This applies even when formal enrolment is held after this date. Students should contact their supervisor for details.

Award

Honours degrees may be awarded in the following grades: first class, second class (division 1), second class (division 2) and third class.

Other information

Interested students should discuss the program and possible research projects available with the relevant head of department or honours course coordinator, or with individual members of academic staff.

Majors

The Bachelor of Science (C10242) (see page 241) and most named degrees offered by UTS: Science are structured into 48-credit-point foundation streams plus 96 credit points in majors. A major is defined by a specific 48-credit-point disciplinary core group of subjects plus a specific 48-credit-point extension group of subjects.

Students in the Bachelor of Science do not have to choose a major and can instead choose a range of subjects according to their interests, providing they ensure they choose the appropriate prerequisite subjects and have the required mix of second and third year subjects. However, there are benefits to students of formal majors:

- UTS: Science provides direction in the choice of subjects so the variety and complexity of programs is diminished
- there is greater clarity in defining a graduate's capabilities, compared to a situation where choice of subjects is totally free
- a testamur is awarded that identifies the student's area or areas of study.

Listed below are the majors within the Bachelor of Science.

- Applied Chemistry (MAJ01100)
- Applied Physics (MAJ01101)
- Biomedical Science (MAJ01104)
- Biotechnology (MAJ01103)
- Environmental Biology (MAJ01106)
- Environmental Forensics (MAJ01108)
- Marine Biology (MAJ01107)
- Mathematics (MAJ01110)
- Medical Science (MAJ01105)
- Nanotechnology (MAJ01102)
- Statistics (MAJ01111).

Sub-majors

Students enrolled in the Bachelor of Science (C10242) (see page 241), Bachelor of Medical Science (C10184) (see page 217), Bachelor of Biomedical Science (C10115) (see page 172) and Bachelor of Biotechnology (C10172) (see page 215) degrees may undertake a sub-major as part of their course. A sub-major comprises a coherent sequence of subjects offered by UTS: Science, UTS: International Studies or another course area of the University. The purpose of the sub-major is to give students the opportunity to broaden their studies into other areas of interest or to pursue studies in particular disciplines to greater depth.

Examples of possible sub-majors (24 credit points each) are listed below, but it should be noted that not all of them are necessarily appropriate to every course and that normal prerequisite conditions and timetabling constraints apply in all cases. Students should consult their program director for advice on selecting sub-majors.

- Environmental Sciences (SMJ01048): this sub-major is suitable for students in non-environmental courses.
- Mathematics (SMJ01007)
- Quantitative Management (SMJ01025): this sub-major was developed for students who have completed a first course in statistics at the University (e.g. from UTS: Business) or in the biological sciences.

- Quantitative Management (SMJ01026): this sub-major was developed for students in UTS: Information Technology but is also suitable for students from any faculty who have studied no tertiary mathematics or statistics in their degree programs.
- Quantitative Methods (SMJ01029): this sub-major is intended to expose students to the theory and application of quantitative methods that are widely used by information technology professionals, especially techniques drawn from the disciplines of statistics and management science.
- Scientific Computing (SMJ02054): this sub-major is intended to expose students to the theory and practice of computing as applied in the area of computational science.
- Statistics (Life Sciences) (SMJ01030): this sub-major is suitable for students in biological or environmental science courses.
- Statistics (Physical Sciences) (SMJ01031): this sub-major is suitable for students in physical and chemical programs, and assumes they have completed 33190 Mathematical Modelling for Science and 33290 Statistics and Mathematics for Science.
- Statistical Modelling (SMJ01032): this sub-major is intended to expose students to the theory and practice of statistical modelling.

Combined course information

UTS: Science is involved in the teaching of science to other areas of the University, including UTS: Engineering and UTS: Health. UTS: Science is also involved in offering the following joint undergraduate degree programs.

- The Bachelor of Science Bachelor of Laws (C10126) (see page 182) is offered in conjunction with UTS: Law. In order to qualify for separate awards in science and law, students are required to select an area of specialisation in science so that they can proceed to more advanced studies and thereby obtain recognition in relevant professional fields. Science majors available are applied chemistry, applied physics, biomedical science, biotechnology, environmental biology, environmental forensics, marine biology, mathematics, medical science and nanotechnology. Graduates from the course are qualified for professional practice as either scientists or lawyers and especially in areas where a knowledge of both disciplines is desirable.
- The Bachelor of Medical Science Bachelor of Laws (C10131) (see page 189) is similar in structure to the Bachelor of Science Bachelor of Laws (C10126) (see page 182), but with a specialisation in medical science. Graduates qualify for professional practice in either field but may expect to be in most demand in those areas of law in which a knowledge of medical science is a particular advantage or, conversely, in areas of science such as the pharmaceutical industries where a knowledge of the law has special value.
- Science degrees combined with the 96-credit-point Bachelor of Arts in International Studies enables science students to learn and experience the language and culture of another country, thereby enhancing their competitiveness in global career choices. Students are required to select a region or country of specialisation within the International Studies program. The length of these combined degrees is five years full time, which includes one year of in-country study. Graduates may work as professionals in their area of scientific expertise particularly in specialist positions where an understanding of a particular culture may be highly desirable. The Bachelor of Science Bachelor of Arts in International Studies (C10243) (see page 245) enables students to combine a science degree in any of the 12 Bachelor of Science majors with the Bachelor of Arts in International Studies; the Bachelor of Medical Science Bachelor of Arts in International Studies (C10167) (see page 211) and the Bachelor of Biotechnology Bachelor of Arts in International Studies (C10168) (see page 212) impart additional practical skills to students specialising in science, medical science and biotechnology, particularly the knowledge and understanding of a language and culture other than English.
- The combined degree Bachelor of Health Science in Traditional Chinese Medicine Bachelor of Arts in International Studies (C10164) (see page 209) provides acupuncture and Chinese herbal medicine students with greater exposure to and understanding of China's culture and a working knowledge of Chinese. The program makes it easier for traditional Chinese medicine graduates to practise outside Australia.
- The combined degrees Bachelor of Mathematics and Computing Bachelor of Arts in International Studies (C10224) (see page 229) and Bachelor of Mathematics and Finance Bachelor of Arts in International Studies (C10157) (see page 200) facilitate an international perspective on mathematics career choices in the fields of computing and finance.

- The combined degrees Bachelor of Engineering Bachelor of Biotechnology (C10078) (see page 170) and Bachelor of Engineering Bachelor of Medical Science (C10075) (see page 167) integrate the theory and application of science and engineering to produce well-rounded graduates in biotechnology or medical science. In the Bachelor of Engineering Bachelor of Science (C10073) (see page 160) the major science study may be chosen from applied chemistry, applied physics, biomedical science, biotechnology, environmental sciences, mathematics, medical science or nanotechnology. In five years of full-time study, students choose from one of the engineering majors and 78 credit points from one of the science programs. Depending on the combinations chosen, graduates are qualified to work in professional practice as well as in research and development.
- The Bachelor of Science Bachelor of Business (C10162) (see page 203) requires completion, over four years of full-time study, of a 96-credit-point major selected from the Bachelor of Business (C10026) (see page 131) plus a 96-credit-point major selected from the science programs. Graduates may work as professional scientists or as business professionals. Career areas include accounting or economics, finance, management or marketing in enterprises in which high-level scientific expertise is desirable. The program also provides business expertise for scientists who wish to be administrators in research or other scientific institutions. The Bachelor of Medical Science Bachelor of Business (C10163) (see page 208) and the Bachelor of Biotechnology Bachelor of Business (C10169) (see page 214) are similar in structure to the Bachelor of Science Bachelor of Business (C10162) (see page 203), with the science specialisation in medical science or biotechnology.

Postgraduate course information

UTS: Science offers both PhD and master's programs by research and thesis. There are also several master's, graduate diploma and graduate certificate programs by coursework. Inquiries regarding postgraduate coursework programs should be directed to the UTS Student Centre.

Prospective research students should discuss possible topics of research with either a potential supervisor or the head of the appropriate department in the first instance. Further information on research programs is available from UTS: Science's research and development coordinator.

Progression

Postgraduate students are advised that they may be excluded from a course if they exceed the maximum time allowed for completion of that course (see rule 10.5).

Postgraduate research

UTS: Science has a well-developed research culture and is proud of its achievements and track record in teaching and researching innovative science. The research courses focus on applied and practical research to bring about benefits to industry and the community. UTS: Science has strong links with industry and its courses are highly respected for their relevance, skills and research training, and for their professional focus.

UTS: Science wins a substantial part of the competitive grants awarded to the University. Much of UTS: Science's research focuses on the activities of its research institutes, centres and units, which include the University's strategic research strengths (see below).

This concentration of research has enabled UTS: Science to significantly improve the quality of its major equipment and instrumentations in recent years to the benefit of its students.

The research programs may be carried out on either a full-time or part-time basis and it is possible for part-time students to undertake a portion of their research at a site external to UTS, provided appropriate supervisory arrangements can be made. Details of current research in progress can be obtained from the office of the associate dean (research and development).

Contacts and inquiries

Further information is available from:

Research and Development Coordinator telephone +61 2 9514 2490 fax +61 2 9514 1656

email science.research@uts.edu.au

Research profile

UTS: Science's strategic research strengths are:

- The ithree Institute (I3)
- Plant Functional Biology and Climate Change Cluster (C3)
- Centre for Forensic Science (CFS)
- Institute for Nanoscale Technology (INT)
- Centre for Environmental Sustainability (CeNS)

Other research areas include, but are not limited to:

- applied chemistry, including nanochemistry, anaytical chemistry, infrared imaging, bioinorganic chemistry
- applied physics, including image processing and analysis
- computational number theory
- ecotoxicology and chemistry toxicology
- experimental design and data analysis
- immunology
- marine biology and ecology
- mathematics and statistics
- medical and biomedical science
- microbiology
- neurotoxins
- numerical integration
- psycho-oncology
- scheduling theory
- traditional Chinese medicine.

- Centre for Health Technologies
- Centre for the Study of Choice
- Quantitative Finance Research Group.

Further information on UTS: Science's research strengths, areas and entities is available from:

www.science.uts.edu.au/research

UNDERGRADUATE COURSES

C09004v6 Bachelor of Business (Honours)

Award(s): Bachelor of Business (Honours) (BBus(Hons))

CRICOS code: 015933J

Commonwealth-supported place?: Yes

Load credit points: 48 Course EFTSL: 1

Location: City and Kuring-gai campuses

Overview

The Bachelor of Business (Honours) provides an opportunity for advanced study in the disciplinary areas of accounting, finance and economics, management or marketing.

The course provides the ideal foundation for students who plan to pursue a career in applied research in business and related professions, or who plan to undertake master's or doctoral research studies.

Course aims

The degree seeks to provide students with the knowledge, competencies and values necessary for a fulfilling and effective career.

Career options

Career options include accounting, economics, finance, financial services, human resource management, international business, management, marketing, marketing communication, and government advisory positions.

Admission requirements

Applicants must have completed a recognised Australian bachelor's degree in a relevant discipline at an appropriate level.

Applicants must have completed the UTS Bachelor of Business, or an equivalent degree, with an overall credit average and an average mark of 70 (or equivalent for non-UTS students) in the discipline area in which the honours degree is to be awarded. A questionnaire, available from UTS: Business student offices, must also be completed.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The honours degree comprises one year of intensive full-time study or, in approved cases, two years of part-time study.

Course structure

The Bachelor of Business (Honours) comprises 48 credit points of study.

Students may undertake any of the following four streams.

- The Accounting stream provides the knowledge and skills to critically evaluate accounting issues. The coursework component provides research skills necessary for critical evaluation of both theoretical and empirical studies in accounting. The thesis component focuses on an area such as market-based accounting research, contracting theory, auditing and management accounting.
- The Economics stream equips students with the skills and knowledge required for applied or postgraduate research in economics. The coursework component provides in-depth knowledge of advanced microeconomic and macroeconomic

- analysis, economic modelling and policy applications. Students undertake original theoretical or applied research in a disciplinary area of economics for the thesis component.
- The Finance stream brings students up to date with both the latest theoretical issues and the current research methods used in finance. The thesis develops skills through applied research in a relevant area, and prepares students for further research in either industry or postgraduate studies. It is recommended that students undertake this program on a full-time basis.
- The Management stream prepares students for applied or postgraduate research in many areas of management. The coursework component brings students up to date with the latest theoretical issues and research paradigms currently in use. The thesis component involves original study in one of the major areas.
- The Marketing stream prepares students for further academic research or research in a marketing management position. The coursework component provides in-depth knowledge of contrasting theories of marketing, and expertise in a range of current research methods and analytical techniques. The thesis component involves original applied research in a disciplinary area of marketing.

C09005v6 Bachelor of Management (Honours) in Events and Leisure

Award(s): Bachelor of Management (Honours) in Events and Leisure (BM(Hons))

CRICOS code: 043288A

Commonwealth-supported place?: Yes

Load credit points: 48 Course EFTSL: 1

Location: Kuring-gai campus

Overview

The honours program is designed to provide students with the resources to further develop and apply their research skills and to pursue special areas of interest in depth.

Course aims

The honours program aims to develop, at an advanced undergraduate level, knowledge of sport and leisure management through research; facilitate the completion of a substantive research thesis which focuses on theory, applied/professional issues or some combination of these; provide a direct pathway to graduate-level study; and make contributions to knowledge in the field of sport and leisure management.

Career options

Career options include activities and cultural events coordinator at a university or college; manager or administrator in leisure, tourism, sports, entertainment or the arts; marketing of sport and leisure; outdoor recreation promotion; and recreation planner/manager in local government.

Admission requirements

Applicants must have completed a recognised Australian bachelor's degree in a relevant discipline at an appropriate level.

Applicants typically should have successfully completed the Bachelor of Management in Events and Leisure (C10039) (see page 135), with a credit average or better in the final two full-time semesters.

Graduates from other institutions who have completed a comparable course and who meet the academic criteria are also considered for admission.

In exceptional cases, consideration is given to applicants who have completed the Bachelor of Management in Events and Leisure (C10039) (see page 135), the Bachelor of Management in Sport and Exercise (C10301) (see page 289), the Bachelor of Management in Tourism (C10040) (see page 136) or the Bachelor of Human Movement (C10300) (see page 288) at pass level. In such cases, outstanding professional achievements are taken into account.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The course is normally completed in one year of full-time or two years of part-time study. It is offered only at Kuring-gai campus.

Course structure

All students must complete three coursework subjects, each worth 6 credit points, and a major thesis of 30 credit points, totalling 48 credit points. The precise nature of each student's program is determined in consultation with the honours course coordinator, with the aim being to choose those subjects that facilitate completion of the honours research thesis.

In choosing electives, students may:

- substitute subject Readings for Thesis with an elective subject with the approval of the course coordinator
- complete both elective subjects in the first semester
- choose other senior undergraduate-level subjects with the approval of the course coordinator; these subjects may be taken from other schools within UTS: Business or elsewhere in the University.

Award(s): Bachelor of Management (Honours) in Tourism (BM(Hons)) CRICOS code: 042814C

Commonwealth-supported place?: Yes

Load credit points: 48 Course EFTSL: 1

Location: Kuring-gai campus

Overview

The honours program is designed to provide students with the resources to further develop and apply their research skills and to pursue special areas of interest in depth.

Course aims

The honours program aims to develop, at an advanced undergraduate level, knowledge of tourism management through research; facilitate the completion of a substantive research thesis which focuses on theory, applied/professional issues or some combination of these; provide a direct pathway to graduate-level study; and make contributions to knowledge in the field of tourism management.

Career options

Career options include management, marketing and policy analysis roles in industries such as hotels, airlines, tour operations, regional planning and development, special events and tourist attractions, both in Australia and overseas.

Admission requirements

Applicants must have completed a recognised Australian bachelor's degree in a relevant discipline at an appropriate level.

Applicants typically should have successfully completed the Bachelor of Management in Tourism (C10040) (see page 136), with a credit average or better in the final two full-time semesters.

Graduates from other institutions who have completed a comparable course and who meet the academic criteria are also considered for admission. In exceptional cases, consideration is given to applicants who have completed the Bachelor of Management in Leisure (C10039) (see page 135), the Bachelor of Arts in Sport and Exercise Management (C10301) (see page 289), the Bachelor of Management in Tourism (C10040) (see page 136) or the Bachelor of Arts in Human Movement Studies (C10300) (see page 288) at pass level. In such cases, outstanding professional achievements are taken into account.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

C09009v4 Bachelor of Arts (Honours) in Communication

Award(s): Bachelor of Arts (Honours) in Communication (BA(Hons)) CRICOS code: 017874K Commonwealth-supported place?: Yes Load credit points: 48 Course EFTSL: 1 Location: City campus

Overview

This course offers graduates the opportunity to pursue advanced work in the humanities and social sciences, and prepares them for postgraduate research. Emphasis is placed on interdisciplinary approaches and the integration of scholarship with contemporary media.

Students undertake a program of advanced coursework and produce a thesis relevant to their academic, professional and / or creative agenda.

Admission requirements

Applicants must have completed a recognised Australian bachelor's degree in a relevant discipline at an appropriate level.

Applicants are admitted to the honours program only if appropriately qualified UTS: Communication academic staff are available for supervision for the thesis component.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 7.0 overall with a writing score of 7.0; or TOEFL: paper based: 584-609 overall with TWE of 5.0, internet based: 94-101 overall with a writing score of 23; or DEEP: B+; or PTE: 65-72; or CAE: 67-73

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The course is offered on a one-year, full-time basis.

Course structure

Students complete two 12-credit-point subjects (24 credit points) and a thesis (24 credit points). The thesis is based on their original work informed by theoretical study and independent research. The thesis may be presented in a variety of traditional and/or non-traditional formats

C09018v5 Bachelor of Nursing (Honours)

Award(s): Bachelor of Nursing (Honours) (BN(Hons))

CRICOS code: 015936F

Commonwealth-supported place?: Yes

Load credit points: 48 Course EFTSL: 1 Location: City campus

Overview

This course provides the opportunity for eligible graduates of the Bachelor of Nursing to extend their skills and understanding of the research process. It emphasises the reciprocal relationship between nursing research and the contexts of nursing practice.

This course provides Bachelor of Nursing graduates with the opportunity to develop training in clinically focused research. The course deepens students' understanding of the importance of research in nursing.

Course aims

The purpose of the course is to enable graduate nurses to conduct research relevant to nursing in any of its dimensions. It aims to develop students' skills in using research designs and methodologies, and to reinforce their understanding of the crucial role of research in the evolution of the discipline of nursing. Students also develop academic writing skills to produce a dissertation.

Career options

Career options that graduates may undertake include registered nurse in a clinical specialty supported by their research project work, such as critical care, or roles such as nurse educator or manager. However, graduates are also well-prepared to undertake postgraduate research degrees or begin a career as a researcher.

Admission requirements

Applicants must have completed a recognised Australian bachelor's degree in a relevant discipline at an appropriate level.

All applicants must be eligible to graduate from a Bachelor of Nursing program from UTS or another tertiary institution at the time of application (followed by successful completion). Applicants must be registered as a nurse in their country of citizenship or residence at the time of enrolment (exemptions to this rule may be sought from the Bachelor (Honours) Selection Committee in exceptional

All applicants must have completed at least one research subject (as approved by the Bachelor (Honours) Selection Committee) with a credit grade and have a weighted average mark or grade point average of credit or higher for their bachelor's degree. Applicants are admitted to the honours course only if appropriately qualified academic members of UTS: Health staff are available for supervision of the dissertation component.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

C09019v4 Bachelor of Science (Honours) in Information Technology

Award(s): Bachelor of Science (Honours) in Information Technology (BSc(Hons))

CRICOS code: 046619G

Commonwealth-supported place?: Yes

Load credit points: 48 Course EFTSL: 1 Location: City campus

Overview

This course provides the opportunity for students to develop research skills, and provides greater breadth and depth in a specific area of information technology.

The honours program in IT prepares students to be active players in the knowledge economy. The course provides the research skills needed to create knowledge, a much harder and more rewarding task than simply using the knowledge created by other people. Students experience the satisfaction of creating links between the world of cutting-edge knowledge and the IT industry.

Course aims

The honours program aims to provide students:

- with a sound research methodology
- for the in-depth study of particular topics in information technology
- with the experience of undertaking a research-oriented project
- with a basis for postgraduate research or a career in industrial research and development.

Career options

This course prepares graduates for a leading role in industry-relevant

Admission requirements

Applicants must have completed a recognised Australian bachelor's degree in a relevant discipline at an appropriate level.

Students within the Faculty of Engineering and Information Technology at UTS who are eligible to graduate from any undergraduate degree in information technology may apply for the Bachelor of Science (Honours) in Information Technology. The admission requirement is a weighted average mark of 65 per cent or higher, normally with no recorded failures in the core subjects after the first year (full time) or stages 1 and 2 (part time) of the undergraduate degree.

Students from another faculty in the University, or from another university, with qualifications equivalent to the Bachelor of Science in Information Technology (C10148) (see page 193) are considered for entry, subject to approval by the honours program leader, on the basis of their potential to complete the honours degree.

Students can enrol without having organised a supervisor, but must find one by the end of week 2 of their first semester. Students are

strongly advised to find a potential supervisor during their final undergraduate semester (or sometime before the application deadline for external students).

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.0 overall with a writing score of 6.0; or TOEFL: paper based: 500-549 overall with TWE of 4.5, internet based: 60-78 overall with a writing score of 21; or DEEP: C; or PTE: 50-57; or CAE: 52-57

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard fulltime duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

Most students come from an undergraduate program in IT at UTS, so they are familiar with the three basic topic areas in IT: software engineering, data communications and project management.

Course duration and attendance

The honours program is offered over one year of full-time or two years of part-time study.

Course structure

The honours degree consists of research and advanced coursework.

The research component is spread over the entire course. In the first semester (full time), students undertake a research methods subject and review the research literature in their chosen area; in the second semester (full time), students undertake a formal research project in their chosen area.

Part-time students should undertake the project subjects in the second year of the program.

Any UTS: Information Technology master's-level subject may be taken by an IT honours student, subject to prerequisites and availability. If it aligns with their research, IT honours students may take advancedlevel undergraduate electives or electives from other faculties, with the permission of the course coordinator.

Award(s): Bachelor of Science (Honours) in Mathematics (BSc(Hons))

CRICOS code: 017876G

Commonwealth-supported place?: Yes

Load credit points: 48 Course EFTSL: 1 Location: City campus

Overview

The honours course offers basic training in research and introduces students to advanced studies in the mathematical sciences.

Students who complete the honours degree are well prepared to enter the workforce at a high level or to undertake graduate studies.

Admission requirements

Applicants must have completed a recognised Australian bachelor's degree in a relevant discipline at an appropriate level.

Students who are eligible to graduate from the Bachelor of Science (Mathematics major) with an average mark of 65 per cent or more in Year 2 (full time) in their core subjects and chosen major are eligible for entry to the honours degree.

Students who have obtained qualifications equivalent to the Bachelor $\,$ of Science in Mathematics (C09020) (see page 112) degree are, upon application, considered for entry by the head of the School of Mathematical Sciences on the basis of assessed potential to complete the honours degree.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

(BMathFin(Hons)) CRICOS code: 017875J

Commonwealth-supported place?: Yes

Load credit points: 48 Course EFTSL: 1 Location: City campus

Overview

The honours course offers basic training in research and introduces advanced areas of study in mathematics and finance.

Honours degree graduates are particularly sought after and their skills enable them to compete for high entry-level jobs in the banking sector.

Admission requirements

Applicants must have completed a recognised Australian bachelor's degree in a relevant discipline at an appropriate level.

Students who are eligible to graduate from the Bachelor of Mathematics and Finance (C10155) (see page 199) with an average mark of 65 per cent or more over all subjects in Years 2 and 3 (full time) are eligible for entry to the honours degree, subject to the approval of the head of the School of Mathematical Sciences and the head of the School of Finance and Economics.

Students who have obtained qualifications equivalent to the Bachelor of Mathematics and Finance degree are considered for entry, upon application, by the heads of the participating department and school on the basis of their assessed potential to complete the honours degree.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The course is offered on a one-year, full-time basis.

Course structure

The honours course requires completion of subjects comprising 48 credit points, consisting of advanced coursework subjects in mathematics, statistics and finance, together with a substantial project.

The project involves a major investigation of some area of finance and provides students with the opportunity to apply the skills developed in their coursework.

C09022v3 Bachelor of Biotechnology (Honours)

Award(s): Bachelor of Biotechnology (Honours) (BBiotech(Hons))

CRICOS code: 043283F

Commonwealth-supported place?: Yes

Load credit points: 48 Course EFTSL: 1 Location: City campus

Overview

The honours degree offers basic training in research and introduces advanced areas of study in biotechnology.

This course provides students with a unique opportunity to undertake original research and gain in-depth knowledge in a particular field of biotechnology. Honours students have access to staff that are leading researchers and experts in their field. Undertaking an honours course allows students to explore their research potential and develop research skills. Honours also provides a pathway for students interested in pursuing postgraduate studies at masters and PhD level, and enhances graduate's career and study options.

Admission requirements

Applicants must have completed a recognised Australian bachelor's degree in a relevant discipline at an appropriate level.

The honours program is open to students who have attained at least a credit average over the final third of the undergraduate program.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full time duration. Students can extend their courses only in exceptional

Course duration and attendance

The course is offered on a one-year, full-time basis.

Course structure

The major component of the course is a research project that extends over the full duration of the course and normally takes the form of an experimental or analytical investigation, undertaken in the laboratory or the field.

Candidates may also be required to undertake one or more critical reviews of the scientific literature in designated areas and to attend formal classes devoted to advanced coursework.

The results of the project are presented in an oral seminar and in a written thesis, both of which are formally assessed.

Overview

The honours degree offers basic training in research and introduces advanced areas of study in applied chemistry.

This degree in applied chemistry provides students with an opportunity to get involved in a research program in an area that interests them, as well as providing training in research techniques and experience with modern research instrumentation. The honours program adds a new dimension to the skills students have acquired during their undergraduate years and enhances their immediate employment prospects and future career potential. An honours degree can lead into a postgraduate research degree.

Career options

Career options include developer, production manager, researcher, safety officer and sales manager in drug, food, industrial chemical and process industries, metal and alloy, paint and plastic.

Admission requirements

Applicants must have completed a recognised Australian bachelor's degree in a relevant discipline at an appropriate level.

The honours program is open to students who have attained at least a credit average over the final third of the undergraduate program.

Overview

The honours degree is a one-year, full-time program undertaken following the completion of the pass degree. The main component of the course is a research project conducted within one of the UTS research groups, or jointly with an external organisation.

The course prepares students in aspects of planning and executing a research program to address a specific scientific or technological problem. In addition, two coursework subjects provide detailed knowledge in several areas of contemporary significance in physics and nanotechnology.

Admission requirements

Applicants must have completed a recognised Australian bachelor's degree in a relevant discipline at an appropriate level.

The honours program is open to students who have attained at least a credit average over the final third of the undergraduate program.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

C09048v2 Bachelor of Design (Honours) in Architecture

Award(s): Bachelor of Design (Honours) in Architecture (BDesign(Hons))

CRICOS code: 044180E

Commonwealth-supported place?: Yes

Load credit points: 48 Course EFTSL: 1 Location: City campus

Overview

The Bachelor of Design (Honours) in Architecture offers graduates of the Bachelor of Design in Architecture (C10004) (see page 125) the opportunity to pursue advanced work in subject areas related to architecture and prepares them for postgraduate research.

This course allows students to work at a higher level of academic study. It also allows study in a relevant area of student interest.

Career options

Career options include architect (after completion of the Master of Architecture), urban designer, landscape architect, administrator, policy maker, researcher, educator, or journalist.

Admission requirements

Applicants must have completed a recognised Australian bachelor's degree in a relevant discipline at an appropriate level.

An appropriate first degree can include the UTS Bachelor of Design in Architecture (C10004) (see page 125). The following requirements also apply:

- applicants must have a credit average or better at level 2 of the Bachelor of Design in Architecture (or equivalent from another university)
- the feasibility of the proposed project must be demonstrated by a two-three page description of the thesis proposed including an account of the methods to be employed in completing the project
- applicants must be able to demonstrate an understanding of what is involved in undertaking the research for the project in the proposed area of study
- the availability of staff for supervision as indicated in a signed statement by a potential supervisor.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The course is offered full time only, over two semesters. The maximum time taken to complete the course is three semesters.

Course structure

Students complete 48 credit points, comprising one 12-credit-point coursework subject, one 12-credit-point preparatory honours thesis subject and one 24-credit-point honours thesis.

Students must complete a coursework subject, conducted in the first half of first semester, devoted to research methods, information retrieval skills and the initial development of their thesis proposal. Students then spend the remainder of the first semester and the whole of second semester producing, under the direction of a specific supervisor, a thesis relevant to their academic, professional and/or creative agenda. The thesis is based on their original work informed by theoretical study and independent research.

The final level of honours achieved is determined by a weighted calculation of the three components of the honours course:

- pass in subject Research Methods (required for obtaining any level of honours)
- honours thesis preparatory mark (35 per cent)
- honours thesis mark (65 per cent).

The level of honours degree awarded is dependent on the student's final percentage mark for the course:

- honours first class (85-100 per cent)
- honours second class (division 1) (75-84 per cent)
- honours second class (division 2) (65-74 per cent)
- honours third class (50-64 per cent)
- fail (less than 50 per cent).

C09050v1 Bachelor of Forensic Science (Honours) in Applied Chemistry

Award(s): Bachelor of Forensic Science (Honours) in Applied Chemistry (BForSc(Hons))

CRICOS code: 061247E

Commonwealth-supported place?: Yes

Load credit points: 48 Course EFTSL: 1 Location: City campus

Overview

In this honours course, students gain direct training in the skills required for undertaking research in forensic science as well as further developing their investigative and communication skills in the forensic science context.

The course offers the opportunity for students to undertake a research project within one of the research groups at UTS or collaboratively with an external organisation.

Course aims

This course aims to produce professional forensic scientists and chemists with highly adaptable and practical scientific skills and to develop critical thinking, communication and research skills.

Career options

Career options include positions in the police service or other government forensic services, in drug detection, environmental chemistry, private investigation, and state and federal law enforcement agencies.

Admission requirements

Applicants must have completed a recognised Australian bachelor's degree in a relevant discipline at an appropriate level.

The honours program is open to students who have attained at least a credit average over the final third of the undergraduate program in the Bachelor of Forensic Science in Applied Chemistry (C10244) (see page 251) or other appropriate science degrees.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The course is offered on a one-year, full-time basis.

Course structure

The course comprises 48 credit points of study, consisting of two academic stages. The major component of the course (75 per cent) is a research project that extends over the full duration of the course and normally takes the form of an experimental investigation. The project is undertaken within one of the research groups at UTS in an area of forensic science. Projects may also be undertaken in collaboration with an external partner. Projects are chosen by the student, although first preferences cannot always be accommodated. As part of the project, students undertake a critical review of the existing literature in their research area and develop a research plan for the year. The results of the project are presented in an oral seminar and in a written thesis, both of which are formally assessed. The remaining 25 per cent is coursework.

C09051v1 Bachelor of Midwifery (Honours)

Award(s): Bachelor of Midwifery (Honours) (BMid(Hons))

Commonwealth-supported place?: Yes

Load credit points: 48 Course EFTSL: 1 Location: City campus

Note(s)

This course is not offered to international students.

Overview

This course provides the opportunity for eligible graduates of the Bachelor of Midwifery (C10225) (see page 230) to extend their skills and understanding of the research process. It emphasises the reciprocal relationship between nursing research and the contexts of midwifery practice.

This course provides Bachelor of Midwifery graduates with the opportunity to develop training in clinically focused research. The course deepens students' understanding of the importance of research in midwifery

Course aims

The purpose of the course is to enable graduate midwives to conduct research relevant to midwifery in any of its dimensions. It aims to develop students' skills in using research designs and methodologies, and to reinforce their understanding of the crucial role of research in the evolution of the discipline of midwifery. Students also develop academic writing skills to produce a dissertation.

Career options

Career options that graduates may undertake include registered midwife in a clinical specialty supported by their research project work, such as antenatal care, or prepare for roles such as midwife educator or manager. However, graduates are also well-prepared to undertake postgraduate research degrees or begin a career as a researcher.

Admission requirements

Applicants must have completed a recognised Australian bachelor's degree in a relevant discipline at an appropriate level.

All applicants must be eligible to graduate from the UTS Bachelor of Midwifery or another tertiary institution at the time of application (followed by successful completion). Applicants must be registered as a midwife in their country of citizenship or residence at the time of enrolment (in exceptional circumstances, exemptions to this rule may be sought from the Bachelor (Honours) Selection Committee).

All applicants must have completed at least one research subject (as approved by the Bachelor (Honours) Selection Committee) with a credit grade and have a weighted average mark or grade point average of credit or higher for their bachelor's degree. Applicants are admitted to the honours course only if appropriately qualified academic members of UTS: Health are available for supervision of the dissertation component.

The English proficiency requirement for local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Course duration and attendance

The course may be completed in one year of full-time or two years of part-time study.

Course structure

The course comprises a total of 48 credit points. Students complete two 6-credit-point subjects and a 36-credit-point thesis.

C09052v1 Bachelor of Design (Honours) in Photography and Situated Media

Award(s): Bachelor of Design (Honours) in Photography and Situated

Media (BDesign(Hons))

CRICOS code: 068111J

Commonwealth-supported place?: Yes

Load credit points: 48

Course EFTSL: 1

Location: City campus

Note(s)

This course has its first intake of students in 2013.

Overview

The Bachelor of Design in Photography and Situated Media (C10265) (see page 280) explores both traditional photographic practice and more contemporary uses for urban media, such as exhibitions and installations. The degree has a strong emphasis on the relationship between digital photography and its purpose in an environmental situation, focusing on city and urban issues of media placement.

This course not only recognises the technological change brought about by digital advances in photography, but responds to actual and potential directions in which technological change impacts upon photography, the production of imagery and their applications in the real and virtual worlds.

Accordingly, the course balances practical skills with theoretical underpinnings, ethics and creative speculation. All studio subjects are giving students the capacity to handle the expectations of professional life.

The honours year allows research exploration through an independent project.

Course aims

This degree equips graduates with the ability to engage in the broad scope of photographic careers. Students graduate with skills of self-reflection in their practice, critical engagement with and responses to social and cultural issues, and a broad understanding of research practices. Students also gain an understanding of new technologies for image and sound production, and new ways of approaching media in the environment.

Career options

Career options include employment or self-employment in traditional commercial photography, exhibition media, photographic lighting, photographic technical and digital workflow practice, photojournalism, installation and interactive media and advertising.

Admission requirements

Applicants must have completed a recognised Australian bachelor's degree in a relevant discipline at an appropriate level.

Applicants require a weighted average mark of 70 across the three years of the Bachelor of Design in Photography and Situated Media (C10265) (see page 280).

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The course is offered on a one-year, full-time basis.

Course structure

This course totals 48 credit points made up of four 12-credit-point subjects.

C09055v1 Bachelor of Design (Honours) in Interior and Spatial Design

Award(s): Bachelor of Design (Honours) in Interior and Spatial Design (BDesign(Hons))

CRICOS code: 071630D

Commonwealth-supported place?: Yes

Load credit points: 48 Course EFTSL: 1

Overview

With a strong emphasis on creativity and technology, the Bachelor of Design (Honours) in Interior and Spatial Design is the first university program of its kind in Australia. While interior design is an established profession, spatial design encompasses a range of connected practices that engage directly and creatively with space, from designing an exhibition to art directing a performance. This honours course allows students to critically research and develop an interior and spatial design project.

The course enhances employability through the development of a portfolio. This course allows students to develop skills in a specialised area, such as performative space, commercial interiors or residential interiors design.

Uniquely, this course emphasises digital technologies of representation and fabrication, internationalisation and design practice.

Course aims

This course uses project-based learning to allow students to develop a focused portfolio. Through their study, students develop spatial intelligence and excellence in design practice. The program fosters a creative and explorative attitude toward the design process, underpinned by a reflective and critical engagement. In doing so, students generate a cohesive design approach where research and practice are consolidated in design outcomes.

The course cultivates a collaborative and global vision of design through a variety of interdisciplinary subjects, industry projects and international studios. Students develop the flexibility and confidence to work in the divergent and novel environments of contemporary practice.

The course has

- an emphasis on creative, innovative spatial practice and international networks
- practice-oriented and research-integrated learning regarding specific projects
- engagement with innovative and creative technologies
- an emphasis on emerging design practices
- close links with creative practitioners.

Students are expected to develop an understanding of their individual design language and theoretical position in relation to historic and contemporary contexts.

Career options

Career options include commercial and residential interior design, interactive and responsive environment design, museum and exhibition design, production design for film and television, theatre and performance design, and visual and spatial branding.

Admission requirements

Applicants must have completed a recognised Australian bachelor's degree in a relevant discipline at an appropriate level.

Applicants require a weighted average mark of 72.5 across the three years of the Bachelor of Design in Interior and Spatial Design (C10271) (see page 284).

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian

student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The course is offered on a one-year, full-time basis. There are generally up to 15 contact hours a week. Lectures and studios are on campus during semester. Semesters are focused on design studios that incorporate advanced communication and technology skills with innovative design thinking and practice.

Course structure

Students must complete 48 credit points of honours subjects.

C09056v1 Bachelor of Design (Honours) in Animation

Award(s): Bachelor of Design (Honours) in Animation (BDesign(Hons)) CRICOS code: 074705K

Commonwealth-supported place?: Yes

Load credit points: 48

Course EFTSL: 1

Overview

This course offers a practice-based approach to learning animation and places strong emphasis on two key concepts: dramatisation (including performance and character) and VFX (visual effects) design. It teaches students how to conceptualise, visualise and realise animation across many different types of media. Central to the course is the development of conceptual understanding of performance, narrative, characterisation, form, motion, time, space and aesthetics.

This course has a strong emphasis on drawing and image-making, dramatisation, physical movement and expression, teaching a full range of animation techniques and skills in industry-standard facilities.

Through a variety of interdisciplinary subjects, industry-focused projects and international studios, students develop the flexibility and confidence to work in the diverse environments of contemporary practice.

The course focuses on a set of animation studios that concentrate student learning through design projects. The animation studios integrate practice-oriented learning that allows time for a high level of individual presentation and in-depth consultation, complemented by a series of related context subjects that spans drawing and 2D animation practices to 3D and 2D digital practices.

The honours year allows exploration through the completion of an independent animated film/project.

Course aims

The course gives students skills and an outlook that extends beyond the university, and cultivates a collaborative and global vision of design. As part of the ongoing development of key industry innovators, the course aims to create new approaches to 2D and 3D animation and VFX design, enabling graduates to better develop, adapt and respond to a range of creative partnerships and collaborations.

Students develop an understanding of their individual design language and theoretical position in relation to historic and contemporary contexts.

Career options

The course opens up animation careers in film, television, and online and mobile application design. Options include: director, producer, storyboard artist, previsualisation (previs) artist, layout artist, concept artist, production designer, art director, character

designer, animator, modeller, rigger, motion capture designer, lighting designer, matchmover/3D tracker, effects (FX) animator, roto designer, compositor, stop frame model animator (claymation), and animation scriptwriter.

Admission requirements

Applicants must have completed a recognised Australian bachelor's degree in a relevant discipline at an appropriate level.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 7.0 overall with a writing score of 7.0; or TOEFL: paper based: 584-609 overall with TWE of 5.0, internet based: 94-101 overall with a writing score of 23; or DEEP: B+; or PTE: 65-72; or CAE: 67-73

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

Load credit points: 48

Course EFTSL: 1

Location: Kuring-gai campus

Overview

The honours program is designed to provide students with the resources to further develop and apply their research skills and to pursue special areas of interest in depth.

Course aims

The honours program aims to develop, at an advanced undergraduate level, knowledge of human movement through research; facilitate the completion of a substantive research thesis which focuses on theory, applied/professional issues or some combination of these; provide a direct pathway to graduate-level study; and make contributions to knowledge in the field of human movement.

Career options

Career options include exercise therapy and teaching of personal development, facility management, fitness and corporate health, health, physical education and outdoor education, health promotion, sports coaching, sports development, sports management, sports science and team conditioning.

Admission requirements

Applicants must have completed a recognised Australian bachelor's degree in a relevant discipline at an appropriate level.

Applicants should have successfully completed the Bachelor of Human Movement (C10300) (see page 288), with a credit average or better in the final two full-time semesters.

Graduates from other institutions who have completed a comparable course and who meet the academic criteria are also considered for admission. In exceptional cases, consideration is given to applicants who have completed the Bachelor of Management in Leisure and Events (C10039) (see page 135), the Bachelor of Management in Sport and Exercise (C10301) (see page 289), the Bachelor of Management in Tourism (C10040) (see page 136) or the Bachelor of Human Movement (C10300) (see page 288) at pass level. In such cases, outstanding professional achievements are taken into account.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The honours component is normally completed in one year of full-time or two years of part-time study. It is offered only at Kuring-gai campus.

Course structure

All students must complete three coursework subjects, each worth 6 credit points, and a major thesis of 30 credit points, totalling 48 credit points. The precise nature of each student's program is determined in consultation with the honours course coordinator, with the aim of choosing those subjects that will facilitate completion of the honours research thesis.

In choosing electives, students may:

- substitute subject Readings for Thesis with an elective subject with the approval of the course coordinator
- complete both elective subjects in the first semester
- choose other senior undergraduate-level subjects with the approval of the course coordinator; these subjects may be taken from within UTS: Health or elsewhere in the University.

(BDesign(Hons))

CRICOS code: 077332K

Commonwealth-supported place?: Yes

Load credit points: 48 Course EFTSL: 1 Location: City campus

Note(s)

The first intake for this course will be in 2016.

Overview

Integrated product design expands on the traditional field of industrial design to reflect the changed realities of the globalised design profession. The course offers a practice-based approach to learning through the integration of digital and analogue technologies across the broad field of integrated product design, as well as the potential for specialisation within highly contemporary and innovative integrated product design practices.

Structured around design studios, this dynamic course allows the development and realisation of major projects, as a professional design outcome. With a strong emphasis on creativity and technology, graduates move seamlessly from the design of material objects to the design of associated services together with the skills to maintain a specialist role within an interdisciplinary team.

Course aims

The Bachelor of Design in Integrated Product Design (Honours) centres on the integration of research and high-level design project engagement. This provides students with an opportunity to be challenged by high-level engagement with design, research and practice. Honours projects are managed by structuring technology-driven, practice-orientated and research-integrated learning.

Students explore design issues, learn and implement new strategies and combine theory and practice in the context of a rapidly changing technological and social environment. They are encouraged to develop intellectual independence and a research-driven methodology to product development that explores the boundaries of their profession.

Career options

Career options include corporate or in-house designer, design consultant, production manager, industrial designer, interaction designer, designer of smart objects, interactive product designer, system designer, furniture, product or accessories designer, design communication professional, design researcher, commercialisation professional.

Admission requirements

Applicants must have completed a recognised Australian bachelor's degree in a relevant discipline at an appropriate level.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Note(s

The first intake for this course will be in 2016.

Overview

The Bachelor of Design in Fashion and Textiles has been designed to enable students to create pathways of learning as they progress through the degree with a flexible and diverse approach to learning. Emphasis throughout this practice-based course is placed on value, innovation, creativity and responsible practice. Students should develop flexibility and confidence in working in and across the diverse environments that constitute contemporary practice.

The course centres around design studios which integrate practiceorientated learning around specific projects, and parallel the process that professionals undertake in industry. The Honours year allows the development and realisation of major projects, as a professional design outcome.

123

Course aims

The course aims to produce graduates who aspire to the highest level of practice and are capable of adapting to the changing nature of the industry and research by developing creative solutions within the context of rapidly changing global fashion.

The course is designed to provide students with an outlook and ambition that extends beyond the university, cultivating a collaborative and global vision of design. The driving force of this course is critical and reflective design practice. It advances critical research skills and challenge students to question, analyse and redefine existing methodologies in fashion and textile practice.

Career options

Career options include buyer, fashion editor, fashion or textile designer, illustrator or stylist. Some students start their own business, while others work within an established company. Graduates may also continue studies at postgraduate level.

Admission requirements

Applicants must have completed a recognised Australian bachelor's degree in a relevant discipline at an appropriate level.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Overview

The Bachelor of Design in Visual Communication (Honours) offers a practice-based approach to learning visual communication. Throughout the course, the creation of new design solutions is driven by rigorous and critical exploration of methods, materiality and technology, and understanding the influence of globalisation, digitisation, complexity and interactivity.

The course allows students to develop and realise major design projects, paralleling the process that professionals undertake in industry. It allows students to consolidate an understanding of their own individual design language and gives them advanced levels of analysis, self-direction, motivation and self-management.

Course aims

The Bachelor of Design in Visual Communication (Honours) centres on the integration of research and high-level design project engagement. This provides students with an opportunity to be challenged by high-level engagement with design, research and practice. Honours' projects are managed by structuring technology-driven, practice-orientated and research-integrated learning.

Students explore design issues, learn and implement new strategies and combine theory and practice in the context of a rapidly changing technological and social environment.

Career options

Career options include design roles in graphic design, publishing, advertising, animation, film, television, exhibitions, government agencies, not-for-profit and corporate sectors.

UAC code: 602010

CRICOS code: 044179J

Commonwealth-supported place?: Yes

Load credit points: 144 Course EFTSL: 3 Location: City campus

Note(s)

The Bachelor of Design in Architecture by itself does not lead to professional recognition as an architect. To become a professional architect, students must complete this degree followed by the Master of Architecture (C04235) (see page 353) (an additional two years of full-time study or equivalent).

Overview

The Bachelor of Design in Architecture is the first of two degrees needed to become an architect. Students wishing to qualify for professional recognition as architects must also complete the Master of Architecture (C04235) (see page 353). UTS architecture courses provide the skills and knowledge necessary to practise in the architectural profession and to be a future leader in the design of the built environment.

The Bachelor of Design in Architecture provides students with a rich education oriented towards international practice and design experimentation. Teaching is hands-on and undertaken in teams using the most innovative digital design and fabrication technologies available to the architectural profession in dedicated studios and workshops.

UTS students have the benefit of learning from a cohesive team who are passionate about architecture and engage with the discipline as practitioners, researchers, educators and critics.

The first year is undertaken full time, but in subsequent years students can enrol part time, making it possible to gain significant professional experience before graduation.

Course aims

This degree provides a liberal introduction to the study of architecture as a discipline. Students gain a critical and ethical awareness of architecture as a discipline with much to offer in the face of many of today's most pressing societal challenges. It equips students to join other design fields or related disciplines, and it prepares students for the Master of Architecture degree.

Career options

Career options include architect (after completion of the Master of Architecture), urban designer, landscape architect, administrator, policy maker, researcher, educator, or journalist.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

UTS: Design, Architecture and Building may consider applications based on the results of the Special Tertiary Admissions Test (STAT) if students lack academic qualifications but have extensive professional experience. The STAT is conducted through the $\hat{\text{Universities}}$ Admissions Centre.

 $The \, English \, proficiency \, requirement \, for \, international \, students \, or \, local \,$ applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard fulltime duration. Students can extend their courses only in exceptional

Assumed knowledge

Mathematics and any two units of English.

Design and technology; visual arts; history and physics are recommended.

Course duration and attendance

The course duration is three years of full-time study (or equivalent). Year 1 is recommended to be taken in full-time mode.

Course structure

The course comprises a total of 144 credit points. The normal fulltime load is four 6-credit-point subjects a semester, totalling 48 credit points a year for three years.

Year 1 comprises four compulsory 6-credit-point subjects a semester. Years 2 and 3 comprise one 6-credit-point elective and three compulsory subjects a semester.

C10007v8 Bachelor of Property Economics

Award(s): Bachelor of Property Economics (BPropEc)

UAC code: 602033 CRICOS code: 000372E

Commonwealth-supported place?: Yes

Load credit points: 168 Course EFTSL: 3.5 Location: City campus

Overview

The Bachelor of Property Economics is a functional and practical degree that prepares graduates for careers in real estate, valuation, funds and asset management, and property development. It produces highly skilled property professionals able to enter the workforce with a qualification fully recognised and sought after by employers and professional and industry bodies.

Graduates are renowned among employers for their hands-on and diverse knowledge and professional skills. UTS: Design, Architecture and Building provides a flexible property education that gives students the opportunity to work in the industry, leading to a large majority of students already working in the property sector by their final year of study.

During the course, students have the opportunity to complete practical assignments, apply for property cadetships and employment, network with property professionals, and undertake international exchange programs in a highly stimulating learning environment.

Staff include industry-recognised experts in property-related areas such as the commercial property sector, property taxation, finance, valuation, urban planning and international real estate.

Course aims

The course equips graduates with an understanding of the legalities, principles and processes required to fill a professional role in this field, and an appreciation of a professional ethic that emphasises responsibility and responsiveness to community needs.

Career options

Career options include positions in corporate real estate, property analysis, property and asset management, property development, property finance, property research, property sales and acquisitions, real estate agency (sales/leasing), tenant advisory services and valuation

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

UTS: Design, Architecture and Building may consider applications based on the results of the Special Tertiary Admissions Test (STAT) if students lack academic qualifications but have extensive professional experience. The STAT is conducted through the Universities Admissions Centre.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

Mathematics and any two units of English.

Credit recognition

Students with prior academic or industrial experience are considered for credit recognition and may be given the opportunity to tailor their program of study in line with subjects completed previously at other institutions.

Course duration and attendance

The course is offered on a three-and-a-half-year, full-time or equivalent part-time basis.

Course structure

The course comprises a total of 168 credit points.

Course completion requirements

CBK90242 Sub-major/Electives (DAB)	24cp

The course equips students with an understanding of the legalities, principles and processes required to fill a professional role in this field and an appreciation of a professional ethic that emphasises responsibility and responsiveness to community needs. It also develops perspectives and understandings that enable graduates to meet the demands of an internationalised professional environment.

Career options

Career options include asset and portfolio manager, auctioneer, business agent, consultant, land economist, property analyst, property developer, property manager, real estate agent, researcher, stock and station agent, strata manager and valuer.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

Admission to the combined degree is on merit according to the admissions policy for the Bachelor of Property Economics (C10007) (see page 126).

There is a range of entry levels to the various language and culture programs. Students are admitted to the international studies program with no guarantee of entry to a specific major, although every effort is made to meet students' preferences.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard fulltime duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

 $There \, are \, no \, prior \, language \, requirements \, for \, the \, international \, studies \,$ program (see page 87).

Credit recognition

Students with prior academic or industrial experience are considered for credit recognition, and may be given the opportunity to tailor their program of study in line with subjects completed previously at other institutions. Contact a UTS Student Centre for further information.

Course duration and attendance

The combined program is offered on a six-year, full-time basis. Students spend two semesters of study at a university or other higher education institution in the country of their major.

Course structure

Students are required to complete 264 credit points of study, comprising 168 credit points in property economics and 96 credit points in international studies.

The Bachelor of Arts in International Studies requires undergraduates to study a region or country major over a minimum of three years. The Bachelor of Arts in International Studies is not offered as a separate degree, but is completed only in combination with the professional degree program.

Overview

The Bachelor of Property Economics is a functional and practical degree that prepares graduates for careers in real estate, valuation, funds and asset management, and property development. It produces highly skilled property professionals able to enter the workforce with a qualification fully recognised and sought after by employers, professional and industry bodies. The combined degree program in property economics and international studies provides students specialising in property economics with additional practical skills by providing the opportunity to acquire knowledge and understanding of a language and culture other than English.

Graduates are renowned among employers for their hands-on and diverse knowledge and professional skills. UTS: Design, Architecture

Overseas study

Students spend their fourth year of study at a university overseas.

Industrial training/professional practice

In addition to attending classes, students are required to gain practical experience in appropriate professional or industrial organisations. Full-time students undertake practical studies as part of the program included in core subjects. They are also required to gain approved professional experience in the final two full-time years of their programs. Part-time students are required to enrol each year, except Year 1, in the professional/industrial experience subject and to supply details of the experience gained.

C10019v3 Bachelor of Arts in Adult Education and Community Management

Award(s): Bachelor of Arts in Adult Education and Community

Management (BA)

Commonwealth-supported place?: Yes

Load credit points: 144 Course EFTSL: 3 Location: City campus

Note(s)

This course is only offered to Aboriginal and Torres Strait Islander people.

This course is not offered in 2013.

This course is not offered to international students.

Overview

The Bachelor of Arts in Adult Education and Community Management addresses the professional development needs of Indigenous people who are directly involved with community management and development activities.

The integration of work-based learning and formal higher education, which is central to the curriculum of this course, requires students to apply theory to practice and reflect on this process in the context of their communities and community-managed organisations. The support services of Indigenous academic and administrative staff combined with the regular participation of Indigenous visiting lecturers provide a depth of support for the learning of Aboriginal and Torres Strait Islander students unequalled in any other Australian university.

Course aims

The course aims to provide an understanding of the context of community non-profit organisations and the theoretical frameworks underpinning the roles of these organisations in the political and economic environment. Key concepts are introduced and students are assisted in situating their organisations and interests within the wider environments in which they operate.

Career options

Career options include management of a range of non-profit or community-based organisations and community education programs.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

This course is only offered to Aboriginal and Torres Strait Islander people. Course entry is not based on ATAR.

The English proficiency requirement for local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Applications

Universities Admissions Centre entry is not available. Students should apply directly to UTS.

External articulation

Students who have completed the TAFE Advanced Certificate in Community Management in the three years prior to entry to this course are eligible to apply for a block exemption that includes up to three subjects. Students should provide a TAFE statement of attainment attached to an application for exemption form.

Course duration and attendance

The course is completed in three years of full-time or six years of part-time study. Subjects are run in intensive block release format, requiring students to attend university for two or three five-day blocks per semester. Between blocks, students work independently and in small study groups utilising flexible learning strategies to learn in ways appropriate to individual needs.

Course structure

The course comprises 144 credit points of study.

The course has been designed in two stages:

- Stage 1 comprises the first 96 credit points of the course. This includes 30 credit points in adult education, 30 credit points in community management and 36 credit points in Aboriginal
- Stage 2 comprises 12 credit points in Aboriginal studies and 36 credit points in either adult education or community management in any combination.

6ср

The course is also available at Kuring-gai campus (see C10021) (see page 131).

Overview

The Bachelor of Business Bachelor of Arts in International Studies is offered jointly by UTS: Business and UTS: International Studies. The degree integrates the study of business with a major in the language and culture of another country.

Career options

Career options include positions in any branch of business or commerce as well as management of private and public sector enterprises ranging from start-ups to large multinational enterprises. Career options are enhanced by international experience, making students more marketable to prospective employers.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

Admission to the combined degree is on merit according to the admissions policy for the Bachelor of Business at City campus (C10026) (see page 131) or the Bachelor of Business at Kuring-gai campus (C10027) (see page 133). There is a range of entry levels to the various language and culture programs. Students are admitted to the international studies program with no guarantee of entry to a specific major, although every effort is made to meet students' preferences.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

There are no prior language requirements for the international studies program (see page 87).

Credit recognition

Information on credit recognition in the business component is available from the Bachelor of Business (C10026) (see page 131).

Course duration and attendance

The course is offered as a full-time program over five years. Students spend two semesters of study at a university or other higher education institution in the country of their major.

Course structure

All students must complete 240 credit points of study, comprising 144 credit points relating to business and 96 credit points relating to international studies. Full details of the Bachelor of Business component of the combined degree are available from the Bachelor of Business (C10026) (see page 131). The Bachelor of Arts in International Studies requires undergraduates to study a region or country major over a minimum of three years. The Bachelor of Arts in International Studies is not offered as a separate degree, but is completed only in combination with the professional degree program.

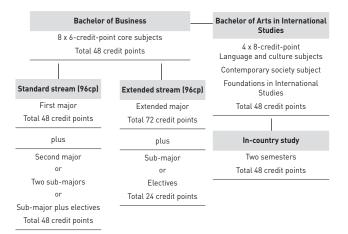

Overseas study

Students spend their fourth year of study at a university overseas.

C10021v4 Bachelor of Business Bachelor of Arts in International Studies

Award(s): Bachelor of Business (BBus)
Bachelor of Arts in International Studies (BA)

CRICOS code: 026187C

Commonwealth-supported place?: Yes

Load credit points: 240 Course EFTSL: 5

Location: Kuring-gai campus

Note(s)

The course is also available at City campus (see C10020) (see page 129).

Overview

The Bachelor of Business Bachelor of Arts in International Studies is offered jointly by UTS: Business and UTS: International Studies. The degree integrates the study of business with a major in the language and culture of another country.

Career options

Career options include positions in any branch of business or commerce as well as management of private and public sector enterprises ranging from start-ups to large multinational enterprises. Career options are enhanced by international experience, making students more marketable to prospective employers.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

Admission to the combined degree is on merit according to the admissions policy for the Bachelor of Business at City campus (C10026) (see page 131) or the Bachelor of Business at Kuring-gai campus (C10027) (see page 133). There is a range of entry levels to the various language and culture programs. Students are admitted to the international studies program with no guarantee of entry to a specific major, although every effort is made to meet students' preferences.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

There are no prior language requirements for the international studies program (see page 87).

Credit recognition

Information on credit recognition in the business component is available from the Bachelor of Business (C10027) (see page 133).

Course duration and attendance

The course is offered as a full-time program over five years. Students spend two semesters of study at a university or other higher education institution in the country of their major. The international studies component of the course is mainly offered at City campus.

Course structure

All students must complete 240 credit points of study, comprising 144 credit points relating to business and 96 credit points relating to international studies. Full details of the Bachelor of Business component of the combined degree are available from the Bachelor of Business (C10027) (see page 133). The Bachelor of Arts in International Studies requires undergraduates to study a region or country major over a minimum of three years. The Bachelor of Arts in International

Studies is not offered as a separate degree, but is completed only in combination with the professional degree program.

Overseas study

Students spend their fourth year of study at a university overseas.

Award(s): Bachelor of Business (BBus) UAC code: 601030 (FT), 601035 (PT)

CRICOS code: 006487A

Commonwealth-supported place?: Yes

Load credit points: 144 Course EFTSL: 3 Location: City campus

Note(s)

This is the City campus version of the Bachelor of Business. It is also available at Kuring-gai campus (see C10027) (see page 133).

Overview

The Bachelor of Business offers students a sound background in all areas of business through common core subjects, in addition to indepth knowledge in one or more chosen areas of interest.

This course provides an understanding of important aspects of business and offers a wide choice of majors and sub-majors. Students are encouraged to add a specialisation to their broad general training.

Course aims

The degree seeks to provide students with the knowledge, competencies and values necessary to develop critical, analytical and evaluative skills essential for a fulfilling and effective career in business.

Career options

Career options include accounting, banking, economics, finance, financial services, human resource management, international business, management, marketing, marketing communication, sport or tourism management.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

Mathematics and any two units of English. Bridging courses are available.

External articulation

- TAFE NSW: UTS has an articulated credit transfer policy with TAFE NSW. Block credit may be granted for a number of completed TAFE courses. To be eligible for credit, students must have completed their course at a minimum Diploma (AQF) or higher. These courses must have been completed no earlier than two years prior to their commencement in the relevant course at UTS, i.e. students commencing in 2012 must have completed their TAFE courses in 2010 or later.
- INSEARCH: Students who have completed appropriate courses through INSEARCH, if admitted, will be given up to one year's credit recognition in the Bachelor of Business.

Credit recognition

Students who are enrolled in the Bachelor of Business and have previously studied at another university or other recognised tertiary educational institution may be eligible for credit recognition if the subjects previously studied are deemed by UTS: Business to be equivalent to those specified for their course.

Students who have completed subjects at a recognised university may be granted exemptions for particular subjects at UTS or unspecified electives that are credit points granted without nominating a particular subject equivalent. To be considered for credit recognition, subjects must have been completed no more than 10 years prior to the commencement of the Bachelor of Business course. Undergraduate students who have been identified as having studied at another university prior to the commencement of their studies at UTS normally receive information on applying for credit recognition at approximately the same time as they receive their offer of a place at UTS.

Students who have completed a course at a private college are not eligible for any exemptions unless an articulation agreement between UTS: Business and the college is in place.

Course duration and attendance

The course can be completed in a minimum of three years of full-time or six years of part-time study.

The course may be completed through either a full-time or part-time attendance pattern, or a combination of these.

Full-time study is usually undertaken at the rate of 24 credit points a semester. Students who wish to undertake more than the normal full-time load in one semester must have their study plan endorsed by a student adviser from a UTS Student Centre.

Part-time study is usually undertaken at the rate of 12 credit points a semester. Part-time students must be prepared to attend one afternoon or morning class during each teaching week.

Some subjects may be offered in an optional Summer session so that students may fast-track their studies.

Course structure

Students must complete 144 credit points, comprising eight foundation core subjects (48 credit points), and a standard stream (96 credit points) or an extended major stream (96 credit points). The standard stream comprises a first major (48 credit points), and either a second major (48 credit points), or two sub-majors (24 credit points each), or a single sub-major (24 credit points) in conjunction with elective subjects (24 credit points). The extended major stream comprises an extended major (72 credit points), and a sub-major (24 credit points) or elective subjects (24 credit points).

Students can choose any one of the following as a first major: Accounting, Economics, Finance, Human Resource Management, International Business, Management, Marketing, Financial Services or Marketing Communication.

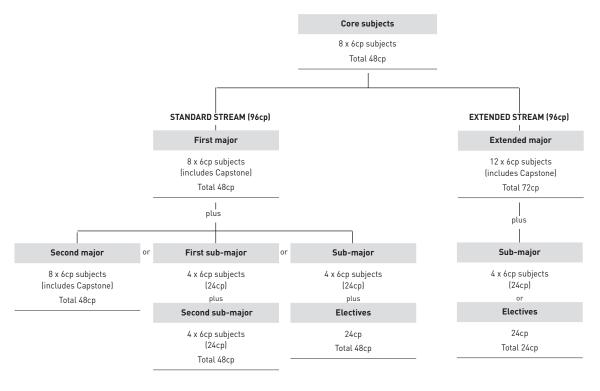

The choice of second major includes those listed above as well as Business Law, Information Technology, Sport Management or Tourism Management.

Electives or structured elective sequences (totalling 24 credit points) can be taken from any faculty in the University, or from another university or its equivalent, with UTS: Business approval.

C10039v10 Bachelor of Management in Events and Leisure

Award(s): Bachelor of Management in Events and Leisure (BM)

UAC code: 601065 CRICOS code: 008759K

Commonwealth-supported place?: Yes

Load credit points: 144 Course EFTSL: 3

Location: Kuring-gai campus

Overview

The Bachelor of Management in Events and Leisure provides students with the knowledge and professional skills necessary to operate within the events and leisure industry.

This course provides students with a broad understanding of leisure behaviour and the event and experience industries that enrich the lives of individuals, organisations and Australian communities. It examines in some depth the ways in which sporting, recreational, touristic, entertainment and arts events are produced and used in the commercial, public and not-for-profit sectors to satisfy the community's need for economic development, social interaction and as important fund raising functions for causes and charities. The degree provides the skills to design, plan, create, implement, manage and market events from community events such as sports and public celebrations, to major and mega events such as the Olympic Games. These technical skills are set within contemporary management practice that includes sustainability, ethics, entrepreneurship, strategic management, consultancy and research.

The degree develops the student's capabilities as a manager, to work independently and in team environments, supported by strong critical, analytical, written, verbal and interpersonal skills.

Course aims

Graduates of this program develop theoretical knowledge and skills relevant to the organisation, research, planning, administration, marketing and equitable distribution of event and leisure services.

Career options

Career options include event coordinator / manager, meetings planner, entertainment, venue or facility manager, festival organiser, leisure and recreation planner, marketing manager for arts, leisure and events organisations, sponsor manager.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

Non-current school leavers should submit a personal statement to UTS by $30\ \mathrm{November}.$

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

Any two units of English.

Credit recognition

Students may apply for credit recognition in subjects in which they consider themselves eligible. Equivalence of subject matter is the main criterion for credit recognition in a subject successfully completed at another institution.

Course duration and attendance

The course is taught on a full-time basis. The normal time for completion is three years.

Full-time students should be aware that they are required to attend evening classes as part of their program of study.

This course is offered at Kuring-gai campus only.

Course structure

All students must complete a total of 144 credit points made up of 24 subjects, comprising 20 core and four elective subjects.

The electives (totalling 24 credit points) are to be chosen from a prescribed list of subjects in events, leisure, sport, tourism or arts management. The four electives chosen from the prescribed list may comprise a Tourism Management or Sport Management sub-major.

With the approval of the undergraduate program director, two of the four electives may be chosen from outside the prescribed list of subjects.

Industrial training/professional practice

The course has an extensive compulsory internship program and a capstone industry-based research project.

UAC code: 601085 CRICOS code: 000383B

Commonwealth-supported place?: Yes

Load credit points: 144 Course EFTSL: 3

Location: Kuring-gai campus

Overview

The Bachelor of Management in Tourism provides students with a strong understanding of the distinctive features of tourism and the tourism industry, with the knowledge and range of skills that provide the flexibility to manage effectively in an environment of significant growth and change. The course also develops students' understanding of tourism as an increasingly important social phenomenon, in order to foster a critical approach to this field of study.

The course takes a broad approach studying the phenomenon of tourism and tourists, the society in which tourism takes place, the relationship of tourism to sustainability and the role of the different tourism industry sectors. The course develops ethical, professional values and skills for working in the various fields of toursim, such as, strategic management, marketing, research and policy.

Career options

Career options include management, marketing and policy-analysis roles in national and regional tourism offices, hotels, airlines, tour operations, tourist attractions and events.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

Award(s): Bachelor of Management in Tourism (BM) Bachelor of Arts in International Studies (BA)

UAC code: 609110 CRICOS code: 026190G

Commonwealth-supported place?: Yes

Load credit points: 240 Course EFTSL: 5

Location: Kuring-gai campus

Overview

This degree program develops understanding of tourism as an increasingly important social phenomenon in order to foster a critical approach to this field of study. The course combines a professional degree with immersion in another language and culture, enhancing professional training and career options.

The course is distinctive in six ways: it follows a broad and holistic approach to the study of tourism; it is interdisciplinary, in that it makes use of systems theory to create a framework for subsequent interdisciplinary description, analysis and inquiry; it gives full coverage to all of the tourism sector; it has a practical hands-on component; it has an industry experience component that includes a minimum of 10 weeks' work experience; and it provides the opportunity to live and study in another country.

Course aims

The degree provides students with a strong understanding of the distinctive features of tourism and the tourism industry, with the knowledge and skills to manage effectively in an environment of significant growth and change. This degree integrates tourism management with a major in the language and culture of another country.

Career options

Career options include management, marketing and policy analysis roles in such areas as airlines, hotels, regional planning and development, special events, tour operations and tourist attractions. Career options are enhanced by international experience, making students more marketable to prospective employers.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

Admission to the combined degree is on merit according to the admissions policy for the Bachelor of Management in Tourism (C10040) (see page 136). There is a range of entry levels to the various language and culture programs. Students are admitted to the international studies program with no guarantee of entry to a specific major, although every effort is made to meet students' preferences.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances

Assumed knowledge

There are no prior language requirements for the international studies program (see page 87).

Credit recognition

For credit recognition details, see the Bachelor of Management in Tourism (C10040) (see page 136).

Course duration and attendance

The course is offered as a full-time program over five years. Students may be required to attend some evening classes and undertake a minimum of 10 weeks' industry-related work experience during the course. Students spend two semesters of study at a university or other higher education institution in the country of their major. The international studies component of the course is mainly offered at City campus.

Course structure

Students must complete 240 credit points of study, comprising 144 credit points relating to management in tourism and 96 credit points relating to international studies. For full details of the Bachelor of Management in Tourism component of the combined degree, refer to the Bachelor of Management in Tourism (C10040) (see page 136). The Bachelor of Arts in International Studies requires undergraduates to study a region or country major over a minimum of three years. The Bachelor of Arts in International Studies is not offered as a separate degree, but is completed only in combination with the professional degree program.

Overseas study

Students spend their fourth year of study at a university overseas.

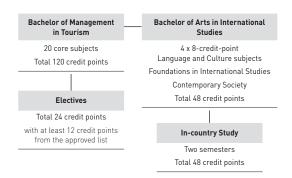

Industrial training/professional practice

This course has a professional internship component that includes a minimum of six weeks' work experience.

UAC code: 609090 CRICOS code: 026189A

Commonwealth-supported place?: Yes

Load credit points: 240 Course EFTSL: 5

Location: Kuring-gai campus

Overview

The Bachelor of Management in Events and Leisure Bachelor of Arts in International Studies is offered jointly by UTS: Business and UTS: International Studies. The degree integrates leisure management with a major in the language and culture of another country.

Course aims

Graduates of this program develop theoretical knowledge and skills relevant to the organisation, research, planning, administration, marketing and equitable distribution of leisure services.

Career options

Career options include activities and cultural events coordinator at a university or college, manager or administrator in leisure, tourism, sports, entertainment or the arts, marketing of sport and leisure, outdoor recreation promotion, and recreation planner/manager in local government. Career options are enhanced by international experience, making students more marketable to prospective employers.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

Admission to the combined degree is on merit according to the admissions policy for the Bachelor of Management in Events and Leisure (C10039) (see page 135). There is a range of entry levels to the various language and culture programs. Students are admitted to the international studies program with no guarantee of entry to a specific major, although every effort is made to meet students' preferences.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Note(s)

6ср

6ср

8ср

6ср

This course is not offered to recent school leavers. Specific prior study conditions apply.

Overview

This course is a pathway program developed in conjunction with TAFE NSW. It explores the collaborative linkages and networks that are an integral part of the tourism industry and which need to be managed so that a hospitality organisation achieves its stated objectives. Strategies to ensure the sustainability of a destination's $tour is m\, product\, and\, marketing/management\, effort\, are\, highlighted.$

The course broadens students' understanding of the hospitality sector's role in tourism. It highlights tourism-related environmental factors that influence and are affected by hospitality operations. The course develops ethical, professional values and skills for working in tourism and hospitality.

Course aims

The UTS component of the course seeks to build on the vocational skills and knowledge acquired by students in the hospitality management courses offered by TAFE NSW.

Career options

Career options include hotel and resort management, research and policy development for government tourism authorities, destination management and marketing, wholesaling and tour operations.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

Applicants must have completed either the Advanced Diploma in Hospitality (Management) from TAFE NSW, or the Advanced Diploma in Hospitality Management and the Advanced Diploma in Tourism Management from Kenvale College of Tourism and Hospitality Management.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Applications

Local students

Commonwealth-supported place applicants are assessed as noncurrent school leaver students through the Universities Admissions Centre.

International students

Overseas full-fee-paying students are admitted through UTS International provided they meet the applicable English language requirements for UTS courses.

Assumed knowledge

Any two units of English.

External articulation

Applicants must have either the Advanced Diploma in Hospitality (Management) from TAFE NSW at credit level or higher, or the Advanced Diploma in Hospitality from Kenvale College at credit level or higher (credit recognition is being reviewed and subject to variation). Successful applicants are granted credit recognition for advanced diploma studies, and must complete 72 credit points to attain the degree.

Course duration and attendance

The course duration is one-and-a-half years of full-time study (following completion of the Advanced Diploma in Hospitality (Management) from TAFE NSW prior to entry) if students commence the course in Autumn semester.

This course is offered at Kuring-gai campus only.

Course structure

Students from the Advanced Diploma in Hospitality (Management) receive a block exemption of 72 credit points for their hospitality studies. Completion of a further 72 credit points (as listed in the course program) leads to the award of the Bachelor of Management in Tourism and Hospitality.

Course completion requirements

Load credit points: 204 Course EFTSL: 4.25 Location: City campus

Overview

This program is a comprehensive preparation for careers in the professional practice of engineering. Students learn to deal with complex systems and manage large-scale projects using the most appropriate emerging technologies.

The course offers an authentic, professionally focused and practice-based education program with two semesters of internship (normally paid) in a real workplace setting. A number of the areas of study are available with explicit specialisations. For example, ICT Engineering is available with sub-majors in Software, Computer Systems and Telecommunications. Civil Engineering is available with specialisations in Structures and Construction. Students can also focus on or broaden their studies by completing electives. By appropriate choice of electives, students can gain knowledge in a second engineering discipline, obtain a sub-major in a different field or study postgraduate degree subjects and apply for credit towards an engineering master's degree.

Course aims

The course aims to equip graduates with the skills and attributes needed for professional practice and leadership. It is based on the themes of academic development, personal development and professional formation. It provides sound foundations in engineering theory, technical expertise and knowledge of professional practice, while also developing academic literacy, advocacy skills and social awareness so that graduates become lifelong learners and effective citizens in many different capacities. The concept has been strongly endorsed in wide-ranging industry consultations. Interaction between work experience and academic curriculum is very strong, giving the program a depth that no other full-time academic course can match.

Career options

6ср

6ср

Career options depend on the major chosen.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

Current school leavers are advised to submit a HSC Bonus Scheme Questionnaire to UTS by 2 December.

Non-current school leavers are advised to complete the employment question on their UAC application as bonus points may be awarded on the basis of relevant work experience.

27648

27348

6ср

 $The \, English \, proficiency \, requirement \, for \, international \, students \, or \, local \,$ applicants with international qualifications is: Academic IELTS: 6.0 overall with a writing score of 6.0; or TOEFL: paper based: 500-549 overall with TWE of 4.5, internet based: 60-78 overall with a writing score of 21; or DEEP: C; or PTE: 50-57; or CAE: 52-57

Eligibility for admission does not guarantee offer of a place.

Local students

Entry to individual engineering majors is subject to ATAR requirements.

International students

Applicants who successfully complete a recognised pathway program are eligible to apply.

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard fulltime duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

Mathematics Extension 1; Physics; and English Standard.

English Advanced is recommended.

Course duration and attendance

Full-time students normally complete the program in five years, which includes four years of study plus two periods of engineering internship in the workplace totalling at least 48 weeks. The internship is typically taken in the third or fourth semester and again in the seventh or eighth.

It is possible to complete the program entirely on a part-time basis, with continuous concurrent employment, by enrolling at half the full-time rate, however this is not recommended. Students wishing to make extensive use of part-time attendance are strongly encouraged to negotiate with their employers for at least two full-time semesters of study somewhere through the program.

Course structure

A total of 204 credit points is required for graduation, distributed in the following way:

- core program: 48 credit points
- engineering practice program: 12 credit points, plus 48 weeks of approved internship
- fields of practice (including a major capstone project): 120 credit points (credit points may vary depending on major), and
- electives (within this component students may undertake a faculty-approved sub-major totalling 24 credit points): 24 credit points (credit points may vary depending on sub-major). Students in the Civil Engineering major, Structures specialisation are required to complete 12 credit points of electives from approved postgraduate structural engineering subjects.

The degree may be taken with a designated major which students usually select at entry. Opportunities exist in later years for students to apply to change majors. Students may choose not to take a major and instead take a general program comprising subjects from different areas of engineering which must be approved by the director of UTS: Engineering undergraduate programs.

The Diploma in Engineering Practice is not offered separately.

Industrial training/professional practice

The Diploma in Engineering Practice requires the completion of two six-month internships and the Engineering Practice Program. Completing 12 months of relevant engineering experience before graduating enables students to link learning in the workplace and learning at University, with each experience enhancing the other.

Course completion requirements

CBK90011 Electives	24cp
STM90106 Core subjects	48cp
STM90271 Engineering practice program	12cp
CBK90173 Major choice	120cp
,	Total 204cp

Course program

Most of the subjects are offered in both Autumn and Spring semesters, sometimes as day classes and sometimes as evening classes. The programs provided below for each major show a suggested sequence for students undertaking the course full time for Autumn $commencement. \ This \ sequence \ may \ be \ impacted \ in \ future \ semesters$ by course changes, subject availability, or satisfactory academic progress. Internships may be taken in semesters other than those shown, but this may lengthen the time required to complete the course. The program for students undertaking the Civil Engineering major beyond Year 1 depends on which specialisation is chosen.

Levels of award

The Bachelor of Engineering Diploma in Engineering Practice may be awarded with first or second class honours for meritorious performance in the course as a whole.

Professional recognition

The Bachelor of Engineering is accredited by Engineers Australia (under the Washington Accord the degree is internationally recognised by countries including the UK, USA, Hong Kong China, Malaysia, Korea, Japan, Ireland, New Zealand, Canada, Chinese Taipei, Russia, Singapore, South Africa and Turkey). The Diploma in Engineering Practice allows students to accelerate their entry into the engineering profession as a chartered professional engineer by reducing the time required for professional experience after graduation.

C10062v4 Bachelor of Engineering Bachelor of Arts in International Studies Diploma in Engineering Practice

Award(s): Bachelor of Engineering in (name of Engineering major)
Diploma in Engineering Practice (BE DipEngPrac)
Bachelor of Arts in International Studies (BA)

CRICOS code: 043948C

Commonwealth-supported place?: Yes

Load credit points: 252 Course EFTSL: 5.25 Location: City campus

Overview

This combined degree, offered jointly by UTS: Engineering and UTS: International Studies, links the Bachelor of Engineering Diploma in Engineering Practice (C10061) (see page 140) with the study of a language and culture other than English.

This combined degree offers a shortened version of the Bachelor of Arts International Studies together with a shortened version of the Bachelor of Engineering Diploma of Engineering Practice. Students who choose this course have less opportunity to elect specialist areas of study. On completion, students receive separate testamurs for each degree.

Course aims

The purpose of the program is to develop skills for leadership in the professional practice of engineering in an international setting. It reflects a belief in the international character of engineering, and the conviction that Australian professionals can benefit from the early development of an international perspective and a fluency in crosscultural interactions.

Career options

Career options depend on the major chosen. Options are enhanced by international experience, making students more marketable to prospective employers.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

Admission to the combined degree is on merit according to the admissions policy for the Bachelor of Engineering (C10067) (see page 152).

There is a range of entry levels to the various language and culture programs. Students are admitted to the international studies program with no guarantee of entry to a specific major, although every effort is made to meet students' preferences.

Current school leavers are advised to submit a HSC Bonus Scheme Questionnaire to UTS by 2 December.

Non-current school leavers are advised to complete the employment question on their UAC application as bonus points may be awarded on the basis of relevant work experience.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Local students

Entry to individual engineering majors is subject to ATAR requirements.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances

Assumed knowledge

There are no prior language requirements for the international studies program (see page 87).

Course duration and attendance

The course duration is normally six years of full-time study, although it may be possible to complete the degree in less time than this.

The program involves four years of academic work in Australia, one year of academic work overseas and two periods of engineering internship. The periods of engineering internship can be taken in Australia, or one in Australia and one overseas.

Course structure

The course comprises a total of 252 credit points, made up of 156 credit points relating to engineering and 96 credit points relating to international studies. The Bachelor of Arts in International Studies requires students to study a region or country major over a minimum of three years. The Bachelor of Arts in International Studies is not offered as a separate degree, but is completed only in combination with the professional degree program. The engineering component of this degree is made up of subjects selected from the engineering core, the engineering practice program and the engineering fields of practice (majors) subjects. The international studies component is made up of subjects in language and culture, foundations in international studies, and contemporary society, and study undertaken in the country of the student's chosen international studies major.

Overseas study

Students spend their fourth year of study at a university overseas.

Industrial training/professional practice

Students undertake a minimum of 48 weeks of engineering internship. Some students choose to take their first period of engineering internship overseas, during their second or third year of enrolment. Most take this first period in Australia. This course is also available without the Diploma in Engineering Practice. For details, refer to the Bachelor of Engineering Bachelor of Arts in International Studies (C10063) (see page 147).

Eligibility for admission does not guarantee offer of a place.

Local students

Entry to individual engineering majors is subject to ATAR requirements.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

There are no prior language requirements for the international studies program (see page 87).

Course duration and attendance

The course duration is normally five years of full-time study, although it may be possible to complete the degree in less time than this. Students spend two semesters of study at a university or other higher education institution in the country of their major.

Course structure

The program comprises a total of 240 credit points, made up of 144 credit points relating to engineering and 96 credit points relating to international studies. The Bachelor of Arts in International Studies requires students to study a region or country major over a minimum of three years. The Bachelor of Arts in International Studies is not offered as a separate degree, but is completed only in combination with the professional degree program. The engineering component is made up of subjects selected from the engineering core and the engineering fields of practice (majors). The international studies component is made up of subjects in language and culture, foundations in international studies, and contemporary society, and study undertaken in the country of the student's chosen international studies major.

Overseas study

Students spend their fourth year of study at a university overseas.

Industrial training/professional practice

Students graduating without the Diploma in Engineering Practice are required to obtain the equivalent of at least 12 weeks exposure to professional engineering practice, preferably outside the university environment. For further details, refer to 48100 Professional Practice.

Course completion requirements

CBK90005	Country major choice	96cp
STM90107	Core subjects (Engineering)	42cp
CBK90174	Major choice (Engineering)	102cp
48100	Professional Practice (BE)	0cp
		Total 240cn

Course program

The program for this course is the same as that for the Bachelor of Engineering Bachelor of Arts in International Studies Diploma in Engineering Practice (C10062) (see page 146), but without the two semester-long internships and associate Diploma in Engineering Practice subjects.

Levels of award

The Bachelor of Engineering may be awarded with first or second class honours for meritorious performance in the course as a whole.

Transfer between UTS courses

It is not possible to complete either degree at an intermediate point. However, a student unable for any reason to continue with international studies could transfer to the Bachelor of Engineering Diploma in Engineering Practice (C10061) (see page 140).

Professional recognition

The Bachelor of Engineering is accredited by Engineers Australia (under the Washington Accord the degree is internationally recognised by countries including the UK, USA, Hong Kong China, Malaysia, Korea, Japan, Ireland, New Zealand, Canada, Chinese Taipei, Russia, Singapore, South Africa and Turkey).

C10065v8 Bachelor of Engineering Bachelor of Business

Award(s): Bachelor of Engineering in (name of Engineering major) (BE)

Bachelor of Business (BBus) UAC code: 609350

CRICOS code: 030574B Commonwealth-supported place?: Yes

Load credit points: 240 Course EFTSL: 5 Location: City campus

Overview 3 4 1

This combined degree is offered jointly by UTS: Engineering and UTS: Business. It allows students to complete the core and major components of both the engineering and business degrees, producing engineers with skills in commercialisation of technology innovation and business graduates with professional-level competency in technology use.

Students learn how engineering and business fit together, how to manage technology and innovation, and how to commercialise engineering innovations. For graduates choosing to practise as engineers, the business knowledge gained in this course will prove invaluable in providing a sound foundation for entrepreneurial initiatives and the commercialisation of engineering innovations.

This combined degree can be completed in less time than would be required to complete the two degrees separately.

Career options

Career options include working in a business career applying advanced technology in commercial settings or practising as an engineer where business knowledge helps to ensure success in commercialisation of engineering innovations. The course provides excellent training for senior management roles.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

Current school leavers are advised to submit a HSC Bonus Scheme Questionnaire to UTS by 2 December.

Non-current school leavers are advised to complete the employment question on their UAC application as bonus points may be awarded on the basis of relevant work experience.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Local students

To be admitted to this combined degree, applicants must achieve an ATAR rank no lower than five points below the rank for the Bachelor of Business single degree.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

 $Mathematics\ Extension\ 1;\ Physics;\ and\ English\ Standard.$

English Advanced is recommended.

Course duration and attendance

The program may be completed on a five-year, full-time or equivalent part-time basis.

Course structure

The program comprises a total of 240 credit points, made up of 150 credit points relating to the Bachelor of Engineering and 90 credit points relating to the Bachelor of Business. Students wishing to graduate from the engineering component of the combined degree prior to completion of the business component must have completed the business core subjects (STM90108) and at least 30 credit points from their chosen business major (CBK90169).

Industrial training/professional practice

Students graduating with a Bachelor of Engineering without the Diploma in Engineering Practice are required to obtain the equivalent of at least 12 weeks exposure to professional engineering practice. For further details, refer to 48100 Professional Practice.

Course completion requirements

STM90272	Core subjects (Engineering)	36ср
STM90108	Core subjects (Business)	42cp
CBK90169	Major choice (Business)	48cp
CBK90176	Major choice (Engineering)	114cp
48100	Professional Practice (BE)	0cp
		Total 240cp

Course program

A typical program for a student attending full time would be that shown for the Bachelor of Engineering Bachelor of Business Diploma in Engineering Practice (C10068) (see page 157), but with semesters moved forward to replace the semesters in which students in the Bachelor of Engineering Bachelor of Business Diploma in Engineering Practice undertake the Diploma in Engineering Practice.

Levels of award

The Bachelor of Engineering may be awarded with first or second class honours for meritorious performance in the course as a whole.

Transfer between UTS courses

Students wishing to transfer from the combined degree to the Bachelor of Business (C10026) (see page 131) single degree are required to apply for admission through UAC in the non-current school leaver category.

Professional recognition

The Bachelor of Engineering is accredited by Engineers Australia (under the Washington Accord the degree is internationally recognised by countries including the UK, USA, Hong Kong China, Malaysia, Korea, Japan, Ireland, New Zealand, Canada, Chinese Taipei, Russia, Singapore, South Africa and Turkey). Refer to the Bachelor of Business for details on professional recognition.

C10066v4 Bachelor of Engineering Science

Award(s): Bachelor of Engineering Science in (name of Engineering major)

(BEngSc)

CRICOS code: 033909D

Commonwealth-supported place?: Yes

Load credit points: 144 Course EFTSL: 3 Location: City campus

Note(s)

This course is only offered to new international students. Local students in an existing UTS course may be able to transfer into it.

This course is also offered offshore. It is available in Hong Kong. The language of tuition is English.

Local students are advised to refer to the Bachelor of Engineering Diploma in Engineering Practice (C10061) (see page 140), which includes industry experience and provides a comprehensive preparation for a career in the engineering profession.

Overview

This course is an engineering technologist-level program which is similar in nature to the Bachelor of Engineering (C10067) (see page 152) but does not provide full professional engineering status.

This course provides students with the skills required at an engineering technologist level - and hence the ability to work with professional engineers - without developing full professional engineering competencies.

Career options

Career options include positions in engineering teams across the full spectrum of engineering activities. Specific career options depend on the major chosen.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.0 overall with a writing score of 6.0; or TOEFL: paper based: 500-549 overall with TWE of 4.5, internet based: 60-78 overall with a writing score of 21; or DEEP: C; or PTE: 50-57; or CAE: 52-57

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

Mathematics Extension 1; Physics; and English Standard. English Advanced is recommended.

Course duration and attendance

The course can be completed in three years of full-time study.

Course structure

A total of 144 credit points is required for graduation, distributed in the following way:

- core program (including the Project BEngSc): 42 credit points
- fields of practice (including a major BEngSc project): 84 credit points, and
- electives: 18 credit points.

The degree may be taken with a designated major which students usually select at entry. Opportunities exist in later years for students to apply to change majors. Students may choose not to take a major, instead taking a general program comprising subjects from different areas of engineering as approved by the director of UTS: Engineering Undergraduate Programs.

Course completion requirements

STM90356 Core subjects	36cp
CBK90228 Electives	18cp
48001 Project BEngSc	6cp
CBK90178 Major choice	84cp
,	Total 144cp

Course program

Most subjects are offered in Spring and Autumn semesters, sometimes as day classes and sometimes as evening classes. The programs shown below for each major show a suggested sequence for students undertaking the course full time. The subjects taken in any one semester are determined by what is on offer and any subject requisites.

List of majors

Course duration and attendance

The course is offered on a four-year, full-time basis.

Course structure

A total of 192 credit points is required for graduation, distributed in the following way:

- core program: 48 credit pointschoice of major: 120 credit points
- electives: 24 credit points.

Industrial training/professional practice

Students graduating with a Bachelor of Engineering without the Diploma in Engineering Practice are required to obtain the equivalent of at least 12 weeks exposure to professional engineering practice, preferably outside the university environment. For further details, refer to 48100 Professional Practice.

Course completion requirements

CBK90011	Electives	24cp
STM90106	Core subjects	48cp
CBK90173	Major choice	120cp
48100	Professional Practice (BE)	0cp
		Total 192cp

Course program

Most of the subjects are offered in both Autumn and Spring semesters, sometimes as day classes and sometimes as evening classes. The programs provided below for each major show a suggested sequence for students commencing in Autumn semester undertaking the course full time. The program for students undertaking the Civil Engineering major beyond Year 1 depends on which specialisation is chosen.

Year 4

Year 2

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Local students

 $Entry\,to\,individual\,engineering\,majors\,is\,subject\,to\,ATAR\,requirements.$

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

Mathematics Extension 1; Physics; and English Standard. English Advanced is recommended.

Course duration and attendance

The course duration is six years of full-time study.

Course structure

The program comprises a total of 252 credit points, made up of 162 credit points relating to the Bachelor of Engineering Diploma in Engineering Practice and 90 credit points relating to the Bachelor of Business.

The engineering component of this course is made up of subjects selected from the engineering core, the engineering practice program and the engineering fields of practice (majors).

The business component is made up of core business subjects and a business major.

Industrial training/professional practice

The Diploma in Engineering Practice requires the completion of two six-month internships and the engineering practice program. This course is also available without the Diploma in Engineering Practice. For details, refer to the Bachelor of Engineering Bachelor of Business (C10065) (see page 148).

Levels of award

48550

The Bachelor of Engineering Diploma in Engineering Practice may be awarded with first or second class honours for meritorious performance in the course as a whole.

6ср

Professional recognition

The Bachelor of Engineering is accredited by Engineers Australia (under the Washington Accord the degree is internationally recognised by countries including the UK, USA, Hong Kong China, Malaysia, Korea, Japan, Ireland, New Zealand, Canada, Chinese Taipei, Russia, Singapore, South Africa and Turkey). The Dipoma in Engineering Practice allows students to accelerate their entry into the engineering profession as a chartered professional engineer by reducing the time required for professional experience after graduation.

Other information

Further information is available from: Building 1 Student Centre telephone 1300 ask UTS (1300 275 887) or +61 2 9514 1222

Ask UTS www.ask.uts.edu.au

C10069v3 Bachelor of Engineering Science in Aerospace Operations

Award(s): Bachelor of Engineering Science in Aerospace Operations (BEngSc)

Commonwealth-supported place?: No

Load credit points: 144 Course EFTSL: 3 Location: Singapore

Note(s)

This course is only offered offshore. It is available in Singapore. The language of tuition is English.

Overview

This is a professional degree program offered jointly by UTS and the Singapore Institute of Aerospace Engineers (SIAE). Building on an established SIAE-UTS educational partnership in aerospace operations, this course was launched in Singapore in 2000.

This unique degree equips graduates to take advantage of expanding professional opportunities in the fast-growing aerospace industry in Singapore and the region.

Career options

The Bachelor of Engineering Science in Aerospace Operations enhances the career prospects of professionals in other industries who wish to move into the aerospace industry, professionals who wish to upgrade and broaden their academic qualifications and technical specialists currently working in the aerospace industry.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

Applicants require a Singapore polytechnic diploma or equivalent. Holders of Licensed Aircraft Maintenance Engineering (LAME) are also considered. Those without a diploma can also be considered for admission based on their performance in other courses and extensive aircraft engineering experience.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.0 overall with a writing score of 6.0; or TOEFL: paper based: 500-549 overall with TWE of 4.5, internet based: 60-78 overall with a writing score of 21; or DEEP: C; or PTE: 50-57; or CAE: 52-57

Eligibility for admission does not guarantee offer of a place.

Assumed knowledge

Students must be competent in written and spoken English and the use of basic information technology tools.

Credit recognition

Students with a Singapore polytechnic diploma or equivalent qualification may be granted a maximum 96-credit-point exemption out of the required 144 credit points.

Course duration and attendance

The typical course duration for a student getting the maximum advanced standing is two years (four semesters) of part-time study.

Course structure

Once students have been granted 96 credit points of exemptions, they are required to complete eight compulsory subjects (48 credit points). Students study two subjects a semester.

Course completion requirements

STM90520	Core subjects	42cp
48001	Project BEngSc	6cp
MAJ03414	Aerospace Engineering	78cp
CBK90228	Electives	18cp
		Total 144cp

Levels of award

The course is awarded with high distinction, distinction, credit or pass.

Further study at UTS

Bachelor of Engineering Science graduates have the option of continuing their professional development through studies at UTS leading to a four-year Bachelor of Engineering (C10067) (see page 152) degree, a five-year Bachelor of Engineering Diploma in Engineering Practice (C10061) (see page 140) combined award, or combined five-year engineering and business degrees.

Alternatively, graduates of this course may enter postgraduate courses in engineering and/or business management including the Master of Engineering Management (C04094) (see page 314) via a graduate certificate program.

C10073v6 Bachelor of Engineering Bachelor of Science

Award(s): Bachelor of Engineering in (name of Engineering major) (BE) Bachelor of Science in (name of Science major) (BSc)

UAC code: 609360 CRICOS code: 040711D

Commonwealth-supported place?: Yes

Load credit points: 240 Course EFTSL: 5 Location: City campus

Overview

This combined degree is designed to provide opportunities for students interested in science, the scientific basis of engineering and technology, and the technology itself. Graduates of this course work as cutting edge professionals where science and engineering interact dynamically.

There is a strong interrelation between the progress of engineering and developments in science, and a demonstrated need for professionals with a strong understanding and experience in both areas.

Students have the option of undertaking honours in science, or an additional two internships to gain the Diploma in Engineering Practice, or both.

This combined degree can be completed in less time than would be required to complete the two degrees separately.

Course aims

This course aims to produce graduates with professional qualifications in science and engineering who are well prepared to pursue a career in either field, or one that combines the skills of both. Students develop valuable skills highly prized by employers, including the technological expertise to understand scientific problems and the design skills to implement solutions.

Career options

Career options depend on the majors and subjects chosen. Options include research, design and development, and scientific management. Graduates work in industry or government, in areas such as biotechnology, communications, energy and resource exploration, environmental protection, medical technology, molecular biology and materials technology, nanotechnology and transportation.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

There is provision for students already enrolled in a Bachelor of Science or a Bachelor of Engineering degree to transfer to the combined degree program. The eligibility criteria used to assess transfer applications for students currently enrolled in a science or engineering program are in line with those used by the Universities Admissions Centre to assess non-current school leaver applicants.

Current school leavers are advised to submit a HSC Bonus Scheme Questionnaire to UTS by 2 December.

Non-current school leavers are advised to complete the employment question on their UAC application as bonus points may be awarded on the basis of relevant work experience.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Applicants who successfully complete a recognised pathway program are also eligible to apply.

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

Mathematics Extension 1; Physics; and English Standard. English Advanced is recommended.

Course duration and attendance

The course duration is five years full time, 10 years part time, or six years full time with honours.

Full-time attendance involves up to 24 hours each week at the University. Part-time attendance involves up to 12 hours each week at the University. It is expected that employers will release part-time students for at least one half-day a week for attendance at classes.

Course structure

The program comprises a total of 240 credit points, made up of 162 credit points relating to the Bachelor of Engineering and 78 credit points relating to the Bachelor of Science.

The engineering component of this course is made up of subjects selected from the engineering core and engineering fields of practice (majors).

The science component represents a specific science major.

Graduation from the science component of the combined degree is not possible prior to completion of all components of the combined degree. Students wishing to graduate with a Bachelor of Science prior to completion of the engineering component of the combined degree must apply for transfer to the Bachelor of Science (C10242) (see page 241) single degree program where they must complete all requirements for the stand-alone single degree version.

Similarly, if a student wishes to graduate from the engineering component of the combined degree prior to completion of the science component they must apply for transfer to the Bachelor of Engineering (C10067) (see page 152) single degree program where they must complete all requirements for the stand-alone single degree version, including the Professional Practice (BE) subject.

Further, students wishing to graduate from the engineering component of the combined degree prior to completion of the science component must have completed at least 60 credit points of the science major (CBK90586).

Industrial training/professional practice

Students are required to undertake a minimum of 12 weeks of engineering experience.

A Diploma in Engineering Practice is also available. The Diploma in Engineering Practice requires the additional completion of two sixmonth internships and the engineering practice program.

Course completion requirements

STM90106	Core subjects	48cp

Matnem Year 1	atics major			35383 35252	High Performance Computing Mathematical Statistics	6ср 6ср	
Autumn s	emester				e subject from the following:	_	6ср
33130	Mathematical Modelling 1		6ср	48580 48581	Advanced Control Digital Electronics	6cp	
48510	Introduction to Electrical Engineering		6ср	48434	Embedded Software	6ср 6ср	
68037	Physical Modelling		6ср	48561	Power Electronics and Drives	6ср	
35140	Introduction to Quantitative Management		6ср	48582	Power Systems Analysis and Design	6ср	

Ci				Ci			
Spring se 48026	Capstone Project Part B		6ср	Spring se 48270	Entrepreneurship and Commercialisation		6ср
	e subject from the following:		6ср	91705	Medical Devices and Diagnostics		6ср
49274	Advanced Robotics	6ср	оср	Select two	o subjects from the following:		12cp
48551	Analog Electronics	6cp		48560	Introductory Control	6cp	
48450 48550	Real-time Operating Systems Renewable Energy Systems	6ср 6ср		48570 48451	Data Acquisition and Distribution Advanced Digital Systems	6ср 6ср	
48583	Power Systems Operation and Protection	6ср		48571	Electrical Machines	6ср	
Select two	o subjects from the following:		12cp	48572	Power Circuit Theory	6ср	
35322	Advanced Analysis	6cp	1	49274 48551	Advanced Robotics Analog Electronics	6ср 6ср	
35335 35342	Mathematical Methods Nonlinear Methods in Quantitative	6ср		48450	Real-time Operating Systems	6ср	
33342	Management	6ср		48550	Renewable Energy Systems	6ср	
35344	Network and Combinatorial Optimisation	6ср		48583	Power Systems Operation and Protection	6ср	
35355 35391	Quality Control	6cp		Year 5			
35391	Seminar (Mathematics) Seminar (Statistics)	6ср 6ср		Autumn s	semester		
35340	Quantitative Management Practice	6ср		48016	Capstone Project Part A		6cp
35361	Stochastic Processes	6ср		91706 91707	Neuroscience Pharmacology 1		6ср 6ср
Medical	Science major				e subject from the following:		6ср
Year 1				48580	Advanced Control	6ср	оср
Autumn	emester			48581	Digital Electronics	6ср	
33130	Mathematical Modelling 1		6ср	48434 48561	Embedded Software Power Electronics and Drives	6ср 6ср	
48510	Introduction to Electrical Engineering		6cp	48582	Power Systems Analysis and Design	6ср	
68037	Physical Modelling		6cp	Spring se	mester	•	
65111	Chemistry 1		6ср	48026	Capstone Project Part B		6ср
Spring se 33230			600	91708	Medical and Applied Physiology		6ср
48521	Mathematical Modelling 2 Fundamentals of Electrical Engineering		6ср 6ср	91709	Pharmacology 2		6ср
48520	Electronics and Circuits		6cp	Select one 49274	e subject from the following: Advanced Robotics	6ср	6ср
65212	Chemistry 2		6ср	48551	Analog Electronics	6ср	
Year 2				48450	Real-time Operating Systems	6ср	
Autumn	semester			48550 48583	Renewable Energy Systems Power Systems Operation and Protection	6ср 6ср	
48230	Engineering Communication		6ср			ocp	
48530 48441	Circuit Analysis Introductory Digital Systems		6ср 6ср	Nanotec	hnology major		
				17 4			
91161	Cell Biology and Genetics		6ср	Year 1			
91161 Spring se			6ср	Year 1 Autumn s	semester

The Bache	elor of Engineering may be awarded with fi	rst or se	econd

The Bachelor of Engineering may be awarded with first or second class honours for meritorious performance in the course as a whole.

Honours

An honours program in science is available, which involves an extra year of full-time study. The honours program is designed to introduce students to more advanced coursework and to research work in science. It allows selected students to continue with postgraduate studies if desired and enhances their employment prospects.

Professional recognition

The Bachelor of Engineering is accredited by Engineers Australia (under the Washington Accord the degree is internationally recognised by countries including the UK, USA, Hong Kong China, Malaysia, Korea, Japan, Ireland, New Zealand, Canada, Chinese Taipei, Russia, Singapore, South Africa and Turkey). Depending on the disciplines chosen, students may also be eligible for entry to other relevant professional associations.

Other information

C10074v5 Bachelor of Engineering Bachelor of Science Diploma in Engineering Practice

Award(s): Bachelor of Engineering in (name of Engineering major)
Diploma in Engineering Practice (BE DipEngPrac)
Bachelor of Science in (name of Science major)
CRICOS code: 043278C
Commonwealth-supported place?: Yes
Load credit points: 252
Course EFTSL: 5.25
Location: City campus

Note(s)

This course is only offered to new international students. Local students in an existing UTS course may be able to transfer into it.

Overview

This combined degree is the same as the Bachelor of Engineering Bachelor of Science (C10073) (see page 160), except for the additional requirement of two internships and completion of the engineering practice program. Students can transfer to this program if they wish to complete the Diploma in Engineering Practice.

There is a strong interrelation between the progress of engineering and developments in science and a demonstrated need for professionals with a strong understanding and experience in both areas.

Students also have the option of undertaking honours in science.

Course aims

The course aims to develop in students valuable skills highly prized by employers, including the technological expertise to understand scientific problems and the design skills to implement solutions.

Career options

Career options depend on the majors and subjects chosen. Options include research, design and development, and scientific management. Graduates work in industry or government, in areas such as biotechnology, communications, energy and resource exploration, environmental protection, medical technology, molecular biology and materials technology, nanotechnology and transportation.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

There is provision for students already enrolled in a Bachelor of Science or a Bachelor of Engineering degree to transfer to the combined degree program. The eligibility criteria used to assess transfer applications for students currently enrolled in a science or engineering program are in line with those used by the Universities Admissions Centre to assess non-current school leaver applicants.

Current school leavers are advised to submit a HSC Bonus Scheme Questionnaire to UTS by 30 November.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Local students

Entry to individual engineering majors is subject to ATAR requirements.

International students

Applicants who successfully complete a recognised pathway program are also eligible to apply.

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

 $Mathematics\ Extension\ 1;\ Physics;\ and\ English\ Standard.$

English Advanced is recommended.

Course duration and attendance

The course duration is six years full time, 12 years part time, or seven years full time with honours.

Full-time attendance involves up to 24 hours each week at the University. Part-time attendance involves up to 12 hours each week at the University. It is expected that employers will release part-time students for at least one half-day a week for attendance at classes.

Course structure

The program comprises a total of 252 credit points, made up of 174 credit points relating to the Bachelor of Engineering Diploma in Engineering Practice and 78 credit points relating to the Bachelor of Science.

The engineering component of this course is made up of subjects selected from the engineering core, the engineering practice program and the engineering fields of practice (majors).

The science component represents a specific science major.

Graduation from the science component of the combined degree is not possible prior to completion of all components of the combined degree. Students wishing to graduate with a Bachelor of Science prior to completion of the engineering component of the combined degree must apply for transfer to the Bachelor of Science (C10242) (see page 241) single degree program where they must complete all requirements for the stand-alone single degree version.

Similarly, if a student wishes to graduate from the engineering component of the combined degree prior to completion of the science component they must apply for transfer to the Bachelor of Engineering Diploma in Engineering Practice (C10061) (see page 140) single degree program where they must complete all requirements for the standalone single degree version.

Further, students wishing to graduate from the engineering component of the combined degree prior to completion of the science component must have completed at least 60 credit points of the science major (CBK90586).

Industrial training/professional practice

The Diploma in Engineering Practice requires the completion of two six-month internships and the engineering practice program.

Overview

This combined degree is designed to provide opportunities for students interested in medical science, the scientific basis of engineering and technology, and the technology itself.

There is a strong interrelation between the progress of engineering and developments in science, and a demonstrated need for professionals with a strong understanding and experience in both areas.

A strong professional focus ensures graduates of this course learn the skills employers want with a solid link between theory and practice and the benefits of hands-on experience.

This combined degree can be completed in less time than would be required to complete the two degrees separately.

Course aims

This course aims to produce graduates with professional qualifications in medical science and engineering who are well prepared to pursue a career in either field, or one that combines the skills of both.

Career options

Career options include positions in biotechnology, communications, construction, energy and resource exploration and development, environmental protection and management, materials technology, mathematical modelling, medical technology and instrumentation, molecular biology, nanotechnology and transportation.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

There is provision for students already enrolled in a Bachelor of Medical Science or a Bachelor of Engineering degree to transfer to this combined degree program. The eligibility criteria used to assess transfer applications are in line with those used by the Universities Admissions Centre to assess non-current school leaver applicants.

Current school leavers are advised to submit a HSC Bonus Scheme Questionnaire to UTS by 2 December.

Non-current school leavers are advised to complete the employment question on their UAC application as bonus points may be awarded on the basis of relevant work experience.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard fulltime duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

Mathematics Extension 1; Physics; and English Standard.

English Advanced is recommended.

Course duration and attendance

This course is offered over five years full time, 10 years part time, or six years full time with honours.

Full-time attendance involves approximately 24 hours each week at the University, which allows a full stage of the course to be completed in one semester. Part-time attendance involves approximately 12 hours each week at the University, which allows a full stage to be completed in one year. It is expected that employers will release parttime students for at least one half-day a week for attendance at classes.

Course structure

The program comprises a total of 240 credit points, made up of 162 credit points relating to the Bachelor of Engineering and 78 credit points relating to the Bachelor of Medical Science.

The engineering component of this course is made up of subjects selected from the engineering core and the engineering fields of practice (majors).

The medical science component represents a specific medical science strand.

Graduation from the medical science component of the combined degree is not possible prior to completion of all components of the combined degree. Students wishing to graduate with a Bachelor of Medical Science prior to completion of the engineering component of the combined degree must apply for transfer to the Bachelor of Medical Science (C10184) (see page 217) single degree program where they must complete all requirements for the stand-alone single degree version.

Similarly, if a student wishes to graduate from the engineering component of the combined degree prior to completion of the science component they must apply for transfer to the Bachelor of Engineering (C10067) (see page 152) single degree program where they must complete all requirements for the stand-alone single degree version, including the Professional Practice (BE) subject.

Further, students wishing to graduate from the engineering component of the combined degree prior to completion of the medical science component must have completed at least 60 credit points of the medical science major (STM90348).

Industrial training/professional practice

Students are required to undertake a minimum of 12 weeks of engineering experience.

A Diploma in Engineering Practice is also available. The Diploma in Engineering Practice requires the additional completion of two sixmonth internships and the engineering practice program.

C10078v6 Bachelor of Engineering Bachelor of Biotechnology

Award(s): Bachelor of Engineering in (name of Engineering major) (BE)

Bachelor of Biotechnology (BBiotech)

UAC code: 609380 CRICOS code: 043276E

Commonwealth-supported place?: Yes

Load credit points: 240 Course EFTSL: 5 Location: City campus

Overview

This combined degree is designed to provide opportunities for students interested in biotechnology, the scientific basis of engineering and technology, and the technology itself.

Engineers are needed in the biotechnology field to design new technologies for industries such as the food, agricultural, environmental and medical biotechnology industries.

A strong professional focus ensures graduates have the skills employers want with a solid link between theory and practice, and the benefits of hands-on experience.

This combined degree can be completed in less time than would be required to complete the two degrees separately.

Course aims

This course aims to produce graduates with professional qualifications in biotechnology and engineering who are well prepared to pursue a career in either field, or one that combines the skills of both.

Career options

Career options include positions in biotechnology, materials technology, medical technology and instrumentation, molecular biology and nanotechnology. Good employment opportunities exist with government scientific organisations, in research in universities, hospitals and industry, and in specialised development and consulting companies.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

There is provision for students already enrolled in a Bachelor of Biotechnology or a Bachelor of Engineering degree to transfer to this combined degree program. The eligibility criteria used to assess transfer applications are in line with those used by the Universities Admissions Centre to assess non-current school leaver applicants.

Current school leavers are advised to submit a HSC Bonus Scheme Questionnaire to UTS by 2 December.

Non-current school leavers are advised to complete the employment question on their UAC application as bonus points may be awarded on the basis of relevant work experience.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

Mathematics Extension 1; Physics; and English Standard. English Advanced is recommended.

Course duration and attendance

The course duration is five years full time, 10 years part time, or six years full time with honours.

Full-time attendance involves approximately 24 hours each week at the University, which allows a full stage of the course to be completed in one semester. Part-time attendance involves approximately 12 hours each week at the University, which allows a full stage to be completed in one year. It is expected that employers will release part-time students for at least one half-day a week for attendance at classes.

Course structure

The course comprises a total of 240 credit points, made up of 162 credit points of engineering subjects and 78 credit points of biotechnology subjects.

The engineering component of this course is made up of subjects selected from the engineering core and the engineering fields of practice (majors).

The biotechnology component represents a specific biotechnology strand. There is an emphasis on DNA technologies and applications, and on industrial aspects of biotechnology. Students attain a high level of competence in microbiology and biochemistry, and learn to design products involving the application of biotechnology in product manufacturing.

Graduation from the biotechnology component of the combined degree is not possible prior to completion of all components of the combined degree. Students wishing to graduate with a Bachelor of Biotechnology prior to completion of the engineering component of the combined degree must apply for transfer to the Bachelor of Biotechnology (C10172) (see page 215) single degree program where they must complete all requirements for the stand-alone single degree version.

Similarly, if a student wishes to graduate from the engineering component of the combined degree prior to completion of the biotechnology component they must apply for transfer to the Bachelor of Engineering (C10067) (see page 152) single degree program where they must complete all requirements for the stand-alone single degree version, including the Professional Practice (BE) subject.

Further, students wishing to graduate from the engineering component of the combined degree prior to completion of the biotechnology component must have completed at least 60 credit points of biotechnology subjects (STM90274).

Industrial training/professional practice

Students are required to undertake a minimum of 12 weeks of engineering experience.

A Diploma in Engineering Practice is also available. The Diploma in Engineering Practice requires the additional completion of two sixmonth internships and the engineering practice program.

Levels of award

Introductory Control

Bioreactors and Bioprocessing

The Bachelor of Engineering may be awarded with first or second class honours for meritorious performance in the course as a whole.

Honours

An honours program in biotechnology (C09022) (see page 113) is available, which involves an extra year of full-time study. The honours program is designed to introduce students to more advanced coursework and to research work in biotechnology. It allows selected students to continue with postgraduate studies if desired and enhances their employment prospects.

Professional recognition

The Bachelor of Engineering is accredited by Engineers Australia (under the Washington Accord the degree is internationally recognised by countries including the UK, USA, Hong Kong China, Malaysia, Korea, Japan, Ireland, New Zealand, Canada, Chinese Taipei, Russia, Singapore, South Africa and Turkey). Depending on the disciplines chosen, students may also be eligible for entry to other relevant professional associations.

Other information

Further information is available from: Building 1 Student Centre telephone 1300 ask UTS (1300 275 887) or +61 2 9514 1222 Ask UTS www.ask.uts.edu.au

Note(s)

6ср

6cp

This course is only offered to new international students. Local students in an existing UTS course may be able to transfer into it.

Overview

This combined degree is the same as the Bachelor of Engineering Bachelor of Biotechnology (C10078) (see page 170), except for the additional requirement of two internships and completion of the engineering practice program. Students can transfer to this program if they wish to complete the Diploma in Engineering Practice.

Engineers are needed in the biotechnology field to design new technologies for industries such as the food, agricultural, environmental and medical biotechnology industries.

A strong professional focus ensures graduates of this course learn the skills employers want with a solid link between theory and practice, and the benefits of hands-on experience.

This combined degree can be completed in less time than would be required to complete the two degrees separately.

Course aims

This course aims to produce graduates with professional qualifications in biotechnology and engineering who are well prepared to pursue a career in either field, or one that combines the skills of both

Career options

Career options include positions in biotechnology, materials technology, medical technology and instrumentation, molecular biology and nanotechnology. Good employment opportunities exist with government scientific organisations, research in universities, hospitals and industry, and in specialised development and consulting companies.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

There is provision for students already enrolled in a Bachelor of Biotechnology or a Bachelor of Engineering degree to transfer to this combined degree program. The eligibility criteria used to assess transfer applications are in line with those used by the Universities Admissions Centre to assess non-current school leaver applicants.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

171

Local students

Entry to individual engineering majors is subject to ATAR requirements.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

Mathematics Extension 1; Physics; and English Standard. English Advanced is recommended.

Course duration and attendance

The course duration is six years full time, 12 years part time, or seven years full time with honours.

Full-time attendance involves approximately 24 hours each week at the University, which allows a full stage of the course to be completed in one semester. Part-time attendance involves approximately 12 hours each week at the University, which allows a full stage to be completed in one year. It is expected that employers will release part-time students for at least one half-day a week for attendance at classes.

Course structure

The program comprises a total of 252 credit points, made up of 174 credit points relating to the Bachelor of Engineering Diploma in Engineering Practice and 78 credit points relating to the Bachelor of Biotechnology.

The engineering component of the course is made up of subjects selected from the engineering core, the engineering practice program and the engineering fields of practice (majors).

The biotechnology component represents a specific biotechnology strand. There is an emphasis on DNA technologies and applications, and industrial aspects of biotechnology. Students attain a high level of competence in microbiology and biochemistry, and learn to design products involving the application of biotechnology in product manufacturing.

Graduation from the biotechnology component of the combined degree is not possible prior to completion of all components of the combined degree. Students wishing to graduate with a Bachelor of Biotechnology prior to completion of the engineering component of the combined degree must apply for transfer to the Bachelor of Biotechnology (C10172) (see page 215) single degree program where they must complete all requirements for the stand-alone single degree version.

Similarly, if a student wishes to graduate from the engineering component of the combined degree prior to completion of the biotechnology component they must apply for transfer to the Bachelor of Engineering Diploma in Engineering Practice (C10061) (see page 140) single degree program where they must complete all requirements for the stand-alone single degree version.

Further, students wishing to graduate from the engineering component of the combined degree prior to completion of the biotechnology component must have completed at least 60 credit points of biotechnology subjects (STM90274).

Industrial training/professional practice

The Diploma in Engineering Practice requires the completion of two six-month internships and the engineering practice program.

Commonwealth-supported place?: Yes

Load credit points: 144 Course EFTSL: 3 Location: City campus

Noteis

For international students, mid-year (July/August) intake may be considered on a case-by-case basis by the faculty.

Overview

This course provides an in-depth understanding of how the body works at the cellular level, what causes disease and the techniques of laboratory diagnosis of disease, including the expanding area of molecular-based diagnostic techniques. Students gain the underpinning knowledge and lab skills required to participate in research aimed at the prevention or treatment of disease.

This course provides a strong professional and industry focus. With extensive theoretical knowledge and advanced laboratory skills in medical laboratory science, students obtain a solid background in the biological/medical sciences and practical experimentation.

Career options

Career options include positions in diagnostic medical laboratories, pharmaceutical, biomedical and biotechnology industries. Students may pursue a career in biomedical research in hospitals or other research institutes. Biomedical science also provides excellent preparation for entry into graduate medical degrees.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

Mathematics; English; and at least one science subject.

HSC Mathematics Extension 1 and Chemistry are recommended.

Course duration and attendance

Students can complete the course over three years full time. Full-time attendance involves approximately 20 hours each week on campus.

Students may also be able to complete the course in part-time mode, usually at the rate of two subjects a semester (a 50 per cent load), taking six years to complete. Part-time students are required to attend some sessions in daytime hours.

Course structure

The course comprises a total of 144 credit points. There is choice within the core subjects, enabling students to focus on a particular theme or area of expertise. The elective subjects enable students to increase their expertise in the biomedical science area or in other areas of science or other disciplines in the University. This can be in the form of a specialised 24-credit-point sub-major or by a varied selection of subjects.

Students must satisfactorily complete all core subjects and the required number of credit points of elective/second major subjects for award of the degree.

Students admitted to the Bachelor of Nursing (standard program) before 2010 should refer to the course description in the 2009

Students admitted to the Bachelor of Nursing (accelerated program) before 2011 should refer to the course description in the 2010 handbook.

Overview

The Bachelor of Nursing is designed to prepare students for the role of the registered nurse. The course incorporates a range of nursing subjects as well as behavioural science, physical science, ethics and professional subjects relevant to contemporary nursing practice. Graduates of the course are capable of delivering a high standard of confident, safe and therapeutic nursing care in a variety of health care settings. They demonstrate nursing care that is patient-centred, informed and responsible.

Clinical learning is a key element of the course with clinical placements in health care settings occurring in every semester. Learning technologies such as simulation, which is undertaken within the faculty's clinical practice laboratories, assist students in preparing for clinical practice. Across the course students develop an e-portfolio to showcase their abilities and facilitate career planning. In the third year of the course students are able to pursue an area of nursing interest by choosing a clinical specialty elective.

173

Course aims

The course aims to prepare graduates who are independent lifelong learners to be attuned to the needs of patients from diverse backgrounds; are patient-centred and value collaboration with patients and colleagues; seek evidence in the exercise of clinical judgment and safe practice; and act in a professional, compassionate and ethical manner. In addition, graduates are prepared to foster the development of nursing as a practice discipline and demonstrate leadership in health care.

Career options

Career options for registered nurses include working in diverse specialty areas such as community health, critical care, intensive care, aged care, mental health, operating theatres and paediatrics. Career progression opportunities include working as a clinical nurse consultant, clinical nurse specialist, nurse educator, nurse manager, nurse practitioner or rural and remote practice nurse.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

The requirements specified above apply to the standard, three-year mode of the course. The accelerated program has the following requirements.

- Bachelor of Nursing Accelerated: Graduate Entry: applicants
 who have successfully completed an Australian (or overseas
 equivalent) bachelor's degree in health, human bioscience, or
 social science within eight years prior to entry are eligible to
 apply. Successful applicants are given advanced standing (four
 subjects = 24 credit points) for their previous studies and are
 able to complete the course in two years full time, inclusive
 of pre-semester and summer subjects. Successful completion
 of the four-week, pre-semester subject in January/February
 2013 is required before proceeding to the Bachelor of Nursing:
 Accelerated Graduate Entry course.
- Bachelor of Nursing Accelerated: Enrolled Nurse Certificate entry (graduates between 2004 to 2008): applicants must have completed the TAFE Certificate IV in Nursing (Enrolled Nurse) and have commenced their studies between 2003 and 2007. Hospital-trained enrolled nurses are not eligible for the accelerated course. Successful applicants are given advanced standing (five subjects = 30 credit points) for their previous studies and are able to complete the course in two years full time inclusive of pre-semester and summer subjects.
- Bachelor of Nursing Accelerated: Enrolled Nurse Certificate
 or Diploma entry (graduates from 2009): applicants must
 have completed the TAFE Certificate IV in Nursing (Enrolled/
 Division 2 Nursing) or the TAFE Diploma/Advanced Diploma
 of Nursing (Enrolled/Division 2 Nursing) and commenced their
 TAFE studies in or after 2008. Hospital-trained enrolled nurses
 are not eligible for the accelerated course. Successful applicants
 are given advanced standing (eight subjects = 48 credit points)
 for their previous studies and are able to complete the course
 in two years full time with no pre-semester or summer schools.

As part of its duty of care to patients and clients receiving health care in NSW, anyone who works in a NSW public health facility must first undergo a criminal record check. You must provide UTS with either evidence that a criminal record check has been conducted on you in your country, or a statutory declaration that you have no criminal record in your country of residence or in any country you have resided in. Participation in screening and vaccination against infectious diseases are prerequisites for students undertaking clinical placements in health facilities. Further information is available from: www.nmh.uts.edu.au/students/current/clinical-practice/rules.html

Non-current school leavers are strongly advised to submit a personal statement directly to UTS by 30 November 2012. Further information is available from:

www.undergraduate.uts.edu.au/apply

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C

Eligibility for admission does not guarantee offer of a place.

Local students

The UTS Year 12 Bonus Scheme awards bonus points to Australian high school applicants based on performance in HSC subjects that are relevant to the course applied for. Further details are available at: www.undergraduate.uts.edu.au/bonuspoints

In addition, current school leaver applicants who have met UTS matriculation with an ATAR of at least 69.00 and have B Nursing Kuring-gai campus full time (606000) as a first preference may be eligible for bonus marks on the basis of an interview. Marks are allocated for motivation, HSC marks in English and science, leadership and community service. Eligible applicants are contacted by telephone in early January.

International students

Applicants to the standard three-year course who have successfully completed a recognised pathway program in Australia can also apply.

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances

Applications

Entry to the Bachelor of Nursing at City campus (606002) is very competitive; applicants are encouraged to also include a preference for the Bachelor of Nursing at Kuring-gai campus (606000).

The TAFE Certificate IV in Nursing (Enrolled Nurse) and work experience do not satisfy the University's English proficiency requirements.

Assumed knowledge

Any two units of English.

Any two units of science and any two units of mathematics are recommended.

Course duration and attendance

The Bachelor of Nursing is offered at Kuring-gai campus on a full-time basis over three years and a part-time basis over six years, and at City campus on a full-time basis over three years.

The Accelerated Program: Graduate Entry is offered at Kuring-gai campus on a full-time basis over two years and a part-time basis over four years including a pre-semester school in February at commencement and Summer session.

The Accelerated Program: Enrolled Nurse is offered at Kuring-gai campus on a full-time basis over two years and a part-time basis over four years including Summer session.

Course structure

The course comprises 144 credit points, made up of nursing theory, science and clinical practice in a range of health facilities. Full-time students study four subjects per semester and part-time students study two subjects per semester.

Industrial training/professional practice

This course includes extensive nursing practice, which is a compulsory component. Students undertake nursing professional experience in a variety healthcare and community settings. Clinical placements occur in blocks each semester and are in addition to time spent in the nursing clinical practice laboratories that simulate the clinical environment. The placements involve morning and evening shifts and in the final year some night duty may occur. The final year of the program has prolonged periods of clinical experience.

All nursing students must adhere to the requirements in the Ministry of Health policy directive, 'PD2011_005 Occupational Assessment, Screening and Vaccination Against Specified Infectious Diseases', prior to commencement of any clinical practice placements. The policy can be viewed at:

www.health.nsw.gov.au/policies/PD/2011/PD2011_005.html

The policy should be read in full as it outlines students' obligation for screening and immunisation against certain infectious diseases prior to commencing their clinical placement. Students are asked to provide evidence of their immunity or vaccination status, and screening for tuberculosis (TB) status may also be required prior to or at the time of commencement of the first clinical placement. Students should be aware that if they do not meet the requirements of the policy they cannot commence the placement and as a result are not able to complete the course.

C10123v6 Bachelor of Nursing Bachelor of Arts in International Studies

Award(s): Bachelor of Nursing (BN) Bachelor of Arts in International Studies (BA)

UAC code: 609150 CRICOS code: 026198M

Commonwealth-supported place?: Yes

Load credit points: 240 Course EFTSL: 5 Location: City campus

Note(s)

Students admitted to the Bachelor of Nursing Bachelor of Arts in International Studies before 2010 should refer to the course description in the 2009 handbook.

Overview

The Bachelor of Nursing Bachelor of Arts in International Studies combines preparation for the role of the registered nurse with immersion in another language and culture, enhancing professional education and career options.

The course offers all the benefits of the UTS Bachelor of Nursing, including clinical placements every semester, use of state-of-the-art facilities, selection of a clinical elective in the final year and development of an e-portfolio. In addition, students gain specific skills in their chosen language and culture and become more aware of the need for intercultural sensitivities, not only through studying another language and culture, but also by living in another country in the fourth year of the course.

Career options

Career options for registered nurses include working in diverse specialty areas such as community health, critical care, intensive care, aged care, mental health, operating theatres and paediatrics. Career progression opportunities include working as a clinical nurse consultant, clinical nurse specialist, nurse educator, nurse manager, nurse practitioner or rural and remote practice nurse. Career options are enhanced by international experience, making students more marketable to prospective employers.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

Admission to the combined degree is on merit according to the admissions policy for the Bachelor of Nursing (C10122) (see page 173).

There is a range of entry levels to the various language and culture programs. Students are admitted to the international studies program with no guarantee of entry to a specific major, although every effort is made to meet students' preferences.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

Any two units of English (nursing component). There are no prior language requirements (international studies component).

Any two units of science and any two units of mathematics are recommended (nursing component).

External articulation

UTS offers an accelerated Bachelor of Nursing program to students who have completed the TAFE Certificate IV in Enrolled Nursing, and to students who have completed a degree in another discipline within the past seven years. Enrolled nurses receive 36 credit points of exemption and graduates receive 30 credit points of exemption. Applicants must have completed their qualification by December of the previous year to be eligible for the accelerated program. Spaces are limited in these accelerated programs and offers are based on competition.

Course duration and attendance

The course duration is five years of full-time study. Students spend two semesters of study at a university or other higher education institution in the country of their major.

Course structure

Students are required to complete 240 credit points of study comprising 144 credit points in nursing and 96 credit points in international studies. The Bachelor of Arts in International Studies requires undergraduates to study a region or country major over a minimum of three years.

Overseas study

Students spend their fourth year of study at a university overseas.

Industrial training/professional practice

The Bachelor of Nursing includes extensive clinical practice, which is a compulsory component of the course, commencing in the first semester. Students may be required to complete clinical practice during the semester break period.

Course completion requirements

C10124v6 Bachelor of Laws

Award(s): Bachelor of Laws (LLB) UAC code: 604000 (FT), 604001 (PT)

CRICOS code: 013614G

Commonwealth-supported place?: Yes

Load credit points: 192 Course EFTSL: 4 Location: City campus

Overview

This course teaches students foundational knowledge and skills in law and its practice. UTS: Law graduates are increasingly in demand in the legal profession and the business sector in a wide range of roles and responsibilities. Today's law graduates are called upon to advise and counsel parties, act as negotiators, manage project teams and resolve disputes.

The program provides full or part-time study for students wishing to obtain a professional legal qualification that satisfies the requirements for admission as a lawyer.

Students have the opportunity to engage in deeper study in the law through undertaking a number of law options and incorporate a broad variety of other disciplines by enrolling in options from other faculties.

Career options

Career options include lawyer or legal policy adviser within a government or corporate department, private law firm or community law centre, or negotiating treaties or work in legislation drafting with the Attorney-General's Department.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

Any two units of English.

Credit recognition

Students who have already completed a degree in another discipline may apply for exemption from 48 credit points of general law electives. Details about applying for credit recognition can be found in undergraduate course information (see page 96).

Course duration and attendance

The course duration is four years of full-time or six-and-a-half years of part-time study. Full-time students have approximately 10–14.5 contact hours per week and part-time students have approximately 7–9.5 contact hours per week. Timetable constraints may require attendance at both day and evening classes.

Course structure

The course comprises a total of 192 credit points. The study components for course completion are:

- 102 credit points of compulsory core law subjects
- 42 credit points of law options, and
- 48 credit points of general electives that include subjects offered by other faculties of the University (for students who have not received exemption on the basis of a recognised prior degree), or
- either 18 credit points of practical legal training (PLT) subjects and an additional 30 credit points of law options.

Refer to the course entry in the *UTS: Handbook 2007* for the pre-2008 course structure. For a current listing of subjects in each course, refer to the study package directory.

6ср

6ср

Industrial training/professional practice

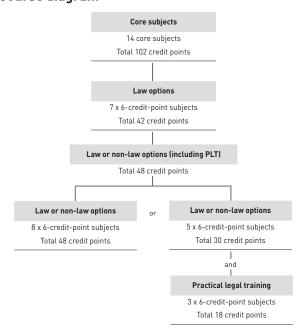

To practise as a lawyer in NSW, students need to successfully complete an accredited legal qualification (e.g. Bachelor of Laws) and an accredited course of practical legal training (PLT), which UTS offers through its PLT program.

Students enrolled in the Bachelor of Laws have the option of completing the PLT program within their undergraduate law degree. Alternatively, students who wish to practise as lawyers in NSW can complete their Bachelor of Laws by including further law electives and then undertake a postgraduate course in PLT, such as the Graduate Certificate in Professional Legal Practice (C11232) (see page 467).

Course completion requirements

STM90688 Core subjects	102cp
CBK90383 Options	42cp
CBK90391 Options	48cp
•	Total 192cp

Course diagram

Course program

The two programs below show the standard programs of study for a full-time student and a part-time student.

The 90 credit points of optional subjects are made up of:

- 42 credit points of law options from CBK90383, and
- 48 credit points of general UTS electives from CBK90300, or 30 credit points of general UTS electives from CBK90390 and 18 credit points of PLT subjects from STM90792.

Levels of award

The Bachelor of Laws may be awarded with first or second class honours, which does not require an additional honours year. Honours candidates must complete the research thesis within the law option component. The rules concerning the Bachelor of Laws with honours can be found in undergraduate course information (see page 97).

Professional recognition

This course satisfies the academic requirements for admission to the Supreme Court of NSW as a lawyer. Students wishing to obtain full recognition as graduate lawyers have the option of completing the PLT program, also offered by UTS: Law.

Other information

Further information is available from: UTS Student Centre telephone 1300 ask UTS (1300 275 887) or +61 2 9514 1222

Award(s): Bachelor of Business (BBus) Bachelor of Laws (LLB) UAC code: 609010 CRICOS code: 008756B Commonwealth-supported place?: Yes Load credit points: 240 Course EFTSL: 5 Location: City campus

Overview

This combined program is offered jointly by UTS: Law and UTS: Business. One of the most popular combined degrees offered by UTS: Law, the Bachelor of Business Bachelor of Laws combines foundational understanding of law and important aspects of business with a wide choice of business majors and sub-majors, with real-world experience to make students work-ready upon graduation.

The program provides full-time study for students wishing to obtain a professional legal qualification that satisfies the academic requirements only for admission as a lawyer.

The degree seeks to provide students with the knowledge, competencies and values necessary to develop critical, analytical and evaluative skills essential for a dynamic and rewarding career in business and law.

Career options

Career options include legal adviser within a government department, lawyer in corporate and commercial sector, mergers and acquisitions, property, and intellectual property, as well as management consultant or professional in the chosen business specialisation (such as an accountant or marketing executive).

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

Proficiency in English and mathematics.

Course duration and attendance

The course duration is five years of full-time study. The law component requires attendance of 10-15 hours of lectures a week and timetable constraints may require attendance at both daytime and evening classes.

Course structure

The course comprises a total of 240 credit points, allowing students to graduate with the separate degrees of Bachelor of Business and Bachelor of Laws. The study components for course completion are as follows.

The law component of 144 credit points is made up of:

- 102 credit points of compulsory core law subjects, and
- 42 credit points of law options.

The business component of 96 credit points comprises:

- 48 credit points of core business subjects, and
- 48 credit points of subjects within a business major.

Refer to the course entry in the *UTS: Handbook 2007* for the pre-2008 course structure. For a current listing of subjects in each course refer to the study package directory.

Industrial training/professional practice

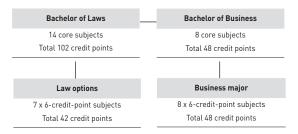

To practise as a lawyer in NSW, students need to successfully complete an accredited legal academic qualification (e.g. Bachelor of Laws) and an accredited course of practical legal training (PLT), which UTS offers through its PLT program.

Students enrolled in this course may complete their practical legal training by undertaking a postgraduate course in PLT, such as the Graduate Certificate in Professional Legal Practice (C11232) (see page 467).

Overview

The Bachelor of Science Bachelor of Laws is offered jointly by UTS: Law and UTS: Science. The law is of special importance in many areas of science, including research, industrial and commercial enterprise. The program provides full-time study for students wishing to obtain a professional legal qualification that satisfies the academic requirements only for admission as a lawyer together with a science specialisation.

The course addresses the increasing need for scientific expertise among lawyers. Graduates develop critical and analytical skills necessary when making decisions as they understand the complex links between science and law, increasing their employment prospects and career opportunities in both fields.

Career options

Career options include lawyers in areas where strong scientific backgrounds are valued, such as conservation and resource management, climate change advisory roles, defence technologies, environmental pollution regulations, finance, human health, industrial and occupational health and safety, pharmaceutical and biotechnological R&D and scientific patents.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

24cp

English proficiency; Mathematics; and Science.

Course duration and attendance

The course duration is five years of full-time study. For students who undertake the Bachelor of Science (Honours) the course duration is six years of full-time study.

The law component requires attendance at 10-15 hours of lectures a week and timetable constraints may require attendance at daytime and evening classes. The science component requires attendance of approximately 10 hours a week at the University.

Course structure

The course comprises a total of 240 credit points and allows students to graduate with the separate degrees of Bachelor of Science (BSc) and Bachelor of Laws (LLB). The study components for course completion are as follows.

The law component of 144 credit points is made up of:

- 102 credit points of compulsory core law subjects, and
- 42 credit points of law options.

The science component comprises 96 credit points of core science subjects taken from one of 10 specified majors representing different science disciplines.

Students graduate from the BSc independently from the LLB. However, to be eligible for graduation from the BSc students must complete one of the 96-credit-point UTS: Science majors plus at least 96 credit points of Bachelor of Law subjects.

Graduation from the science component of the combined degree is not possible prior to completion of all components of the combined degree. Students wishing to graduate with a Bachelor of Science prior to completion of the law component of the combined degree must apply for transfer to the Bachelor of Science (C10242) (see page 241) single degree program where they must complete all requirements for the stand-alone single degree version.

Similarly, a student can graduate from the law component of the combined degree prior to completion of the science component, but if they wish to continue with the science component, they must apply for transfer to the Bachelor of Science (C10242) (see page 241) single degree program where they need to complete all requirements for the stand-alone single degree version.

Industrial training/professional practice

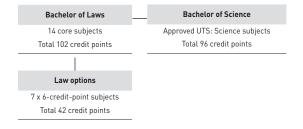

To practise as a lawyer in NSW, students need to successfully complete an accredited legal academic qualification (e.g. Bachelor of Laws) and an accredited course of practical legal training (PLT), which UTS offers through its PLT program.

Students enrolled in this course may complete their practical legal training by undertaking a postgraduate course in PLT, such as the Graduate Certificate in Professional Legal Practice (C11232) (see

to expertise and skills to enable them to work internationally and have an in-depth understanding of cross-cultural legal issues.

Career options

Career options include legal policy adviser within a government department, lawyer in a commercial or corporate sector with international links. Graduates can work with international organisations such as the United Nations and opportunities also exist in foreign affairs.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

There is a range of entry levels to the various language and culture programs. Students are admitted to the international studies program (see page 92) with no guarantee of entry to a specific major, although every effort is made to meet students' preferences.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

Proficiency in English is assumed. There are no prior language requirements for the international studies program (see page 87).

Course duration and attendance

The course duration is five years of full-time study. The law component requires attendance of 10-15 hours of lectures a week and timetable constraints may require attendance at daytime and evening classes. Students spend two semesters of study at a university or other higher education institution in the country of their major.

Course structure

The course comprises a total of 240 credit points. The study components for course completion are as follows.

The law component of 144 credit points is made up of:

- 102 credit points of compulsory core law subjects, and
- 42 credit points of law options.

The international studies component comprises 96 credit points of international studies subjects.

Refer to the course entry in the *UTS: Handbook 2007* for the pre-2008 course structure.

For a current listing of subjects in each course refer to the study package directory.

Overseas study

Students spend their fourth year of study at a university overseas.

Industrial training/professional practice

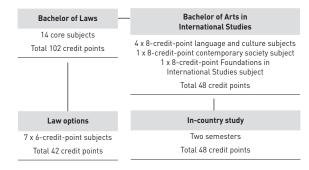

To practise as a lawyer in NSW, students need to successfully complete an accredited legal academic qualification (e.g. Bachelor of Laws) and an accredited course of practical legal training (PLT), which UTS offers through its PLT program.

Students enrolled in this course may complete their practical legal training by undertaking a postgraduate course in PLT, such as the Graduate Certificate in Professional Legal Practice (C11232) (see page 467).

Levels of award

The Bachelor of Laws may be awarded with first or second class honours, which does not require an additional honours year. Honours candidates must complete the research thesis within the law option component. The rules concerning the Bachelor of Laws with honours can be found in undergraduate course information (see page 96).

Professional recognition

This course satisfies the requirements for admission to the Supreme Court of NSW as a lawyer, provided students complete a practical legal training program, such as the Graduate Certificate in Professional Legal Practice (C11232) (see page 467).

Location: City campus

Overview

The law is of special importance in many areas of medical science, including medical and health practice, medical and biological research and industrial and commercial enterprise. The Bachelor of Medical Science Bachelor of Laws is offered jointly by UTS: Law and UTS: Science.

The program provides full-time study for students wishing to obtain a professional legal qualification that satisfies the academic requirements only for admission as a lawyer together with specialisation in medical science.

The course addresses the increasing need for medical science expertise among lawyers. Graduates develop critical and analytical skills inherent to an understanding of the complex links between medical science and the law, thus increasing their employment opportunities and career choices.

Career options

Career options include lawyer in areas where a strong background in human biology, medical diagnostics, neuroscience or pharmacology is valued; manager, officer or researcher in private or public health administration.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

English proficiency; mathematics; and two science subjects.

Course duration and attendance

The course duration is five years of full-time study. Students who undertake the Bachelor of Medical Science (Honours) (C09031) (see page 116) complete the course in six years of full-time study.

The law component requires attendance at 10-15 hours of lectures a week and timetable constraints may require attendance at daytime and evening classes. The science component requires attendance of approximately 10 hours a week at the University.

Course structure

The course comprises a total of 240 credit points and allows students to graduate with the separate degrees of Bachelor of Medical Science (BMedSc) and Bachelor of Laws (LLB). The study components for course completion are as follows.

The law component of 144 credit points is made up of:

- 102 credit points of compulsory core law subjects, and
- 42 credit points of law options.

The medical science component comprises 96 credit points of core medical science subjects.

Students graduate from the BMedSc independently from the LLB. However, to be eligible for graduation from the BMedSc, students must complete a total of 96 credit points of science subjects plus at least 96 credit points of Bachelor of Laws subjects.

For a current listing of subjects in each course refer to the study package directory.

Graduation from the medical science component of the combined degree is not possible prior to completion of all components of the combined degree. Students wishing to graduate with a Bachelor of Medical Science prior to completion of the law component of the combined degree must apply for transfer to the Bachelor of Medical Science (C10184) (see page 217) single degree program where they must complete all requirements for the stand-alone single degree version.

Similarly, a student can graduate from the law component of the combined degree prior to completion of the medical science component, but if they wish to continue with the medical science component, they must apply for transfer to the Bachelor of Medical Science (C10184) (see page 217) single degree program where they need to complete all requirements for the stand-alone single degree version.

Industrial training/professional practice

To practise as a lawyer in NSW, students need to successfully complete an accredited legal academic qualification (e.g. Bachelor of Laws) and an accredited course of practical legal training (PLT), which UTS offers through its PLT program.

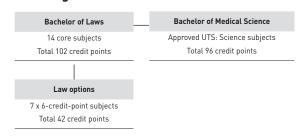

Students enrolled in this course may complete their practical legal training by undertaking a postgraduate course in PLT, such as the Graduate Certificate in Professional Legal Practice (C11232) (see page 467).

UAC code: 609050

CRICOS code: 040713B

Commonwealth-supported place?: Yes

Load credit points: 264 Course EFTSL: 5.5 Location: City campus

Overview

The Bachelor of Engineering Science Bachelor of Laws is offered jointly by UTS: Law and UTS: Engineering and is awarded with two testamurs. The course was developed in response to growing demand for legal services in areas in which an in-depth appreciation of complex technical matters is essential. It provides an overview of the legal system as a whole and an in-depth knowledge of an engineering specialisation.

The program provides full-time study for students wishing to obtain a professional legal qualification that satisfies the academic requirements only for admission as a lawyer together with a specialisation in engineering science.

The course addresses the increasing need for technical expertise and legal knowledge, which are highly sought after in both private law firms and the engineering industry. Graduates develop critical and analytical skills, combined with a strong industry focus, essential for an understanding of the complex links between engineering and the law.

Career options

6ср

6ср

6ср

6ср

6ср

6ср

Career options include professions as a lawyer in areas of environmental law, technology legislation and technology-specific criminal law; consultant, legal adviser or manager to engineering corporations in Australia and overseas.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Local students

Admission to the chosen engineering major is dependent on the ATAR for that major being met.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard fulltime duration. Students can extend their courses only in exceptional circumstances

Assumed knowledge

Mathematics Extension 1; Physics; and English Standard.

English Advanced is recommended.

Course duration and attendance

The course is normally completed in five-and-a-half years of full-time study. The hours of full-time attendance are approximately 17 hours a week and timetable constraints may require attendance at daytime and evening classes in the law component.

Course structure

The course comprises 264 credit points and allows students to graduate with the separate degrees of Bachelor of Engineering Science and Bachelor of Laws. The study components for course completion are as follows

- The law component is made up of 102 credit points of compulsory core law subjects; and 42 credit points of law options.
- The engineering component comprises 120 credit points of study, consisting of the core subjects in the Bachelor of Engineering Science and the field of practice subjects associated with the chosen engineering major.
- On completion of the engineering component (as set out in 2 above) a student who has also completed at least 78 credit points of law subjects approved by UTS: Law is eligible for the award of Bachelor of Engineering Science.

A student who qualifies for the award of Bachelor of Engineering Science (according to 3 above) is, on completion of the law component as approved by UTS: Law, eligible for the award of Bachelor of Laws. Refer to the course entry in the UTS: Handbook 2007 for the pre-2008 course structure.

For a current listing of subjects in each course refer to the study package directory.

Industrial training/professional practice

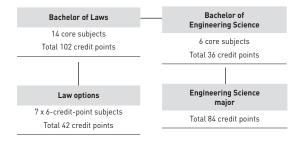

To practise as a lawyer in NSW, students need to successfully complete an accredited legal academic qualification (e.g. Bachelor of Laws) and an accredited course of practical legal training (PLT), which UTS offers through its PLT program.

Students enrolled in this course may complete their practical legal training by undertaking a postgraduate course in PLT, such as the Graduate Certificate in Professional Legal Practice (C11232) (see

Award(s): Bachelor of Information Technology (BInfTech)

UAC code: 603210

Commonwealth-supported place?: Yes

Load credit points: 144 Course EFTSL: 3 Location: City campus

Note(s)

This course is only offered to local students.

It is intended for local current school leavers.

This course is not offered to international students.

Overview

This is a cooperative education scholarship program in computer information systems, developed by UTS in cooperation with a group of leading organisations. It differs from other cooperative education courses in that, during the industry-based semesters, students follow a structured program designed jointly by UTS and the employer group, including formal coursework delivered by industry.

There are a limited number of places available in this course according to the number of industry sponsors each year. If selected for this course, students receive a total scholarship of around \$46,500 for the duration of the course.

This intensive course includes two six-month industry placements with different industry sponsors. Industry sponsors are heavily involved in the curriculum design to ensure graduates are not only highly qualified but also have the knowledge and skills relevant to the needs of industry.

Students normally secure graduate employment before completion of the course, which has a track record of 100 per cent employment. Sponsors also actively recruit graduates from the course but students are not obliged to take up employment with a sponsor.

Course aims

Students gain an understanding of both business practice and technical skills in IT and computing, and learn how to apply IT solutions to business challenges.

Career options

Career options include ICT business analyst, systems analyst, analyst/programmer, software developer, information systems manager, IT consultant, programmer/developer or IT project manager.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

This is an intensive scholarship course intended primarily for current school leavers, although applications are also accepted from noncurrent school leavers. Special application and selection procedures apply. Applicants must submit a Bachelor of Information Technology application questionnaire and attend an interview.

Applicants must demonstrate leadership potential and involvement in extra-curricular activities and it is expected that students achieve an ATAR of around 90. If suitable, students are interviewed before selection. Final selection is based on the result of the interview and ATAR. There are two application and interview rounds.

Further information is available from:

http://it.uts.edu.au/courses/scholarships/bit

Eligibility for admission does not guarantee offer of a place.

Assumed knowledge

Mathematics and any two units of English.

HSC Mathematics Extension 1 and English Advanced are recommended.

Course duration and attendance

The course is of three years' duration and involves four semesters of full-time study at the University and two semesters of full-time industry-based study and practical experience. The industry-based semesters are of 23 weeks' duration.

Course structure

Students are required to complete 144 credit points, comprising 120 credit points in compulsory subjects and 24 credit points in electives.

The central curriculum of the course is computer and information systems. This is supported by studies in management and strategic planning, as well as the necessary background subjects in information technology and programming.

There are special conditions relating to students enrolled in this course. Leave of absence and re-admission after withdrawal are not normally granted to students, except under extraordinary circumstances and subject to satisfactory arrangements being possible.

Rules and regulations

UTS: Information Technology does not recommend probation for unsatisfactory academic performance. Instead, it recommends to the Faculty Board in Engineering and Information Technology that a student be excluded under any of the following circumstances:

- a student fails any subject for the second time
- a student gains less than 50 per cent of the credit points for which he or she is enrolled in that assessment period
- a student fails any subject that is part of the program of an industry-based semester or a student performs unsatisfactorily during an industry-based semester, or
- immediately prior to the commencement of an industry-based semester, a student has still to complete more than one subject in the normal program of the course to that stage.

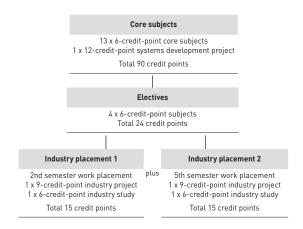

As an alternative to exclusion, a student whose performance is unsatisfactory according to the circumstances named above may have their enrolment forcibly transferred from the Bachelor of Information Technology to the Bachelor of Science in Information Technology course by means of an internal course transfer: continuing. The decision of whether a student is recommended for exclusion or a forced course transfer is at the sole discretion of the faculty and dependent on the individual circumstances of the student.

Appeals against exclusion are dealt with by the University's Appeals Committee (of the Academic Board), which takes into account the recommendation of the Course Steering Committee.

Industrial training/professional practice

Students spend two six-month, full-time semesters in industry.

Note(s)

This course is only offered to new international students. Local students in an existing UTS course may be able to transfer into it.

Local applicants now apply for the Bachelor of Science in Information Technology Diploma in Information Technology Professional Practice (C10152) (see page 196), which includes the industry training year and provides a comprehensive preparation for a career in IT.

Overview

6cp

This course offers a sound education in all aspects of computing and information technology for students who intend to make a career in the profession, as well as providing a pathway to honours, postgraduate study or a research career.

This course adopts a practice-based approach to IT education and the course content is a mix of theory and practice. As well as gaining strong technical skills in IT, students gain skills in business analysis, problem solving, teamwork and communication. Employers look for graduates with industry experience and, in this course, students are exposed to real IT problems.

UTS: Information Technology continues to support part-time study and some subjects can be taken in the evening as well as during the day.

Course aims

The course aims to produce graduates who are able to apply, in the context of any organisation, the knowledge and skills required of:

- information systems professionals in business units who integrate packaged systems rather than develop systems from first principles
- information technology professionals who develop systems from first principles
- network specialists who build, maintain and administer complex network systems, or
- computing specialists for technical research careers.

Career options

Career options include business analyst, IT project manager, network specialist, software developer, systems analyst or web developer.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.0 overall with a writing score of 6.0; or TOEFL: paper based: 500-549 overall with TWE of 4.5, internet based: 60-78 overall with a writing score of 21; or DEEP: C; or PTE: 50-57; or CAE: 52-57

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard fulltime duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

Mathematics and any two units of English.

HSC Mathematics Extension 1 and English Advanced are recommended.

External articulation

Students who gain entry through the UTS INSEARCH pathway are eligible for 48 credit points of credit recognition. Students who have completed a relevant diploma at TAFE NSW may be eligible for at least 24 credit points of credit recognition. There are also articulations with this course with institutions in China, Hong Kong, Malaysia and Singapore. Details are available from the Building 10 Student Centre.

Credit recognition

Students who have previously undertaken study at a university or other recognised tertiary education institution may be eligible for some academic credit for their prior study if the subjects previously completed are deemed by the Faculty of Engineering and Information Technology to be equivalent to subjects in the course.

The prior study must have been completed before commencement of this course, but no earlier than three years before commencement. Students must be able to demonstrate that their knowledge is current.

Credit recognition is not normally granted in this course for study completed at a private college except where UTS has an external articulation agreement with the college. TAFE IT diplomas and advanced diplomas completed within three years of enrolment may be granted some credit recognition. For further details see:

www.it.uts.edu.au/courses/undergraduate/credit-recognition.html

There are no exemptions granted for the networking subjects 31270, 31277 and 31283 without the successful completion of the challenge test for each of the these subjects. A challenge test is granted at enrolment time to students who have completed the CCNA curriculum (or CCNP) at a university and/or TAFE diploma level where the awarding institution is a CISCO Networking Academy. These challenge tests are always held in the week before the commencement of semester.

Course duration and attendance

The course is completed in three years of full-time or six years of parttime study. A significant number of subjects are offered in the evening but some daytime attendance is required for part-time students.

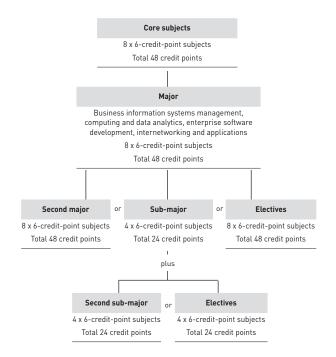

Course structure

Students are required to complete 144 credit points, comprising 48 credit points of core subjects, 48 credit points of one compulsory IT major and 48 credit points of electives.

Students must complete eight foundation core subjects (6 credit points each) and an IT major (48 credit points).

The 48 credit points of electives can be a combination of a second IT major, or two sub-majors, or one sub-major and four electives, or eight electives to broaden their knowledge of information technology and other disciplines.

Course diagram

Industrial training/professional practice

Industrial training is available as a separate course. Students enrol into the Diploma in Information Technology Professional Practice (C20049) (see page 299) once they have secured suitable full-time employment in the IT industry. This incorporates a minimum of nine months' full-time paid work experience with four supporting subjects at UTS. Full-time students normally undertake industrial training after completing Year 2.

Course completion requirements

STM90651 Core subjects (Information Technology)	48cp
CBK90781 Major choice (Information Technology)	48cp
CBK90782 Major/Two sub-majors/Electives	48cp
., ., ., ., ., ., ., ., ., ., ., ., ., .	Total 144cp

Course program

Example full-time programs are shown below. Refer to CBK90782 for the IT majors and approved sub-majors available to students in this course. All students are required to complete one IT major.

Note: Subjects listed as electives and IT major subjects are only offered in a particular semester (or year) if there is sufficient demand and the necessary resources.

C10152v4 Bachelor of Science in Information Technology Diploma in Information Technology Professional Practice

Award(s): Bachelor of Science in Information Technology Diploma in Information Technology Professional Practice (BScDipInfTechProfPrac)

UAC code: 603200 CRICOS code: 040940B

Commonwealth-supported place?: Yes

Load credit points: 156 Course EFTSL: 3.25 Location: City campus

Overview

This course offers a sound education in all aspects of computing and information technology for students who intend to make a career in the profession, as well as providing a pathway to honours, postgraduate study and a research career.

The course adopts a practice-based approach to IT education. Its content is designed with a mix of theory and practice. As well as gaining strong technical skills in IT, students gain skills in problem solving, teamwork and communication. Employers look for graduates with industry experience and, in this course, students are exposed to real IT problems and apply classroom learning on the job through the Diploma in Information Technology Professional Practice.

UTS: Information Technology continues to support part-time study with some subjects offered in the evening as well as during the day.

Course aims

The course aims to produce graduates who are able to apply, in the context of any organisation, the knowledge and skills required of:

- information professionals in business units who integrate packaged systems rather then develop systems from first principles
- information technology professionals who develop systems from first principles
- network specialists who build, maintain and administer complex network systems, or
- computing specialists for technical research careers.

Career options

Career options include ICT business analyst, analyst/programmer, IT project manager, network specialist, software developer, software engineer, systems analyst or web developer.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

Non-current school leavers are advised to complete the employment question on their UAC application and provide supporting statements of employment to UAC as bonus points may be awarded on the basis of relevant work experience.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.0 overall with a writing score of 6.0; or TOEFL: paper based: 500-549 overall with TWE of 4.5, internet based: 60-78 overall with a writing score of 21; or DEEP: C; or PTE: 50-57; or CAE: 52-57

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian

student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

Mathematics and any two units of English.

Mathematics Extension 1 and English Advanced are recommended.

External articulation

Students who gain entry through the UTS INSEARCH pathway are eligible for 48 credit points of credit recognition. Students who have completed a relevant diploma at TAFE NSW may be eligible for at least 24 credit points of credit recognition. There are also articulations with this course with institutions in China, Hong Kong, Malaysia and Singapore. Details are available from the Building 10 Student Centre.

Credit recognition

Students who have previously undertaken study at a university or other recognised tertiary education institution may be eligible for some academic credit for their prior study if the subjects previously completed are deemed by the Faculty of Engineering and Information Technology to be equivalent to subjects in the course.

The prior study must have been completed before commencement of this course, but no earlier than three years before commencement. Students must be able to demonstrate that their knowledge is current.

Credit recognition is not normally granted in this course for study completed at a private college except where UTS has an external articulation agreement with the college. TAFE IT diplomas and advanced diplomas completed within three years of enrolment may be granted some credit recognition. For further details see:

www.it.uts.edu.au/courses/undergraduate/credit-recognition.html

There are no exemptions granted for the networking subjects 31270, 31277 and 31283 without the successful completion of the challenge test for each of the these subjects. A challenge test is granted at enrolment time to students who have completed the CCNA curriculum (or CCNP) at a university and/or TAFE diploma level where the awarding institution is a CISCO Networking Academy. These challenge tests are always held in the week before the commencement of semester.

Course duration and attendance

The course is completed in four years of full-time or six years of part-time study. It comprises six academic semesters of full-time (or equivalent part-time) study, and a period of industrial training.

A significant number of subjects are offered in the evening but some daytime attendance is required for part-time students.

To gain credit for the DipITProfPrac, students are required to obtain an approved, full-time job within the information technology industry for a minimum of nine months.

Course structure

Students are required to complete 156 credit points, comprising 48 credit points of core subjects, 48 credit points for one compulsory IT major, 48 credit points of electives and 12 credit points for the Diploma in Information Technology Professional Practice.

The 48 credit points of electives can be a combination of a second IT major, or two sub-majors, or one sub-major and four electives, or eight electives to broaden knowledge of information technology and other disciplines.

Industrial training/professional practice

The Diploma in Information Technology Professional Practice is a compulsory part of this course and incorporates a minimum of nine months' work experience and four supporting subjects at UTS. Full-time students normally undertake the diploma after completing Year 2 and after obtaining suitable full-time employment in the information technology industry. International students can work full-time for the duration of the diploma.

Honours

Students interested in research and who excel in their studies are eligible to undertake one additional full-time year of study in the Bachelor of Science (Honours) in Information Technology (C09019) (see page 111) program. The honours year is also available on a parttime basis over two years.

Professional recognition

Graduates are eligible for professional-level membership of the Australian Computer Society.

Overview

In the years since deregulation of the Australian financial system there have been many sweeping changes and a considerable increase in the financial and economic activity of many Australian corporations. During this same period the use of sophisticated quantitative techniques in a variety of areas within the operations of major financial institutions has become the norm. As a consequence, there is a demonstrated and continuing demand for graduates trained in both mathematics and finance. To meet this need the School of Mathematical Sciences in UTS: Science and the School of Finance and Economics in UTS: Business jointly offer this course.

Mathematical techniques are increasingly important for risk assessment and the optimisation of financial plans, and there is a corresponding demand for highly skilled graduates in these areas. Financial institutions, large corporations and government instrumentalities seek graduates of this course to take up rewarding positions in quantitative and financial analysis.

Career options

Career options include stock market analysis, providing advice on portfolio management, option pricing, prediction of movements in international money markets and financial risk management. Major employers of graduates include banks, insurance companies, superannuation providers, government regulatory bodies such as APRA and ASIC, and other major financial bodies.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard fulltime duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

Mathematics and English.

HSC Mathematics Extension 1 is recommended.

Course duration and attendance

The degree is offered full time over three years or part time over six years.

Course structure

This course comprises 144 credit points of study.

Note(s)

For international students, mid-year (July/August) intake may be considered on a case-by-case basis by the faculty.

Overview

This course integrates studies in mathematics and finance with a major in the language and culture of another country. Students undertake an integrated sequence of study in mathematics, statistics, finance, economics and accounting.

The course provides sound training in both the traditional theory of finance and the mathematical aspects of modern portfolio management techniques. Graduates find interesting and rewarding employment in quantitative and financial analysis in major financial institutions such as banks, insurance companies and government instrumentalities

With one year of international experience gained from studying and living overseas, graduates find it easier to adapt and work overseas or in Australia.

Career options

Career options include positions in derivative pricing and risk management, portfolio management, stock market analysis, and other areas of high responsibility and high reward in the finance industry.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

Admission to the combined degree is on merit according to the admissions policy for the Bachelor of Mathematics and Finance (C10155) (see page 199). There is a range of entry levels to the various language and culture programs. Students are admitted to the international studies program with no guarantee of entry to a specific major, although every effort is made to meet students' preferences.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

There are no prior language requirements for the international studies program (see page 87).

Course duration and attendance

The combined degree is available only on a full-time basis over five years. Students spend two semesters of study at a university or other higher education institution in the country of their major.

Course structure

Students are required to complete 240 credit points, comprising 144 credit points in mathematics and finance and 96 credit points in international studies. The mathematics and finance component of the course includes an integrated sequence of subjects in mathematics, statistics, finance, economics and accounting. The Bachelor of Arts in International Studies requires undergraduates to study a region or country major over a minimum of three years. The Bachelor of Arts in International Studies is not offered as a separate degree, but is completed only in combination with the professional degree program. Graduation from the mathematics and finance component of the combined degree is not possible prior to completion of all components

Graduation from the mathematics and finance component of the combined degree is not possible prior to completion of all components of the combined degree. Students wishing to graduate with a Bachelor of Mathematics and Finance prior to completion of the international studies component of the combined degree must apply for transfer to the Bachelor of Mathematics and Finance (C10155) (see page 199) single degree program where they must complete all requirements for the stand-alone single degree.

Overseas study

Students spend their fourth year of study at a university overseas.

C10158v4 Bachelor of Mathematics and Computing

Award(s): Bachelor of Mathematics and Computing (BMathComp)

UAC code: 609045 CRICOS code: 029389B

Commonwealth-supported place?: Yes

Load credit points: 144 Course EFTSL: 3 Location: City campus

For international students, mid-year (July/August) intake may be considered on a case-by-case basis by the faculty.

Overview

This course is designed to meet the increasing industry need for graduates with both computational and analytical skills. It offers the prospect of careers that require a sound knowledge of computing together with the ability to analyse and model practical situations.

Mathematical and computational techniques are increasingly important for commercial, industrial and governmental activities and there is a corresponding demand for highly skilled graduates in these areas.

Career options

Career options include data mining, database design, market research, programming, software development, systems analysis, and positions in analytics, computational modelling, scheduling and logistics, statistical analysis and survey design.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard fulltime duration. Students can extend their courses only in exceptional circumstances

Assumed knowledge

Mathematics and English.

HSC Mathematics Extension 1 is recommended.

Course duration and attendance

Students can complete the course over three years full time. Full-time attendance involves approximately 16 hours each week on campus. Students may also be able to complete the course in part-time mode, usually at the rate of two subjects a semester (a 50 per cent load), taking six years to complete. Part-time students are required to attend some sessions in daytime hours.

Seminar (Statistics)

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

Mathematics; English; and at least one science subject.

Course duration and attendance

Students can complete the course over four years full time. Full-time attendance involves approximately 16 hours each week on campus. Students may also be able to complete the course part time, usually at the rate of two subjects a semester (a 50 per cent load), taking eight years to complete. Part-time students may need to attend science classes for at least one half-day a week, in addition to evening classes.

Course structure

Students are required to complete a total of 192 credit points, comprising 96 credit points of science subjects and 96 credit points of business subjects.

In the science component, students choose one of 10 possible majors representing the major science disciplines. Refer to the entry for the Bachelor of Business (C10026) (see page 131) for the possible majors available in the business component.

Graduation from the science component of the combined degree is not possible prior to completion of all components of the combined degree. Students wishing to graduate with a Bachelor of Science prior to completion of the business component of the combined degree must apply for transfer to the Bachelor of Science (C10242) (see page 241) single degree program where they must complete all requirements for the stand-alone single degree version.

Similarly, if a student wishes to graduate from the business component of the combined degree prior to completion of the science component they must apply for transfer to the Bachelor of Business (C10026) (see page 131) single degree program where they must complete all requirements for the stand-alone single degree version.

Students can extend their courses only in exceptional 6ср

Assumed knowledge

circumstances

Mathematics; English; and at least one science subject.

Students are advised to read the General information and Course area information sections in conjunction with specific course entries.

Course duration and attendance

The course is offered over four years full time. Full-time attendance is approximately 20 hours each week on campus. Students may also complete the course part-time, usually at the rate of two subjects a semester (a 50 per cent load), taking eight years to complete. Part-time students may need to attend science classes for at least one half-day a week, in addition to evening classes.

Course structure

Students are required to complete 192 credit points of study, comprising 96 credit points of medical science subjects and 96 credit points of business subjects. Refer to the Bachelor of Business (C10026) (see page 131) entry for the major areas of study.

Graduation from the medical science component of the combined degree is not possible prior to completion of all components of the combined degree. Students wishing to graduate with a Bachelor of Medical Science prior to completion of the business component of the combined degree must apply for transfer to the Bachelor of Medical Science (C10184) (see page 217) single degree program where they must complete all requirements for the stand-alone single degree

Similarly, if a student wishes to graduate from the business component of the combined degree prior to completion of the science component they must apply for transfer to the Bachelor of Business (C10026) (see page 131) single degree program where they must complete all requirements for the stand-alone single degree version.

Honours

An honours program is available to eligible students.

Transfer between UTS courses

There is provision for students already enrolled in a Bachelor of Medical Science or a Bachelor of Business degree to transfer to this combined degree program, provided they meet the entry requirements for the combined degree.

Students wishing to transfer from the combined degree program to the Bachelor of Business (C10026) (see page 131) single degree program, and whose ATAR is less than the current entry rank for the Bachelor of Business, are required to apply for admission through the Universities Admissions Centre in the non-current school leaver category.

Professional recognition

Depending on disciplines chosen, students may be eligible for entry to the relevant professional associations.

C10164v5 Bachelor of Health Science in Traditional Chinese Medicine **Bachelor of Arts in International Studies**

Award(s): Bachelor of Health Science in Traditional Chinese Medicine (BHlthSc)

Bachelor of Arts in International Studies (BA)

CRICOS code: 067517F

Commonwealth-supported place?: Yes

Load credit points: 288 Course EFTSL: 6 Location: City campus

Note(s)

This course is only offered to new international students. Local students in an existing UTS course may be able to transfer into it.

Entry to this degree for local students is by internal transfer from the Bachelor of Health Science in Traditional Chinese Medicine (C10186) (see page 218).

Students undertaking this degree may only study China as their international studies major. For international students, mid-year (July/August) intake may be considered on a case-by-case basis by the faculty.

Overview

This combined degree program provides students with greater exposure to and understanding of Chinese culture and a working knowledge of Chinese. Students complete four consecutive semesters

of study of Chinese language and culture before proceeding to China for an academic year of study at a university or institution of higher education.

The course has a strong history of delivering highly skilled practitioners and potential researchers. Students complete 1050 clinical hours, starting in the first semester first year and are well equipped for private practice. Opportunity exists for clinical internship in China and Korea, or undertaking the international studies program by learning Mandarin and spending a year studying in China.

Career options

Career options include acupuncture or Chinese herbal medicine practitioner in private or community health services. This combined program makes it more possible for graduates to practise outside Australia.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

Entry to this degree is by internal transfer from the Bachelor of Health Science in Traditional Chinese Medicine (C10186) (see page 218). Students do not need to have previously studied Chinese to successfully complete this program. There is a range of entry levels to the Chinese language and culture program.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Applications

Students in the Bachelor of Health Science in Traditional Chinese Medicine apply during Year 2 for transfer to this course, commencing in Year 3.

Assumed knowledge

There are no prior language requirements for the international studies program (see page 87).

Course duration and attendance

This combined degree is offered on a six-year, full-time basis. This also involves students practising their skills in the UTS acupuncture and herbal medicine clinics as required during the course. Students spend their fifth year of study at a Chinese university.

Course structure

Students are required to complete 288 credit points of study, comprising 192 credit points in traditional Chinese medicine (TCM) and 96 credit points in Chinese studies. The Bachelor of Arts in International Studies (see page 92) requires undergraduates to study a region or country major over a minimum of three years. Students undertaking this degree may only study China as their international studies major. The international studies component (96 credit points) includes 32 credit points (four 8-credit-point subjects) of instruction in Chinese language and culture, 8 credit points (one subject) of study of foundations in international studies, 8 credit points (one subject) of study of contemporary China and 48 credit points (two semesters) of study at a university or institution of higher education in China. The Bachelor of Arts in International Studies is not offered as a separate degree, but is completed only in combination with the professional degree program.

Graduation from the TCM component of the combined degree is not possible prior to completion of all components of the combined degree. Students wishing to graduate with a Bachelor of Health Science in Traditional Chinese Medicine prior to completion of the international studies component of the combined degree must apply for transfer to the Bachelor of Health Science in Traditional Chinese Medicine (C10186) (see page 218) single degree program where they must complete all requirements for the stand-alone single degree version.

Overseas study

Students spend their fifth year of study at a university overseas.

Industrial training/professional practice

Through working clinics, students gain practical experience treating patients under the guidance of qualified health professionals. The opportunity exists for clinical internship in China.

C10167v3 Bachelor of Medical Science Bachelor of Arts in International Studies

Award(s): Bachelor of Medical Science (BMedSc) Bachelor of Arts in International Studies (BA)

UAC code: 609255 CRICOS code: 043287B

Commonwealth-supported place?: Yes

Load credit points: 240 Course EFTSL: 5 Location: City campus

Note(s)

For international students, mid-year (July/August) intake may be considered on a case-by-case basis by the faculty.

Overview 4 1

This degree combines a professional degree in medical science with immersion in another language and culture. The medical science program is designed to educate and train graduates for careers in medical and health-related sciences. It aims to produce medical scientists with highly adaptable, practical scientific skills and a thorough grounding in the structure and function of the human body and in disease processes at the cellular, whole organ and behavioural level.

The combination of medical science and international studies aims to produce graduates with an increased awareness of the international contexts of health and who are well prepared to pursue global healthrelated professional careers.

Multinational pharmaceutical companies look to medical science graduates to work in drug registration, clinical trials coordination, as technical or marketing representatives and as policy analysts.

Career options

Career options include positions in government departments, private and public hospitals and public health units, nationally and internationally.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

Admission to the combined degree is on merit according to the admissions policy for the Bachelor of Medical Science (C10184) (see page 217). There is a range of entry levels to the various language and culture programs. Students are admitted to the international studies program (see page 92) with no guarantee of entry to a specific major, although every effort is made to meet students' preferences.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard fulltime duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

Mathematics; English; and two science subjects. There are no prior language requirements for the international studies program (see page 87).

Course duration and attendance

This course is offered over five years full time. Attendance involves approximately 20 hours each week on campus. Students spend two semesters of study at a university or other higher education institution in the country of their major.

Course structure

Students must complete 240 credit points of study, comprising 144 credit points relating to medical science and 96 credit points relating to international studies. The Bachelor of Arts in International Studies requires undergraduates to study a region or country major over a minimum of three years. The Bachelor of Arts in International Studies is not offered as a separate degree, but is completed only in combination with the professional degree program.

Graduation from the medical science component of the combined degree is not possible prior to completion of all components of the combined degree. Students wishing to graduate with a Bachelor of Medical Science prior to completion of the international studies component of the combined degree must apply for transfer to the Bachelor of Medical Science (C10184) (see page 217) single degree program where they must complete all requirements for the standalone single degree version.

Overseas study

Students spend their fourth year of study at a university overseas.

Note(s)

For international students, mid-year (July/August) intake may be considered on a case-by-case basis by the faculty.

Overview

This degree combines a professional degree in biotechnology with immersion in another language and culture. The biotechnology program provides students with a broad knowledge of modern biotechnology, with an emphasis on DNA technology, cell biology and up-to-date industrial applications, plus a wide range of practical skills, supplemented with relevant aspects of ethics law and business.

Biotechnology is a global industry and this course, with its strong professional, international and industry focus, aims to provide students with an increased awareness of the international contexts of the biotechnology industry and prepare students to pursue national and international biotechnology-related professional careers.

Career options

6ср

Career options include bioremediation of contaminated sites, brewing beer, engineering agricultural crops, growing yeast for bread, managing a biotechnology company, manufacturing drugs or medicine, mining uranium, regulating the expanding bioscience industries, researching anti-cancer drugs, teaching science, trading in biotechnology shares or writing about science.

Graduates have the opportunity to work overseas or in Australia in organisations with international networks or links.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

Admission to the combined degree is on merit according to the admissions policy for the Bachelor of Biotechnology (C10172) (see page 215). There is a range of entry levels to the various language and culture programs. Students are admitted to the international studies program (see page 92) with no guarantee of entry to a specific major, although every effort is made to meet students' preferences.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

C10169v4 Bachelor of Biotechnology **Bachelor of Business**

Award(s): Bachelor of Biotechnology (BBiotech)

Bachelor of Business (BBus) UAC code: 609176 CRICOS code: 041436K

Commonwealth-supported place?: Yes

Load credit points: 192 Course EFTSL: 4

Location: City and Kuring-gai campuses

Note(s)

For international students, mid-year (July/August) intake may be considered on a case-by-case basis by the faculty.

Overview

This course is designed to produce graduates who are prepared for scientific practice in the biotechnology industry or who are equipped for entry into business and management in science-based businesses

This course allows graduates to choose between a career in business or biotechnological science. It is particularly suitable for a career in the rapidly expanding and profitable biotechnology business sector where both disciplines are required.

Career options

Career options include manager or scientist in a bio-analytical lab, bio-business, CSIRO, government biotechnology support, a regulatory agency, stockbroking, vaccine manufacture or wine production. Graduates can also be an analyst, biotechnologist, marketer, product developer or research scientist with industry or scientific research organisations.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard fulltime duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

Mathematics; English; and at least one science subject.

Course duration and attendance

Students can complete the course over four years full time. Full-time attendance involves approximately 16 hours each week on campus. Students may also be able to complete the course part time, usually at the rate of two subjects a semester (a 50 per cent load), taking eight years to complete. Part-time students may need to attend science classes for at least one half-day a week, in addition to evening classes.

Course structure

The course comprises a total of 192 credit points, made up of 96 credit points of biotechnology subjects and 96 credit points of business

Graduation from the biotechnology component of the combined degree is not possible prior to completion of all components of the combined degree. Students wishing to graduate with a Bachelor of Biotechnology prior to completion of the business component of the combined degree must apply for transfer to the Bachelor of Biotechnology (C10172) (see page 215) single degree program where they must complete all requirements for the stand-alone single degree.

Similarly, if a student wishes to graduate from the business component of the combined degree prior to completion of the science component they must apply for transfer to the Bachelor of Business (C10026) (see page 131) single degree program where they must complete all requirements for the stand-alone single degree.

91368

91144

A Bachelor of Biotechnology (Honours) (C09022) (see page 113) is available to eligible students.

Bioreactors and Bioprocessing

Transfer between UTS courses

There is provision for students already enrolled in a Bachelor of Biotechnology or a Bachelor of Business degree to transfer to this combined degree program, provided they meet the entry requirements for the combined degree.

Students wishing to transfer from the combined degree program to the Bachelor of Business (C10026) (see page 131) single degree program, and whose ATAR is less than the current entry rank for the Bachelor of Business, are required to apply for admission through the Universities Admissions Centre in the non-current school leaver category.

Professional recognition

Depending on disciplines chosen, students may be eligible for entry to the relevant professional associations.

UAC code: 607045 CRICOS code: 026806C

Commonwealth-supported place?: Yes

Load credit points: 144 Course EFTSL: 3 Location: City campus

Note(s)

For international students, mid-year (July/August) intake may be considered on a case-by-case basis by the faculty.

Overview

This course provides students with a broad knowledge of modern biotechnology with an emphasis on DNA technology, cell biology and up-to-date industrial applications, plus a wide range of practical skills, supplemented with relevant aspects of ethics law and business.

Biotechnology is the science of the future, with high employment rates due to a strong professional and industry focus. Graduates of this course gain a professional qualification in biological science and a firm basis in the industrial aspects of biotechnology. This is a comprehensive biotechnology course with a wide range of options for advanced specialisation.

Career options

Career options include biotechnological research, development and production positions in agricultural, biomedical, chemical, communications, energy, environmental, manufacturing, medical and pharmaceutical companies. Graduates can innovate, invent or research biotechnological science or start their own company to capitalise on their ideas.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard fulltime duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

Mathematics; English; and at least one science subject.

HSC Mathematics Extension 1 and Chemistry are recommended.

Course duration and attendance

Students can complete the course over three years full time. Full-time attendance involves approximately 20 hours each week on campus. Students may also be able to complete the course part time, usually at the rate of two subjects a semester (a 50 per cent load), taking six years to complete. Part-time students are required to attend some sessions in daytime hours.

Course structure

Students must complete a total of 144 credit points, made up of 120 credit points of core subjects and 24 credit points of elective subjects. The elective subjects enable students to increase their expertise in other areas of science or other disciplines in the University. This can be in the form of a specialised 24-credit-point sub-major or by a varied selection of subjects.

Students must satisfactorily complete all core subjects and the required number of credit points of elective/second major subjects for award of the degree.

C10174v4 Bachelor of Forensic Biology in Biomedical Science

Award(s): Bachelor of Forensic Biology in Biomedical Science (BForBiol)

UAC code: 607025

CRICOS code: 049107G

Commonwealth-supported place?: Yes

Load credit points: 144 Course EFTSL: 3 Location: City campus

Note(s)

For international students, mid-year (July/August) intake may be considered on a case-by-case basis by the faculty.

Overview

This course provides a firm foundation in the biomedical sciences and their applications to forensic investigations involving human or other biological evidence. It brings together extensive theoretical knowledge with advanced laboratory and problem-solving skills in forensic and biomedical science, as well as legal aspects of forensic science practice and crime scene investigation.

This is a hands-on course that draws on UTS's strong expertise in both forensic science and biomedical science to produce graduates prepared for employment in either field. World-class facilities and equipment are combined with internationally recognised teaching and access to leading forensic scientists. The course has strong links with federal and state police services and government forensic laboratories.

Career options

Career options include positions as scene of crime officers, forensic laboratory scientists in federal or state law enforcement agencies or private DNA testing laboratories and biomedical scientists in private or public medical diagnostic, state hospitals providing forensic services or research laboratories.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

Mathematics; any two units of English; and any two units of science. HSC Mathematics Extension 1 and Chemistry are recommended.

Course duration and attendance

Students can complete the course over three years full time. Full-time attendance involves approximately 20 hours each week on campus. Students may also be able to complete the course part time, usually at the rate of two subjects a semester (a 50 per cent load), taking six years to complete. Part-time students are required to attend some sessions in daytime hours.

Course structure

The course comprises 144 credit points of study. Stages 1-4 (the first two years) of the program are similar, though not identical, to the Bachelor of Biomedical Science (C10115) (see page 172). However, stages 5-6 (the final year) are strongly focused on forensic studies.

Load credit points: 144 Course EFTSL: 3 Location: City campus

For international students, mid-year (July/August) intake may be considered on a case-by-case basis by the faculty.

Overview

This degree is designed to educate and train graduates for careers in medical and health-related sciences. It aims to produce professional medical scientists with highly adaptable and practical scientific skills accompanied by a thorough grounding in theory. It specialises in the human body's structure, function and disease processes at the cellular and whole organ level.

The course provides the foundation knowledge and skills for students who wish to go on to postgraduate programs such as medicine, dentistry, pharmacy, biomedical engineering, nutrition and dietetics, complementary medicine, public health and health administration.

Pharmaceutical companies look to medical science graduates to work in areas such as drug registration and clinical trials coordination, as technical or marketing representatives and as policy analysts. Graduates also work as consultants, providing links with bodies such as state health departments and the Therapeutic Goods Administration.

Career options

Career options include positions in private and public hospitals, public health units, government departments and in biotechnology, health technology and pharmaceutical companies.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

 $The \, English \, proficiency \, requirement \, for \, international \, students \, or \, local \,$ applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard fulltime duration. Students can extend their courses only in exceptional circumstances

Assumed knowledge

Mathematics; English; and any two science subjects.

Course duration and attendance

Students can complete the course over three years full time. Full-time attendance involves approximately 20 hours each week on campus. Students may also be able to complete the course part time, usually at the rate of two subjects a semester (a 50 per cent load), taking six years to complete. Part-time students are required to attend some sessions in daytime hours.

Course structure

Students must complete a total of 144 credit points, made up of 120 credit points of core subjects and 24 credit points of elective subjects. There is some choice within the core subjects enabling students to focus on a particular theme or area of expertise. The elective subjects enable students to increase their expertise in other areas of science or other disciplines in the University. This can be in the form of a specialised 24-credit-point sub-major or by a varied selection of subjects.

Students must satisfactorily complete all core subjects and the required number of credit points of elective/sub-major subjects for award of the degree.

Note(s)

For international students, mid-year (July/August) intake may be considered on a case-by-case basis by the faculty.

Overview 3 4 1

This course provides graduates with a professional entry level for the practice of acupuncture and Chinese herbal medicine. It aims to produce professional Chinese medicine practitioners with highly adaptable and practical clinical skills accompanied by a thorough grounding in theory.

The course has a strong history of delivering highly skilled practitioners and potential researchers. Students complete 1050 clinical hours, starting in the first semester first year and are well equipped for private practice. Opportunity exists for clinical internship in China and Korea, or undertaking the international studies program by learning Mandarin and spending a year studying in China.

Career options

6ср

6ср 6ср

Career options include self employment in private practice or as part of an interdisciplinary clinical team. Opportunities exist in healthcare policy development and consultancy; research trial coordination; and sales, marketing and product development for herbal and pharmaceutical companies.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

Non-current school leavers must submit a personal statement to UTS by 30 November. Further information is available from:

www.undergraduate.uts.edu.au/apply

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard fulltime duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

Any two units of English; and any two units of science. Biology is recommended.

Course duration and attendance

This course can be completed over four years of full-time study. Attendance involves approximately 24 hours each week at the University. This also involves students practising their skills in the UTS acupuncture and herbal medicine clinics as required during the course.

Course structure

The course comprises 192 credit points of study and consists of eight academic stages, taken over four years of full-time study.

Industrial training/professional practice

Students gain practical clinical experience treating patients under the guidance of qualified health professionals.

Transfer between UTS courses

Students have the opportunity to transfer into the combined degree of Bachelor of Health Science in Traditional Chinese Medicine Bachelor of Arts in International Studies (C10164) (see page 209). This involves an additional two years of language and culture training in Australia and China.

Professional recognition

Graduates qualify for professional membership of most Australasian Chinese medicine professional associations. It is expected graduates will be eligible for registration under the new 2012 National Registration scheme.

C10206v5 Bachelor of Education in **Primary Education**

Award(s): Bachelor of Education in Primary Education (BEd) UAC code: 600038 CRICOS code: 008763C Commonwealth-supported place?: Yes Load credit points: 192 Course EFTSL: 4 Location: Kuring-gai campus

Overview

This course prepares students to teach in schools from kindergarten to Year 6. It is a practice-oriented course that aims to produce high-quality graduates through an integrated program of the latest educational theory, along with professional experience every semester in every year. Students continually develop teaching competence throughout the entire degree by teaching what they learn in professional experience.

This course is designed for students who want the benefit of extensive and diverse professional experience opportunities. Students also study innovative teaching methods in the key learning areas and have a wide choice of electives in which to add depth of study in fields of $interest. \, Students \, have \, the \, opportunity \, to \, undertake \, an \, international \,$ teaching practicum in countries such as China, Thailand or Samoa.

Course aims

The course aims to produce primary school teachers who are reflective in their practice, are able to manage the changing nature of teaching, have well developed interpersonal skills, are keen to put current developments in learning and teaching into practice, and have a commitment to lifelong learning.

Career options

Career options include a primary school teacher (kindergarten to Year 6) in a public or private school locally and internationally. Other options include a curriculum consultant, educational researcher or educator in a community setting such as a hospital, community or migrant education centre.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

 $The \, English \, proficiency \, requirement \, for \, international \, students \, or \, local \,$ applicants with international qualifications is: Academic IELTS: $7.0\,$ overall with a writing score of 7.0; or TOEFL: paper based: 584-609 overall with TWE of 5.0, internet based: 94-101 overall with a writing score of 23; or DEEP: B+; or PTE: 65-72; or CAE: 67-73

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard fulltime duration. Students can extend their courses only in exceptional circumstances

Applications

Local students

Local students apply through the Universities Admissions Centre.

International students

International students apply through UTS International.

Assumed knowledge

Competency in English and mathematics is a requirement. To gain employment as primary teachers in NSW schools, students must have achieved: HSC minimum Band 4 in English Advanced, Standard English or English as a Second Language, and HSC General Mathematics minimum Band 4 or completion of Mathematics or Extension Mathematics to an equivalent standard. At UTS, students who do not have the requisite HSC Mathematics are provided with a concurrent pathway to complete an equivalent course in General Mathematics (see www.education.uts.edu.au/students/maths).

Similarly, students who do not demonstrate the requisite HSC English are required to attend intensive workshops where they are provided with specific tuition.

Course duration and attendance

The course duration is four years of full-time study. The course may also be undertaken at a reduced load, provided it is completed within six years.

Course structure

The course totals 192 credit points of study and has three main streams.

- Key learning areas: develops student knowledge of the primary school syllabus and builds pedagogical skill in its implementation.
- Professional experience: builds student knowledge and skill in core aspects of teaching and learning practice, applies that practice in the field, and reflects on it critically in subsequent course elements.
- Contextual studies: where knowledge of the influences on students, on their evolving sense of themselves and their place in the social and physical world, and on their learning is examined.

Students also study a wide range of electives. Honours is available to meritorious students instead of electives.

Industrial training/professional practice

Students undertake professional experience teaching in schools and/ or community settings in every semester, and every year, throughout the degree. This includes a 20-day internship with a teaching and professional learning element. In the third year, an international teaching placement is available in China, Thailand or Samoa.

Honours Thesis 2

023635

Honours is available in the third and fourth years to meritorious students

Professional recognition

The course provides a teaching qualification recognised by the NSW Department of Education and Training, Independent Schools Association, Catholic Education Office, and is also recognised internationally. Accreditation of the primary teacher education component of the course is through the New South Wales Institute of Teachers (NSWIT). To gain employment as a teacher in NSW schools, graduates must meet the requirements of the NSWIT, including language proficiency and maths (see www.education.uts.edu.au/students/maths).

Overview

6ср

6cp

6cn

6ср

12cp

This combined degree prepares students to teach in schools from kindergarten to Year 6, ensuring they are well equipped to meet the challenges of local and international teaching. It is a practice-based course that aims to produce high-quality graduates through an integrated program combining the latest educational theory with professional experience. In the fourth year, students undertake a year of in-country study at an overseas university.

The degree is for students who want a strong practice-oriented primary education qualification and the benefit of learning and studying another language and culture, which includes a year living overseas studying in their country of choice. It may appeal to students who want an international study experience or are aiming for an international career.

Course aims

This combined degree aims to provide students with the professional education necessary for preparation for primary teaching, while at the same time providing an opportunity to acquire knowledge and understanding of another language and culture.

Career options

Career options include a primary school teacher (kindergarten to Year 6) in a public or private school, a curriculum consultant, educational researcher or educator in a community setting such as a hospital, community or migrant education centre. Career options in primary school teaching and teaching English as a second language overseas are enhanced by international experience.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

Admission to the combined degree is on merit according to the admissions policy for the Bachelor of Education in Primary Education (C10206) (see page 219). There is a range of entry levels to the various language and culture programs. Students are admitted to the international studies program with no guarantee of entry to a specific major, although every effort is made to meet students' preferences.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 7.0 overall with a writing score of 7.0; or TOEFL: paper based: 584-609 overall with TWE of 5.0, internet based: 94-101 overall with a writing score of 23; or DEEP: B+; or PTE: 65-72; or CAE: 67-73

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Applications

Local students

Local students apply through the Universities Admissions Centre.

International students

International students apply through UTS International.

Assumed knowledge

Competency in English and mathematics is a requirement. To gain employment as primary teachers in NSW schools, students

must have achieved: HSC minimum Band 4 in English Advanced, Standard English or English as a Second Language, and HSC General Mathematics minimum Band 4 or completion of Mathematics or Extension Mathematics to an equivalent standard. At UTS, students who do not have the requisite HSC Mathematics are provided with a concurrent pathway to complete an equivalent course in general mathematics. Similarly, students who do not demonstrate the requisite HSC English are required to attend intensive workshops where they are provided with specific tuition.

There are no prior language requirements for the international studies program (see page 87).

Course duration and attendance

The course duration is five years of full-time study. The course may also be undertaken at a reduced load, provided it is completed within six years. Students spend two semesters of study at a university or other higher education institution in the country of their major. The international studies component of the course is offered at City campus only.

Course structure

Students are required to complete 252 credit points of study, comprising 156 credit points in teacher education and 96 credit points in international studies.

The teacher education component includes three streams:

- Key learning areas: develops student knowledge of the primary school syllabus and builds pedagogical skill in its implementation.
- Professional experience: builds student knowledge and skill in core aspects of teaching and learning practice, applies that practice in the field, and reflects on it critically in subsequent course elements.
- Contextual studies: where knowledge of the influences on students, on their evolving sense of themselves and their place in the social and physical world, and on their learning is examined.

The Bachelor of Arts in International Studies requires undergraduates to study a region or country major over a minimum of three years. It is not offered as a separate degree, but is completed only in combination with the professional degree program.

Overseas study

Students spend their fourth year of study at a university overseas.

Industrial training/professional practice

The primary teacher education component includes the Professional Experience stream, which allows students to complete significant teaching and learning experiences in schools and other settings. This includes a 20-day internship with a teaching and professional learning element.

Award(s): Bachelor of Construction Project Management (BCPM) UAC code: 602025 CRICOS code: 044183B

Commonwealth-supported place?: Yes Load credit points: 192

Course EFTSL: 4 Location: City campus

Overview

Widely regarded as one of the most respected courses within the industry, the Bachelor of Construction Project Management provides a comprehensive construction education. This unique degree provides graduates with the broader skills and knowledge base required to meet the changing demands of the construction, infrastructure and related industries.

This course puts students at the forefront of contemporary industry practice as they deal with real-life examples and case studies that facilitate the application of theory in a way that is practical and relevant.

Graduates are renowned among employers for their practical knowledge and professional skills.

The course satisfies all the main accreditation requirements for the disciplines of construction management and quantity surveying. Students can also study sub-majors in areas of particular interest. Examples include sub-majors in environmental studies and architectural studies. The course also provides skills and knowledge that can be applied in other industries such as mining, petrochemicals and infrastructure development.

The course offers a unique blend of theory and practice that incorporates concurrent industrial experience with the end result being that students graduate as highly skilled and sought-after professionals.

Course aims

This course is concerned with the management of all aspects of the construction process, including business management, construction management, design management, project management, quantity surveying, contract administration and property development. It delivers all the recognised competencies for construction project management professionals while introducing the prospect of diversifying into project management.

Career options

Career opportunities for graduates include project manager, construction manager, construction economist, quantity surveyor, design manager, environmental manager, contract manager, site manager, construction programmer, cost engineer, estimator, facility manager and property developer.

Graduates have a wide range of employment opportunities and can work in both the private and public sectors for employers such as building proprietors, contractors, developers, government bodies and consultancy practices or be self-employed entrepreneurs. As key professionals in the construction industry, graduates work closely with other professional disciplines, industry groups and development authorities

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

UTS: Design, Architecture and Building may consider applications based on the results of the Special Tertiary Admissions Test (STAT) if students lack academic qualifications but have extensive professional experience. The STAT is conducted through the Universities Admissions Centre.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

Mathematics and any two units of English.

Credit recognition

Students with prior academic or industrial experience are considered for credit recognition for up to a maximum of 96 credit points (50 per cent of the course) and may be given the opportunity to tailor their program of study in line with subjects completed previously at other institutions. Contact a UTS Student Centre for further information.

Course duration and attendance

The course is offered on a four-year, full-time or six-year, parttime basis. Students may transfer between part-time and full-time attendance patterns. Part-time students attend one day and one evening a week. Full-time students may be expected to attend at any time during the week. The contact hours allocated to each subject are nominal and often involve a combination of lectures, tutorials, workshops and self-directed teaching methods. Some subjects are offered online and, according to demand, some subjects may be offered over Summer session.

Course structure

The course program consists of 192 credit points, comprising 28 6-credit-point core subjects and four 6-credit-point electives, the latter chosen either from within UTS: Design, Architecture and Building or from the many electives offered by other faculties throughout the

Students undertaking four elective subjects (24 credit points) within a common area are eligible for a sub-major. Sub-majors are offered in project management, construction finance/economics and architectural studies, depending on demand.

Industrial training/professional practice

In this course, the value of concurrent industry experience is recognised and students are required to accumulate relevant industry experience prior to graduating. The course provides part-time and flexible study options to enable students to gain this valuable industry experience during their studies.

Overview

Widely regarded as one of the most respected courses within industry, the Bachelor of Construction Project Management provides a comprehensive construction education. The combined Bachelor of Construction Project Management Bachelor of Arts in International Studies aims to provide graduates not only with those skills necessary for the management of all aspects of the construction process, but also to develop perspectives and understandings that enable them to meet the demands of an internationalised professional environment.

This course puts students at the forefront of industry as they deal with real-life examples, applying theory in a way that is practical and relevant. Graduates are renowned among employers for their hands-on knowledge and professional skills.

The course satisfies all the main accreditation requirements for the disciplines of quantity surveying and construction management and students can study a sub-major in project management or construction finance and economics. It also provides skills and knowledge that can be applied in other industries, such as mining, petrochemicals and infrastructure

UTS: Design, Architecture and Building offer a unique blend of theory and practice so that students graduate as highly skilled and soughtafter professionals. Concurrent industrial experience is a feature of the course with students required to acquire a specified level of industry experience before graduating.

Graduates also possess an advanced understanding of the language and culture of their chosen country of study, thus enabling them to pursue a range of career paths both locally and internationally.

Course aims

This course is concerned with management of all aspects of the construction process, including business management, construction management, design management, quantity surveying, contract management and property development. It delivers all the recognised competencies for construction project management professionals while introducing the prospect of diversifying into project management.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

Admission to the combined degree is on merit according to the admissions policy for the Bachelor of Construction Project Management (C10214) (see page 223). There is a range of entry levels to the various language and culture programs. Students are admitted to the international studies program (see page 87) with no guarantee of entry to a specific major, although every effort is made to meet students' preferences.

 $The \, English \, proficiency \, requirement \, for \, international \, students \, or \, local \,$ applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard fulltime duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

There are no prior language requirements for the international studies program (see page 87).

Course duration and attendance

The course duration is six years of full-time study. The contact hours allocated to each subject are nominal and often involve a combination of lectures, tutorials, workshops and self-directed teaching methods. Some subjects are delivered electronically through UTSOnline. Students spend two semesters of study at a university or other higher education institution in the country of their major.

Course structure

Students must complete 288 credit points, comprising 192 credit points in construction project management and 96 credit points in international studies. The construction project management component comprises 28 6-credit-point core subjects and four 6-creditpoint electives. Electives can be chosen either from within UTS: Design, Architecture and Building or from the many electives offered by course areas throughout the University. Students undertaking four elective subjects (24 credit points) within a common area are eligible for a sub-major. Sub-majors are offered in three areas, depending on demand. Work experience comprises an important component of the course. The Bachelor of Arts in International Studies requires undergraduates to study a region or country major over a minimum of three years. The Bachelor of Arts in International Studies is not offered as a separate degree, but is completed only in combination with the professional degree program.

Overseas study

Students spend their fourth year of study at a university overseas.

Industrial training/professional practice

In the Bachelor of Construction Project Management, the value of hands-on experience is recognised and part-time work in the industry is encouraged; all students are required to accumulate relevant industry experience prior to graduating. The course provides parttime and flexible study options to enable students to gain this valuable industry experience during their studies.

Load credit points: 192 Course EFTSL: 4 Location: City campus

Overview

This course is offered jointly by UTS: Information Technology and UTS: Business and is awarded with two testamurs. The information technology component provides a sound education in all aspects of computing and information technology for students who intend to make a career in the profession. The business component provides students with the knowledge, competencies and values necessary for fulfilling an effective career in business.

Graduates with solid IT skills who also understand business operations are in strong demand in industry. This combined program allows students to gain two degrees, leading towards a career in business IT operations in only four years.

Course aims

The aim of this course is to prepare graduates to apply an in-depth knowledge of information technology to the business activities of an organisation.

Career options

Career options include accountant, advertising consultant, analyst/programmer, banker, business analyst, economist, financial planner, information systems developer, ICT business analyst, IT project manager, management consultant, marketing manager, network specialist, software developer, systems analyst and web developer.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

Non-current school leavers are advised to complete the employment question on their UAC application and provide supporting statements of employment to UAC as bonus points may be awarded on the basis of relevant work experience.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583

overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

Mathematics and any two units of English.

HSC Mathematics Extension 1 and English Advanced are recommended.

External articulation

Students who gain entry through the UTS INSEARCH pathway are eligible for 48 credit points of credit recognition.

Students who have completed a relevant diploma at TAFE NSW may be eligible for credit recognition if subjects previously completed are equivalent to existing UTS subjects. Details are available from the Building 10 Student Centre.

Credit recognition

Students who have previously undertaken study at a university or other recognised tertiary education institution may be eligible for some academic credit for their prior study if the subjects previously completed are deemed by the Faculty of Engineering and Information Technology to be equivalent to subjects in the course.

The prior study must have been completed before commencement of this course, but no earlier than three years before commencement. Students must be able to demonstrate that their knowledge is current.

Credit recognition is not normally granted in this course for study completed at a private college except where UTS has an external articulation agreement with the college. For further details see:

www.it.uts.edu.au/courses/undergraduate/credit-recognition.html

There are no exemptions granted for the networking subjects 31270, 31277 and 31283 without the successful completion of the challenge test for each of the these subjects. A challenge test is granted at enrolment time to students who have completed the CCNA curriculum (or CCNP) at a university and/or TAFE diploma level where the awarding institution is a CISCO Networking Academy. These challenge tests are always held in the week before the commencement of semester.

Course duration and attendance

The course duration is four years of full-time study. Some subjects may be offered in an optional Summer session so that students can fast-track their studies.

Course structure

Students are required to complete 192 credit points, comprising 96 credit points of study in business and 96 credit points of study in information technology.

In the business component, students must complete eight foundation core subjects (6 credit points each) and a business major (48 credit points).

In the information technology component, students must complete eight foundation core subjects (6 credit points each) and an IT major (48 credit points).

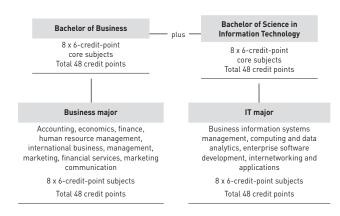

Industrial training/professional practice

Industrial training is available as an additional year and students enrol into the Diploma in Information Technology Professional Practice (C20049) (see page 299) once they have secured suitable full-time employment. This incorporates a minimum of nine months full-time work experience with four supporting subjects at UTS. Full-time students normally undertake the industrial training after completing Year 3. International students can work full-time for the duration of the diploma.

Course completion requirements

CBK90169 Major choice (Business)	48cp
STM90273 Core subjects (Business)	48cp
STM90651 Core subjects (Information Technology)	48cp
CBK90781 Major choice (Information Technology)	48cp
,	Total 192cp

Course diagram

Course program

Example programs are shown below for each IT major for a student who has chosen Human Resource Management for the business major. Students choose one business major (from CBK90169) and one IT major (from CBK90781).

Note: Subjects listed as electives and IT major subjects are only offered in a particular semester (or year) if there is sufficient demand and the necessary resources.

Undergraduate courses

C10224v2 Bachelor of Mathematics and Computing Bachelor of Arts in International Studies

Award(s): Bachelor of Mathematics and Computing (BMathComp) Bachelor of Arts in International Studies (BA)

UAC code: 609225 CRICOS code: 067091E

Commonwealth-supported place?: Yes

Load credit points: 240 Course EFTSL: 5 Location: City campus

Note(s)

For international students, mid-year (July/August) intake may be considered on a case-by-case basis by the faculty.

This course integrates studies in mathematics and computing with immersion in another language and culture, enhancing professional training and career options. The course is designed to meet the increasing industry need for graduates with both computational and analytical skills. It offers the prospect of careers in fields which require a sound knowledge of computing together with the ability to analyse and model practical situations.

Demand for mathematics and computing skills is increasing as quantitative analysis becomes more widespread in dealing with commercial and industrial problems. There is also a growing need for teachers with skills in computing as well as mathematics, and graduates of this course are well qualified to fill this role. Employment opportunities are enhanced by the international experience of studying and living overseas.

Career options

Career options include programmer, quantitative analyst, software engineer, systems analyst and technical applications software developer. Teachers with qualifications in this field are highly sought after. Graduates of this course can expect to gain employment in a range of companies and industries that rely on IT and computational techniques, including banks, finance, insurance, logistics and transport, and manufacturing.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

Admission to the combined degree is on merit according to the admissions policy for the Bachelor of Mathematics and Computing (C10158) (see page 201). There are no prior language requirements. There is a range of entry levels to the various language and culture programs. Students are admitted to the international studies program (see page 92) with no guarantee of entry to a specific major, although every effort is made to meet students' preferences.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of $\bar{4}$.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard fulltime duration. Students can extend their courses only in exceptional

Course duration and attendance

The combined degree is offered only on a full-time basis over five years. Students spend two semesters of study at a university or other higher education institution in the country of their major.

Course structure

Students are required to complete 240 credit points of study, comprising 144 credit points in mathematics and computing and 96 credit points in international studies. The mathematics and computing component consists of an integrated sequence of subjects in the mathematical sciences and information technology. The international studies component requires students to study a region or country major over a minimum of three years. The Bachelor of Arts in International Studies is not offered as a separate degree, but is completed only in combination with the professional degree program.

Graduation from the mathematics and computing component of the combined degree is not possible prior to completion of all components of the combined degree. Students wishing to graduate with a Bachelor of Mathematics and Computing prior to completion of the international studies component of the combined degree must apply for transfer to the Bachelor of Mathematics and Computing (C10158) (see page 201) single degree program where they must complete all requirements for the stand-alone single degree version.

Overseas study

Students spend their fourth year of study at a university overseas.

Course completion requirements

CBK90005	Country major choice	96ср
STM90324	Mathematics foundation subjects	72cp
STM90651	Core subjects (Information Technology)	48cp
CBK90373	Sub-major choice	24cp
	,	Total 240cp

Course program

The course commences in Autumn semester. The example program shown below is for a student choosing the Enterprise Systems Development sub-major, and the Germany major as their international studies major. Other countries may be chosen from the list of majors in CBK90005; the program has the same structure but with subjects $\,$ specific to the chosen country major.

Subjects 35212 and 35252 are only available in Autumn semester. Students who wish to choose one of these subjects from the options list in Year 5 Spring semester should contact the course director to discuss possible ways to re-sequence other subjects to permit this choice.

Further study at UTS

Suitably qualified graduates are eligible to proceed to an additional year of advanced study in the Bachelor of Science (Honours) in Mathematics (C09020) (see page 112) or the Bachelor of Science (Honours) in Information Technology (C09019) (see page 111).

Professional recognition

Graduates of this course are eligible for associate-level membership of the Australian Computer Society.

C10225v2 Bachelor of Midwifery

Award(s): Bachelor of Midwifery (BMid) UAC code: 606010 (FT), 606011 (PT) Commonwealth-supported place?: Yes

Load credit points: 144 Course EFTSL: 3 Location: City campus

Note(s)

This course is only offered to local students.

Students admitted to the Bachelor of Midwifery before 2012 should refer to the course entry in the 2011 handbook.

This course is not offered to international students.

Overview

The Bachelor of Midwifery incorporates midwifery theory, science and clinical practice in a range of health facilities. Graduates of the course are competent midwives who have the skills, knowledge and confidence to practise midwifery according to the international definition of the role and scope of practice of the midwife.

This course was the first Bachelor of Midwifery to be introduced in New South Wales. It provides the opportunity to apply for registration as a midwife with the Nursing and Midwifery Board of Australia without having to become a registered nurse beforehand.

Course aims

The course aims to produce informed, reflective, caring and compassionate midwives who demonstrate competencies related to professional responsibility, interpersonal processes and the exercise of clinical judgment. Graduates are capable of providing womancentred care in both hospitals and community settings. They practise reflective, evidence-based midwifery encompassing primary health care principles as well as emotional and social aspects of birth. They promote culturally sensitive care for women from indigenous and culturally and linguistically diverse communities. The course prepares students to identify and analyse the knowledge, skills and attitudes that will continue to develop them as midwives and lifelong learners. This includes meeting the challenges of contemporary midwifery practice and maternity service provision in Australia and internationally.

Career options

Career options include being a registered midwife in both hospital and community settings, and in both metropolitan and rural areas. Career progression opportunities include midwifery education and management, consultancy roles, e.g. lactation consultant and independent practice.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

The UTS Year 12 Bonus Scheme awards bonus points to Australian high school applicants based on performance in HSC subjects that are relevant to the course applied for. Further details are available at:

www.under graduate.uts.edu.au/bonus points

Current school leaver applicants are assessed solely on ATAR.

Entry to the course is competitive. Applicants who are over 20 and do not have competitive recognised academic qualifications are encouraged to sit a Special Tertiary Admissions Test or complete a TAFE certificate IV qualification or higher.

Non-current school leavers are strongly advised to submit a personal statement directly to UTS by 30 November 2012. Further information is available at:

www.undergraduate.uts.edu.au/apply

The English proficiency requirement for local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C

Eligibility for admission does not guarantee offer of a place.

6ср

Assumed knowledge

Any two units of English.

Any two units of science and any two units of mathematics are recommended.

Course duration and attendance

The course is offered at City campus on a three-year, full-time or five-year, part-time basis.

Course structure

Students must gain a minimum of 144 credit points to complete the Bachelor of Midwifery.

Full-time students study four subjects a semester incorporating midwifery theory, science and clinical practice.

Industrial training/professional practice

This course includes extensive midwifery practice, which is a compulsory component. Students undertake midwifery professional experience in an allocated area health service facility. Clinical placements occur in blocks each semester, and are in addition to time spent in the midwifery clinical practice laboratories that simulate the clinical environment. The placements involve morning, evening and possibly night shifts. Over the duration of the course, students are also required to follow 20 women throughout their pregnancy, birth and the period after birth. This requires students to be on-call to attend the labour and birth. Third-year students undertake a prolonged period of clinical experience with much of their time spent in a clinical environment. Third-year students also have the opportunity to complete a rural and remote placement.

All midwifery students must adhere to the requirements in the Ministry of Health policy directive, 'PD2011_005 Occupational Assessment, Screening and Vaccination Against Specified Infectious Diseases', prior to commencement of any clinical practice placements. The policy can be viewed at:

www.health.nsw.gov.au/policies/PD/2011/PD2011_005.html

The policy should be read in full as it outlines students' obligation for screening and immunisation against certain infectious diseases prior to commencing their clinical placement. Students are asked to provide evidence of their immunity or vaccination status, and screening for tuberculosis (TB) status may also be required prior to or at the time of commencement of the first clinical placement. Students should be aware that if they do not meet the requirements of the policy they cannot commence the placement and as a result are not able to complete the course.

Students are also required to undertake a National Criminal Record Check and obtain a National Police Certificate. Further information

www.health.nsw.gov.au/jobs/student clearance/index.asp

In the full-time program, students commence midwifery professional $% \left(1\right) =\left(1\right) \left(1\right)$ experience in the clinical setting in first year and this continues into second and third year. In the part-time program, midwifery professional experience in the clinical setting occurs in the second, fourth and fifth years of the course.

C10226v3 Bachelor of Business

Award(s): Bachelor of Business (BBus)

CRICOS code: 063721A

Commonwealth-supported place?: No

Load credit points: 144 Course EFTSL: 3

Location: Shanghai University

Note(s)

This course is only offered offshore. It is available in Shanghai. The language of tuition is English.

Overview

The Bachelor of Business offers students a sound background in all areas of business through common core subjects, in addition to indepth knowledge in one or more chosen areas of interest.

This course provides a basic understanding of important aspects of business with a choice of majors.

Course aims

The degree seeks to provide students with the knowledge, competencies and values necessary to develop critical, analytical and evaluative skills essential for a fulfilling and effective career in business.

Career options

Career options include careers in international business and management.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

In addition to the academic and English language requirements, students who have successfully completed Commerce offered at SILC (Sydney Institute of Language and Commerce in Shanghai University), are also required to achieve:

- a WAM of 60 for the graduates of the Insearch Diploma of Business Studies, or
- a WAM of 50 for the graduates of the Insearch Diploma of Business and Commerce.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Assumed knowledge

Mathematics and any two units of English. Bridging courses are available.

Credit recognition

According to the agreement between Shanghai University (SU) and UTS, students from SU who meet both the English language requirement and the academic requirement can apply for the UTS Bachelor of Business and are given credit recognition for their studies

at SU. These students are granted one-year credit or advanced standing to the second year of the UTS Bachelor of Business.

This advanced standing practice is the same as that for the Insearch UTS Diploma of Business Studies and Diploma of Business and Commerce delivered in Sydney.

Students who do not have the SILC diploma but who have appropriate academic and English language requirements may apply for advanced standing.

Course duration and attendance

The eight subjects taught by UTS are delivered in two teaching blocks with all the subjects completed in one year. The subjects are delivered in a lecture/tutorial format. During each 12-week block, UTS academics coordinate these subjects and provide face-to-face lectures in Shanghai.

The delivery pattern of these subjects may be modified from time-to-time and by mutual agreement.

Course structure

There are two majors for this course that are delivered by UTS at Shanghai University: the Management major and the International Business major.

The structure of the delivery mode in Shanghai University is:

- The first part (48 credit points) comprises the Insearch Diploma of Business Studies or the Insearch Diploma of Business and Commerce. This part is equivalent to the core or the first year of the UTS Bachelor of Business. This part is delivered in standard, full-time mode with semester-long subjects through SILC. On successful completion, students are granted one-year credit or advanced standing to the second year of the UTS Bachelor of Business.
- The second part of the UTS Bachelor of Business (48 credit points) comprises the Management major or the International Business major in the UTS Bachelor of Business. Academics from UTS teach eight subjects over two teaching blocks in one year. The subjects are delivered in Shanghai University using a lecture/tutorial format.
- The third part of the UTS Bachelor of Business comprises 48 credit-points of non-specified elective subjects taught by Shanghai University. These electives are drawn from a range of degree-level subjects offered in English by SU in standard full-time mode as semester long subjects. The subjects are accredited as part of the UTS Bachelor of Business in accordance with UTS' quality assurance policies and processes.

Course completion requirements

 STM90273 Core subjects (Business)
 48cp

 CBK90812 Major choice
 48cp

 CBK90813 Year 3 (Business)

 Total 144cp

Transfer between UTS courses

The following study options are available to Shanghai University students who wish to transfer to study a full year of the course at UTS in Sydney.

- Major (48 credit points): Students need to seek advice at the
 time of enrolment as to which major they are eligible to take
 based on their prior knowledge and the timetabling of subjects
 during their chosen semesters. Students who study the UTS
 Management major at Shanghai University are not allowed to
 undertake the Management major in Sydney.
- Two sub-majors (24 credit points each) or one sub-major and four electives (24 credit points each): Students need to seek advice at the time of enrolment as to which sub-majors, electives and subjects they are eligible to take based on their prior knowledge and the timetabling of subjects during their chosen semesters.

Other information

The overall responsibility for all academic aspects of the Bachelor of Business degree at Shanghai University resides with the Director of China Business Courses, Associate Professor Kylie Redfern and the Dean of the Faculty of Business, Professor Roy Green. UTS staff works closely with senior staff from SILC and Shanghai University in relation to all aspects of the course through the dual degree management committee.

Associate Professor Kylie Redfern telephone +61 2 9514 3917 email Kylie.Redfern@uts.edu.au

C10227v3 Bachelor of Science in Environmental Forensics

Award(s): Bachelor of Science in Environmental Forensics (BSc)

UAC code: 607030 CRICOS code: 053206C

Commonwealth-supported place?: Yes

Load credit points: 144 Course EFTSL: 3 Location: City campus

Note(s)

For international students, mid-year (July/August) intake may be considered on a case-by-case basis by the faculty.

Overview

This course provides graduates with skills for careers in the new and fast-developing discipline of environmental forensics that is integral to the processes of environmental protection. It focuses on studies of living and non-living components of the environment and on the impacts of human use of environmental resources on the ecosystem.

The course has an interdisciplinary approach that allows students to gain skills and knowledge through theoretical and practice-based field and laboratory studies of ecology and environmental chemistry, and to understand the importance of investigatory scientific evidence in the legal and regulatory framework that governs the environmental protection process.

This cross-disciplinary course gives students the opportunity to combine studies of environmental biology, chemistry and law with a choice of further specialisations via a sub-major. It is attractive to students who are interested in the broad application of science to other disciplines without necessarily undertaking a combined degree.

Course aims

The course aims to produce professional environmental scientists with a solid scientific background in environmental protection, thereby enabling them to contribute to environmental management, policy and planning processes. Graduates gain scientific training and an understanding of the legal framework underlying environmental protection.

Career options

Career options include positions in both government and private industry and in environment protection and natural resource management as environmental analysts and consultants, environmental scientists and managers, policy advisers and planners. Students can also develop careers in teaching (in the secondary or TAFE sector, or as education officers) or in research (as research officers for organisations, universities or CSIRO).

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

Mathematics; any two units of English; and any two units of science.

Course duration and attendance

Students can complete the course over three years full time. Full-time attendance involves approximately 20 hours each week on campus. Students may also be able to complete the course part time, usually

at the rate of two subjects a semester (a 50 per cent load), taking six years to complete. Part-time students are required to attend some sessions in daytime hours.

Course structure

Students must complete a total of 144 credit points, made up of 120 credit points of core subjects and 24 credit points of elective subjects. The elective subjects enable students to increase their expertise in other areas of science or in other disciplines in the University. This can be in the form of a specialised 24-credit-point sub-major or by a varied selection of subjects. Students must satisfactorily complete all core subjects and the required number of credit points of elective/sub-major subjects for award of the degree.

Industrial training/professional practice

Opportunities for practical experience exist through electives that provide experience in research or general scientific practice.

Course program

The program shown assumes full-time attendance, commencing in Autumn semester.

Note: The subjects 79004 Environmental Law and Science and 79023 Environmental Forensic Law are only offered in odd-numbered years. The course program provided below is for students commencing Year 1 or Year 3 in an odd-numbered year, e.g. 2013.

Students entering Year 2 in an odd-numbered year, e.g. 2013, should choose 79004 Environmental Law and Science and 79023 Environmental Forensic Law in place of two of their Autumn and/or Spring semester electives. These students will then do the two electives instead of 79004 Environmental Law and Science and 79023 Environmental Forensic Law in Year 3.

C10228v3 Bachelor of Science in Marine Biology

Award(s): Bachelor of Science in Marine Biology (BSc)

UAC code: 607035 CRICOS code: 053205D

Commonwealth-supported place?: Yes

Load credit points: 144 Course EFTSL: 3 Location: City campus

Note(s)

For international students, mid-year (July/August) intake may be considered on a case-by-case basis by the faculty.

This course focuses on how the marine environment works and how it can be better managed. This requires a thorough understanding of the way plants, animals and micro-organisms function in marine ecosystems (including estuarine, coastal, oceanic and coral reef ecosystems and Antarctica), as well as the skills required to detect and assess detrimental impacts on these marine environments resulting from anthropogenic sources and climate change.

The course has a strong practical and field-based focus. Students learn important concepts and skills through a combination of theory, laboratory and real-world experience via field trips to a range of marine environments.

Career options

Career options include positions in government departments such as fisheries, national parks and wildlife, state environmental protection authorities and other state departments such as infrastructure, natural resources and planning. Graduates are also employed by local coastal councils as environmental officers, in resource industries and consulting firms, as research officers with CSIRO and at universities, and as teachers at schools and TAFE colleges.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard fulltime duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

Mathematics; any two units of English; and any two units of science.

Course duration and attendance

Students can complete the course over three years full time. Full-time attendance involves approximately 20 hours each week on campus. Students may also be able to complete the course part time, usually at the rate of two subjects a semester (a 50 per cent load), taking six years to complete. Part-time students are required to attend some sessions in daytime hours.

Course structure

Students must complete a total of 144 credit points, made up of 120 credit points of core subjects and 24 credit points of elective subjects. The elective subjects enable students to increase their expertise in other areas of science or other disciplines in the University. This can be in the form of a specialised 24-credit-point sub-major or by a varied selection of subjects.

Students must satisfactorily complete all core subjects and the required number of credit points of elective/second major subjects for award of the degree.

C10229v3 Bachelor of Science in Games Development

Award(s): Bachelor of Science in Games Development (BSc) UAC code: 603225 CRICOS code: 057197M Commonwealth-supported place?: Yes Load credit points: 144

Course EFTSL: 3 Location: City campus

Overview

This course offers a sound education in all aspects of information technology and develops the diverse skills necessary for a career in computer games development.

Students gain enhanced work-ready expertise in games development; practical problem-solving skills based on leading-edge IT theory; communication skills in a variety of forms including written, verbal, online and technical literacies; and an awareness of the principles of ethics and corporate governance in a variety of settings.

Course aims

This course aims to produce graduates who are able to:

- apply core technical skills to problem analysis and decisionmaking in computer games development
- collaborate and be creative within a professional environment through the application of technical, problem-solving and teamwork skills
- communicate effectively in a variety of forms across diverse business and technical environments
- apply ethical, legal and political considerations to technological issues as socially responsible professionals
- demonstrate a capacity to take a leadership role in technical and business situations, and
- be proactive and reflective learners in relation to knowledge, skills, experience and career direction.

Career options

 $Career\ options\ include\ computer\ animation/\ graphics\ specialist, and$ computer games developer, systems analyst, analyst/programmer, IT project manager, software developer, software engineer or web developer.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

Non-current school leavers are advised to complete the employment question on their UAC application and provide supporting statements of employment to UAC as bonus points may be awarded on the basis of relevant work experience.

Applicants who have successfully completed 19050 Diploma of Information Technology (Games Development) at TAFE NSW may be eligible for credit towards this course.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.0 overall with a writing score of 6.0; or TOEFL: paper based: 500-549 overall with TWE of 4.5, internet based: 60-78 overall with a writing score of 21; or DEEP: C; or PTE: 50-57; or CAE: 52-57

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard fulltime duration. Students can extend their courses only in exceptional circumstances.

Applications

Local students

Both school leavers and non-current school leavers may apply through UAC for this course. This course does not have an intake commencing in Spring semester.

Assumed knowledge

Mathematics and any two units of English.

HSC Mathematics Extension 1 and English Advanced are recommended.

External articulation

Students who have completed the Diploma of Information Technology (Games Development) (19050) at TAFE NSW receive an exemption from three core subjects (31266, 48023, 48024) and 30 credit points of advanced standing, totalling 48 credit points of credit recognition.

Credit recognition

In addition to the external articulation with TAFE NSW, students who have previously undertaken other study at a university or other recognised tertiary education institution may be eligible for some academic credit for their prior study if the subjects previously completed are deemed by the Faculty of Engineering and Information Technology to be equivalent to subjects in the course.

The prior study must have been completed before commencement of this course, but no earlier than three years before commencement. Students must be able to demonstrate that their knowledge is current.

Credit recognition is not normally granted in this course for study completed at a private college except where UTS has an external articulation agreement with the college. TAFE IT diplomas and advanced diplomas completed within three years of enrolment may be granted some credit recognition. For further details see:

www.it.uts.edu.au/courses/undergraduate/credit-recognition.html

There are no exemptions granted for the networking subjects 31270, 31277 and 31283 without the successful completion of the challenge test for each of the these subjects. A challenge test is granted at enrolment time to students who have completed the CCNA curriculum (or CCNP) at a university and/or TAFE diploma level where the awarding institution is a CISCO Networking Academy. These challenge tests are always held in the week before the commencement of semester.

Course duration and attendance

The course can be completed in three years of full-time or six years of part-time study. For students who receive the 48 credit points in credit recognition, the course can be completed in two years of fulltime or four years of part-time study. A significant number of subjects are offered in the evening but some daytime attendance is required for part-time students.

Course structure

Students are required to complete 144 credit points, comprising 48 credit points of IT core subjects, 48 credit points of games development core subjects, and 48 credit points of elective subjects. Eligible students who receive 48 credit points of credit recognition complete a total of 96 credit points of academic study.

Industrial training/professional practice

Industrial training is available as an additional year and students enrol into the Diploma in Information Technology Professional Practice (C20049) (see page 299) once they have secured suitable full-time employment. This incorporates a minimum of nine months full-time work experience with four supporting subjects at UTS.

C10235v2 Bachelor of Accounting

Award(s): Bachelor of Accounting (BAcc)

UAC code: 601010

Commonwealth-supported place?: Yes

Load credit points: 150 Course EFTSL: 3.125 Location: City campus

Note(s)

This course is only offered to local students.

This is a scholarship degree intended for recent school leavers. Students can only add this course to their preferences until 26 October 2012.

This course is not offered to international students.

Overview

The Bachelor of Accounting is a cooperative education program in accounting. It is an intensive course offered in conjunction with major employers. Students complete a compulsory first major in accounting and receive a scholarship and full-time work training.

This course is a specialist degree for high-achieving students who view an accounting career as an excellent foundation for future business leadership. All students in the course receive a \$46,500 scholarship over the three years, a year of full-time industry experience and are encouraged to complete a second major or sub-major in another business discipline. It has a historical graduate employment rate greater than 95 per cent.

Career options

Career options include accountant, auditor, business analyst, investment manager, management accountant, taxation adviser. Experienced accountants are highly sought after in all industries as well as government and not-for-profit organisations.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

This is an intensive scholarship course for current school leavers. Special application and selection procedures apply, including an early closing date for applications. Full details on application and selection is available from the Bachelor of Accounting website at:

www.business.uts.edu.au/bofacc

Eligibility for admission does not guarantee offer of a place.

Assumed knowledge

Mathematics and any two units of English.

Course duration and attendance

The course is completed in three years of full-time study, which includes two separate half years of full-time work training. Some subjects are fast-tracked over Summer session, while others are taken part-time during full-time work training, to allow completion of the degree within three years.

Course structure

The course comprises 150 credit points. All students must complete nine foundation core subjects and a compulsory accounting major, and choose from a second major, two sub-majors, or a sub-major plus four electives. Electives or structured elective sequences (totalling 24 credit points) can be taken from any faculty in the University, or from another university or its equivalent, with faculty approval.

Industrial training/professional practice

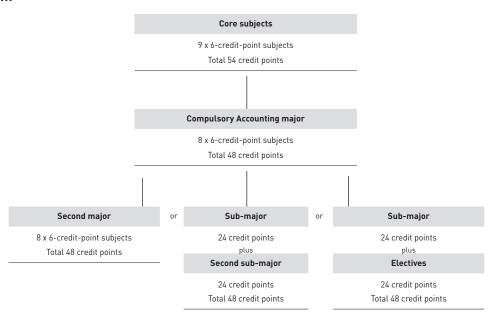

This course includes two, full-time, six-month industry internships, with two different sponsoring employers.

The first internship is in the second half of the first year of the course; the second internship is in the first half of the third year of the course. Students are not paid by the sponsoring employer during these internships, but continue to receive their scholarship.

Course aims

The course aims to produce graduates who are able to apply, in the context of any organisation, the knowledge and skills required of:

- information systems professionals in business units who integrate packaged systems rather than develop systems from first principles
- information technology professionals who develop systems from first principles
- network specialists who build, maintain and administer complex network systems, or
- computing specialists for technical research careers.

The course also aims to:

- provide sufficient language skills to live and work in another culture, and
- encourage understanding and appreciation of, and sensitivity towards, diverse cultural perspectives, practices, needs and values, in international and local contexts.

Career options

Career options include business analyst, network engineer, network specialist, software developer, software engineer or web developer. Graduates of this course are in high demand with technology companies and industries that use IT such as banking, construction, energy, finance, government, manufacturing, retail and transport. Options are enhanced by international experience, making students more marketable to prospective employers, including multinational companies.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

Admission requirements are the same as the Bachelor of Science in Information Technology Diploma in Information Technology Professional Practice (C10152) (see page 196).

There are no prior language requirements for the international studies program. Entry level to the various language and culture programs depends upon students' prior knowledge of the relevant language. Students are admitted to the international studies program with no guarantee of entry to a specific country major, although every effort is made to meet their preferences.

Non-current school leavers are advised to complete the employment question on their UAC application and provide supporting statements of employment to UAC as bonus points may be awarded on the basis of relevant work experience.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

For the information technology component, mathematics and any two units of English. There are no prior language requirements for the international studies program (see page 87).

 $Mathematics \ Extension \ 1 \ and \ English \ Advanced \ are \ recommended.$

External articulation

Students who gain entry through the UTS INSEARCH pathway are eligible for 48 credit points of credit recognition.

Students who have completed a relevant diploma at TAFE NSW may be eligible for at least 24 credit points of credit recognition. Details are available from the Building 10 Student Centre.

Credit recognition

Information technology component: Students who have previously undertaken study at a university or other recognised tertiary education institution may be eligible for some academic credit for their prior study if the subjects previously completed are deemed by the Faculty of Engineering and Information Technology to be equivalent to subjects in the course.

The prior study must have been completed before commencement of this course, but no earlier than three years before commencement. Students must be able to demonstrate that their knowledge is current.

Credit recognition is not normally granted in this course for study completed at a private college except where UTS has an external articulation agreement with the college. TAFE IT diplomas and advanced diplomas completed within three years of enrolment may be granted some credit recognition. For further details see:

www.it.uts.edu.au/courses/undergraduate/credit-recognition.html

There are no exemptions granted for the networking subjects 31270, 31277 and 31283 without the successful completion of the challenge test for each of the these subjects. A challenge test is granted at enrolment time to students who have completed the CCNA curriculum (or CCNP) at a university and/or TAFE diploma level where the awarding institution is a CISCO Networking Academy. These challenge tests are always held in the week before the commencement of semester.

Course duration and attendance

The course is of five years' duration. Students spend two semesters of study at a university or other higher education institution in the country of their major. Students may undertake an extra year with the Diploma in Information Technology Professional Practice (C20049) (see page 299).

Course structure

Students are required to complete 240 credit points, comprising 96 credit points in information technology, 96 credit points in international studies and 48 credit points of electives. The 48 credit points of electives can be a combination of a second IT major, or two sub-majors, or one sub-major and four electives, or eight electives. The Bachelor of Arts in International Studies requires undergraduates to study a region or country major over a minimum of three years.

Overseas study

Students spend their fourth year of study at a university overseas.

Industrial training/professional practice

Industrial training is available as an additional year and students enrol into the Diploma in Information Technology Professional Practice (C20049) (see page 299) once they have secured suitable full-time employment. This incorporates a minimum of nine months full-time work experience with four supporting subjects at UTS. After completing Year 4 (in-country study), students have the option to undertake the Diploma in Information Technology Professional Practice.

Biomedical Science) CRICOS code: 040705B

Commonwealth-supported place?: Yes

Load credit points: 144 Course EFTSL: 3 Location: City campus

Note(s)

For international students, mid-year (July/August) intake may be considered on a case-by-case basis by the faculty.

Overview

Students may follow any of 15 different specialised programs leading to the award of a degree naming the chosen discipline, e.g. Bachelor of Science in Applied Physics, or Medical Science, or any of the other specialised disciplines available. Majors are chosen at the end of first year when students have experienced a range of disciplines and are more equipped to choose their preferred path. Students may also choose not to follow a major, but to select a range of second and third year subjects to tailor their study according to their interests and graduate with a cross-disciplinary science degree.

The flexibility of this course allows students to either specialise in a specific professional area or to develop skills and knowledge in a range of scientific disciplines. All majors aim to produce professional scientists with a thorough grounding in theory and highly adaptable and practical scientific, experimental and computational skills relevant to the discipline chosen.

Career options

Graduates are highly versatile as they can work in almost any industry such as biotechnology, biomedical science, medical science, marine biology, environmental management and forensics, mathematics, statistical modelling, applied chemistry, applied physics, nanotechnology and material science. Graduates could be employed to analyse traffic flow, calculate the optimum distribution of branches for major banks, set rates of insurance premiums, analyse the consumer demand for products, be part of a medical team working on groundbreaking research, determine the effectiveness of new drugs, evaluate the environmental impact of pollution or provide advice on the stock market.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

Mathematics; any two units of English.

At least two units of science relevant to the individual discipline chosen is recommended; HSC Mathematics Extension 1 is recommended for those majoring in mathematics/statistics.

Course duration and attendance

Students can complete the course in three years of full-time study. Full-time attendance involves approximately 20 hours each week on campus. Students may also be able to complete the course part time,

usually at the rate of two subjects a semester (a 50 per cent load), taking six years to complete. Part-time students are required to attend some sessions in daytime hours.

Course structure

Students must complete a total of 144 credit points to graduate. Subjects offered by the University have been classified as introductory (normally taken in stages 1 and 2), intermediate (stages 3 and 4) and advanced (stages 5 and 6 or later). In the Bachelor of Science, students are required to complete one of three introductory foundation streams (mathematical sciences, physical sciences, life and environmental sciences). Upon the successful completion of first year, they may choose one of the majors that follow from that stream. The chosen major specifies a series of intermediate and advanced subjects that, if taken, result in award of a Bachelor of Science in that major.

Alternatively, students may choose not to take a specific major but a flexible mix of subjects of interest and graduate with a Bachelor of Science degree without a specified major. If so, they must complete 36 credit points of intermediate and 36 credit points of advanced science subjects. In doing so, students must ensure that they have completed the required prerequisite subjects at each stage. It cannot be guaranteed that all subjects that students in a flexible program wish to take together can be timetabled without clashes and so students need to check timetable constraints before final subject choice each semester.

The Bachelor of Science also contains 24 credit points of free elective subjects that enable students to increase their expertise in other areas of science or other disciplines in the University. This can be in the form of a specialised 24-credit-point sub-major or by a varied selection of subjects.

Students must satisfactorily complete 120 credit points of specified major or flexible science subjects and, in addition, 24 credit points of elective/sub-major subjects for award of the degree.

Course completion requirements

CBK90653 Stream choice 144cp
Total 144cp

Course program

The majors available and the course programs for each major are shown below.

Note: In the Environmental Forensics major the subjects 79004 Environmental Law and Science and 79023 Environmental Forensic Law are only offered in odd-numbered years. The course program provided below is for students commencing Year 1 or Year 3 in an odd-numbered year, e.g. 2013.

Students entering Year 2 in an odd-numbered year, e.g. 2013, should choose 79004 Environmental Law and Science and 79023 Environmental Forensic Law in place of two of their Autumn and/or Spring semester electives. These students then do the two electives instead of 79004 Environmental Law and Science and 79023 Environmental Forensic Law in Year 3.

C10243v1 Bachelor of Science Bachelor of Arts in International Studies

Award(s): Bachelor of Science in (name of Science major) (BSc)

Bachelor of Arts in International Studies (BA)

UAC code: 609250 CRICOS code: 026202J

Commonwealth-supported place?: Yes

Load credit points: 240 Course EFTSL: 5 Location: City campus

Note(s)

For international students, mid-year (July/August) intake may be considered on a case-by-case basis by the faculty.

Overview

In the science component of this combined degree, students may select any one of 12 different specialised programs leading to the award of a science degree naming the chosen discipline, or students may select a range of science subjects to tailor their study according to their interests. In the international studies component, students are immersed in another language and culture. The combined degree program is aimed at increasing students' awareness of international contexts and producing graduates who are well prepared for professional careers in science in an international setting.

Career options

Career options include those listed for the single Bachelor of Science (C10242) (see page 241) degree, but global opportunities are enhanced by the international perspective provided by the international studies component and by the specific language and culture chosen.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

Admission to the combined degree is on merit according to the admissions policy for the Bachelor of Science (C10242) (see page 241). There is a range of entry levels to the various language and culture programs. Students are admitted to the international studies program (see page 92) with no guarantee of entry to a specific major, although every effort is made to meet students' preferences.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

Mathematics; English; and at least one science subject. There are no prior language requirements for the international studies program (see page 87).

HSC Mathematics Extension 1 is recommended for those majoring in mathematics/statistics.

Course duration and attendance

This course is offered over five years full time. Full-time attendance involves approximately 20 hours each week on campus. Students spend two semesters of study at a university or other higher education institution in the country of their major.

6ср

6ср

Course structure

All students must complete 240 credit points of study, comprising 144 credit points relating to the Bachelor of Science and 96 credit points relating to the Bachelor of Arts in International Studies. The Bachelor of Arts in International Studies requires undergraduates to study a region or country major over a minimum of three years. The Bachelor of Arts in International Studies is not offered as a separate degree, but is completed only in combination with the professional degree program.

Graduation from the science component of the combined degree is not possible prior to completion of all components of the combined degree. Students wishing to graduate with a Bachelor of Science prior to completion of the international studies component of the combined degree must apply for transfer to the Bachelor of Science (C10242) (see page 241) single degree program where they must complete all requirements for the stand-alone single degree.

Overseas study

Students spend their fourth year of study at a university overseas.

C10244v1 Bachelor of Forensic Science in Applied Chemistry

Award(s): Bachelor of Forensic Science in Applied Chemistry (BForSc)

UAC code: 607020 CRICOS code: 061246F

Commonwealth-supported place?: Yes

Load credit points: 144 Course EFTSL: 3 Location: City campus

For international students, mid-year (July/August) intake may be considered on a case-by-case basis by the faculty.

Overview

This course prepares students for entry to professional work in the field of applied chemistry or as specialists in the forensic science area. It includes a foundation in the basic sciences, with in-depth development of chemistry and analytical sciences and forensic techniques, emphasising forensic applications.

The hands-on course is well regarded nationally and internationally. It is unique in Australasia and draws on UTS's strong expertise in both forensic science and chemistry to produce graduates prepared for employment in either field. Facilities and equipment are worldclass, with internationally recognised teaching, research and access to leading forensic experts. The course has strong links with the federal and state police services, national and international forensic institutions and the analytical industry.

Course aims

This course aims to produce professional forensic scientists and chemists with highly adaptable and practical scientific skills, accompanied by a thorough grounding in theory.

Career options

Career options include positions in the police service (in crime scene or laboratories), in state and federal law enforcement agencies, in government and private forensic or drug detection laboratories, in environmental protection agencies and in pharmaceutical and chemical industries.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard fulltime duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

Mathematics; any two units of English; and any two units of science. HSC Mathematics Extension 1; Chemistry; Physics are recommended.

Course duration and attendance

Students can complete the course over three years full time. Full-time attendance involves approximately 24 hours each week on campus. Students may also be able to complete the course part time, usually at the rate of two subjects a semester (a 50 per cent load), taking six years to complete. Part-time students are required to attend some sessions in daytime hours.

Course structure

The course comprises 144 credit points of study. Stages 1-4 (the first two years) of the program are similar, though not identical, to the Bachelor of Science (Applied Chemistry major) (C10242) (see page 241). Stages 5-6 (the final year) are strongly focused on forensic studies.

Award(s): Bachelor of Science in Information Technology (BSc)

Bachelor of Laws (LLB) UAC code: 609020 CRICOS code: 064382G

Commonwealth-supported place?: Yes

Load credit points: 240 Course EFTSL: 5 Location: City campus

Overview

The primary goal of this combined degree is to prepare lawyers with an expert knowledge of IT qualifying them to work as IT professionals in a legal environment.

The law component of this course provides a thorough grounding in Australian legal practice. The information technology component offers a sound education in all aspects of computing and information technology and allows students to gain a specialisation with an IT

The information technology component adopts a practice-based approach to IT education and the course content is a mix of theory and practice. As well as gaining strong technical skills in IT, students gain skills in business analysis, problem solving, teamwork and communication.

Career options

Lawyers with IT skills are in demand. Career opportunities include lawyer or policy adviser in various government departments, in-house legal counsel to an IT or software company, or specialist in areas such as intellectual property, e-commerce and privacy or internet censorship. Alternatively, graduates can work as IT professionals in legal practice, legal publishing or private law firms.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard fulltime duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

HSC or equivalent mathematics; and any two units of English. Mathematics Extension 1 and English Advanced are recommended.

Credit recognition

Credit recognition is not normally granted in this course for study completed at a private college, except where UTS has an external articulation agreement with the college. There are no exemptions granted for the networking subjects 31270, 31277 and 31283 without the successful completion of the challenge test for each of the these subjects. A challenge test is granted at enrolment time to students who have completed the CCNA curriculum (or CCNP) at a university and/ or TAFE diploma level where the awarding institution is a CISCO Networking Academy. These challenge tests are always held in the week before the commencement of semester.

Course duration and attendance

The course duration is five years of full-time study. The law component requires attendance of 10-15 hours of lectures a week and timetable constraints require attendance at daytime and evening classes. The IT component normally requires around 12 hours attendance of lectures and seminars a week and attendance at some evening classes may be required. The Diploma in Information Technology Professional Practice (C20049) (see page 299) includes at least nine months of paid work experience in the IT industry.

Course structure

The course comprises a total of 240 credit points, allowing students to graduate with the separate degrees of Bachelor of Science in Information Technology and Bachelor of Laws. The study components for course completion are as follows.

The law component of 144 credit points is made up of:

- 102 credit points of compulsory core law subjects, and
- 42 credit points of law options.

The IT component of 96 credit points is made up of:

- 48 credit points of core IT subjects, and
- 48 credit points of subjects for an IT major.

Industrial training/professional practice

To practise as a lawyer in NSW, students need to successfully complete an accredited legal academic qualification (e.g. Bachelor of Laws) and an accredited course of practical legal training (PLT), which UTS offers through its PLT program.

Students enrolled in this course may complete their practical legal training by undertaking a postgraduate course in PLT, such as the Graduate Certificate in Professional Legal Practice (C11232) (see page 467).

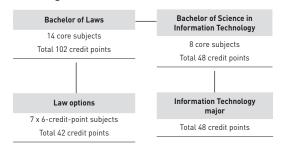

Students also have the option to undertake the Diploma in Information Technology Professional Practice (C20049) (see page 299) once they have secured suitable full-time employment in the IT industry. This incorporates a minimum of nine months' full-time paid work experience with four supporting subjects at UTS.

Levels of award

Select 24 credit points of options

The Bachelor of Laws may be awarded with first or second class honours, which do not require an additional honours year. Honours candidates must complete the research thesis subject within the law option component. The rules concerning the Bachelor of Laws with honours can be found in undergraduate course information (see page 96).

The Bachelor of Science in Information Technology may also be awarded with a distinction, credit or pass.

Honours

Students interested in research and who excel in their IT studies are eligible to undertake one additional full-time year of study in the Bachelor of Science (Honours) in Information Technology (C09019) (see page 111). The honours year is also available on a part-time basis over two years.

Professional recognition

The IT component qualifies for professional-level membership of the Australian Computer Society.

The law component of the course satisfies the requirements for admission to the Supreme Court of NSW as a lawyer, provided students complete a practical legal training (PLT) program, such as the Graduate Certificate in Professional Legal Practice (C11232) (see page 467).

C10246v1 Bachelor of Arts in Communication (Journalism)

Award(s): Bachelor of Arts in Communication (BA)

UAC code: 600013 CRICOS code: 032309C

Commonwealth-supported place?: Yes

Load credit points: 144 Course EFTSL: 3 Location: City campus

Overview

Journalism education at UTS is based on the principle that professional journalism is founded on the public's right to know. This degree develops professional skills across all media and critically engages with the intellectual, ethical and political foundations of journalism.

This course is designed to meet the essential practical skills and theoretical knowledge needed for a career injournalism. Students gain a crucial understanding of the role that journalists play in creating a democratic public sphere, providing a forum for debate and giving voice to diverse communities. The course equips students with advanced research, writing, reporting and analytical skills for print, television, video, radio, audio and online media; and knowledge of the intellectual, ethical and political foundations of journalism.

Career options

Career options include reporters, producers, publishers, editors, subeditors, feature and freelance journalists, investigative journalists, media researchers, and strategists in the print, broadcast and online media.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 7.0 overall with a writing score of 7.0; or TOEFL: paper based: 584-609 overall with TWE of 5.0, internet based: 94-101 overall with a writing score of 23; or DEEP: B+; or PTE: 65-72; or CAE: 67-73

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

HSC English and computer literacy.

External articulation

The Faculty of Arts and Social Sciences has established credit recognition packages with the following institutions for the courses listed:

- INSEARCH UTS: Diploma of Communication
- Nanyang Polytechnic, Singapore: Diploma in Media Studies and Management
- Temasek Polytechnic: Diploma in Communication and Media Management
- Ngee Ann Polytechnic, Singapore: Diploma in Mass Communication.

Course duration and attendance

The course is offered on a three-year, full-time basis.

Course structure

Students must complete 144 credit points consisting of a 48-credit-point core program, a 48-credit-point major, a 24-credit-point submajor and 24 credit points of electives.

Industrial training/professional practice

Students take part in relevant and applied journalism tasks throughout the course and can elect to undertake a professional placement with a media organisation.

C10247v1 Bachelor of Arts in Communication (Media Arts and Production)

Award(s): Bachelor of Arts in Communication (BA)

UAC code: 600018 CRICOS code: 033247D

Commonwealth-supported place?: Yes

Load credit points: 144 Course EFTSL: 3 Location: City campus

Overview

This course prepares students for a wide range of roles within the media and cultural sectors. Students study the history, contemporary issues and theory of media and culture while developing advanced technical and conceptual skills in film, video, new media and sound. The professional areas within the degree include film, video, television, multimedia, sound, radio, performance and installation, and the interplay among these media forms.

This course explores the history, contemporary issues, theories and challenges of media and culture in society. Students develop sophisticated production skills in video, sound and new media, and enhance their creative innovation in these areas. Students are encouraged to evolve as a creative director and producer of media projects, as well as develop technical proficiency specifically in one media area. By the time of graduation, students should have a professional portfolio of creative production work.

Career options

Career options include arts and cultural administrators, cinematographers, directors, documentary makers, editors, film producers, freelance media artists multimedia designers, new media producers, producers, production managers, program commissioning editors, radio producers, scriptwriters and sound designers.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 7.0 overall with a writing score of 7.0; or TOEFL: paper based: 584-609 overall with TWE of 5.0, internet based: 94-101 overall with a writing score of 23; or DEEP: B+; or PTE: 65-72; or CAE: 67-73

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

Award(s): Bachelor of Arts in Communication (BA)

UAC code: 600023 CRICOS code: 026164K

Commonwealth-supported place?: Yes

Load credit points: 144 Course EFTSL: 3 Location: City campus

Overview

The critical and theoretical approach offered in this course develops ethical and responsible communication professionals. This course provides students with interdisciplinary knowledge of public communication processes and industries, and their social, economic and political contexts with specialised expertise in public relations and or advertising.

This course has a focus on professional communication careers including public relations and advertising. Students explore the communication contexts for these practices – cultural, social and political. Students develop their professional skills in campaign design and production, copywriting, media liaison and writing, research and evaluation, sponsorship and event management. Assignments provide material for a portfolio after graduation.

Career options

Career options include advertising account executives, advertising copywriters, communication strategists, community relations managers, marketing communication specialists, media liaison officers, media researchers, political media advisers, public relations consultants, publicity officers and special events coordinators.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

 $The \, English \, proficiency \, requirement \, for \, international \, students \, or \, local \,$ applicants with international qualifications is: Academic IELTS: 7.0 overall with a writing score of 7.0; or TOEFL: paper based: 584-609 overall with TWE of 5.0, internet based: 94-101 overall with a writing score of 23; or DEEP: B+; or PTE: 65-72; or CAE: 67-73

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard fulltime duration. Students can extend their courses only in exceptional circumstances

Assumed knowledge

HSC English and computer literacy.

External articulation

The Faculty of Arts and Social Sciences has established credit recognition packages with the following institutions for the courses listed:

- INSEARCH UTS: Diploma of Communication
- Nanyang Polytechnic, Singapore: Diploma in Media Studies and Management
- Temasek Polytechnic: Diploma in Communication and Media
- Ngee Ann Polytechnic, Singapore: Diploma in Mass Communication.

Course duration and attendance

The course is offered on a three-year, full-time basis.

Course structure

Students must complete 144 credit points consisting of a 48-creditpoint core program, a 48-credit-point major, a 24-credit-point submajor and 24 credit points of electives.

Industrial training/professional practice

Many assignments are practice based and all are relevant to understanding and working in the industry. Students undertake a professional placement in an organisation involved in public communication.

Overview

In this course, writing is studied as a professional practice that takes place through engagement with contemporary cultures. Writing is studied in both theory and practice, and students apply their skills to a range of genres and different media. Students in the course develop creative writing skills across a range of genres and media and a critical understanding and awareness of cultural and social issues.

Students study both writing and cultural studies as a critical and creative practice. They learn the theories of culture and writing and challenge the practices that produce culture. Through their own writing, they create alternative and innovative ways of communicating in multiple modes.

Students gain the skills to analyse and intervene in social and cultural discourses, practices and institutions, and to practice as cultural researchers. They also explore and develop their own writing ability to high level, giving them the skills to work as writers in a range of contexts across the communications, arts and media sectors.

Career options

Career options include arts and cultural administrators, communication coordinators, communication officers, creative writers, cultural policy officers, cultural researchers, feature writers, media researchers, new media and web producers, and publications officers.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 7.0 overall with a writing score of 7.0; or TOEFL: paper based: 584-609 overall with TWE of 5.0, internet based: 94-101 overall with a writing score of 23; or DEEP: B+; or PTE: 65-72; or CAE: 67-73

Eligibility for admission does not guarantee offer of a place.

Overview

Social inquiry is where social and political theory and practices of research and communication converge. This cross-disciplinary course investigates society, explores current issues, and questions implications of change and progress in the global community. Students undertake professional studies as well as social, cultural and communication theory and practice so they can ask questions, research issues, develop advocacy skills and effectively develop communication strategies.

This is a cross-disciplinary course in which students combine social, political, historical and philosophical perspectives on what makes us members of society. Is change good, bad or both? Students learn how

to understand social issues and how to think through ways of making a difference; how to research, communicate and plan contributions to national and international debates. The course equips students with the knowledge and skills to be involved in diverse organisations that want to make changes.

Career options

Career options include community development workers, community project managers, international aid workers, local and community historians, media researchers, policy analysts, policy officers, political advisers, politicians, social researchers, trade union officials, social welfare officers, and change agents in a range of social, cultural, historical and political arenas

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 7.0 overall with a writing score of 7.0; or TOEFL: paper based: 584-609 overall with TWE of 5.0, internet based: 94-101 overall with a writing score of 23; or DEEP: B+; or PTE: 65-72; or CAE: 67-73

Award(s): Bachelor of Arts in Communication (BA) UAC code: 600008 CRICOS code: 060173D Commonwealth-supported place?: Yes Load credit points: 144 Course EFTSL: 3 Location: City campus

Overview

This course has been specifically designed to respond to the new demands created by the increasing convergence of information, media and communication, design, and the creative arts. The course uses a 'learning through making' approach which is creative, collaborative and critical. The broad range of skills and knowledge needed for creative information practice is reflected in the portfolio students develop throughout the course.

Students create a portfolio of products including blogs, podcasts, websites, databases as well as audience and user analyses. The degree also provides students with an opportunity to develop a secondary specialisation to complement core studies and to undertake a professional placement.

Course aims

This interdisciplinary course prepares students for work in a variety of creative information design and management roles. Students develop an understanding of the interrelationships between people, information and communication technologies, as well as practical skills in areas such as web design and architecture, media research and writing information and media content for diverse audiences.

Career options

Career options include work as collection developers, database designers, information architects, information managers, librarians, media researchers, new media producers, project managers, and web content developers or content managers.

Honours

The Bachelor of Arts (Honours) in Communication (C09009) (see page 110) is available with an additional year of full-time study for eligible students.

Professional recognition

This course has professional recognition from the Australian Library and Information Association. Students wishing to be eligible for professional membership of ALIA, must successfully complete 50190 Professional Information Project as an elective.

Other information

Further information is available from the UTS Student Centre on: telephone 1300 ask UTS (1300 275 887)

or +61 2 9514 1222

Award(s): Bachelor of Arts in Communication (BA) Bachelor of Arts in International Studies (BA)

UAC code: 609300 CRICOS code: 043279B

Commonwealth-supported place?: Yes

Load credit points: 240 Course EFTSL: 5 Location: City campus

Overview

This degree combines a professional degree with immersion in another language and culture, enhancing professional training and career options. The combined course seeks to augment the value of journalism by broadening awareness and understanding of another language and culture.

As media becomes increasingly global, it is more important than ever for journalists to have an understanding of international affairs and cultural perspectives other than their own. There are many opportunities for journalists to work in different countries during their career and those who are fluent in more than one language are able to take advantage of these opportunities. Career options are also enhanced by international experience, making students more marketable to prospective employers.

Career options

Career options include editors and sub-editors, feature and freelance writers, investigative journalists, media researchers, producers, publishers, reporters, and strategists in the print, broadcast and online media.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

There are no prior language requirements for the international studies program. Entry level to the various language and culture programs depends upon students' prior knowledge of the relevant language. Students are admitted to the international studies program with no guarantee of entry to a specific country major, although every effort is made to meet their preferences.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 7.0 overall with a writing score of 7.0; or TOEFL: paper based: 584-609 overall with TWE of 5.0, internet based: 94-101 overall with a writing score of 23; or DEEP: B+; or PTE: 65-72; or CAE: 67-73

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

HSC English and computer literacy. There are no prior language requirements for the international studies program (see page 87).

External articulation

The Faculty of Arts and Social Sciences has established credit recognition packages with the following institutions for the courses listed:

- INSEARCH UTS: Diploma of Communication
- Nanyang Polytechnic, Singapore: Diploma in Media Studies and Management
- Temasek Polytechnic: Diploma in Communication and Media Management
- Ngee Ann Polytechnic, Singapore: Diploma in Mass Communication.

Course duration and attendance

The course is offered on a five-year, full-time basis. Students spend two semesters of study at a university or other higher education institution in the country of their major.

Course structure

Students must complete 240 credit points, comprising 144 credit points in the communication component and 96 credit points in the international studies component. The Bachelor of Arts in International Studies requires undergraduates to study a region or country major over a minimum of three years. The Bachelor of Arts in International Studies is not offered as a separate degree, but is completed only in combination with the professional degree program.

Overseas study

Students spend their fourth year of study at a university overseas.

Course completion requirements

Location: City campus

Overview

The course combines a professional degree with immersion in another language and culture, enhancing professional training and career options. This combined degree seeks to augment the value of media arts and production by broadening students' awareness and understanding of another language and culture. The emphasis lies in recognising that the media and cultural industries are undergoing enormous changes in identities and audiences.

Students develop their own creative and conceptual work through the production of a range of exercises and projects in film and video, sound and radio and new media (multimedia and online applications). The subjects in the course also place a strong emphasis on the professional context and work practices associated with these areas and the ability to apply them in the national and international production context. Career options are also enhanced by international experience, making students more marketable to prospective employers.

Career options

Career options include arts and cultural administrators, cinematographers, directors, documentary makers, editors, film producers, freelance media artists and producers, multimedia designers, new media producers, production managers, program commissioning editors, radio producers, scriptwriters and sound designers.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

There are no prior language requirements for the international studies program. Entry level to the various language and culture programs depends upon students' prior knowledge of the relevant language. Students are admitted to the international studies program with no guarantee of entry to a specific country major, although every effort is made to meet their preferences.

Overview

The course combines a professional degree with immersion in another language and culture, enhancing professional training and career options. This combined degree seeks to augment the value of public communication by broadening awareness and understanding of another language and culture.

International perspectives on public relations and advertising enable UTS graduates to transcend national barriers and be competitive in a global environment. Career options are enhanced by international experience, making students more adept at international and crosscultural professional practice.

Career options

Career options include advertising copywriters, advertising account executives, communication strategists, community relations managers, marketing communication specialists, media liaison officers, media researchers, political media advisers, public relations consultants, publicity officers and special events coordinators.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

There are no prior language requirements for the international studies program. Entry level to the various language and culture programs depends upon students' prior knowledge of the relevant language. Overview

Writers tell their own stories and, in doing so, they tell the stories of the societies they live in. This course combines a professional degree with immersion in another language and culture, enhancing professional training and career options. This combined degree is designed to broaden students' awareness of writing and the work of the writer in relation to different languages and cultures.

Writing at UTS is studied as a craft undertaken in close engagement with, and responsiveness to, the writer's society. Australia is uniquely positioned to play a significant role in the 21st century. Its writers are a vital part of understanding and defining this role and they are better equipped for this task with an understanding of their own and other contemporary cultures as they go about their work.

Career options

Career options include arts and cultural administrators, book marketing coordinators, communication coordinators, copywriters, cultural researchers, dramatists, editors, feature writers, freelance writers, new media and web producers, novelists, publishers, literary agents, media researchers, poets, publications officers and scriptwriters.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

There are no prior language requirements for the international studies program. Entry level to the various language and culture programs depends upon students' prior knowledge of the relevant language. Students are admitted to the international studies program with no guarantee of entry to a specific country major, although every effort is made to meet their preferences.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 7.0 overall with a writing score of 7.0; or TOEFL: paper based: 584-609 overall with TWE of 5.0, internet based: 94-101 overall with a writing score of 23; or DEEP: B+; or PTE: 65-72; or CAE: 67-73

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

HSC English and computer literacy. There are no prior language requirements for the international studies program (see page 87).

External articulation

The Faculty of Arts and Social Sciences has established credit recognition packages with the following institutions for the courses listed:

- INSEARCH UTS: Diploma of Communication
- Nanyang Polytechnic, Singapore: Diploma in Media Studies and Management
- Temasek Polytechnic: Diploma in Communication and Media Management
- Ngee Ann Polytechnic, Singapore: Diploma in Mass Communication.

Course duration and attendance

The course is offered on a five-year, full-time basis. Students spend two semesters of study at a university or other higher education institution in the country of their major.

Course structure

Students must complete 240 credit points, comprising 144 credit points in the communication component and 96 credit points in the international studies component. The Bachelor of Arts in International Studies requires undergraduates to study a region or country major over a minimum of three years. The Bachelor of Arts in International Studies is not offered as a separate degree, but is completed only in combination with the professional degree program.

Overseas study

Students spend their fourth year of study at a university overseas.

Course completion requirements

Overview

The course combines a professional degree with immersion in another language and culture, enhancing professional training and career options. This combined degree seeks to augment the value of social inquiry by broadening awareness and understanding of another language and culture.

The course offers students a powerful mix of skills and knowledge which may be applied in many professional areas. It prepares students by incorporating and teaching diversity, ways of understanding and working within other cultures, the ability to understand different social and political frameworks, skills in exploring historical materials as well as researching current social problems and devising policy possibilities, and developing communication strategies using new media. Career options are also enhanced by international experience, making students more marketable to prospective employers.

Career options

Career options include community development workers, community project managers, local and community historians, international aid workers, media researchers, policy analysts, policy officers, political advisers, politicians, social researchers, social welfare officers, trade union officials, and change agents in a range of social, cultural, historical and political arenas.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

There are no prior language requirements for the international studies program. Entry level to the various language and culture programs depends upon students' prior knowledge of the relevant language. Students are admitted to the international studies program with no guarantee of entry to a specific country major, although every effort is made to meet their preferences.

Course EFTSL: 5 Location: City campus

Overview

8ср

The combined degree enhances the interdisciplinary nature of the professionally oriented information and media degree through immersion in another language and culture.

Apart from the wider educational goals, the course helps students become more effective as information professionals, whether in Australia or overseas. Career options are enhanced by international experience.

Career options

Career options include collection developers, database designers, information architects, information managers, librarians, media researchers, new media producers, project managers, and web content developers or content managers.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

There are no prior language requirements for the international studies program. Entry level to the various language and culture programs depends upon students' prior knowledge of the relevant language. Students are admitted to the international studies program with no guarantee of entry to a specific country major, although every effort is made to meet their preferences.

Bachelor of Laws (LLB) UAC code: 609001 CRICOS code: 030572D

Commonwealth-supported place?: Yes

Load credit points: 240 Course EFTSL: 5 Location: City campus

Overview

This course is offered jointly by UTS: Law and UTS: Communication. It aims to produce journalists with the knowledge and analytical skills of lawyers, and lawyers with the communication skills of professional journalists. It develops a broad range of professional skills and knowledge for either legal or media practice.

For those wishing to specialise after graduation, the course offers a number of possibilities including media and communications legal practice, policy and research work, specialist legal and crime reporting and publishing for print, internet, radio or television, and legal communications or publishing in the private sector.

Career options

Career options include journalist with professional skills in one or more of the print, radio, television or internet media; lawyer in the media and communication industry or legal policy adviser in a government department such as the Australian Broadcasting Authority.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 7.0 overall with a writing score of 7.0; or TOEFL: paper based: 584-609 overall with TWE of 5.0, internet based: 94-101 overall with a writing score of 23; or DEEP: B+; or PTE: 65-72; or CAE: 67-73

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances

Assumed knowledge

Proficiency in English and computer literacy.

Course duration and attendance

The course is offered on a five-year, full-time basis. Students are required to attend approximately 17 hours of seminars and lectures a week. Timetable constraints may require attendance at daytime and evening classes for the law component.

Course structure

The course comprises 240 credit points. The study components for course completion are as follows.

The law component of 144 credit points is made up of:

- 102 credit points of compulsory core law subjects, and
- 42 credit points of law options

The communication component of 96 credit points is made up of:

- 48 credit points of compulsory subjects, and
- 48 credit points of subjects from the Journalism major.

Refer to the course entry in the *UTS: Handbook 2007* for the pre-2008 course structure.

For a current listing of subjects in each course, refer to the study package directory.

Industrial training/professional practice

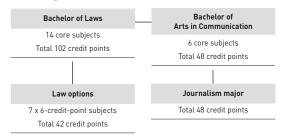

To practise as a lawyer in NSW, students need to successfully complete an accredited legal academic qualification (e.g. Bachelor of Laws) and an accredited course of practical legal training (PLT), which UTS offers through its PLT program.

Students enrolled in this course may complete their practical legal training by undertaking a postgraduate course in PLT, such as the Graduate Certificate in Professional Legal Practice (C11232) (see page 467).

Levels of award

The Bachelor of Laws may be awarded with first or second class honours, which does not require an additional honours year. Honours candidates must complete the research thesis within the law option component. The rules concerning the Bachelor of Laws with honours can be found in undergraduate course information (see page 96).

Honours

The Bachelor of Arts (Honours) in Communication (C09009) (see page 110) is offered on a one-year, full-time basis.

Professional recognition

This course satisfies the requirements for admission to the Supreme Court of NSW as a lawyer, provided students complete a practical legal training program, such as the Graduate Certificate in Professional Legal Practice (C11232) (see page 467).

Bachelor of Laws (LLB) UAC code: 609002 CRICOS code: 030573C

Commonwealth-supported place?: Yes

Load credit points: 240 Course EFTSL: 5 Location: City campus

Overview

This course is offered jointly by UTS: Law and UTS: Communication. It aims to develop a broad range of professional skills and knowledge for either legal or media practice and provides advanced hands-on conceptual and technical skills in film, video, sound and new media. It allows students to graduate with the separate degrees of Bachelor of Arts in Communication (Media Arts and Production) and Bachelor of Laws.

Students have the unique opportunity to combine studies in film, video, sound and new media with studies in law, gaining a first-hand perspective of the production process, the creation of intellectual property in media production and the functions of various crew roles including directors and producers through producing and exhibiting their own short film, video, sound production or new media programs.

Career options

Career options include lawyer in the media and communication industry; a wide range of roles within the media and cultural sectors in film, media or sound production; or emerging areas including the internet.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 7.0 overall with a writing score of 7.0; or TOEFL: paper based: 584-609 overall with TWE of 5.0, internet based: 94-101 overall with a writing score of 23; or DEEP: B+; or PTE: 65-72; or CAE: 67-73

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

HSC English and computer literacy.

Course duration and attendance

The course is offered on a five-year, full-time basis. Students are required to attend approximately 17 hours of seminars and lectures a week, and may be required to attend evening classes for the law component.

Course structure

The course comprises 240 credit points. The study components for course completion are as follows.

The law component of 144 credit points is made up of:

- 102 credit points of compulsory core law subjects, and
- 42 credit points of law options.

The communication component of 96 credit points is made up of:

- 48 credit points of compulsory subjects, and
- 48 credit points of subjects from the Media Arts and Production major.

Refer to the course entry in the $UTS: Handbook\ 2007$ for the pre-2008 course structure.

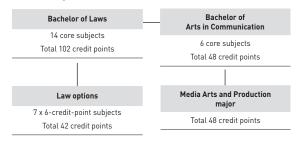

For a current listing of subjects in each course, refer to the study package directory.

Industrial training/professional practice

To practise as a lawyer in NSW, students need to successfully complete an accredited legal academic qualification (e.g. Bachelor of Laws) and an accredited course of practical legal training (PLT), which UTS offers through its PLT program.

Students enrolled in this course may complete their practical legal training by undertaking a postgraduate course in PLT, such as the Graduate Certificate in Professional Legal Practice (C11232) (see page 467).

Overview

This course is offered jointly by UTS: Law and UTS: Communication. It provides students with a range of professional and analytical skills grounded in sociology, social policy, politics, public history and international studies, for either legal or social science practice. It is designed for students who want to use their professional legal qualification together with social research, policy development and political advocacy.

The program provides full-time study for students wishing to obtain $% \left\{ 1\right\} =\left\{ 1\right\}$ a professional legal qualification that satisfies the requirements for admission as a lawyer together with specialisation in social, cultural and communication theory and practice. Studies in social inquiry increase students' employment options in the diverse fields of social science, media and communication, as well as extending their knowledge of the broader context in which the legal system operates.

Course aims

The course aims to promote understanding of how communities and political systems work, along with positive and effective intervention skills.

Career options

Career options include lawyer in business or media organisations, community or public sector, as an advocate, policy maker, political activist, political adviser or social or media researcher.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 7.0 overall with a writing score of 7.0; or TOEFL: paper based: 584-609 overall with TWE of 5.0, internet based: 94-101 overall with a writing score of 23; or DEEP: B+; or PTE: 65-72; or CAE: 67-73

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard fulltime duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

HSC English and computer literacy.

Course duration and attendance

The course is offered on a five-year, full-time basis. Students are required to attend approximately 17 hours of seminars and lectures a week, and may be required to attend evening classes for the law component.

Course structure

The course comprises 240 credit points. The study components for course completion are as follows.

The law component of 144 credit points is made up of:

- 102 credit points of compulsory core law subjects, and
- 42 credit points of law options.

The communication component of 96 credit points is made up of:

- 48 credit points of compulsory subjects, and
- 48 credit points of subjects from the Social Inquiry major.

Refer to the course entry in the *UTS: Handbook 2007* for the pre-2008 course structure

For a current listing of subjects in each course, refer to the study package directory.

Industrial training/professional practice

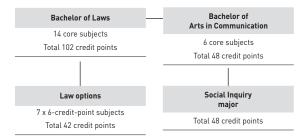

To practise as a lawyer in NSW, students need to successfully complete an accredited legal academic qualification (e.g. Bachelor of Laws) and an accredited course of practical legal training (PLT), which UTS offers through its PLT program.

Students enrolled in this course may complete their practical legal training by undertaking a postgraduate course in PLT, such as the Graduate Certificate in Professional Legal Practice (C11232) (see page 467).

Overview

This course is offered jointly by UTS: Law and UTS: Communication. It provides students with interdisciplinary knowledge of public communication processes and industries, and their social, economic and political contexts with specialised expertise in public relations and/or advertising, together with studies in law. It allows students to graduate with the separate degrees of Bachelor of Arts in Communication (Public Communication) and Bachelor of Laws.

The course provides full-time study for students wishing to obtain a professional legal qualification that satisfies the requirements for admission as a lawyer in NSW together with practical skills and knowledge for contemporary public communication practice. Assessments and a professional industry placement ensure industry relevance and that students are work-ready.

Career options

Career options include advertising account manager, corporate communications adviser, lawyer in the public communication industry, media liaison officer, political media adviser, public or community relations manager or special events coordinator.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 7.0 overall with a writing score of 7.0; or TOEFL: paper based: 584-609 overall with TWE of 5.0, internet based: 94-101 overall with a writing score of 23; or DEEP: B+; or PTE: 65-72; or CAE: 67-73

Overview

This course is offered jointly by UTS: Law and UTS: Communication. It aims to develop knowledge and skills in law and the dynamic area of information and media. Through a 'learning through making' approach, this course is collaborative and critical in its study of creative information practices and how the law interrelates.

The course develops a broad range of capabilities for professional practice in information and law. This is particularly relevant to the creation, organisation, retrieval, access and flow of information, particularly within electronic environments such as blogs and podcasts where students develop skills in web design and architecture, media research and writing information and media content for diverse audiences. Students learn to solve problems encountered in areas where the law intersects with information and communication technologies within society, and engage with pertinent ethical questions.

Career options

Career options include collection developer, content developer or content manager, database designer, information architect, information manager, online and social media consultant, legal adviser within a government department, lawyer in corporate and commercial sector, librarian, media researcher, project manager, web designer and in other diverse roles particularly in legal and business contexts.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 7.0 overall with a writing score of 7.0; or TOEFL: paper based: 584-609 overall with TWE of 5.0, internet based: 94-101 overall with a writing score of 23; or DEEP: B+; or PTE: 65-72; or CAE: 67-73

The Bachelor of Laws may be awarded with first or second class honours, which does not require an additional honours year. Honours candidates must complete the research thesis within the law option component. The rules concerning the Bachelor of Laws with honours can be found in undergraduate course information (see page 96).

Honours

The Bachelor of Arts (Honours) in Communication (C09009) (see page 110) is offered on a one-year, full-time basis.

Professional recognition

This course satisfies the requirements for admission to the Supreme Court of NSW as a lawyer, provided students complete a practical legal training program, such as the Graduate Certificate in Professional Legal Practice (C11232) (see page 467).

Note(s)

The Organisational Learning major will not be available for enrolment after 2012. Students currently enrolled in this major will not be affected.

Overview

This degree focuses on learning about the global political, economic and cultural processes, institutions and theories involved in a particular area of interest. Students are able to draw connections between these global phenomena and concrete local practices in work and life, seeing the different opportunities and constraints that exist for different groups of people. The course requires students to engage in complex problem solving regarding global phenomena from several different perspectives. Students who wish to study overseas during this course can undertake a UTS exchange or study abroad placement that counts towards their degree, after their first year.

This course prepares graduates for careers and contributions in a world of social and cultural diversity being transformed by globalisation, allowing students to draw connections between global phenomena and local practices in work and life.

Course aims

The course aims to produce graduates that are capable of applying knowledge about global phenomena, institutions and theories in a professional context; have well developed communication and interpersonal skills, attitudes and values; have relevant practical and professional skills; and possess innovative thinking and research skills.

Career options

24cp

Career options exist in globally oriented workplaces that may include international advisory and management positions in governmental organisations such as foreign affairs or the UN, non-government agencies, and companies that operate globally.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

Any two units of English and computer literacy.

Course duration and attendance

The course is offered on a three-year, full-time or six-year, part-time basis.

24cp

24cp

Course structure

- Students must complete 144 credit points, comprising: six core subjects (48 credit points)
- a major in business studies, communication, information technology, legal studies or management studies (48 credit points), and
- one of the following: two sub-majors (48 credit points), or
- a sub-major (24 credit points) and exchange semester (24 credit points), or
- a sub-major (24 credit points) and three electives (24 credit points), or
- an exchange semester (24 credit points) and three electives (24 credit points).

Industrial training/professional practice

Students undergo a domestic work placement within a workplace that deals with global issues and practices.

Course completion requirements

STM90655 Core subjects	48cp
CBK90566 Major choice	48cp
CBK90567 Sub-majors + electives	48cp
•	Total 144cp

Course program

Two examples are given below. The first is for the degree without an exchange semester. The second is for the degree with an exchange semester. The global studies core subjects are noted in each example and students may arrange major and sub-major subjects around these core subjects. Normally students do 24 credit points each semester but as this degree involves mixing 6-credit-point and 8-credit-point subjects it may be possible to vary the 24 credit point load as needed up to 28 credit points.

C10265v1 Bachelor of Design in Photography and Situated Media

Award(s): Bachelor of Design in Photography and Situated Media (BDesign)

UAC code: 602065 CRICOS code: 067912F

Commonwealth-supported place?: Yes

Load credit points: 144 Course EFTSL: 3 Location: City campus

Overview

The Bachelor of Design in Photography and Situated Media explores both traditional photographic practice and more contemporary dimensions of media and imaging in urban environments, such as for exhibitions, installations and interactive responses. The degree has a strong emphasis on the relationship between digital photography and its purpose in an environmental situation, focusing on the city, urban issues and the relationship of media to its context - social, physical, geographical, political, documentary, artistic and design motivations.

This course explores the image in terms of its cultural history, its material uses, and its social implications. Combining contemporary photography practice with emerging digital technologies, the course equips its graduates with the visual literacy and technical skills they require to hold leading positions in image-based design professions.

The course balances technical skills and creativity with ethics and theory. Students study alongside other design disciplines in projectbased studios. They encounter the city as a protagonist, employing images in a range of contexts, artistic, political and commercial, and exploring their role as part of the fabric of both collective memory and the built environment.

Course aims

Students graduate with skills of self-reflection in their practice, critical engagement with and responses to social and cultural issues, and a broad understanding of research practices. Students also gain an understanding of new technologies for image and multi-modal production, and new ways of approaching media in the environment.

Career options

Graduates of this course are able to engage in the broad scope of photographic and image-based careers. Career options include employment or self-employment in photography, art direction, fine art photography, exhibition media, installation, interactive media and advertising, photographic lighting, photographic technical and digital workflow practice, photojournalism, and commercial photography.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard fulltime duration. Students can extend their courses only in exceptional circumstances.

Applications

Local students

Non-recent school leavers must submit a personal statement directly to UTS: Design, Architecture and Building. Based on the statement, students are selected for interview, at which they are expected to attend with a portfolio of work.

International students

International students (excluding those studying in an Australian high school) must submit an application to UTS International (in person, by mail or online) or through an accredited UTS representative. The application must include a portfolio of up to 10 examples of the student's work demonstrating awareness, imagination and skills relevant to design (preferably provided on CD or DVD).

Course duration and attendance

The course is offered on a three-year, full-time basis.

Course structure

Students must complete 144 credit points made up of 96 credit points of core subjects (10 subjects), a 24-credit-point sub-major and 24 credit points of electives.

Course completion requirements

STM90707 Core subjects	54cp

C10266v1 Bachelor of Design in Photography and Situated Media Bachelor of Arts in International Studies

Award(s): Bachelor of Design in Photography and Situated Media (BDesign)

Bachelor of Arts in International Studies (BA)

UAC code: 609285 CRICOS code: 068104G

Commonwealth-supported place?: Yes

Load credit points: 240 Course EFTSL: 5 Location: City campus

Overview

The Bachelor of Design in Photography and Situated Media explores both traditional photographic practice and more contemporary uses for urban media, such as exhibitions and installations. The degree has a strong emphasis on the relationship between digital photography, its purpose in an environmental situation, focusing on city and urban issues of media placement in an internationalised professional context.

This course not only recognises the technological change brought about by digital advances in photography, but responds to actual and potential directions in which technological change impacts upon photography, the production of imagery and their applications in the real and virtual worlds.

Accordingly, the course balances practical skills with theoretical underpinnings, ethics and creative speculation. All studio subjects are project based and rely on professional practice in their requirements, giving students the capacity to handle the expectations of professional life.

Course aims

This degree equips graduates to engage in the broad, international scope of photographic careers. Students graduate with skills of self-reflection in their practice, critical engagement with and responses to social and cultural issues, and a broad understanding of research practices.

Students also gain an understanding of new technologies for image and sound production, and new ways of approaching media in the environment. They also learn a different language and culture and travel overseas.

Career options

Career options include employment or self-employment in exhibition media, installation, interactive media and advertising, photographic lighting, photographic technical and digital workflow practice, photojournalism and traditional commercial photography.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

There are no prior language requirements for the international studies program (see page 87).

Course duration and attendance

The course is offered on a five-year, full-time basis. Students spend two semesters of study at a university or other higher education institution in the country of their major.

Course structure

Students must complete 240 credit points of study, comprising 144 credit points relating to photography and situated media and 96 credit points relating to international studies.

Overseas study

Students spend their fourth year of study at a university overseas.

Course completion requirements

CBK90086 Sub-major options	24cp

C10269v1 Bachelor of Sound and Music Design

Award(s): Bachelor of Sound and Music Design (BSoundMusDesign)

UAC code: 600006 CRICOS code: 068112G

Commonwealth-supported place?: Yes

Load credit points: 144 Course EFTSL: 3 Location: City campus

Overview

This course is the first of its kind in Australia to combine the domains of sound and music, and prepare students for new emerging domains that require the confluence of sound in design and interaction.

The course appeals to students with an interest in music, creative arts, design and technology, or multimedia. It converges creative practice (art thinking) and innovative solution (design thinking) through music and sound. It offers a unique, contemporary sound and music degree experience by merging art and technology across domains of composition, entertainment and audio technology, as well as combining features of music and audio engineering with interaction design.

Course aims

Students' learning outcomes include expression through creative practice, and technical fluency across a range of technologies.

Career options

Career options include working in sound design or production across a diverse range of media, communication and design outlets including architecture, animation, exhibition design, gaming, music, product design and web applications.

Specific examples include computer musicians, e-fashion designers, electronic music composers, information system (sonification) designers, installation artists/sound sculptors, interactive media artists, mobile/smart-phone and device audio interface designers, new media artists, new sonic interface designers, product audio designers and software interface designers.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 7.0 overall with a writing score of 7.0; or TOEFL: paper based: 584-609 overall with TWE of 5.0, internet based: 94-101 overall with a writing score of 23; or DEEP: B+; or PTE: 65-72; or CAE: 67-73

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Applications

Local students

Local students apply through the Universities Admissions Centre with first round applications closing 31 October, and final round closing 31 January each year.

International students

International students apply through UTS International.

Assumed knowledge

Any two units of English and computer literacy.

Course duration and attendance

The course is offered on a three-year, full-time basis.

Course structure

Students must complete 144 credit points, comprising 96 credit points of core subjects (includes 42 credit points of interdisciplinary studio subjects), 24 credit points of sub-majors and 24 credit points of electives.

Industrial training/professional practice

Studio-based and professional practice subjects are highly flexible, allowing students to foster their specialisation and interests through practical projects, critical review, documentation development and collaboration with industry professionals.

Course completion requirements

Overview

This course is the first of its kind to combine the domains of sound and music, and prepare students for new emerging domains that require the confluence of sound in design and interaction. The degree integrates the study of sound and music with a major in the language and culture of another country.

The course appeals to students with an interest in music, creative arts, design and technology or multimedia. It converges creative practice (art thinking) and innovative solution (design thinking) through music and sound. It offers a unique, contemporary sound and music degree experience by merging art and technology across domains of composition, entertainment and audio technology, as well as combining features of music and audio engineering with interaction design. The course may also appeal to students who want an international study experience or are aiming for an international career.

6ср

12cp

6ср

Course aims

Students' learning outcomes include expression through creative practice, and technical fluency across a range of technologies. The course also provides an opportunity to acquire knowledge and understanding of another language and culture.

Career options

Career options include working in sound design or production across a diverse range of media, communication and design outlets including architecture, animation, exhibition design, gaming, music, product design and web applications.

Specific examples include computer musicians, e-fashion designers, electronic music composers, information system (sonification) designers, installation artists/sound sculptors, interactive media artists, mobile/smart-phone and device audio interface designers, new media artists, new sonic interface designers, product audio designers and software interface designers. Career options are enhanced by international experience.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

Admission to the combined degree is based on merit in accordance with faculty admission requirements. There is a range of entry levels to the various language and culture programs. Students are admitted to the international studies program with no guarantee of entry to a specific major, although every effort is made to meet students' preferences.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 7.0 overall with a writing score of 7.0; or TOEFL: paper based: 584-609 overall with TWE of 5.0, internet based: 94-101 overall with a writing score of 23; or DEEP: B+; or PTE: 65-72; or CAE: 67-73

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard fulltime duration. Students can extend their courses only in exceptional circumstances

Applications

Local students

Local students apply through the Universities Admissions Centre with first round applications closing 31 October, and final round closing 31 January each year.

International students

International students apply through UTS International.

Assumed knowledge

Any two units of English and computer literacy. There are no prior language requirements for the international studies program (see page 87).

Course duration and attendance

The course is offered on a five-year, full-time basis. Students spend two semesters of study at a university or other higher education institution in the country of their major.

Course structure

Students must complete 240 credit points, comprising 144 credit points in sound and music design and 96 credit points in international studies. The sound and music design component is made up of 96 credit points of core subjects (includes 42 credit points of interdisciplinary studio subjects), 24 credit points of sub-majors and 24 credit points of electives. The Bachelor of Arts in International Studies requires undergraduates to study a region or country major over a minimum of three years. The Bachelor of Arts in International Studies is not offered as a separate degree, but is completed only in combination with the professional degree program.

Overseas study

Students spend their fourth year of study at a university overseas.

Industrial training/professional practice

Studio-based and professional practice subjects are highly flexible, allowing students to foster their specialisation and interests through practical projects, critical review, documentation development and collaboration with industry professionals.

C10271v1 Bachelor of Design in Interior and Spatial Design

Award(s): Bachelor of Design in Interior and Spatial Design (BDesign)

UAC code: 602060 CRICOS code: 071631C

Commonwealth-supported place?: Yes

Load credit points: 144 Course EFTSL: 3

Note(s)

The mid-year intake for this course is only for students transferring from C10057.

Overview

With a strong emphasis on creativity and technology, the Bachelor of Design in Interior and Spatial Design is the first university program of its kind in Australia. While interior design is an established profession, spatial design encompasses a range of connected practices that engage directly and creatively with space, from designing an exhibition to art directing a performance.

The course equips graduates with critical thinking, spatial intelligence, creativity and the skills to engage across the expanded field of interior and spatial design, to take up leading roles in industry. Uniquely, this course emphasises digital and analogue technologies of representation and fabrication, internationalisation and design practice.

Course aims

Through their study, students develop spatial intelligence and excellence in design practice. The program fosters a creative and explorative attitude toward the design process, underpinned by a reflective and critical engagement. In doing so, students generate a cohesive design approach where research and practice are consolidated in design outcomes.

The course cultivates a collaborative and global vision of design through a variety of interdisciplinary subjects, industry projects and international studios. Students develop the flexibility and confidence to work in the divergent and novel environments of contemporary practice.

The course has:

- an emphasis on creative, innovative spatial practice and international networks
- practice-oriented and research-integrated learning around specific projects
- engagement with innovative and creative technologies
- an emphasis on emerging design practices, and
- close links with creative practitioners.

Students are expected to develop an understanding of their individual design language and theoretical position in relation to historic and contemporary contexts.

Career options

Career options include commercial and residential interior design, interactive and responsive environment design, museum and exhibition design, production design for film and television, theatre and performance design, and visual and spatial branding.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The course is offered on a three-year, full-time basis. There are generally up to 20 contact hours a week. Lectures and studios are on campus during semester.

Course structure

Students must complete 144 credit points comprising 96 credit points of core subjects, a 24-credit-point sub-major and 24 credit points of electives.

Course completion requirements

Note(s)

The mid-year intake for this course is only for students transferring from C10058.

Overview

With a strong emphasis on creativity and technology, the Bachelor of Design in Interior and Spatial Design is the first university program of its kind in Australia. While interior design is an established profession, spatial design encompasses a range of connected practices that engage directly and creatively with space, from designing an exhibition to art directing a performance.

The combined degree program in design and international studies provides students with additional practical skills, in particular those that make them aware of the international contexts of design, by providing the opportunity to acquire knowledge and understanding of a language and culture other than English.

The course equips graduates with critical thinking, creativity and the skills to engage across the expanded field of interior and spatial design, to take up leading roles in industry. Uniquely, this course emphasises digital technologies of representation and fabrication, internationalisation and design practice. Students also learn a different language and culture, and travel overseas.

Course aims

Through their study, students develop spatial intelligence and excellence in design practice. The program fosters a creative and explorative attitude toward the design process, underpinned by a reflective and critical engagement. In doing so, students generate a cohesive design approach where research and practice are consolidated in design outcomes.

The course cultivates a collaborative and global vision of design through a variety of interdisciplinary subjects, industry projects and international studios. Students develop the flexibility and confidence to work in the divergent and novel environments of contemporary practice.

The course has:

- an emphasis on creative, innovative spatial practice and international networks
- practice-oriented and research-integrated learning around specific projects
- engagement with innovative and creative technologies
- an emphasis on emerging design practices, and
- close links with creative practitioners.

Students are expected to develop an understanding of their individual design language and theoretical position in relation to historic and contemporary contexts.

The aim of this combined degree is to produce graduates who have developed perspectives and understandings that enable them to meet the professional demands of an internationalised marketplace.

Career options

Career options include commercial and residential interior design, interactive and responsive environment design, museum and exhibition design, production design for film and television, theatre and performance design, and visual and spatial branding

Career options are enhanced by international experience, making students more marketable to prospective employers.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard fulltime duration. Students can extend their courses only in exceptional circumstances

Assumed knowledge

There are no prior language requirements for the international studies program (see page 87).

Course duration and attendance

The course is offered on a five-year, full-time basis. There are generally up to 20 contact hours a week. Lectures and studios are on campus during semester. Semesters are focused around design studios that incorporate advanced communication and technology skills with innovative design thinking and practice.

Students spend two semesters of study at a university or other higher education institution in the country of their major.

Course structure

Students must complete 144 credit points comprising 96 credit points of core subjects, a 24-credit-point sub-major, 24 credit points of electives in interior and spatial design, and 96 credit points of international studies subjects.

Overseas study

Students spend their fourth year of study at a university overseas.

C10273v1 Bachelor of Design in Animation

Award(s): Bachelor of Design in Animation (BDesign)

UAC code: 602035 CRICOS code: 074703A

Commonwealth-supported place?: Yes

Load credit points: 144 Course EFTSL: 3

Overview

This course offers a practice-based approach to learning animation and places strong emphasis on two key concepts: dramatisation (including performance and character) and VFX (visual effects) design. It teaches students how to conceptualise, visualise and realise animation across many different types of media. Central to the course is the development of a conceptual understanding of performance, narrative, characterisation, form, motion, time, space and aesthetics.

The course has a strong emphasis on drawing and image-making, dramatisation, physical movement and expression, teaching a full range of animation techniques and skills in industry-standard facilities.

Through a variety of interdisciplinary subjects, industry-focused projects and international studios, students develop the flexibility and confidence to work in the diverse environments of contemporary practice.

The course focuses on a set of animation studios that concentrate student learning through design projects. The animation studios integrate practice-oriented learning that allows time for a high level of individual presentation and in-depth consultation, complemented by a series of related context subjects that spans drawing and 2D animation practices to 3D and 2D digital practices.

Course aims

This course gives students skills and an outlook that extends beyond the university, and cultivates a collaborative and global vision of design. As part of the ongoing development of key industry innovators, the course aims to create new approaches to 2D and 3D animation and VFX design, enabling graduates to better develop, adapt and respond to a range of creative partnerships and collaborations.

Students develop an understanding of their individual design language and theoretical position in relation to historic and contemporary contexts.

Career options

This course opens up animation careers in film, television, and online and mobile application design. Career options include director, producer, storyboard artist, previsualisation (previs) artist, layout artist, concept artist, production designer, art director, character designer, animator, modeller, rigger, motion capture designer, lighting designer, matchmover/3D tracker, effects (FX) animator, roto designer, compositor, stop frame model animator (claymation), and animation scriptwriter.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The course is offered on a three-year, full-time or part-time equivalent basis.

C10300v1 Bachelor of Human Movement

Award(s): Bachelor of Human Movement (BHM)

UAC code: 606020 CRICOS code: 008760F

Commonwealth-supported place?: Yes

Load credit points: 144 Course EFTSL: 3

Location: Kuring-gai campus

Overview

The Bachelor of Human Movement meets the demand for professionals able to provide physical activity services to all sectors of the community.

The course provides students with a strong understanding of the processes and mechanisms underlying human movement, and with the knowledge and skills necessary to manage and plan human movement activities in leisure, sport, health and education contexts.

Students who complete this course are eligible for direct entry into the Bachelor of Teaching in Secondary Education (PDHPE major) (C08002) (see page 468) offered by UTS: Education. This course is formally accredited with the NSW Institute of Teachers and provides PDHPE students with the opportunity to complete two degrees.

Course aims

The Bachelor of Human Movement aims to provide graduates with the necessary skills to gain initial employment in the human movement field, as well as the analytical skills necessary for critical appraisal of developments in the field.

Career options

Career options include sports science, corporate health and wellbeing, strength and conditioning, personal training, physiotherapy (pathway), sports coaching, teaching personal development, health and physical education (PDHPE), outdoor education and facility management.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

This course is also available to mature-aged applicants where preference is given to those with vocational experience in the broad field of human movement.

Non-current school leavers should submit a personal statement to UTS by 30 November 2012. Further information is available from:

www.undergraduate.uts.edu.au/apply

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

Mathematics and any two units of English.

Credit recognition

After admission, students may apply for credit recognition in subjects in which they consider themselves eligible. Equivalence of subject matter is the main criterion for the award of credit recognition in a subject successfully completed at another institution.

Course duration and attendance

The course is available on a three-year, full-time basis. Students should be aware that they may be required to attend evening classes.

This course is currently offered at Kuring-gai campus only.

Course structure

Students must complete at least 144 credit points over 24 subjects.

Students choose four electives, appropriate to their chosen career, to complement the core subjects in the degree. Students studying to be a physical education teacher must take the performance studies subjects as electives.

Industrial training/professional practice

The course has an extensive compulsory internship program.

Course completion requirements

Honours

The Bachelor in Human Movement (Honours) (C09057) (see page 121) is available to eligible students with an additional year of full-time study, or two years of part-time study.

Further study at UTS

Students who complete this course are eligible for direct entry into the Bachelor of Teaching in Secondary Education (PDHPE major) (C08002) (see page 468) offered by UTS: Education. This course is formally accredited with the NSW Institute of Teachers and provides PDHPE students with the opportunity to complete two degrees.

Professional recognition

NSW Department of Education and Training (for those students who go on to complete the Bachelor of Teaching in Secondary Education).

Commonwealth-supported place?: Yes

Load credit points: 144 Course EFTSL: 3

Location: Kuring-gai campus

Overview

6ср

6cp

6ср

This course develops graduates who possess a sound knowledge of the biophysical, behavioural and sociocultural foundations of sport and exercise, combined with the management skills and knowledge increasingly necessary in sport and exercise professions.

As the sport and exercise industry has undergone a period of substantial growth, the need for professionals with management skills and qualifications has become increasingly important. Graduates are equipped with the professional knowledge and skills to operate in one of Australia's most dynamic industries.

Career options

Career options include athlete management, corporate health and fitness, fitness consultant, health promotion, sport development manager, sport event manager, sport marketing, sport policy, sport scientist, sport venue manager.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

Non-current school leavers are strongly advised to submit a personal statement directly to UTS by 30 November 2012. Further information is available from:

www.undergraduate.uts.edu.au/apply

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying

on student visas to complete the course within the standard fulltime duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

Mathematics and any two units of English.

Credit recognition

After admission, students may apply for credit recognition in subjects in which they consider themselves eligible. Equivalence of subject matter is the main criterion for credit recognition in a subject successfully completed at another institution.

Course duration and attendance

The course is taught on a full-time basis. The normal time for completion is three years. Students are required to attend some evening classes as part of their program of study.

This course is currently offered at Kuring-gai campus only.

Course structure

Students must complete 144 credit points comprising 24 subjects, made up of 20 core subjects and four elective subjects.

Industrial training/professional practice

The course has an extensive compulsory internship program and a number of industry-based projects.

UAC code: 609080 CRICOS code: 026188B

Commonwealth-supported place?: Yes

Load credit points: 240 Course EFTSL: 5

Location: Kuring-gai campus

Overview

The Bachelor of Human Movement Bachelor of Arts in International Studies is offered jointly by UTS: Health and UTS: International Studies. The degree integrates human movement studies with a major in the language and culture of another country.

Career options

Career options include exercise therapy and teaching of personal development, fitness and corporate health, facility management, health, physical education and outdoor education, sport coaching, sport development, sport management, and sports science and team conditioning. Career options are enhanced by international experience, making students more marketable to prospective employers.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

Admission to the combined degree is on merit according to the admissions policy for the Bachelor of Human Movement (C10300) (see page 288). There is a range of entry levels to the various language and culture programs. Students are admitted to the international studies program with no guarantee of entry to a specific major, although every effort is made to meet students' preferences.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard fulltime duration. Students can extend their courses only in exceptional $% \left(1\right) =\left(1\right) \left(1\right$ circumstances.

Assumed knowledge

There are no prior language requirements for the international studies program (see page 87).

Credit recognition

For credit recognition, see the Bachelor of Human Movement (C10300) (see page 288).

Course duration and attendance

The course is offered on a five-year, full-time basis. Students spend two semesters of study at a university or other higher education institution in the country of their major.

Course structure

Students must complete 240 credit points of study, comprising 144 credit points relating to human movement and 96 credit points relating to international studies. For full details of the Bachelor of Human Movement component of the combined degree, refer to the Bachelor of Human Movement (C10300) (see page 288). The Bachelor of Arts in International Studies requires undergraduates to study a region or country major over a minimum of three years. The Bachelor of Arts in International Studies is not offered as a separate degree, but is completed only in combination with the professional degree program.

Overseas study

Students spend their fourth year of study at a university overseas.

Industrial training/professional practice

This course has a professional internship component that includes a minimum of six weeks' work experience.

Further study at UTS

Students who complete the Bachelor of Human Movement with the PDHPE stream are guaranteed entry into the Bachelor of Teaching in Secondary Education (C08002) (see page 468) with a personal development, health and physical education (PDHPE) major. Students in the Bachelor of Teaching in Secondary Education are granted 72 credit points of exemptions in credit recognition and are required to complete 72 credit points of study which may be undertaken in one year of intensive full-time study. Refer to C08002 (see page 468) for further details.

Students who commenced this program prior to 2007 should consult with the undergraduate course director on transition arrangements arising from changes to the Bachelor of Management in Sport and Exercise (C10301) (see page 289), which became effective in Autumn semester 2007.

Overview

This course is offered jointly by UTS: Health and UTS: International Studies. It integrates the study of sport and exercise management with a major in the language and culture of another country.

Career options

Career options include corporate health and fitness manager, events manager, exercise therapist, health and fitness consultant, sport coach, sport development officer, sport manager, sport marketing coordinator or sporting facility manager. Career options are enhanced by international experience, making students more marketable to prospective employers.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

Admission to the combined degree is on merit according to the admissions policy for the Bachelor of Management in Sport and Exercise (C10301) (see page 289). There is a range of entry levels to the various language and culture programs. Students are admitted to the international studies program with no guarantee of entry to a specific major, although every effort is made to meet students' preferences.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Assumed knowledge

There are no prior language requirements for the international studies program (see page 87).

Credit recognition

For credit recognition, see the Bachelor of Management in Sport and Exercise (C10301) (see page 289).

Course duration and attendance

The course is offered as a full-time program over five years. Students spend two semesters of study at a university or other higher education institution in the country of their major. The international studies component of the course is mainly offered at City campus.

Course structure

Students must complete 240 credit points of study, comprising 144 credit points relating to management in sport and exercise and 96 credit points relating to international studies. For full details of the Bachelor of Management in Sport and Exercise component of the combined degree, refer to the Bachelor of Management in Sport and Exercise (C10301) (see page 289). The Bachelor of Arts in International Studies requires undergraduates to study a region or country major over a minimum of three years. The Bachelor of Arts in International Studies is not offered as a separate degree, but is completed only in combination with the professional degree program.

Overseas study

Students spend their fourth year of study at a university overseas.

Industrial training/professional practice

This course has a professional internship component that includes a minimum of six weeks' work experience.

Overview

Integrated product design expands on the traditional field of industrial design to reflect the changed realities of the globalised design profession. The course offers a practice-based approach to learning through the integration of digital and analogue technologies across the broad field of integrated product design, as well as the potential for specialisation within highly contemporary and innovative integrated product design practices.

With a strong emphasis on creativity and technology, graduates move seamlessly from the design of material objects to the design of associated services together with the skills to maintain a specialist role within an interdisciplinary team. Structured around design studios, this dynamic course allows specialisations such as interaction design, smart object design, interactive product design, system design. The design studio integrates practice-orientated learning around specific projects.

Course aims

The course aims to support and foster a creative and explorative attitude toward the design process. It equips its graduates with the ability to effectively function on the international stage with ease and success, with the communication skills that allow them to operate across cultures, languages and location.

The course takes an experimental and hybrid approach to the integration of networked digital technologies into the design of products and systems. Students gain an integrated approach and understanding of how to conceptualise, visualise and realise products, services and/or systems as a design professional.

Innovation and experimentation is underpinned by theoretical, historical and contextual studies to facilitate students' development in both the conceptual and technical design skills required to work within the broader integrated product design field, and its specialist areas.

Throughout each stage, the course requires students to develop an understanding of their own design language and theoretical position in relation to historic and contemporary contexts.

Career options

Career options include corporate or in-house designer, design consultant, production manager, industrial designer, interaction designer, designer of smart objects, interactive product designer, system designer, furniture, product or accessories designer, design communication professional, design researcher, commercialisation professional.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

 $The \, English \, proficiency \, requirement \, for \, international \, students \, or \, local \,$ applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard fulltime duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

This course is offered on a three-year, full-time basis.

Overview

Integrated product design expands on the traditional field of industrial design to reflect the changed realities of the globalised design profession. The course offers a practice-based approach to learning through the integration of digital and analogue technologies across the

broad field of integrated product design, as well as the potential for specialisation within highly contemporary and innovative integrated product design practices.

The combined degree provides additional practical skills, in particular skills that make students aware of the international contexts of design, by providing them with the opportunity to acquire knowledge of a language and culture other than English.

With a strong emphasis on creativity and technology, graduates move seamlessly from the design of material objects to the design of associated services together with the skills to maintain a specialist role within an interdisciplinary team.

Structured around design studios, this dynamic course allows specialisations like interaction design, smart object design, interactive product design, and system design. The design studio integrates practice-orientated learning around specific projects.

The international experience enhances career options, making students more marketable to prospective employers.

Course aims

The course aims to support and foster a creative and explorative attitude toward the design process. It equips its graduates with the ability to effectively function on the international stage with ease and success, with the communication skills that allow them to operate across cultures, languages and location.

The course takes an experimental and hybrid approach to the integration of networked digital technologies into the design of products and systems. Students form an integrated approach and understanding of how to conceptualise, visualise and realise products, services and/or systems as a design professional.

Innovation and experimentation is underpinned by theoretical, historical and contextual studies to facilitate students' development in both the conceptual and technical design skills required to work within the broader integrated product design field, and its specialist areas.

Throughout each stage, the course requires students to develop an understanding of their own design language and theoretical position in relation to historic and contemporary contexts.

A further two years of study introduce and consolidate the learning of a language and culture other than English.

Career options

Career options include corporate or in-house designer, design consultant, production manager, industrial designer, interaction designer, designer of smart objects, interactive product designer, system designer, furniture, product or accessories designer, design communication professional, design researcher, commercialisation professional.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

C10306v1 Bachelor of Design in Fashion and Textiles

Award(s): Bachelor of Design in Fashion and Textiles (BDesign)

UAC code: 602040 CRICOS code: 077334G

Commonwealth-supported place?: Yes

Load credit points: 144 Course EFTSL: 3

Location: City and Kuring-gai campuses

Overview

The Bachelor of Design in Fashion and Textiles has been designed to enable students to create pathways of learning as they progress through the degree with a flexible and diverse approach to learning. Emphasis throughout this practice-based course is placed on value, innovation, creativity and responsible practice. Students should develop flexibility and confidence in working in and across the diverse environments that constitute contemporary practice.

The course centres around design studios which integrate practice-orientated learning around specific projects, and parallels the process that professionals undertake in industry. Professional practice is embedded in all fashion studios and builds on contemporary industry practice within both local and global markets. Projects are developed through both individual and group work, to simulate design team environments.

Course aims

The course is designed to provide students with an outlook and ambition that extends beyond the university, cultivating a collaborative and global vision of design. Central to the course is the integration of theory and practice in relation to fashion and textile design. Students are expected to develop an understanding of the formation and application of their own individual design language and theoretical position in relation to historical and contemporary contexts.

The first year introduces design principles and challenges design thinking. In the second year students have the opportunity to diversify according to their area of interest and strength in areas including innovation in material research, types of technologies, engaging with digital design, methods of construction, approaches to either flat patternmaking or drape.

The fashion studio and professional practice subjects in third-year have been designed to extend students' understanding of global fashion and to provide students with a choice of design projects and areas of specialisation.

Career options

Career options include buyer, fashion editor, fashion or textile designer, illustrator or stylist. Some students start their own business, while others work within an established company. Graduates may also continue studies at postgraduate level.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

UAC code: 602070 CRICOS code: 077339C

Commonwealth-supported place?: Yes

Load credit points: 144 Course EFTSL: 3 Location: City campus

Overview

The Bachelor of Design in Visual Communication offers a practicebased approach to learning visual communication. Throughout the course, the creation of new design solutions is driven by rigorous and critical exploration of methods, materiality and technology, and understanding the influence of globalisation, digitisation, complexity and interactivity.

The course centres around design studios which integrate practiceorientated learning around specific projects, and parallel the process that professionals undertake in industry.

The course is structured to allow students to focus, particularly in its second half, on areas of specialisation. Throughout all stages, the course requires students to develop an understanding of their own individual design language and theoretical position in relationship to historic and contemporary contexts.

Course aims

The course aims to support and foster a creative and explorative attitude toward the design process where research and practice are consolidated in design outcomes. It cultivates a collaborative and global vision of design. Through a variety of interdisciplinary subjects, industry projects and international studios, students will develop the flexibility and confidence to work in the divergent and novel environments of contemporary visual communication practice.

Throughout the degree students progress through studies and skills development in the area of form, content, context and concept. First year introduces the key formal concerns of visual communication, including image, typography, composition and hierarchy. Second year subjects engage more closely with content and the interdependencies of form and content. A contextual understanding of design as an outwardly focused activity is developed in third year, with closer studies of audience, society, ethics and industry.

Career options

Career options include design roles in graphic design, publishing, advertising, animation, film, television, exhibitions, government agencies, not-for-profit and corporate sectors.

Admission requirements

Applicants must have completed an Australian Year 12 qualification, Australian Qualifications Framework Diploma, or equivalent Australian or overseas qualification at the required level.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

C20049v1 Diploma in Information Technology Professional Practice

Award(s): Diploma in Information Technology Professional Practice (DipInfTechProfPrac)

CRICOS code: 062709E

Commonwealth-supported place?: Yes

Load credit points: 12 Course EFTSL: 0.25 Location: City campus

Overview

The Diploma in Information Technology Professional Practice is not a separate course in its own right but is taken in conjunction with UTS: Information Technology's undergraduate bachelor programs.

Students must obtain suitable employment and work for a minimum of nine months full time and must undertake the academic subjects related to their industrial training. International students can work full-time for the duration of the diploma.

The diploma is extremely beneficial for students relating their final year of coursework to the practical needs of the IT industry. This experience is invaluable when applying for graduate career positions.

Course aims

The course aims to develop students' technical and generic work skills in a workplace environment. It also enables students to develop lifelong learning skills and gain a better understanding of the relationship between theory and practice.

Career options

For career options, refer to the main degree undertaken. The diploma increases students' employability by providing at least nine months' work experience before graduation. Many students continue working with their industrial training employer and finish their studies part time.

This course is normally available to students who are currently enrolled in the Bachelor of Science in Information Technology (C10148) (see page 193), Bachelor of Science in Information Technology Bachelor of Arts in International Studies (C10239) (see page 238), Bachelor of Business Bachelor of Science in Information Technology (C10219) (see page 226), Bachelor of Science in Information Technology Bachelor of Laws (C10245) (see page 252), Bachelor of Mathematics and Computing (C10158) (see page 201), Bachelor of Science in Games Development (C10229) (see page 235), Graduate Diploma of Interactive Multimedia (C07078) (see page 412) and Master of Interactive Multimedia (C04158) (see page 333).

Students must have progressed to a particular stage of their program of study and completed certain subject requirements before being admitted concurrently to the Diploma in Information Technology Professional Practice. Students who have completed all subjects in their course may still enrol in the diploma, but cannot graduate from their course until they finish the diploma.

Non-UTS students who hold an ACS Foundation work integrated learning scholarship may also apply for the Diploma in Information Technology Professional Practice.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.0 overall with a writing score of 6.0; or TOEFL: paper based: 500-549 overall with TWE of 4.5, internet based: 60-78 overall with a writing score of 21; or DEEP: C; or PTE: 50-57; or CAE: 52-57

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Applications

Application closing dates are:

- 25 February 2013 (for Autumn semester 2013)
- 29 July 2013 (for Spring semester 2013).

Local students

Students must complete the Diploma in Information Technology Professional Practice direct application form available at: http://datasearch2.uts.edu.au/feit/it/undergraduate/experience/

International students

Students must complete the international student undergraduate application form available from UTS International at: www.uts.edu.au/international/prospective/studying/apply

Course duration and attendance

Students are required to obtain approved, full-time employment within the IT industry for a minimum of nine months and complete two semesters of academic study.

Students are required to notify the faculty of any changes to their circumstances that affect their industrial training, including notification of the start and finish dates of their industrial training.

Course structure

In addition to undertaking industrial training, students are required to complete 12 credit points comprising the two industrial training subjects below.

POSTGRADUATE COURSEWORK COURSES

C04006v6 Master of Project Management

Award(s): Master of Project Management (MPM)

UAC code: 942103 (Autumn semester), 945103 (Spring semester)

CRICOS code: 001099J

Commonwealth-supported place?: No

Load credit points: 72 Course EFTSL: 1.5 Location: City campus

Overview

With close industry contact, the course is delivered through block workshops designed to emulate project environments, giving students the opportunity to directly develop their ability to manage real projects. The program is rigorous, and is globally recognised for its tradition of excellence. The UTS program was the first Australian program to be accredited by the Project Management Institute's (PMI) Global Accreditation Centre. The foundation subjects are compatible with the structures used by the PMI and Australian Institute of Project Management (AIPM) to certify practitioners.

This program provides practice-based knowledge, skills and tools for the delivery of different types and sizes of projects and programs across all industry sectors, underpinned by theory and research. At the forefront of industry trends, the UTS program incorporates project complexity, program management, governance, reflective practice and leadership.

Drawing on areas of excellence from across UTS, students may choose a sub-major in business, IT, engineering or construction (from 2013), or undertake a pure project management postgraduate degree.

Course aims

Successful graduates of the course can:

- select and critically apply relevant theory to practice
- develop and apply appropriate project management methodologies to suit different project and organisational contexts
- demonstrate application of reflective practice
- communicate in a variety of forms across culturally diverse project and organisational contexts
- demonstrate the capacity to take a leadership role in project, program and portfolio management
- demonstrate advanced-level skills in managing relationships between key stakeholders in a variety of contexts both in Australia and internationally
- exhibit an understanding of the application of ethical practice to project governance in a variety of settings both in Australia and internationally
- select and apply creative problem-solving skills to all phases of the project life cycle
- apply critical thinking, analytical and research skills to a range of project and program management contexts
- understand, select from and apply a range of systems thinking approaches to a variety of project and organisational contexts.

Career options

The course is highly regarded by industry as providing in-demand, 'professionally excellent' graduates. Its focus on leadership, program management and governance increases the employability of graduates at senior levels in many local and international industries, including banking and finance, construction and engineering, event management, government, health and IT.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants also require six months industry experience if they have not completed the Graduate Diploma in Project Management (C07004) (see page 402).

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

Exemptions of up to 24 credit points may be given for equivalent prior learning. Applicants with a four-year degree in a related field of study may be given up to 24 credit points of exemptions.

Course duration and attendance

The course is offered on a one-and-a-half-year, full-time or three-year, part-time basis. Because the intensive workshops are widely spaced throughout the year, many students choose to accelerate the part-time master's program and complete it within two years.

Course structure

Students choose 72 credit points from a list of compulsory and elective subjects.

Articulation with UTS courses

This course is part of an articulated program comprising the Graduate Certificate in Project Management (C11005) (see page 422), the Graduate Diploma in Project Management (C07004) (see page 402), the Master of Project Management and the Master of Business Administration (Project Management major) (C04018) (see page 303). Each stage is self-contained and can be undertaken through part-time or full-time study.

The graduate diploma is offered as an exit point for students who do not wish to go on to complete the master's degree but who otherwise finish with 48 credit points. Direct entry to the graduate diploma is not available.

Articulation from the graduate certificate to the Master of Project Management is allowed with the approval of the course director.

Students articulating from the Master of Project Management to the MBA (Project Management major) receive exemptions and need only to complete the business core units (48 credit points) to complete the MBA.

Professional recognition

This program is accredited by the Project Management Institute's (PMI) Global Accreditation Centre and the Royal Institute of Chartered Surveyors (RICS). It is endorsed by the Australian Institute of Project Management (AIPM), which is a member of the International Project Management Association (IPMA).

Overview

This course provides students with a thorough understanding of the economic, sociological, environmental and other theoretical and practical knowledge underpinning the governance in urban management and urban development. It has a strong focus on sustainable urban development.

With an engaged and practical approach, this course focuses on urban planning and development processes, sustainability and creative development control, and enhances knowledge and skills in urban management, property development, urban design and environmental policy.

Property development and planning students study a common first year, which develops a mutual understanding of how to balance private and public interests in urban development.

Course aims

Graduates of this course understand the nature and methods of planning and urban management and the interdependency of various urban policy fields, agencies and institutions which enable sound urban outcomes.

They can responsibly participate in planning debates, apply sound and appropriate urban design principles, communicate at a superior level and constructively reflect on planning methods and practice.

Graduates also recognise and develop ethical, just and professional methodological approaches and practices.

Career options

Skills in community planning, development control, infrastructure management, planning and environmental law, and strategic planning open up careers in government departments and agencies, local government, major development companies and private consulting firms.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

An appropriate first degree can include the Graduate Diploma in Planning (C07002) (see page 401), or a bachelor's degree in planning, architecture, geography, economics, property economics, commerce, law, engineering or building. Other bachelor's degrees may also be considered.

Work experience is considered relevant if it includes the holding of a responsible position related to the planning or administration of land or design, financing, regulation, construction or management of buildings or infrastructure.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Course duration and attendance

The course is offered on a one-and-a-half-year, full-time or three-year, part-time basis.

All lectures, seminars, workshops and site visits are held during four full-time weeks spread through the year. This facilitates interaction and teamwork, and meets the needs of busy professionals and those living outside Sydney.

In the part-time program, students attend 10 week-long sessions in the first two-and-a-half years and the equivalent of two weeks in the last half year.

Full-time students attend six week-long sessions in each year of the two years of the program in conjunction with part-time students. Between attendance weeks they may attend additional classes and seminars.

Course structure

The course requires the completion of 72 credit points.

C04018v5 Master of Business Administration

Award(s): Master of Business Administration (MBA)

CRICOS code: 025004A

Commonwealth-supported place?: No

Load credit points: 96 Course EFTSL: 2 Location: City campus

Overview

The UTS MBA is distinguished from the competition by its practical, vocational orientation and by the open architecture of the course design. All MBA subjects are approved by an industry board that insists on 'relevance to workplace' as a pre-eminent subject design principle. The MBA provides knowledge and skills that are essential for superior management performance.

The course provides unparalleled program flexibility. Students design their MBA to match their employment aspirations. A wide range of specialist skills is also introduced through a choice of majors and submajors. The teaching staff are drawn from among the finest researchers and university educators around the world, keeping students abreast of current trends and focusing on the global picture.

Course aims

- General management skills develop expertise in strategic thinking, critical analysis, developing and implementing business plans, decision-making under uncertainty, understanding organisational dynamics, motivating others, effective communication, leadership and promoting change in dynamic environments.
- Functional skills develop competency in a number of key disciplines including accounting, finance, marketing and human resources management.
- Specialist skills are introduced in areas such as international marketing, human resource management, management in the public, private and international spheres, tourism, sport, arts management, engineering management and information technology.

Career options

The MBA is the most recognised and most transportable postgraduate degree. Students in the MBA know that to realise their full career potential, additional managerial skills and credentials are essential.

Personal investment in a demanding MBA program that is recognised for both intellectual rigour and practical application of knowledge will accelerate students' career progression or introduce new career pathways.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants also require:

- a minimum grade point average (GPA) of 2.75 out of 4 with less than 10 per cent fail grades, or
- a Graduate Management Admission Test (GMAT) overall minimum score of 550, or
- · a minimum of at least four years' relevant work experience.

Applicants with a relevant graduate certificate must have completed it with at least a credit average. Further information is available at: www.gsb.uts.edu.au/student/gmat

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

Students may be granted a maximum of 10 subject exemptions in the MBA, of which four core subjects may be approved from prior undergraduate study.

Further information is available at: www.gsb.uts.edu.au/student/rpl

Course duration and attendance

The MBA is normally completed in two years of full-time or four years of part-time study. Completion time may be accelerated by undertaking subjects in intensive mode during Summer session. Classes for core subjects are held during the day as well as in the evening.

Course structure

The course comprises 96 credit points, made up of eight compulsory core subjects (totalling 48 credit points) and eight elective subjects (totalling 48 credit points).

Electives can be taken in one of three ways: as one major (48 credit points), as two sub-majors (24 credit points each), or as one sub-major (24 credit points) plus 24 credit points of mixed electives.

Articulation with UTS courses

While the MBA is offered as a stand-alone qualification, it is also part of an articulated program of study comprising the Graduate Certificate in Business Administration (C11008) (see page 422), the Graduate Diploma in Business Administration (C06009) (see page 386), and the Master of Business Administration (MBA). This enables students who satisfactorily complete the Graduate Certificate in Business Administration or the Graduate Diploma in Business Administration to apply for entry to the MBA.

Where a student articulates from one level of study to another, only one testamur is issued.

Professional recognition

CPA Australia; Institute of Chartered Accountants in Australia (ICAA); Australian Human Resources Institute; Institute of Public Accountants (IPA)

The MBA with Professional Accounting major meets the formal academic requirements for associate membership of CPA Australia and the ICAA. In order to meet the educational requirements for membership of CPA Australia and the ICAA, students undertaking the Professional Accounting major must also complete an introductory law subject. Students who have not previously completed an undergraduate law subject by examination must study 79708 Contemporary Business Law in place of 21844 Managing Work and People.

Students completing this degree with a major in human resource management are eligible to apply to the Australian Human Resources Institute (AHRI) for the professional member (MAHRI) status.

Students completing this degree with a major in finance are eligible to apply for associate membership at the Financial Services Institute of Australasia (FINSIA) and are also eligible to apply for Certified Finance and Treasury Professional at the Finance and Treasury Association (FTA).

C04031v6 Executive Master of Business Administration

Award(s): Executive Master of Business Administration (MBA)

Commonwealth-supported place?: No

Load credit points: 96 Course EFTSL: 2 Location: City campus

Note(s)

This course is not offered to international students.

Overview

The Executive MBA is designed as a general management qualification for ambitious individuals with considerable work experience who are looking to further develop their business and strategic leadership skills. The overarching goal of the course is to produce graduates who can operate a business function, unit or organisation by building students' capabilities in technical, professional and interpersonal skills

The Executive MBA curriculum is strongly experientially oriented and provides students with decision-making experiences that emulate the real world of business. The requirements of professional bodies; recent research and scholarship data on successful graduates; information from employers and advisory committees; and industry groups have informed the attributes and learning goals. The course is structured in such a way that students can choose to progress through the degree in a group. The cohort model is designed to foster a sense of union, facilitate networking and encourage cooperative relationships with a focus on leadership and group dynamics.

Course aims

The aim of the Executive MBA degree is to develop students' business acumen through an enhanced capacity for integrity, judgment and intuition. Executive MBA students develop advanced competency in a number of key disciplines including accounting, economics, finance, marketing and strategic management. The learning goals of the degree are designed to meet the needs of today's rapidly changing enterprises including areas such as electronic business, finance, banking, corporate accounting, marketing, operations management, employment relations, management in the public, private and international spheres, information technology, engineering, and event, tourism, sport, arts and leisure management. The focus is on developing specific skills including the ability to integrate accounting, finance, marketing and management skills for progressive solutions and sound management decisions; capacity for analysing and synthesizing complex information and knowledge for tactical and strategic business decisions; effective leadership and teamwork skills; and designing innovative business models and strategies that adhere to the principles of responsible corporate governance and social responsibility.

Career options

Career options include senior general management roles in business or business unit manager, business planning, business strategist, and general management consultant.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Applicants also require five years' relevant work experience or a UTS Graduate Certificate in Executive Business Administration (C11208) (see page 457), with a credit average. Applicants may be required to attend an interview as part of the admission process.

The English proficiency requirement for local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Credit recognition

Students in the Executive MBA are not granted exemptions for any prior studies.

Course duration and attendance

The course is expected to be completed in two years of part-time study. Teaching is conducted in sequential eight-week blocks. The first and last (capstone) subjects are taught in residence.

Course structure

The course comprises 96 credit points, made up of nine core subjects and three elective subjects (all subjects are 8 credit points each). Students in this course are taught separately from other graduate students. Two core subjects are studied in 'residence mode', and the elective subjects include a study tour of leading European or North American business schools and industry visits (restricted numbers and conditions apply).

C04037v5 Master of Business in Accounting Information Systems

Award(s): Master of Business in Accounting Information Systems (MBus) CRICOS code: 009461J

Commonwealth-supported place?: No

Load credit points: 72 Course EFTSL: 1.5 Location: City campus

Overview

The Master of Business in Accounting Information Systems provides advanced-level study in a range of contemporary accounting issues.

The business project offers students the option of applying their learning to a real-world problem for their employer or another organisation.

Career options

Career options include management-level positions in industry or government.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

If the previous qualification is not in a related field, applicants require a minimum of two years' relevant work experience. Applicants with a relevant graduate certificate must have completed it with at least a credit average.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

Students may be granted a maximum of eight subject exemptions based on credit recognition, of which four core subjects may be approved from prior undergraduate study.

Course duration and attendance

The course may be completed in one-and-a-half years of full-time or three years of part-time study.

Course structure

The course totals 72 credit points of study, made up of 12 compulsory core subjects.

Articulation with UTS courses

This course is part of an articulated program comprising the Graduate Certificate in Accounting Information Systems (C11017) (see page 423) and the Master of Business in Accounting Information Systems.

Professional recognition

The Master of Business in Accounting Information Systems is not recognised by CPA Australia as meeting the membership entry requirements for applicants who do not have a recognised undergraduate degree. Such applicants should enrol in the MBA (Professional Accounting major) (C04018) (see page 303). However, applicants with a recognised undergraduate degree can include CPA Australia accredited postgraduate subjects in their Master of Business in Accounting Information Systems program in order to meet the accounting studies requirements for CPA Australia membership. It is recommended that applicants obtain an assessment from CPA

Australia of the subjects they are required to complete before enrolling in their program and then discuss this assessment with the course coordinator.

Assessment forms are available from the CPA Australia website, under Membership, at:

www.cpaaustralia.com.au

or contact:

NSW Office of CPA Australia telephone +61 2 9375 6200

C04052v3 Master of Quantitative Finance

Award(s): Master of Quantitative Finance (MQF) Commonwealth-supported place?: No Load credit points: 72 Course EFTSL: 1.5 Location: City campus

Note(s)

This course is not offered to international students.

Overview

The Master of Quantitative Finance provides the full gamut of specialised quantitative finance skills and development of professional competency required to be a quantitative finance specialist performing at the cutting edge of the discipline.

Participants have the opportunity to see the application of quantitative finance to advanced financial instruments, an integrated approach to risk management and how to implement quantitative finance strategies.

Course aims

The Quantitative Finance program provides the opportunity to acquire the detailed specialised knowledge and the professional competency required to work as a quantitative finance analyst in the modern finance industry.

Career options

Career options for graduates include positions as quantitative analysts, risk management analysts, quantitative structures, quantitative developers, forecasters, traders, investment analysts and financial engineers across investment banks, trading banks, hedge funds, investment management companies, consulting companies, energy and mining companies, regulatory bodies and government organisations.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Previous qualifications must be in finance or have a strong mathematical background. Entry to the course is at the discretion of the course director.

The English proficiency requirement for local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

Credit recognition

Students may be granted a maximum of eight subject exemptions, of which four core subjects may be approved from prior undergraduate study.

Course duration and attendance

The course duration is three years of part-time study.

Award(s): Master of Business in Marketing (MBus)

CRICOS code: 036583G

Commonwealth-supported place?: No

Load credit points: 72 Course EFTSL: 1.5 Location: City campus

Overview

The Master of Business in Marketing provides the opportunity for students to extend their knowledge in the areas of communications, sales management, the development and introduction of new products, business-to-business marketing, technology and marketing, as well as the legal constraints on and the ethical implications of marketing in Australia.

The marketing program provides contemporary theoretical marketing knowledge and the practical skills required for superior performance in Australian and international markets.

Career options

Career options include management-level positions in industry or government.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

If the previous qualification is not in a related field, applicants require a minimum of two years' relevant work experience. Applicants with a relevant graduate certificate must have completed it with at least a credit average.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

Students may be granted a maximum of eight subject exemptions, of which four core subjects may be approved from prior undergraduate study.

Course duration and attendance

The course is one-and-a-half years of full-time or three years of part-time study.

Course structure

The course totals 72 credit points and consists of a combination of core subjects, specialised streams and elective subjects.

Course completion requirements

STM90721 Core subjects (Marketing)	30ср
CBK90635 Marketing streams	24cp
CBK90636 Elective (Marketing PG)	18cp

STM90719 Marketing Research	24cp

Articulation with UTS courses

This course is part of an articulated program comprising the Graduate Certificate in Marketing (C11039) (see page 428), the Graduate Diploma in Marketing (C07031) (see page 407) and the Master of Business in Marketing.

Professional recognition

Completion of this course meets the educational requirements for Professional Postgraduate Diploma in Marketing entry point to the Chartered Institute of Marketing (CIM).

C04085v2 Master of Engineering Management

Award(s): Master of Engineering Management (MEM)

Commonwealth-supported place?: No

Load credit points: 48 Course EFTSL: 1 Location: Hong Kong

Note(s)

This course is only offered offshore. It is available in Beijing. The language of tuition is Modern Standard Chinese.

It is the Chinese language version of the Master of Engineering Management (C04094) (see page 314). It is offered through the Hong Kong Management Association.

Overview

The Master of Engineering Management (MEM) is the ideal course for engineers, technical specialists and others wishing to expand their managerial skills within a technology-based organisation. The MEM has been specifically designed to emphasise the interface between technology and management.

The MEM program provides an opportunity for engineers who are seeking a career in engineering management to undertake a formal course of relevant study at master's level. It may also be of benefit to current engineering managers to undertake formal study and gain recognition of their knowledge and experience.

Career options

Engineering and applied science jobs are becoming increasingly multidisciplinary. Knowledge and skills in technical management gained from completing the MEM can assist in obtaining a high-quality engineering or engineering management position.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Eligibility for admission does not guarantee offer of a place.

Course duration and attendance

The course duration is two years of part-time study if two subjects are taken per teaching period. This time can be reduced if additional subjects are studied in the January to March semester. The program is structured for weekend and distance mode attendance.

Course structure

The course requires 48 credit points of study. A minimum of 36 credit points (the six subjects listed below) must be completed from the list of MEM core subjects. The remaining 12 credit points are completed from two postgraduate subjects offered at Wuhan University in China.

Course completion requirements

49001	Judgment and Decision Making	6ср
49002	Managing Projects	6ср
49003	Economic Evaluation	6ср
49069	Leadership and Responsibility	6ср

C04090v5 Master of Engineering

Award(s): Master of Engineering (ME)

CRICOS code: 017900B

Commonwealth-supported place?: No

Load credit points: 60 Course EFTSL: 1.25 Location: City campus

Overview

This course provides an opportunity at master's level for professionally qualified engineers to extend in depth and breadth the knowledge and skills gained from their undergraduate studies. Each program must be designed to enhance technological knowledge pertaining to one or more fields of engineering. The completion of subjects and project work at advanced level is central to this requirement.

Students may choose a program of study that deepens the body of knowledge acquired in their first degree as well as expands knowledge boundaries into policy and engineering management areas. The program of study is usually framed within a postgraduate program major and supervised by an experienced academic in that field. Students also have the option of not electing a major.

Career options

Students who have a basic engineering undergraduate degree are able to enhance their ability and knowledge through master's-level courses in their respective majors, enabling them to gain and hold employment in their respective engineering fields.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

If applicants are not graduates from the UTS Bachelor of Engineering Diploma in Engineering Practice, they must have an engineering degree from a recognised tertiary institution as well as two years' relevant work experience.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

Credit recognition is considered in accordance with the University's policy on credit recognition:

www.gsu.uts.edu.au/policies/credit-recognition.html

Students may be eligible for credit recognition based on previous postgraduate award study. Subjects undertaken as part of an undergraduate degree, irrespective of their level of study, are not normally considered for credit recognition.

Students who have completed postgraduate subjects as part of a postgraduate degree may be eligible for credit recognition of up to 12 credit points (two subjects) towards an engineering master's degree.

Students who have previously completed subjects at UTS that are part of the postgraduate degree to which they are admitted, may be eligible for credit recognition of up to 18 credit points (three subjects) towards an engineering masters' degree.

Students who have previously completed subjects as part of a UTS Engineering graduate certificate may be eligible for credit recognition of up to 24 credit points (four subjects) towards equivalent subjects in an engineering master's degree.

Further information is available at:

www.eng.uts.edu.au/courses/postgraduate/credit-recognition.html

Course duration and attendance

The course may be completed in one-and-a-half years on a full-time basis or two to three years on a part-time basis.

Classes are usually held in the evenings or in block mode. Some subjects may be available in distance mode.

Course structure

Candidates complete coursework subjects and a major individual project, totalling 60 credit points of study. The project component is typically undertaken following completion of the coursework.

Some postgraduate program majors may require students to complete a number of prescribed subjects with or without opportunity for electives. Subjects are selected from those offered by UTS: Engineering, other UTS faculties, other faculties of engineering (including the University of Sydney, the University of New South Wales and the University of Western Sydney), and other institutions approved by Academic Board. Not less than 60 per cent of total credit points must be completed through subjects offered, and/or a graduate project supervised, by UTS: Engineering.

The graduate project must be supervised by a principal supervisor who is a member or adjunct member of academic staff of the Faculty of Engineering and Information Technology.

A major is granted if four subjects (24 credit points) are completed within a particular postgraduate program major, together with an approved graduate project (18-30 credit points) in the major.

CBK90230 Elective	6cp
Select 30 credit points from the following options: STM90080 Project + two electives STM90081 Project + one elective STM90082 Project	30cp 30cp 30cp 30cp Total 60cp

Course program

The tables below give details of each major: for each major there are three tables. The first lists the compulsory subjects and allowable option choices for the major. The next two tables show the subjects typically offered in Autumn and Spring semesters. Where an elective is specified, any subject in the range 49000 to 49999 is recommended, except for 49277, 49278, 49279, 49454, 49458, 49459, 49460, 49461, 49462, 49463, 49464 and 49465. Some subjects are offered in weekly mode, others in block mode, and others in distance mode or a combination of modes.

C04094v5 Master of Engineering Management

Award(s): Master of Engineering Management (MEM)

CRICOS code: 008685A

Commonwealth-supported place?: No

Load credit points: 48 Course EFTSL: 1 Location: City campus

Note(s)

This course is also offered offshore. It is available in Hong Kong. The language of tuition is English.

Overview

The Master of Engineering Management (MEM) is the ideal course for engineers, technical specialists and others wishing to expand their managerial skills within a technology-based organisation. The MEM has been specifically designed to emphasise the interface between technology and management.

The MEM program provides an opportunity for engineers and others who are seeking a career in engineering management to undertake a formal course of relevant study at a master's level. It may also be of benefit to current engineering managers to undertake formal study and gain recognition of their knowledge and experience.

Career options

Engineering and applied science jobs are becoming increasingly multidisciplinary. Knowledge and skills in technical management gained from completing the MEM can assist in obtaining a high-quality engineering or engineering management position.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

Credit recognition is considered in accordance with the University's policy on credit recognition:

www.gsu.uts.edu.au/policies/credit-recognition.html

Students may be eligible for credit recognition based on previous postgraduate award study. Subjects undertaken as part of an undergraduate degree, irrespective of their level of study, are not normally considered for credit recognition.

Students who have completed postgraduate subjects as part of a postgraduate degree may be eligible for credit recognition of up to 12 credit points (two subjects) towards an engineering master's degree.

Students who have previously completed subjects at UTS that are part of the postgraduate degree to which they are admitted, may be eligible for credit recognition of up to 18 credit points (three subjects) towards an engineering masters'degree.

Students who have previously completed subjects as part of a UTS Engineering graduate certificate may be eligible for credit recognition of up to 24 credit points (four subjects) towards equivalent subjects in an engineering master's degree.

Further information is available at:

www.eng.uts.edu.au/courses/postgraduate/credit-recognition.html

Course duration and attendance

The course duration is two years if two subjects are taken per semester. The course can also be completed in one year of full-time study if four subjects per semester are completed. The program is structured for evening attendance or distance mode. Extra intensive classes may be held during Summer session for selected subjects.

Course structure

The course requires 48 credit points of study. A minimum of 36 credit points (six subjects) must be completed from the list of MEM core subjects. Any remaining credit points should be completed from other postgraduate subjects within UTS: Engineering in the range 49000 to 49999, except for 49277, 49278, 49279, 49454, 49458, 49459, 49460, 49461, 49462, 49463, 49464 and 49465. Not less than 60 per cent (five subjects) of the total number of credit points must be completed through subjects offered by UTS: Engineering.

Further study at UTS

The Master of Business Administration (C04018) (see page 303) (Technology Management major) may be entered directly after completion of this course. With suitable choice of subjects from the MEM, exemptions may be granted for up to eight subjects in the MBA.

CRICOS code: 028689J Commonwealth-supported place?: No Load credit points: 48 Course EFTSL: 1

Overview

Location: City campus

The flexible structure of this course allows recently graduated engineers and technical specialists to deepen the knowledge and skills gained in their first degree while expanding their managerial and policy knowledge.

Students may choose a program of study that deepens the body of knowledge acquired in their first degree as well as expands knowledge boundaries into policy and engineering management areas. The program of study is usually framed within a postgraduate program major and supervised by an experienced academic in that field. Students also have the option of not electing a major.

Career options

Students who have a basic engineering undergraduate degree are able to enhance their ability and knowledge through master's-level courses in their respective majors, enabling them to gain and hold employment in their respective engineering fields.

Admission requirements

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification, or submitted other evidence of general and professional qualifications that demonstrates potential to pursue graduate studies.

Previous qualifications must be in engineering or another technological/applied science field.

The English proficiency requirement for international students or local applicants with international qualifications is: Academic IELTS: 6.5 overall with a writing score of 6.0; or TOEFL: paper based: 550-583 overall with TWE of 4.5, internet based: 79-93 overall with a writing score of 21; or DEEP: C; or PTE: 58-64; or CAE: 58-66

Eligibility for admission does not guarantee offer of a place.

International students

Visa requirement: To obtain a student visa to study in Australia, international students must enrol full time and on campus. Australian student visa regulations also require international students studying on student visas to complete the course within the standard full-time duration. Students can extend their courses only in exceptional circumstances.

Credit recognition

Credit recognition is considered in accordance with the University's policy on credit recognition:

www.gsu.uts.edu.au/policies/credit-recognition.html

Students may be eligible for credit recognition based on previous postgraduate award study. Subjects undertaken as part of an undergraduate degree, irrespective of their level of study, are not normally considered for credit recognition.

Students who have completed postgraduate subjects as part of a postgraduate degree may be eligible for credit recognition of up to 12 credit points (two subjects) towards an engineering master's degree.

Students who have previously completed subjects at UTS that are part of the postgraduate degree to which they are admitted, may be eligible for credit recognition of up to 18 credit points (three subjects) towards an engineering masters' degree.

Students who have previously completed subjects as part of a UTS Engineering graduate certificate may be eligible for credit recognition of up to 24 credit points (four subjects) towards equivalent subjects in an engineering master's degree.

Further information is available at:

www.eng.uts.edu.au/courses/postgraduate/credit-recognition.html

Course duration and attendance

The course requires one year of full-time or two years of part-time study.

Subjects are offered as three-hour weekly sessions, in block or distance mode. Each subject usually requires three hours of class attendance per week. Subjects offered by distance mode require similar hours but at the convenience of the student.

Course structure

Students must complete eight postgraduate subjects (totalling 48 credit points) offered by UTS: Engineering. Students wishing to have a major noted on their academic transcript must complete subjects as specified under that major.

Course completion requirements

CBK90330 Major choice 48cp Total 48cp

Course program

The tables below give details of each major: for each major there are three tables. The first lists the compulsory subjects and allowable option choices for the major. The next two tables show the subjects typically offered in Autumn and Spring semesters. Where an elective is specified, any subject in the range 49000 to 49999 is recommended, except for 49277, 49278, 49279, 49454, 49458, 49459, 49460, 49461, 49462, 49463, 49464 and 49465. Some subjects are offered in weekly mode, others in block mode, and others in distance mode or a combination of modes.
